PURCHASE OF TRAINING COURSES FOR GENERAL PURPOSE COMMERCIAL INFORMATION TECHNOLOGY EQUIPMENT AND SOFTWARE (SPECIAL ITEM NUMBER 611420)

1. SCOPE

- a. The Contractor shall provide training courses normally available to commercial customers, which will permit ordering activity users to make full, efficient use of general-purpose commercial IT products. Training is restricted to training courses for those products within the scope of this solicitation.
- b. The Contractor shall provide training at the Contractor's facility and/or at the ordering activity's location, as agreed to by the Contractor and the ordering activity.

2. ORDER

Written orders, EDI orders (GSA Advantage! and FACNET), credit card orders, and orders placed under blanket purchase agreements (BPAs) shall be the basis for the purchase of training courses in accordance with the terms of this contract. Orders shall include the student's name, course title, course date and time, and contracted dollar amount of the course.

3. TIME OF DELIVERY

The Contractor shall conduct training on the date (time, day, month, and year) agreed to by the Contractor and the ordering activity.

4. CANCELLATION AND RESCHEDULING

- a. The ordering activity will notify the Contractor at least seventy-two (72) hours before the scheduled training date if a student will be unable to attend. The Contractor will then permit the ordering activity to either cancel the order or reschedule the training at no additional charge. In the event the training class is rescheduled, the ordering activity will modify its original training order to specify the time and date of the rescheduled training class.
- b. In the event the ordering activity fails to cancel or reschedule a training course within the time frame specified in paragraph a, above, the ordering activity will be liable for the contracted dollar amount of the training course. The Contractor agrees to permit the ordering activity to reschedule a student who fails to attend a training class within ninety (90) days from the original course date, at no additional charge.
- c. The ordering activity may reserve the right to substitute one student for another up to the first day of class.
- d. In the event the Contractor is unable to conduct training on the date agreed to by the Contractor and the ordering activity, the Contractor must notify the ordering activity at least seventy-two (72) hours before the scheduled training date.

5. FOLLOW-UP SUPPORT

The Contractor agrees to provide each student with unlimited telephone support or online support for a period of 30 days from the completion of the training course. During this period, the student may contact the Contractor's instructors for refresher assistance and answers to related course curriculum questions.

6. PRICE FOR TRAINING

The price that the ordering activity will be charged will be the ordering activity training price in effect at the time of order placement, or the ordering activity price in effect at the time the training course is conducted, whichever is less.

7. INVOICES AND PAYMENT

Invoices for training shall be submitted by the Contractor after ordering activity completion of the training course. Charges for training must be paid in arrears (31 U.S.C. 3324). A PROMPT PAYMENT DISCOUNT, IF APPLICABLE, SHALL BE SHOWN ON THE INVOICE. A fee of 1% of the balance for each month the invoice has not been paid will be applied.

8. FORMAT AND CONTENT OF TRAINING

- a. The Contractor shall provide written materials (i.e., manuals, handbooks, texts, etc.) normally provided with course offerings, printed, and copied two-sided on paper containing 30% post-consumer materials (fiber). Such documentation will become the property of the student upon completion of the training class.
- b. ****If applicable**** For hands-on training courses, there must be a one-to-one assignment of IT equipment to students.
- c. The Contractor shall provide each student with a Certificate of Training at the completion of each training course.
- d. The Contractor shall provide the following information for each training course offered:
 - (1) The course title and a brief description of the course content, to include the course format (e.g., lecture, discussion, hands-on training);
 - (2) The length of the course;
 - (3) Mandatory and desirable prerequisites for student enrollment;
 - (4) The minimum and maximum number of students per class;
 - (5) The locations where the course is offered;
 - (6) Class schedules; and
 - (7) Price (per student, per class (if applicable)).
- e. For those courses conducted at the ordering activity's location, instructor travel charges (if applicable), including mileage and daily living expenses (e.g., per diem charges) are governed by Pub. L. 99-234 and FAR Part 31.205-46, and are

reimbursable by the ordering activity on orders placed under the Multiple Award Schedule, as applicable, in effect on the date(s) the travel is performed. Contractors cannot use GSA city pair contracts. The Industrial Funding Fee does NOT apply to travel and per diem charges.

9. "NO CHARGE" TRAINING

The Contractor shall describe any training provided with equipment and/or software provided under this contract, free of charge, in the space provided below.

DESCRIPTION OF SATCOM DIRECT GOVERNMENT TRAINING COURSES

Satcom Direct® AeroIT Certification

This is a certification course for the configuration and troubleshooting of networks and satcom systems onboard an aircraft.

Identifying a need in the industry based on the rising demand for onboard internet access, Satcom Direct's team of IT and satcom experts created this certification to meet that demand. aeroIT® is similar and complementary to the Network+ certification, an industry standard for IT networking professionals. Candidates must complete the coursework and pass the proctored exam. Successful candidates receive a renewable aeroIT® certification that is valid for three years, per the industry standard.

Exam and Coursework

The aeroIT® certification exam is a professional level assessment, on par with a Net+ skill set. Prior to the exam, the recommended prerequisite experience is two (2) years aviation training with basic knowledge of networking (how to set up a router, etc.).

The aeroIT® exam focuses on four areas:

- ✓ Satellite Networks
- ✓ Network Theory
- ✓ Troubleshooting Aircraft Networks
- ✓ Network Management

This training course is approved for eight FAA Inspection Authorization (IA) credits.

Course Length

Four (4) days of classroom training and coursework review, followed by the opportunity to take the exam.

Who should attend?

