Information Technology Professional Services IT Professional Services and/or labor categories for database planning and design; systems analysis, integration, and design; programming, conversion and implementation support; network services, data/records management, and testing.

33411
Purchasing of new electronic equipment Includes desktop, laptop, tablet computers (including rugged), servers, storage equipment, hyper converged integrated systems, supercomputers, routers, switches and other communications equipment, IT security equipment (hardware based firewalls), audio and video (AV) equipment, public address systems, monitors/displays, sensors and other Internet of Things (IOT) devices, printers and Multi-Function Device (MFD) equipment, broadcast band radio, two-way radio (LMR), microwave radio equipment, satellite communications equipment, radio transmitters/receivers (airborne), radio navigation equipment/antennas, optical/imaging systems, and associated peripherals required for operations (such as controllers, connectors, cables, drivers, adapters, etc., ancillary installation of any equipment purchased.)
811212

OLM
Order-Level Materials (OLM) - OLMs are supplies and/or services acquired in direct support of an individual task or delivery order placed against a Schedule contract or BPA. OLM pricing is not established at the Schedule contract or BPA level, but at the order level. Since OLMs are identified and acquired at the order level, the ordering contracting officer (OCO) is responsible for making a fair and reasonable price determination for all OLMs.

OLMs are procured under a special ordering procedure that simplifies the process for acquiring supplies and services necessary to support individual task or delivery orders placed against a Schedule contract or BPA. Using this new procedure, ancillary supplies and services not known at the time of the Schedule award may be included and priced at the order level.

Note 1: All non-professional labor categories must be incidental to and used solely to support hardware, software and/or professional services, and cannot be purchased separately.

Note 2: Offerors and Agencies are advised that the Group 70 Information Technology Schedule is not to be used as a means to procure services which properly fall under the Brooks Act. These services include, but are not limited to, architectural, engineering, mapping, cartographic production, remote sensing, geographic information systems, and related services. FAR 36.6 distinguishes between mapping services of an A/E nature and mapping services which are not connected nor incidental to the traditionally accepted A/E Services.

Note 3: This solicitation is not intended to solicit for the reselling of IT Professional Services, except for the provision of implementation, maintenance, integration, or training services in direct support of a product. Under such circumstances the services must be performance by the publisher or manufacturer or one of their authorized agents.

Products and ordering information in this Authorized FSS Information Technology Schedule Pricelist are also available on the GSA Advantage! System. Agencies can browse GSA Advantage! by accessing the Federal Supply Services Home Page via the Internet at http://www.fss.gsa.gov/

1. OUR MISSION

Since its inception in 1996, NFF has been governed by its core values. They shape the culture and define the character of our company. They guide how we behave and make decisions. Our solutions drive value through their simplicity, flexibility, and quality.

Our mission is to deliver transformational IT business solutions that optimize our client’s performance and productivity. We are here to listen, consult, execute and deliver net results to our clients. We accomplish this by:

- Improving clients’ business performance, creating long-term, win-win relationships and focusing on executing excellence.
- Providing high performance and cost-effective technical solutions.
- Attracting and developing the best talent for our business, empowering our people to develop a “can do” attitude.

Our clients’ success is the reason we exist and the foundation on which we base every solution and service. It’s why we relentlessly pursue the highest levels of customer service and satisfaction in every project.

Bridging the gap between traditional networking and emerging technologies, NFF has evolved its performance-focused approach and core competencies.

Our performance-focused approach encompasses:

- Human Capital Performance - Designed to increase understanding of the contractor’s behavioral and technical capabilities in regard to a specific client’s work environment.
- Performance Modernization - Review of IT infrastructure systems to achieve organization improvement and equip clients with an understanding of strategic and operational options.
- Performance Acceleration - Solutions to help clients succeed every day. It’s about improving your efficiency and productivity, while delivering the results you want.

2. SOLUTIONS

NFF offers a wide range of solutions to help you build a more resilient, adaptive, and intelligent technology platform:

**Staff Augmentation** – NFF is a full-service IT consulting company that partners with organizations to fulfill their IT staffing requirements. The Staff Augmentation division applies an agile approach to aid and enhance candidate search results. Our team of IT professionals, engineers and subject matter experts (SMEs) use a four-step interview process to select the best talent for you. If our consultants weren't working for you, they would be working for us.

**NetActive Professional Services** – NetActive service delivers supplemental IT subject matter experts to clients with strategic, technical and operational assistance requirements, while they deploy innovative, disruptive, and legacy solutions.

When you need project-based or on-demand support services, technical troubleshooting assistance, or to boost the expertise of your existing staff, you can turn to NFF for remote and on-site access to our technical experts.

**Application Assurance** – Manage, diagnose, and resolve underperforming applications that impact user productivity and contribute to a poor user experience. Whether you are introducing new applications or modernizing your architecture, NFF can furnish the management tools and analytic dashboards to improve application performance, visibility, and control.

**Network Infrastructure** – Tremendous IP traffic growth is fueled by new media applications and user demands for more interactivity, personalization, mobility, and video. A well architected network infrastructure needs to deliver personalized, next-generation services and media experiences anywhere, anytime. NFF can conduct an in-depth evaluation of your network performance and overall architecture to ensure your network meets the needs of future user expectations.

