LABOR CATEGORY DESCRIPTIONS

Software Architect

GSA MAS Schedule

Minimum Education:	Bachelor's Degree in Computer Science, Engineering, or Information Technology
Minimum Years' Experience:	Ten (10) years
<p>Responsibilities: Provides high-level architectural expertise to managers and technical staff. Develops architectural products and deliverables for the enterprise and operational business lines. Develops strategy of system and the design infrastructure necessary to support that strategy. These individual designs secure architecture to include the software, hardware, and communications to support the total requirements as well as provide for present and future cross-functional requirements and interfaces.</p>	

Cloud Architect	
Minimum Education:	Bachelor's Degree in Computer Science, Engineering, or Information Technology
Minimum Years' Experience:	Ten (10) years
<p>Responsibilities: Designs cloud infrastructure, virtual private cloud, virtual private network, relational database services, auto scaling, and compute resources to meet customers' requirements. Responsible for cloud management and monitoring. Designs solutions for various deployment models (Private, Public, Community and Hybrid) in Federal and commercial sectors and service models including Infrastructure as a Service (IaaS), Platform as a service (PaaS), Software as a Service (SaaS) and emerging cloud services to optimize the essential characteristics of cloud computing. Advises on storage and security solutions to securely store data in multi-tenancy environments. Collaborates with enterprise architecture team and other stakeholders to determine enterprise tools, technologies and processes. Establishes corporate cloud computing architecture policies and standards in compliance with appropriate security levels and governance in accordance with best practices. Responsible for delivering an end-to-end cloud architecture solution across all domains.</p>	

Sr. DevOps Engineer	
Minimum Education:	Bachelor's Degree in Computer Science, Engineering, or Information Technology
Minimum Years' Experience:	Five (5) years
<p>Responsibilities: Experience serving as the engineer of complex technology implementations in a product-centric environment. Comfortable with bridging the gap between legacy development or operations teams and working toward a shared culture and vision. Works tirelessly to arm developers with the best tools and ensuring system uptime and performance. Configure server images, optimized the task performance in correspondence with the engineers. Design tools for managing the infrastructure and programmed clean & re-usable simple codes.</p>	

Software Engineer Analyst	
Minimum Education:	Bachelor's Degree in Computer Science, Engineering, or Information Technology
Minimum Years' Experience:	Five (5) years
<p>Responsibilities: Provides highly specialized experience in one or more information, computer, or network security disciplines (e.g., penetration testing, vulnerability scanning, intrusion detection and audit analysis, public key infrastructure, cryptography, certification and accreditation, or risk assessment and mitigation). Source code analysis, SQL Injection Detection, Cross-scripting Detection, Local / Remote File inclusion, DOS Attack, buffer overflow, code injection. Follow OWASP standards.</p>	

Program Manager	
Minimum Education:	Bachelor's Degree in Computer Science, Engineering, or Information Technology
Minimum Years' Experience:	Seven (7) years of experience in Systems Engineering
<p>Responsibilities: Serves as the overall manager for a contract and lead for complex technical projects. Authorized single point of responsibility and authority to coordinate all activities of the project to meet deadlines and budgets and to resolve conflicting demands of users. Establishes costs and determines resource requirements. Responsible for the administrative, contractual, and financial aspects of projects. Oversees the quality assurance efforts of the contract or project.</p>	

Sr. Test Engineer	
Minimum Education:	Bachelor's Degree in Computer Science, Engineering, or Information Technology
Minimum Years' Experience:	Five (5) years with SDLC test activities
<p>Responsibilities: An Integration Tester must oversee all test events and be able to manage multiple test events defining and staffing these test events with appropriate resources. Must coordinate with developers and functional end users to create test plans and test scripts. Coordinate with test sites and other team participants to plan test events. Approves test reports. Monitors and updates bug reports as needed including bug report closure. Must have experience with configuring necessary hardware and operating environments as needed to complete assigned testing. Must have technical expertise on specific products, operating systems and specialized environments. Must have experience in writing or assisting in the development of test plans and test procedures. Must manage the defect database under the guidance of senior QA engineers.</p>	

Business Subject Matter Specialist	
Minimum Education:	Bachelor's Degree in Computer Science, Engineering, or Information Technology
Minimum Years' Experience:	Six (6) years of experience in specialized technical disciplines
<p>Responsibilities: Responsible for advanced technical understanding in multiple disciplines. Provides expert guidance and leadership to project teams or clients in specialized technical or functional disciplines such as Information Security, Data Architecture, Knowledge Management, Financial Management, Human Resources Management, Acquisition Management, Operations Management or Quality Management. Provides advice often based on government or industry best practices / standards, on how to effectively implement solutions or improvements to business challenges. Often a recognized thought leader in specialized areas of industry or government policy, procedures, processes, or legislation.</p>	

Sr. Software Engineer	
Minimum Education:	Bachelor's Degree in Computer Science, Engineering, or Information Technology
Minimum Years' Experience:	Ten (10) years
<p>Responsibilities: Responsible for the design and development of application prototypes, utilities, and solutions across multiple environments using full life-cycle methodologies (requirements definition, design, development, testing, and implementation). Will consult with clients and recommend best practices for successful implementation; interview customer technical personnel; gather technical requirements and develop design specifications. Will produce specifications and design documentation including process flow, object/class models, sequence diagrams, system and web services interface specifications, data dictionary and data model, etc. Can manage developers and junior developers</p>	

Due to the availability or limitation of education, occasionally substitution of experience as referenced below for a professional labor type with additional years of experience will be provided to the Federal Agency when responding to their MAS Schedule requirements and it is solely the acquiring agency's determination, if the substitution is considered acceptable prior to an award.

Experience Substitutions:

- A Bachelor's Degree may be substituted with Associate Degree + 2 years additional relevant IT experience

GSA MAS Schedule

- A Bachelor's Degree may be substituted for 6 years of required relevant IT experience with a High School Diploma
- A Master's Degree may be substituted for 2 years of required relevant IT experience with a Bachelor's Degree
