1c. SERVICES OFFERED: See Price List

2. MAXIMUM ORDER:

<table>
<thead>
<tr>
<th>SIN</th>
<th>Price</th>
</tr>
</thead>
<tbody>
<tr>
<td>54151S</td>
<td>$500,000</td>
</tr>
<tr>
<td>OLM</td>
<td>Any proposed OLMs must be in support of the order and shall not exceed 33.33% of the total order value.</td>
</tr>
</tbody>
</table>

This maximum order threshold is a dollar amount at which it is suggested that the ordering agency request higher discounts from the contractor before issuing the order. The contractor may: (1) Offer a new lower price, (2) Offer the lowest price available under the contract, or (3) Decline the order within five (5) days. In accordance with the Maximum Order provisions contained in the Schedule, a delivery order may be placed against the Schedule contract even though it exceeds the maximum order threshold.

LABOR CATEGORIES DESCRIPTION

Previse Labor Category Descriptions

0001 – Sr IT Solutions Architect

**Minimum/General Experience:** 7 years’ experience as a Solution Architect, familiarity with business hardware and software systems, high level communications skills, ability to create big picture software solutions.

**Functional Responsibility:** Works with Business Owners, and Data Engineers to establish system requirements in the development of enterprise wide or large-scale information systems. Design architecture to include the software, hardware, and communications to support the total requirements as well as provide for present and future cross-functional requirements and interfaces. Ensure these systems are compatible and in compliance with the standards for open systems architectures, the Open Systems Interconnection (OSI) and ISO reference models, and profiles of standards - such as Institute of Electrical and Electronic Engineers (IEEE) Open Systems Environment (OSE) reference model - as they apply to the implementation and specification of information management solution of the application platform, across the Application Program Interface (API), and the external environment/software application. Ensure that the common operating environment is compliant with the Agency enterprise architecture and applicable reference models. Evaluate analytically and systematically problems of workflows, organization, and planning and develop appropriate corrective action. Provide daily supervision and direction to staff.

**Minimum Education:** Must have Master degree preferably in Systems or Software Engineering.

0002 – Senior IT Project Manager

**Minimum/General Experience:** Must have 10 years of general experience including seven years of specialized experience of which two years were direct supervisory experience.

**Functional Responsibility:** Oversees highly complex projects of varying sizes. This individual performs project planning, staffing, budget and schedule tracking and monitoring and keeps the program manager abreast of all problems (risk and issues) and accomplishments. The project manager establishes work plans and coordinates staffing for each phase of the project and effectively coordinates all activities. Interacts with government management personnel to prepare and deliver written and oral reports to contractor management and government representatives.

**Minimum Education:** Must have BS or BA degree preferably in computer science. Must have Project Management Professional Certification
0003 – IT Business Analyst

Minimum/General Experience: Must have 7 years of general experience in requirements elicitation

Functional Responsibility: Provides knowledge in information technology requirements gathering, business process and system analysis, design, improvement, and implementation efforts. Translate business process needs into technical requirements. Ensure that information systems, products and services, meet end user requirements and organizational standards. Support activity and data modeling development of process modernization, identification of best practices and implementation of a comprehensive management plan. Devises improvements to current procedures and develops models of future configuration. Serve as key coordinator between project stakeholders to ensure enterprise-wide integration of reengineering efforts.

Minimum Education: Must have BS or BA degree preferably in computer science

0004 – Senior IT Quality Assurance Engineer

Minimum/General Experience: Must have at least seven years of engineering and/or system analysis and programming experience, including four years of quality assurance experience

Functional Responsibility: Works independently as highest level technical expert providing both external and internal consulting services. Organizes and maintains all quality assurance documentation required. Give guidance and direction to all levels of technical staff. Responsible for ensuring compliance with recognized standards and practices. Lead large project teams. Develops and implements quality controls/methodologies to ensure compliance with quality assurance standards, guidelines, and procedures. Develops and executes test plans and test scripts. Develops and executes manual and automated test procedures. Establishes and maintains a process for evaluating hardware, software, and associated documentation and/or assist in the evaluation.

Minimum Education: Must have BS or BA degree preferably in computer science