**Data Center and Cloud** – Data and virtualized business applications reside in private and secure public cloud infrastructures. Transitioning from traditional data center to application-centric architectures requires careful management. NFF can enable you to guarantee performance, redundancy, fast failover, and high availability in your data center and cloud environments.

**Network and Endpoint Security** – As the number of security incidents continue to rise, agencies face countless challenges in securing their networks, servers, applications and critical data from both internal and external threats. The dynamic threat area and complex, fragmented security solutions call for a new security model. NFF can develop a scalable, threat-centric solution that enables your security team to have visibility and control of threats before, during, and after they occur.

**Collaboration and Mobility** – Agencies are faced with constant change and disruption. NFF can help maximize your users’ agility and productivity through interactive and collaborative tools and services, wherever the users are located and whatever device they are using.
NFF is privately held and operated by the principal owners without any debt, security shares or venture capital. NFF growth and expansion have been driven solely by its profits, dedication, and the determination of its executive team to build the business and serve its customers from a solid and sound financial foundation. **NFF is an ISO 9001:2015 certified company.** Our Dun & Bradstreet rating is 1R2.
3. ORDERING INFORMATION

Operation Hours: 8:00 a.m. - 6:00 p.m. ET, M – F.
Order By Phone: (202) 783-9011
Customer Service: (202) 783-9011
Order By Fax: (202) 783-9019
Order By Mail: NETWORKING FOR FUTURE, INC.
1331 Pennsylvania Ave NW, Suite 1210
Washington, DC 20004
http://www.nffinc.com

Order via E-Mail: For Internet security when placing your orders via e-mail: info@nffinc.com

Government purchase card we accept the Government purchase card for payments equal to or less than the micro-purchase threshold for oral or written delivery orders. Government purchase cards will be acceptable for payment above the micro-purchase threshold. In addition, bank account information for wire transfer payments will be shown on the invoice.

The following telephone number(s) can be used by ordering agencies to obtain technical and/or ordering assistance: (202) 266-4734
4. PURCHASING TERMS

NETWORKING FOR FUTURE, INCORPORATED accepts corporate purchase orders as well as formal contracts for rendering of services and/or product delivery, subject to credit approval by the NETWORKING FOR FUTURE, INCORPORATED, Finance department. Blanket Purchase Agreements or other expedient means for acquiring NETWORKING FOR FUTURE, INCORPORATED services and products may be negotiated on an individual case basis.

In general, payment is due upon completion of services or product delivery and acceptance. For services rendered over an extended period (more than one month), payment will be due no less frequently than monthly, with anticipated invoicing on a monthly schedule, upon completion of services for the preceding period.
5. PROFESSIONAL SERVICES

Professional services can be rendered on a labor hour (hourly) basis or as the primary component of a fixed price services engagement with defined deliverable items (e.g., studies and analyses, custom software programs or hardware design, documentation). When delivered on an hourly basis, professional services shall be ordered by labor category line item, as described in the section entitled “Service Category Labor Description.” When professional services are ordered as a part of a fixed price effort, the labor categories and rates shall be used to determine the basis of estimate (if practicable) and for making interim payments.

NETWORKING FOR FUTURE, INCORPORATED will deliver labor category line items that are fully compliant with the education and experience described in the Service Labor Category Description Section. NETWORKING FOR FUTURE, INCORPORATED reserves the right to substitute additional education in lieu of some years of experience as follows:

- A Doctorate Degree can be substituted for 3 years of experience.
- A Master’s Degree can be substituted for 3 years of experience.
- A Bachelor’s Degree can be substitutes for 3 years of experience.
- A High School Diploma can be substituted for 6 years of experience.
6. TERMS & CONDITIONS

All terms and conditions agreed upon between the General Services Administration and CONTRACTOR are as follows:

1) Special Item Numbers (SIN): MAS (54151S, 33411, 811212, OLM)
2) Discounts: Prices shown are NET Prices; Basic Discounts have been deducted.
3) Prompt payment: 2% @ 10 DAYS
4) Government Credit Card: CONTRACTOR will accept the Government Commercial Credit Card at no additional discount extended to the government for its use.
5) Warranty: None
6) FOB Point: Destination
7) Delivery Time: Time of Delivery: Networking for Future, Inc. shall deliver to destination within the number of calendar days after receipt of order (ARO), as set forth below:

<table>
<thead>
<tr>

Urgent Requirements: When the Federal Supply Schedule contract delivery period does not meet the bona fide urgent delivery requirements of an ordering agency, agencies are encouraged, if time permits, to contact Networking for Future, Inc. for the purpose of obtaining accelerated delivery. NETWORKING FOR FUTURE, INCORPORATED shall reply to the inquiry within 3 workdays after receipt. (Telephonic replies shall be confirmed by Networking for Future, Inc. in writing.) If NETWORKING FOR FUTURE, INCORPORATED offers an accelerated delivery time acceptable to the ordering agency, any order(s) placed pursuant to the agreed upon accelerated delivery time frame shall be delivered within this shorter delivery time and in accordance with all other terms and conditions of the contract.

Expedited Delivery: Times are negotiated between NETWORKING FOR FUTURE, INCORPORATED and the ordering agency.

8) Minimum Order: $100
9) Maximum Order: $1,000,000

8. DESCRIPTION OF LABOR CATEGORY

1. Project Manager

Education:
Bachelor's Degree in Computer and/or related Sciences.

