About Wildflower International

**History**

Since 1991, Wildflower has delivered world class products and services with a philosophy towards improving itself, its business partners, and its community. Today, Wildflower is a $250 million dollar corporation and an enduringly successful graduate of the Small Business Administration’s 8(a) program in 2005. With offices in New Mexico, Tennessee, and a 100% mobile workforce spread throughout the nation that serves the US Government worldwide, Wildflower’s reach reflects its international appellation. Its founder remains the president and CEO, and she continues to lead the team forward.

As a HUBZone Certified company, Wildflower operates from the heart. Participation in the communities in which we live is inextricable from our identity. Our core values of mutual respect, gratitude, passion, and diversity, govern who we are and how we interact with all of our business partners.

**Corporate Culture**

Corporate culture is the identity of a company, its DNA; in some ways, it becomes part of the identity of those who work there. Culture is also a circular condition; people affect the culture as much as the culture affects people. Are we creating the experience or is the experience creating us?

There are so many words and ideas that make up Wildflower’s Corporate Culture. Fundamentally, there are threads that have been woven through our fabric from the beginning that are present with us every day. Periodically we seek to define it in a way that is as unique as we are. That is what this page is about. The Wildflower culture is difficult to describe, but easy to experience. It isn’t something we do, it’s something we are, and something we feel, something that exists....

**Project Management**

Wildflower is an IT Project Management Company. Using its web-based project management application - VirtualEyes™, the company provides a fully integrated communications toolset for project, program, and portfolio management. Wildflower allows its clients to have access to the application, affording real-time visibility into each project as they are in progress. Wildflower has an impressive array of reporting techniques that can be customized for nearly any contractual obligation. Striving to always go above and beyond, Wildflower is a different sort of company that provides a different customer experience: a successful one.

**Managed Services**

Wildflower prides itself on being a quality provider of many managed services to its customers. We understand that the ability to transfer some of your day-to-day management responsibilities can save time and money, which in today’s environment is highly important to you.

Wildflower provides asset management, asset tag placement, asset and warranty reporting, and staged deliveries from our warehouse.

Project management is another way we provide services that can ease the pains of large deliverables. Our project management service will ‘take the reins’ and supply you with the equipment you need to get the job done, addressing each point in your scope of work.

The managed services we provide help us put the value in 'Value Added Reseller'.
Rugged Mobility

Through our extensive network of partnerships, Wildflower is able to extend to its customers an extensive line of ruggedized computers and devices. Wildflower offers devices that have an IP rating of 65 (IP65) and MIL-STD-810F to business rugged. Do you need touch screen, convertible multi-touch tablet, or GPS? All these options, and more, are available along with powerful Intel processors.

VAR Federal Government

Wildflower provides a total solution to U.S. Federal government IT acquisition by providing multi-vendor hardware, software and significant services. The Federal government has specific IT needs, like asset tagging, imaging, bar coding deliveries, and transparent project management.

As a Value-Added Reseller (VAR), Wildflower also tailors performance to contractual needs. This includes contracts administration as well as technical solutions. Services billing can be provided in arrears in many cases. Reporting is one of Wildflower’s many strengths. This includes spend management, the Electronic Product Environmental Assessment Tool (EPEAT), and warranty status. Wildflower provides necessary compliance with Federal Information Processing Standards (FIPS), Trade Agreement Acts (TAA) and Section 508.

Small Business Certifications

IT provider, Wildflower International - New Mexico’s largest woman-owned business has earned the prestigious ranking of ISO 9001:2008 by NQA, the leading global accreditation certification body.

The stringent requirements set forth by the International Standards Organization or ISO and audited by the external third-party auditor are based on a number of quality management principles including a strong customer focus, the motivation and implication of top management, the process approach and continual improvement. “Once we put the ball in motion,” says Kimberly deCastro, president and CEO of Wildflower, “we could immediately see the effectiveness of implementing international standards.”

Wildflower International is HUBZone Certified, and a certified Woman/Minority Owned Business with corporate offices in Santa Fe, New Mexico and Oak Ridge, Tennessee.
