**Service Contract Labor Standards:** The Service Contract Labor Standards (SCLS) are applicable to this contract as it applies to the entire Consolidated MAS Schedule and all services provided. While no specific labor categories have been identified as being subject to SCLS due to exemptions for professional employees (FAR 22.1101, 22.1102 and 29 CRF 541.300), this contract still maintains the provisions and protections for SCLS eligible labor categories. If and/or when the contractor adds SCLS labor categories/employees to the contract through the modification process, the contractor must inform the Contracting Officer and establish a SCLS matrix identifying the GSA labor category titles, the occupational code, SCLS labor category titles and the applicable WD number. Failure to do so may result in cancellation of the contract.
SIN 54151S Labor Category Descriptions

**Business Analyst**

**Functional Responsibilities:** The Business Analyst is responsible for creating wireframes and mockups, identifying and modeling logical structures for new and existing documents, data, and applications. He prepares and maintains documentation, creates charts, and diagrams which explain the business or technical flow. Understands the business and the use of specific terminology, as well as the data structure and the use of analyzing tools. Understands the product life cycle, recognizes the current status of the product and is aware of all stages of the product life-cycle. Possesses advanced organizational skills, negotiation skills, and has the ability to cover all possible scenarios while minimizing the negative effects of conflicts. Possesses advanced analytical and communication skills.

**Minimum Education:** Bachelor’s
**Minimum Experience:** 5 years

**Database Administrator**

**Functional Responsibilities:** The Database Administrator has excellent knowledge of data modeling and design, implementation of databases, data processes (Metadata management and repository usage), backup and data recovery, revision of SQL code, and has excellent SQL procedural skills. Responsible for ensuring data integrity, data availability and data security, and managing and improving system/application performance on an excellent level. Possess a good knowledge of installing and upgrading DB server, hardware and software for data storage, has awareness of software and hardware vendor regulations in terms of licensing and compliance, and has advanced level of knowledge of operating systems and networks configuration.

**Minimum Education:** Bachelor’s
**Minimum Experience:** 5 years

**FullStack Developer**

**Functional Responsibilities:** The FullStack Developer has excellent understanding in technology science. He posses in-depth knowledge of writing comprehensible technical documentation and writing UML diagrams. He understands and implements design principles for quality software code, and uses advanced programming techniques such as generics and abstractions, complex data searches, dealing with competing threads, event-based development.

**Minimum Education:** Bachelor’s
**Minimum Experience:** 5 years
**Graphic Designer**

**Functional Responsibilities:** The Graphic Designer is responsible for the entire process of defining requirements, visualizing, creating and editing graphics including illustrations, logos, layouts, mockups, photos, and other promotional materials for the company. Responsible for shaping the visual aspects of websites, product packaging, exhibitions, etc. The graphic designer is illustrating design ideas using storyboards, process flows, and sitemaps. Possesses advanced knowledge of typography, and the following tools: Adobe Photoshop, Adobe Illustrator, Adobe InDesign, Adobe XD, and Balsamiq Mockups. Has good knowledge of HTML, CSS, WordPress, and photo editing.

**Minimum Education:** Bachelor’s
**Minimum Experience:** 3 years

**IT Project Manager**

**Functional Responsibilities:** The IT Project Manager is responsible for organizing and running projects. Has the basic technical knowledge and excellent skills in project management, time management, client management, team management, conflict management, and risk management. Responsible for creating project management documentation in a clear and understandable way, organizing and coordinating the team and the projects, and building and maintaining excellent customer relationships. Is a strategical thinker and has excellent experience in using project management and support tools at the highest expected level.

**Minimum Education:** Bachelor’s
**Minimum Experience:** 5 years

**Mid Quality Assurance**

**Functional Responsibilities:** The QA Engineer has good knowledge of software solution testing methodology and task management tools, test scripts, running detailed tests, and tracking defects and reports. He is responsible for preparing documentation and reports according to predefined procedures, defining the complexity of software solution features and functionality testing. He defines the start and the end of a test, creates test strategy including test approach, test types, and test preparation techniques on a good level. Creates and executes structured-based tests (white box), experience-based tests, tests based on specified software solution requirements, unit and integration tests. He has advanced skills in analyzing and communication, has analytical and critical thinking, and is aware of the end-user perspective.

**Minimum Education:** Bachelor’s
**Minimum Experience:** 2 years
Project Manager

**Functional Responsibilities:** The Project Manager is responsible for organizing and running projects.