Duties and Responsibilities:
The candidate must be capable of planning, directing, and coordinating the activities of administration and program control. Must supervise technical personnel to complete tasks relating to complex integrated systems design, development or modification as required by specific delivery orders. Must have thorough knowledge and experience in systems requirements definition, work planning, budget development, fiscal control, scheduling, task control, work progress assessments, contract management, subcontract/vendor management, client communications, staff recruiting/development and personnel communications.

Experience:
Position requires 10 years of experience. An advanced degree may be substituted for 4 years' experience. 3 years’ experience must be in the direction and management of large-scale Government programs with 10 or more individuals.

2. Subject Matter Expert/Consultant

Education:
Master's degree in computer Science, Information Systems, Engineering equivalent experiences in a technical or business discipline.

Duties and Responsibilities:
The Subject Matter Expert/ Consultant is responsible for the design, Implementation and analysis of discrete elements of a program. This position will provide leadership and guidance to policy development, authorship of final reports, presentations to high-level managers, and other program elements that require expertise.

Experience:
Position requires 12 years of directly applicable professional experience, 3 of which shall be within the last 5 years in Management of government business and technical operations. Must have demonstrated program, deliverables and staff management experiences.

3. Computer Systems Architect

Education:
Bachelor's degree in Computer Science, Information Systems, Engineering, Business, or other related discipline or equivalent experience in a technical or business discipline.

Duties and Responsibilities:
Establishes system information requirements in the development of enterprise-wide or large-scale information systems in on-premise and/or cloud environment. Designs architecture to include the software, hardware, and communications to support the total requirements as well as provide for present and future cross-functional requirements and interfaces. Ensures these systems are compatible and in compliance with the standards for open systems architectures, and the external
environment/software application. Ensures that the common operating environment is compliant. Evaluates analytically and systematically problems of workflow, organization, and planning and develops appropriate corrective action. Provides daily supervision and direction to staff.

Experience:
10 years of experience, of which at least 8 years must be specialized. Specialized experience includes: supervision of system architects, use of structured analysis, design methodologies and design tools and other design techniques, object oriented principles, and experience with the logical and physical functional, operational, and technical architecture of large and complex information systems.

4. Senior Network Engineer

Education:
Bachelor’s degree in Information Systems, engineering, or other related discipline or equivalent experience in a technical or business discipline.

Duties and Responsibilities:
Plans and performs network engineering research, design development, and other assignments in conformance with network design, engineering and customer specifications. Supervises team of network engineers through project completion. Responsible for major technical/engineering projects of higher complexity and importance than those normally assigned to lower level engineers.

Experience:
6 years of experience, of which at least 4 years must be specialized. Performs variety of network engineering tasks, either independently or under supervision, which are broad in nature and are concerned with the design and implementation of integrated networks, including personnel hardware, software and support facilities and/or equipment. Supervises team of Network Engineers through project completion.

5. Network Engineer

Education:
Bachelor's degree in Information Systems, engineering, or other related discipline or equivalent experience in a technical or business discipline.

Duties and Responsibilities:
Plans and performs network engineering research, design development, and other conformance with network design, engineering and customer specifications. Responsible for the technical/engineering part of a major project.

Experience:
Position requires 2 years of experience. Under Supervision performs a variety of network engineering tasks, which are broad in nature and are concerned with the design and implementation of integrated networks, including personnel, hardware, software and support facilities and/or equipment.
6. **Computer Systems Analyst**

**Education:**
Bachelor's degree in Computer Science or related fields.

**Duties and Responsibilities:**

**Experience:**
This position requires a minimum of 6 years of experience. Act as a lead Network Operation Analyst defining and executing Network systems. These activities consist of internal network systems planning, performance management, capacity planning, testing, and validating information.

7. **Senior Internet/Intranet Developer**

**Education:**
Bachelor’s degree in Computer Science.

**Duties and Responsibilities:**
Develops and applies organization wide information models for use in designing and building integrated shared software and database management systems. To provide and manage different web interactivity development projects for the clients Internet, Intranet, and extranet sites.

**Experience:**
Position requires 6 years of experience which applies to system analysis and design techniques for internet or Intranet development and distribution to remote sites using various technologies e.g., C++, Java, SQL, HTML, XML, ASP, JavaScript, ColdFusion, JavaScript, jQuery and CSS, .NET MVC, Web API, SQL Utilizing Cloud Platforms such as Amazon Web Services, Microsoft Azure.

8. **Internet/Intranet Developer**

**Education:**
Bachelor's degree in Computer Science

**Duties and Responsibilities:**
Develops and applies organization wide information models for use in designing and building integrated shared software and database management systems. To provide and manage different web interactivity development projects for the clients Internet, Intranet, and extranet sites.

**Experience:**
Position requires 2 years of experience, which applies to system analysis and design techniques for internet or Intranet development and distribution to remote sites using various technologies e.g., C++, Java, SQL, HTML, XML, ASP, JavaScript, ColdFusion, JavaScript, jQuery and CSS, .NET MVC, Web API, SQL Utilizing Cloud Platforms such as Amazon Web Services, Microsoft Azure.
9. Computer Application Developer

Education:
Bachelor’s degree in Computer Science or related fields.