- ✓ IT and aviation professionals with experience in aircraft networking
- ✓ Less experienced professionals who require a foundation of knowledge and skills regarding networking and Internet connectivity
- ✓ Experienced professionals who have a foundation of field experience, but need or want to advance their knowledge or skills, perhaps to achieve advanced certifications or accreditation
- ✓ Management professionals in the aviation field who need or want to gain a better understand of their aircraft systems

Satcom Direct® AeroCNCT Certification

This certification is designed to provide flight crew members with the knowledge, ability, and confidence to troubleshoot basic in-flight connectivity issues.

Staying connected in flight has become a necessity, but with communications, avionics, and network systems being more complex than ever, you can't always travel with your IT department to troubleshoot when problems occur – that's why crewmembers need aeroCNCT (Crewmember Network & Connectivity Training).

Exam and Coursework:

aeroCNCT is more than a certificate; it's a professional credential developed to meet industry standards. The three (3) years certification was developed to create a standard in cabin connectivity education. The aeroCNCT exam focuses on several areas:

- ✓ Identifying components of the Aircraft Network
- ✓ Identifying the components of Aircraft Internet Connectivity
- ✓ Identifying the aviation SATCOM Services
- ✓ Identifying a Connectivity Pre-flight Process
- ✓ Troubleshooting In-flight Data and Voice Connectivity

Course Length

Two (2) days of classroom training and coursework, followed by the opportunity to take the exam.

Who should attend?

- ✓ Flight department crewmembers with varied degrees of experience who are looking to gain device knowledge of today's popular devices used by passengers and crew, in addition to troubleshooting basic connectivity and networking issues.

APPLICABLE TO INFORMATION TECHNOLOGY PROFESSIONAL SERVICES (SPECIAL ITEM NUMBER 54151S)

Aeronautical Satcom Consultant

Duties: Serves as a subject matter expert for the organization, creation, execution, and testing of all areas included within aeronautical satcom communications systems and related networks. This individual will also be able to look towards future needs of a current or proposed aeronautical satcom system and provide analysis of alternatives and trade studies between commercial satcom aeronautical solutions, while recommending specific avionics equipment to fit individual user's needs. Additionally, the Aeronautical Satcom Consultant can provide problem solving, technical information, generate reports, and provide specialized and focused feedback and guidance to all levels of clientele throughout the assigned project. This Individual may also serve as a flight deck/flight operations expert for the organization serving as a technical expert on flight deck systems such as ACARS, FMS, EFBs, CNS/ATM equipage, and overall flight operations support systems and may also help coordinate for any certification or approvals as dictated by aviation regulators.

Experience: 20 years of experience in the Information Technology industry with a focus on aeronautical satcom networks. Has experience ranging from local hardware support to systems administration of large corporate networks. Background may also include other flight deck avionics and aircraft operational support systems.

Education: Bachelor's degree.

Network Architect

Duties: The Satellite Systems Network Architect designs and manages the infrastructure of terrestrial network connectivity for the service provider and can design WAN/LAN solutions for implementation on customer aircraft and customer corporate networks when needed. Additionally, they would be responsible for the connectivity between the terrestrial and satellite networks as well as end-to-end solutions for customers with requirements not met by their existing infrastructure. This individual can also act as a technical liaison with the satellite providers to facilitate the exchange of information for the purposes of billing, technical support, and value-added services as well as other connectivity solutions and may also act as a technical expert for coordination and connectivity with ground host and communication providers/solutions.

Experience: 20 years of experience in the information technology industry with a focus ranging from local hardware support to systems administrator of large corporate networks.

Education: Bachelor's degree.

Aircraft Satcom Support Specialist

Duties: The Aircraft Satcom Support Specialist is able to troubleshoot all types of military and government airborne communications platforms by analyzing logs and reports from current onboard systems. Additionally, they will support and configure ISR platforms to include network setup, video encoder configuration, and final testing of any configured setup. This individual will also provide onsite technical support for networking setup, Iridium, and Inmarsat Classic/Swift 64/swift broadband products. This specialist may also serve as a flight deck/flight operations technical expert providing a full range of analysis, troubleshooting, testing, and configuration support for flight deck systems such as ACARS, FMS, EFBs, CNS/ATM equipage, and overall flight operations support systems.

Experience: 12 years of experience specializing in integration of SATCOM, wired and wireless networking components, ISR related components, and flight deck avionics systems such as ACARS, FMS, EFBs, and CNS/ATM equipage and overall flight operations support systems in an airborne environment.

Education: Bachelor's degree.

Project Manager

Duties: Serves as the contractor's satellite communications project manager and shall be the contractors authorized interface with the government technical personnel, the COR, and customer representatives. Responsible for formulating and enforcing work standards, assigning contractor schedules, reviewing work discrepancies, supervising contractor personnel, and communicating policies, purposes, and goals of the organization to subordinates. The Project Manager is responsible for managing small to mid-size projects that may involve multiple task orders and significant numbers of resources (personnel and contract dollars). Shall be responsible for the overall contract performance but may serve in other capacities.

Experience: 25 years of experience in Government Aeronautical Satellite Communications and airborne networking.

Education: Bachelor's degree.

Service Contract Labor Standards: The Service Contract Labor Standards (SCLS), formerly known as the Service Contract Act (SCA), is applicable to this contract as it applies to the entire Multiple Award Schedule (MAS) and all services provided. While no specific labor categories have been identified as being subject to SCLS/SCA due to exemptions for professional employees (FAR 22.1101, 22.1102 and 29 CFR 541.300), this contract still maintains the provisions and protections for SCLS/SCA eligible labor categories. If and / or when the contractor adds SCLS/SCA labor categories to the contract through the modification process, the contractor must inform the Contracting Officer and establish a SCLS/SCA matrix identifying the GSA labor category titles, the occupational code, SCLS/SCA labor category titles and the applicable WD number. Failure to do so may result in the cancellation of the contract.
