### Course Title: SAFe Product Owner/Product Manager
- **GSA Price w/ IFF:** $5350.13
- **Unit of Issue:** Per Course

**Description:**
Instructor led training that can be delivered either in person, on the client’s site, or remotely via Zoom. Develop the skillsets needed to guide the delivery of value in a Lean enterprise by becoming a SAFe® 5 Product Owner/Product Manager (POPM). During this two-day course, attendees gain an in-depth understanding of how to effectively perform their role in the Agile Release Train (ART) as it delivers value through Program Increments. Attendees explore how to apply Lean thinking to decompose Epics into Features and Stories, refine Features and Stories, manage Program and Team backlogs, and to plan and execute Iterations and Program Increments. Attendees also discover how the Continuous Delivery Pipeline and DevOps culture contribute to the relentless improvement of the ART. Prerequisites are not required. Class is Remote and all items are provided. Course price covers 10 students. When the number of students in a class exceeds 10, an additional fee per student is added. Max student count per course is 25 students to assure individual attention and retention of course material.

**Course Length:** 2 Days  
**Minimum Participants:** 2  
**Maximum Participants:** 25

### Course Title: SAFe Scrum Master
- **GSA Price w/ IFF:** $5350.13
- **Unit of Issue:** Per Course

**Description:**
Instructor led training that can be delivered either in person, on the client’s site, or remotely via Zoom. In this two-day course, attendees gain an understanding of the role of a Scrum Master in a SAFe enterprise. Unlike traditional Scrum Master training that focuses on the fundamentals of team-level Scrum, the SAFe Scrum Master course explores the role of the Scrum Master in the context of the entire enterprise, and prepares attendees to successfully plan and execute the Program Increment (PI), the primary enabler of alignment throughout all levels of a SAFe organization. This includes learning the key components of Agile at scale development, how Scrum is facilitated throughout the enterprise, and how to execute Iteration Planning. Attendees discover how to build high performing Agile teams by becoming a servant leader and coach, and how to coach those teams to deliver the maximum business value at scale. SAFe 5 Scrum Master (SSM) certification signifies that people are prepared to perform the role of Scrum Master in a SAFe environment, increasing their value to teams and organizations that are implementing SAFe. Prerequisites are not required. Class is Remote and all items are provided. Course price covers 10 students. When the number of students in a class exceeds 10, an additional fee per student is added. Max student count per course is 25 students to assure individual attention and retention of course material.

**Course Length:** 2 Days  
**Minimum Participants:** 2  
**Maximum Participants:** 25
### Leading SAFe Class

**Description:**

Instructor led training that can be delivered either in person, on the client’s site, or remotely via Zoom. During this two-day course, attendees gain the knowledge necessary to lead a Lean-Agile enterprise by leveraging the Scaled Agile Framework® (SAFe®) and its underlying principles derived from Lean, systems thinking, Agile development, product development flow, and DevOps.

Participants in the class gain insights into mastering Business Agility in order to thrive in the competitive market. They discuss how to establish team and technical agility and organize and re-organize around the flow of value. They also learn and practice the skills for supporting and executing PI Planning events and coordinating multiple Agile Release Trains (ARTs). Participants in the class explore the importance of adopting a customer-centric mindset and design thinking approach to agile product delivery. Learners also develop an understanding for implementing a Lean Portfolio Management function in their enterprise.

Attending the class prepares individuals to take the exam and become a certified SAFe® Agilist (SA). Prerequisites are not required. Class is Remote and all items are provided. Course price covers 10 students. When the number of students in a class exceeds 10, an additional fee per student is added. Max student count per course is 25 students to assure individual attention and retention of course material.

### SAFe for Teams

**Description:**

Instructor led training that can be delivered either in person, on the client’s site, or remotely via Zoom. Build the skills needed to become a high-performing team member of an Agile Release Train (ART)—and learn how to collaborate effectively with other teams—by becoming a SAFe® 5 Practitioner.

During this two-day course, gain an in-depth understanding of the ART, how it delivers value, and what you can do to effectively perform your role using Scrum, Kanban, and XP. Learn how to write stories and break down features, plan and execute iterations, and plan Program Increments. Finally, learn about the continuous delivery pipeline and DevOps culture, how to effectively integrate with other teams in the program, and what it takes to continuously improve the train. Prerequisites are not required. Class is Remote and all items are provided. Course price covers 10 students. When the number of students in a class exceeds 10, an additional fee per student is added. Max student count per course is 25 students to assure individual attention and retention of course material.

### Extra Students (Over 10)

**Description:**

Instructor led training that can be delivered either in person, on the client’s site, or remotely via Zoom. An additional charge per student for each student when the number of students in a class exceeds 10. The additional charge is per person above 10 and covers the cost of additional course licenses and course materials.