Duties and Responsibilities:
The computer programmer performs advanced specialized systems programming duties including design specification development, and computerized information systems implementation. Builds software development tools. Measures software performance through design, implementation, and evaluation of results. Publishes comprehensive analysis of software, such as database management systems, program productivity techniques, operating systems, compilers, and other items. Produces highly technical programs such as cross-compilers and communications software operating systems. Examines overall system design to determine the applicability of a proposed or developed subsystem. Designs complex information systems describing the flow of information among users, interfaces between program interactions, and key data structures. Designs detailed input and output records layouts, documenting the functions of programs. Codes programs in applicable languages using detailed flow diagrams and input/output descriptions as guidelines.

Experience:
Position requires a minimum of 6 years of experience. An advanced degree in Computer Sciences, Systems Analysis, Information Management, Software Engineering or Communications may be substituted for 4 years of experience.

10. Computer Programmer Analyst

Education:
Bachelor's degree in Computer Science, Information Systems, Engineering, Business, or other related discipline.

Duties and Responsibilities:
Serve as an applications programmer on large-scale database management systems. Provide program analysis, including but not limited to data collection, input, and design analysis. This position requires knowledge of computer platforms and software and the ability to develop complex software programs to satisfy design objectives. Demonstrated ability to work independently or under only general direction.

Experience:
This position requires a minimum of 5 years of experience, of which at least 3 years must be specialized. Analyzes functional business applications and design specifications for functional activities. Develops block diagrams and logic flow charts. Translates detailed design into computer software. Tests, debugs, and refines the computer software to produce the required product. Prepares required documentation, including both program level and user-level documentation. Enhances software to reduce operating time or improve efficiency. Provides technical direction to programmers to ensure program deadlines are met.
11. Database Application Developer

Education:
A Bachelor’s degree in Computer Science.

Duties and Responsibilities:
Applies database development disciplines and best practices for the planning analysis, data refinement, design and construction of information systems on an enterprise wide basis or across a major sector of the enterprise. Develops analytical and computational techniques and methodology for problems regarding the various database applications.

Experience:
This position requires knowledge of multidimensional database on large-scale database management systems. This position requires a minimum of 4 years of experience, of which at least 2 years must be specialized.

12. Data Warehouse Specialist

Education:
A Bachelor’s degree in Computer Science.

Duties and Responsibilities:
Analyzes and develops computer software, processing a wide range of capabilities, including data warehouse technologies, business data model, executive information management, and decision support system. Maintaining interfaces with outside systems; provide technical direction to junior staff. Performs data warehouse design and construction, provides product support and maintenance, prepares and implements data verification and testing methods for the data warehouse.

Experience:
This position requires a minimum of 5 years of experience.

13. Technical Writer/Help Desk Engineer

Education:
A Bachelor’s degree.

Duties and Responsibilities:
Edits functional descriptions, systems specification, user manuals, special reports, or any other customer deliverables and documents specifically in a helpdesk support environment.

Experience:
This position requires a minimum of 3 years’ experience. Assists in collecting and organizing information required for preparation of user’s manuals, training materials, installation guides, proposals, and other reports and deliverables.
14. Help Desk Manager

Education:
A Bachelor’s degree or 5 years of on job experience.

Duties and Responsibilities:
Provides daily supervision and direction to staff who are responsible for phone and in person support to users in areas of email, Internet/Intranet, Cyber Security, Active Directory, COTS and custom applications. The Manager supervises the first point of contact and necessary escalations for troubleshooting hardware/software, PC, Printer problems, etc.

Experience:
This position requires a minimum of 4 years of experience. Manages the help desk function and personnel.

15. Hardware/Software Specialist

Education:
A Bachelor’s degree or 4 years of on job experience.

Duties and Responsibilities:
Prepares functional requirements and specifications for hardware/software acquisitions. Ensures that problems have been properly identified and solutions will satisfy the user’s requirements.

Experience:
This position requires a minimum of 4 years of experience. Reviews computer systems in terms of machine capabilities and man machine interface. Prepares reports and studies concerning hardware/software.

16. Subject Matter Expert/Consultant II

Education:
Master’s degree in computer Science, Information Systems, Engineering in a technical or business discipline.

Duties and Responsibilities:
The Subject Matter Expert/Consultant II is responsible for the design, implementation and analysis of discrete elements of a program. This position will provide leadership and guidance to policy development, authorship of final reports, presentations to high-level managers and other program elements that require expertise.

Experience:
Position require 15 years of directly applicable professional experience, 3 of which shall be within the last 6 years in Management of government/commercial business and/or technical operations. Must have demonstrated program, deliverables and staff management experience.
17. Subject Matter Expert/Consultant III

Education:
Master’s degree in computer Science, Information Systems, Engineering in a technical or business discipline.

Duties and Responsibilities:
The Subject Matter Expert/Consultant III is responsible for the design, Implementation and analysis of discrete elements of a program. This position will provide leadership and guidance to policy development, authorship of final reports, presentations to high-level managers and other program elements that require expertise.

Experience:
Position require 17 years of directly applicable professional experience, 3 of which shall be within the last 7 years in Management of government/commercial business and/or technical operations. Must have demonstrated program, deliverables and staff management experience.

18. Program Manager

Education:
Must have at least a Bachelor’s degree in a technical or business-related discipline.

Duties and Responsibilities:
- Directs the performance of a variety of related projects, which may be organized by technology, program, or client.
- Oversees the technology development and/or application, marketing, and resource allocation.
- Program areas typically represents more than three functional areas that may include engineering, systems analysis, quality control, administration, etc.
- Responsible for the effective management of funds and personnel and is accountable for the quality and timely delivery of all contractual items.
- Operates within client guidance, contractual limitations, and Company business and policy directives.
- Serves as focal point-of-contact with client regarding program activities.
- Ensures that all required resources including manpower, production standards, computer time, and facilities are available for program implementation.
- Manages program consisting of multiple projects including project identification, design, development, and delivery.
- Maintains the development and execution of business opportunities based on broad, general guidance.
- Confers with project manager to provide technical advice and to assist with problem resolution.
- Responsible for marketing new technology and follow-on business acquisitions.

Experience:
At least 10 years of experience.
19. Information Security Consultant

Education:
Must have at least a Bachelor’s degree in a technical or business-related discipline.

Duties and Responsibilities:
- Under limited supervision, analyzes needs, designs and develops computer security solutions through the implementation of structured techniques and appropriate standards.
- May direct and supervise other personnel.
- Works on complex application problems involving all phases of computer security to provide complete and effective solutions.
- Provides technical support for secure software development and integration tasks, including the review of work products for correctness, adherence, to the design concept and to user standards.
- Expert knowledge of computer security products and enabling products such as PKI, VPN, Firewalls, Intrusion Detection Systems, etc.
- Based on review of current computer security policy, doctrine, and regulations, provides recommendations for consolidating or developing policy and procedures at the all levels.
- Applies knowledge of current computer security solutions to customer problems based on an understanding of how products and services interrelate and support the client mission and the viewpoints of the consumers of those products and services.
- Analyzes and recommends resolution to problems based on knowledge of the major products and services, an understanding of their limitations, and an expert knowledge of the disciplines of information security.
- Supports the specification and procurement of computer systems controls. Implements computer control systems including administrative, logical and physical controls.
- Establishes and maintains vendor and supplier information for associated disciplines and project areas.
- Directs the development and maintenance of appropriate documentation for system design, testing and maintenance. Performs other related duties as assigned.

Experience:
At least 4 years of Information Security experience.

20. Senior Information Security Consultant

Education:
Must have at least a Bachelor’s degree in a technical or business-related discipline.

Duties and Responsibilities:
- Provides direction and leadership for personnel performing information security task(s) and projects.
- Projects include, mainframes, servers and associated networks, communication services, individual workstations, disaster recovery planning, business recovery planning and other risk management functions related to information technology.
- Recommends solutions to the most difficult information security problems in existing systems and systems development.
- Leads and participates in system evaluations, penetrations, forensics, and vulnerability studies and experiments.
- Makes recommendations as an authoritative leader in the information security field.
- Responsible for applying the highest degree of industry knowledge, foresight and vision in computer security/business continuity problem identification and solution development activities.
- Responsible for the investigation, data collection, identification, analysis and problem-solving for complex business or mission-based security problems and issues, leading to a comprehensive but concise statement of condition and preparation of a business case with recommendations for solving such problems with cost effective solutions.
- Responsible for the design, development and implementation of information security solutions.
- Works closely with all levels of user management and/or internal project teams to develop detailed technical requirements and specifications for the development of information security solutions for complex systems.
- Supports the specification and procurement of information security technology solutions, to include software and hardware systems, peripherals, accessories, software applications, and development tools to safeguard information from loss, misuse or abuse.
- Establishes and maintains vendor and supplier information for associated disciplines and project areas.
- Directs the development and maintenance of appropriate documentation for system design, testing and maintenance. Performs other related duties as assigned.

Experience:
At least 7 years of Information Security experience.

21. Database Administrator

Education:
Must have at least a Bachelor’s degree in a technical or business-related discipline.

Duties and Responsibilities:
- Under general supervision, responsible for all activities related to the administration, planning, and development of computerized databases.
- Additionally, responsible for the formulation and/or implementation of policies and procedures pertaining to database management, security maintenance, and utilization.
- Exercising independent judgment, consults with and advises database users relative to procedures, technical problems, priorities, and methodologies.
- Establishes procedures for operations of the database and database management system and ensures compliance.
- Collects data elements and prepares database specifications. Develops, maintains, and controls the data dictionary.
- Consults with programmers and users to develop test data to exercise the database and user-applications software.
- Participates in logical and physical database designs.
- Maintains control programs required for accessing databases.
- Maintains, refines/enhances the database and modifies logical relationships, as necessary.
- Implements procedures for testing the back-up and recovery procedures of automated systems and security and privacy of automated systems.
Experience:
Must have at least 4 years of Database Administration experience.

22. Senior Database Administrator

Education:
Must have at least a Bachelor’s degree in a technical or business-related discipline.

Duties and Responsibilities:
- Leading all activities related to the administration, planning, and development of computerized databases.
- Additionally, responsible for the formulation and/or implementation of policies and procedures pertaining to database management, security maintenance, and utilization.
- Exercising independent judgment, consults with and advises database users relative to procedures, technical problems, priorities, and methodologies.
- Establishes procedures for operations of the database and database management system and ensures compliance.
- Collects data elements and prepares database specifications. Develops, maintains, and controls the data dictionary.
- Consults with programmers and users to develop test data to exercise the database and user-applications software.
- Participates in logical and physical database designs. Maintains control programs required for accessing databases.
- Maintains, refines/enhances the database and modifies logical relationships, as necessary.
- Implements procedures for testing the back-up and recovery procedures of automated systems and security and privacy of automated systems.
- Monitors performance statistics and performs performance tuning.
- Prepares reports as required. Performs other related duties as assigned.
- Responsible for database and application performance monitoring, analysis and tuning.
- Monitor and optimize database performance and resources.
- Participates in all phases of data extraction, conversion and uploading.
- Provides database management and provides training to junior database administrators.

Experience:
Must have at least 7 years of Database Administration experience.

23. Software Engineer

Education:
Must have at least a Bachelor’s degree in a technical or business-related discipline.

Duties and Responsibilities:
- Under general supervision, engineers software solutions based upon client requirements in Agile, Waterfall or DevOps environments.
- Reports to a Senior Software Engineer and makes use of commercially available or custom Computer Aided Software Engineering (CASE) tools as required.
- Engineers software solutions based upon client requirements.
- Supports a Senior Software Engineer as required.
- Develops technical documentation detailing the project design parameters.
May perform other duties as assigned.

Experience:
Must have at least 4 years of Software Engineering experience.

24. Senior Software Engineer

Education:
Must have at least a Bachelor’s degree in a technical or business-related discipline.

Duties and Responsibilities:
- Engineers software solutions based upon client requirements in Agile, Waterfall or DevOps environments.
- Generally, has one or more Software Engineers on staff and heads up projects that make use of commercially available or custom Computer Aided Software Engineering (CASE) tools as required.
- Supervises a staff of Software Engineers as required. Manages projects that make use of commercially available or custom CASE tools as required.
- Develops technical documentation detailing the project design parameters.
- May perform other duties as assigned.

Experience:
Must have at least 7 years of Software Engineering experience.

25. Systems Analyst / Programmer

Education:
Must have at least a Bachelor’s degree in a technical or business related discipline.

Duties and Responsibilities:
- Under supervision, performs systems analysis of computer and communications/network systems.
- Supports the installation of computer operating systems, network, and application software, and computer/network hardware.
- Possesses troubleshooting skills to assist Systems Analysts. Performs systems analysis of computer and networking systems.
- Technically supports the overall integration of all systems peripherals so that they operate correctly within a predefined environment.
- Design, code and document application programs for computers and related equipment used for scientific or commercial projects. Develops technical documentation detailing the installation procedures.
- May perform other duties, as assigned.

Experience:
Must have at least 4 years of Information Systems experience.
26. Senior Systems Analyst / Programmer

Education:
Must have at least a Bachelor’s degree in a technical or business-related discipline.

Duties and Responsibilities:
- Works independently on highly complex operating systems analysis/programming projects using programming languages.
- Under limited supervision, design, code and document application program for computers and related equipment used for scientific or commercial projects. Install, generate, maintain, test and debug system software programs.
- Develop instructions for use of operating systems software and modifies/maintains system software packages via releases and utilities from manufacturers.
- Evaluate existing operating systems software and recommends changes.
- Engineer highly complex software and/or optimize systems software performance.
- Interpret technical documentation standards and prepare documentation according to supplied standards.
- Other duties may include writing, editing and/or graphical presentation of technical information for both technical and non-technical personnel.

Experience:
Must have at least 9 years of Information Systems experience.

27. Field Technician

Education:
Must have at least a High School Diploma, technical school, or military discipline.

Duties and Responsibilities:
- Under general supervision, performs duties involving the installation and repair of electronic equipment such as microcomputers, and communication systems at field installations.
- Installs, diagnoses and repairs (on-site/remote) file servers, personal computers, printers, modems, monitors, and other associated peripherals.
- Installs and uses various types of cables.
- Analyzes operational malfunctions using troubleshooting skills, and diagnostic software.
- Maintains parts inventory, work orders, logs and related records. Performs other related duties as assigned.

Experience:
Must have at least 3 years of telecom or other IT related field experience.
28. Senior Field Technician

Education:
Must have at least a High School Diploma, technical school, or military discipline.

Duties and Responsibilities:
- Under general supervision, performs duties involving the installation and repair of electronic equipment such as microcomputers, and communication systems at field installations.
- Installs, diagnoses and repairs (on-site/remote) file servers, personal computers, printers, modems, monitors, and other associated peripherals.
- Installs and uses various types of cables. Analyzes operational malfunctions using troubleshooting skills, knowledge of common personal computers and diagnostic software.
- Maintains parts inventory, work orders, logs and related records. Performs other related duties as assigned.

Experience:
Must have at least 5 years of telecom other IT related field experience.

29. Network Management Engineer

Education:
Must have at least a Bachelor’s degree in a technical or business-related discipline.

Duties and Responsibilities:
- Has knowledge and experience configuring Commercial Off The Shelf (COTS) Network Management solutions for Government or Enterprise applications.
- Capable of working, with supervision, on specific aspects of network management engineering.
- Implement, test, and support network management-based applications
- Participate in requirement gathering sessions, Collaborate with the team on application architecture design and decision-making

Experience:
Must have at least 5 years of telecommunications network management.

30. Senior Network Management Engineer

Education:
Must have at least a Bachelor’s degree in a technical or business-related discipline.

Duties and Responsibilities:
- Has broad in-depth knowledge and several years leadership experience in architecting and configuring Commercial Off The Shelf (COTS) Network Management solutions for Government and/or Enterprise applications.
- Has knowledge of one or more flavors of Unix and leading hardware vendors’ products on which the Network Management platform would run.
- Designs, develops and deploys a fault and performance network management system that provides the required trouble isolation and identification required for the applications.
• Identifies deficiencies in existing Network Management platforms and proposes solutions that mediate these problems.
• Provides customizations to existing Network Management implementations to reduce the interval from identification of a fault to problem resolution.
• Integrates multiple COTS vendor products into a seamless operation for a Network Operations Center (NOC).
• Knowledge transfer to NOC personnel or other individuals charged with the maintaining the environment being monitored by the Network Management solution.

Experience:
Must have at least 7 years of telecommunications network management.

31. Network Administrator

Education:
Must have at least a Bachelor’s degree in a technical or business-related discipline.

Duties and Responsibilities:
• Under general supervision, provides daily operational availability of hardware and software systems to support facility operation for a complex computer system.
• Performs system backup for major systems in accordance with established procedures.
• Performs scheduled testing and review of hardware and software.
• Documents all hardware and/or software adjustments and/or modifications as changes are affected.
• Responsible for the preparation of reports and analysis of operations as required. Performs other related duties as assigned.

Experience:
Must have at least 5 years of telecommunications network administration.

32. Senior Network Administrator

Education:
Must have at least a Bachelor’s degree in a technical or business-related discipline.

Duties and Responsibilities:
• Under minimal supervision, provides daily operational availability of hardware and software systems to support facility operation for a complex computer system.
• Ensures system availability and function ability.
• Performs system backup for major systems in accordance with established procedures.
• Performs adjustments on hardware and recommends software changes to maximize system throughput.
• Performs scheduled testing and review of hardware and software.
• Documents all hardware and/or software adjustments and/or modifications as changes are affected.
• Responsible for the preparation of reports and analysis of operations as required.
• Performs other related duties as assigned.
Experience:
Must have at least 7 years of telecommunications network administration.

33. Systems Administrator

Education:
Must have at least a Bachelor’s degree in a technical or business-related discipline.

Duties and Responsibilities:
- Under general supervision performs daily activities of configuration, operation and maintenance of business systems which may be mainframe, mini, or client/server based servers.
- Optimizes system operation and resource utilization and performs system capacity analysis and planning.
- Provides assistance to users in accessing and using business systems.

Experience:
Must have at least 4 years of Information Systems experience.

34. Senior Systems Administrator

Education:
Must have at least a Bachelor’s degree in a technical or business related discipline.

Duties and Responsibilities:
- Supervises and manages the daily activities of configuration and operation of business systems which may be mainframe, mini, or client/server based servers.
- Optimizes system operation and resource utilization and performs system capacity analysis and planning.
- Provides assistance to users in accessing and using business systems.

Experience:
Must have at least 7 years of Information Systems experience.

35. Video Engineer

Education:
Must have at least a Bachelor’s degree in a technical or business-related discipline.

Duties and Responsibilities:
- Under general direction, plans, designs, and implements large physical and logical video communications networks.
- Prepares work statements, test data, and procedures. Devises appropriate tests to evaluate, debug, and check equipment.
- Conveys expertise to other engineering project team members. Analyzes customer’s voice, data and image requirements and develops cost effective solutions.
- Prepares work prints and schematics for the placement, implementation, rearrangement or removal of voice, data and video/audio cables and associated hardware.
• Analyzes, selects and designs circuit paths, transmission logic and hardware to connect localized networks.
• Evaluates projected network usage, signaling characteristics and proposed network media.
• Recommends media that will ensure transport and receipt of voice, data and video/audio signaling.
• Performs other related duties as assigned.

Experience:
Must have at least 4 years of experience in audio/video telecommunications network.

36. Senior Video Engineer

Education:
Must have at least a Bachelor’s degree in a technical or business-related discipline.

Duties and Responsibilities:
• Under limited direction, plans, designs, and implements large complex physical and logical video communications networks.
• Prepares work statements, test data, and procedures.
• Devises appropriate tests to evaluate, debug, and check equipment.
• Conveys expertise to other engineering project team members.
• Reviews and analyzes customer’s voice, data and image requirements and develops cost effective solutions.
• Reviews and analyzes work prints and schematics for the placement, implementation, rearrangement or removal of voice, data and video/audio cables and associated hardware.
• Analyzes, selects and designs circuit paths, transmission logic and hardware to connect localized networks.
• Determines projected network usage, signaling characteristics and proposed network media.
• Recommends media that will ensure transport and receipt of voice, data and video/audio signaling.
• Evaluates new products and technologies. May supervise lower level staff. Performs other related duties as assigned.

Experience:
Must have at least 7 years of experience in audio/video telecommunications network.

37. Helpdesk Analyst

Education:
Must have at least a High School Diploma, military, or technical school training.

Duties and Responsibilities:
• Serves as the initial point-of-contact for troubleshooting hardware/software, PC, and printer problems.
• Provides phone and in-person support to users in the areas of e-mail, directories, standard Operating System’s desktop applications, and applications developed under this contract or predecessors.
Experience:
Must have at least 2 years of IT Support experience.

38. Senior Helpdesk Analyst

Education:
Must have at least a High School Diploma, military, or technical school training.

Duties and Responsibilities:
- Under limited supervision, provides phone and in-person support to users in the areas of electronic mail, directories, standard "shrink wrapped" software applications, network operating systems, network equipment, hardware dispatch and escalation procedures.
- Has specialized experience with working on a help desk, knowledge of standard operating systems, knowledge of networking and electronic mail.

Experience:
Must have at least 4 years of IT Support experience.

39. Administrative Support

Education:
Must have at least a High School Diploma, military, or technical school training.

Duties and Responsibilities:
- Provides administrative-type support to technical and management-level personnel.
- This includes, but is not limited to, documentation planning and support, project administration, general office support, executive secretarial support, human resource planning, event planning and administration, office relocation planning, etc.

Experience:
Must have at least 2 years of related experience.

40. Principal Systems Architect

Education:
Must have at least a Bachelor’s degree in a technical or business-related discipline.

Duties and Responsibilities:
- Has broad, high-level knowledge of technology and/or business architectures for enterprise applications.
- Possesses the capability to direct, design, or develop architecture plans, implementation or cutover plans, integration plans, or interoperability plans based on different technology and business environments.
- Has the ability to use experience and technical judgment to reach conclusions in the face of limited and/or uncertain data.
- Able to develop architecture Requests for Proposals (RFPs) and to evaluate responses to RFPs.
- Supervises or manages the architecture planning and is considered a leading expert in the field.
Networking For Future, Inc. • 1331 Pennsylvania Ave. NW, Suite 1210 • Washington, DC 20004 • 202-783-9011 • www.nffinc.com

- Capable of supervising multiple teams of specialty professionals working on highly complex architecture projects.
- Provides lead analysis for translating customer needs into the design of networks.
- Provides leadership or direction on innovative research associated with the development of IT architectures.
- Performs management responsibilities for a program or staff for architecture projects.
- Provides in-depth analysis on system interoperability, topologies, technologies, interfaces, and protocols.
- May perform other duties as required.

Experience:
Must have at least 8 years of experience in designing IT related systems.

41. Technical Writer

Education:
Must have at least a Bachelor’s degree in a technical or business-related discipline.

Duties and Responsibilities:
- Assists in collecting and organizing information required for preparation of user’s manuals, training materials, installation guides, proposals, and other reports and deliverables.
- Edits functional descriptions, system specifications, user’s manuals, special reports, or any other customer deliverables in technology and/or business related environments.

Experience:
Must have at least 3 years of technical support/writing experience.

42. Data Warehouse Specialist

Education:
Must have at least a Bachelor’s degree in a technical or business-related discipline.

Duties and Responsibilities:
- Performs as a Data Warehouse Developer on large-scale database management systems.
- Knowledge of computer equipment and ability to develop complex software to satisfy design objectives.
- Analyzes functional business applications and design specifications for functional activities.
- Develops block diagrams and logic flow charts.
- Translates detailed design into computer software.
- Prepares required documentation, including both program-level and user-level documentation.
- Demonstrated ability to work independently with minimal supervision.

Experience:
Must have at least 4 years of database design/Data Warehouse implementation experience.
43. Senior Data Warehouse Specialist

Education:
Must have at least a Bachelor’s degree in a technical or business-related discipline.

Duties and Responsibilities:
- Performs as a Data Warehouse Developer/Administrator on large-scale database management systems, knowledge of computer equipment and ability to develop complex software to satisfy design objectives.
- Possesses ability to assume increasing responsibilities in enterprise data warehouse project information system design and management.
- Applies an enterprise-wide set of data warehouse disciplines for the planning, analysis, data refinement, design and construction of information systems on an enterprise-wide basis or across a major sector of the enterprise.
- Develops analytical and computational techniques and methodology for problem solutions.
- Performs enterprise-wide strategic systems planning, business information planning, business and analysis.
- Provides daily supervision and direction to organization.

Experience:
Must have at least 7 years of database design /Data Warehouse implementation experience.
9. COMMERCIAL WARRANTY

Professional services: NETWORKING FOR FUTURE, INCORPORATED warrants that its services shall be rendered in accordance with the service description, and performed by qualified individuals possessing the requisite skills and experience of the respective labor category descriptions found herein.

Third-Party Services, Materials and Equipment: NETWORKING FOR FUTURE, INCORPORATED provides the standard commercial warranty for third-party services or manufacturer’s warranty for all materials and equipment. NETWORKING FOR FUTURE, INCORPORATED requires all third-party service providers to deliver services that comply with its own professional service standards, whenever offering third-party services.

**AGREEMENT**

In the spirit of the Federal Acquisition Streamlining Act ORDERING ACTIVITY and CONTRACTOR enter into a cooperative agreement to further reduce the administrative costs of acquiring commercial items from the GSA/FSS CONTRACT(S). Federal Supply Schedule contract BPAs eliminate contracting and open market costs such as: search for sources; the development of technical documents, solicitations and the evaluation of offers. Teaming Arrangements are permitted with Federal Supply Schedule Contractors in accordance with Federal Acquisition Regulation (FAR) 9.6. This BPA will further decrease costs, reduce paperwork, and save time by eliminating the need for repetitive, individual purchases from the schedule contract. The end result is to create a purchasing mechanism for the ordering activity that works better and costs less.
