### 1. IT PROGRAM MANAGER III

**Education:** B.A. or B.S. degree.

**Basic Experience:** Must have 15 years of IT experience, including at least 10 years of IT and/or telecommunications system management experience.

**Specialized Experience:** At least 10 years of direct supervision of IT software development, integration, maintenance projects, and/or telecommunications systems. Must be capable of leading projects that involve the successful management of teams composed of data processing and other information management professionals who have been involved in analysis, design, integration, testing, documenting, converting, extending, and implementing automated information and/or telecommunications systems.

**Duties:** Responsible for overseeing projects that involve software development, systems design & implementation, and database planning as well as hardware/infrastructure projects. Works with technical teams and IT leaders to continually clarify and refine project objectives, acceptance criteria, and work-plans. Responsible for creating IT project road-maps, risk management, budget management, and complex issue resolution. Provides oversight and management with the ability to: assemble project teams, identifying appropriate resources needed, developing schedules to ensure timely completion of project, communicating project status and issues to team and management, acting to reduce risk and resolve issues.

### 2. IT PROJECT MANAGER

**Education:** B.A. or B.S. degree.

**Basic Experience:** Must have 10 years of IT or telecommunications experience, including at least 5 years of IT software management experience.

**Specialized Experience:** At least 5 years of experience in direct supervision of IT software development, integration maintenance projects, and/or telecommunications management.

**Duties:** Performs day-to-day management of assigned delivery order projects that involve teams of data processing and other information system and management professionals who have previously been involved in analyzing, designing, integrating, testing, documenting, converting, extending, and implementing automated information and telecommunications systems. Demonstrates proven skills in those technical areas addressed by the delivery order to be managed. Organizes, directs, and coordinates the planning and production of all activities associated with assigned delivery order projects. Demonstrates writing and oral communication skills.
3. IT System Engineer – II

<table>
<thead>
<tr>
<th><strong>Education:</strong></th>
<th>B.A. or B.S. degree.</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Basic Experience:</strong></td>
<td>Must have a minimum of 4 years of experience.</td>
</tr>
<tr>
<td><strong>Specialized Experience:</strong></td>
<td>Performed requirements analysis for complex systems with multiple stakeholders. Decomposed and generated low-level requirements needed for implementation. Collaborated with business, technical, and mission stakeholders to develop the optimal solution to an ill-defined problem. Worked directly with end-users to elicit specified and derived user needs using exceptional communication skills. Worked directly with software development personnel to elicit and capture detailed system design information. Experience with integrating user-centered design principles into rapid software development.</td>
</tr>
<tr>
<td><strong>Duties:</strong></td>
<td>Collect, organize, synthesize, and capture mission, user, and system requirements from multiple stakeholders to inform a unified product strategy through user-centered design principles and systems engineering best practices. Participate in user engagement sessions with key stakeholders to design, deconflict, prioritize and validate product requirements at varying levels of fidelity. Document high-level product strategies to convey key features, functions, and capabilities in a prioritized roadmap. Generate user stories with clear acceptance criteria that trace to the product strategy / roadmap. Decompose product strategy into detailed requirements that may be supplemented by user-centered design artifacts.</td>
</tr>
</tbody>
</table>

4. IT Enterprise Architect II

<table>
<thead>
<tr>
<th><strong>Education:</strong></th>
<th>B.A. or B.S. degree.</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Basic Experience:</strong></td>
<td>Must have 3 to 5 years of experience serving in the role of Enterprise Architect responsible for guiding the modernization and evolution of enterprise systems and information infrastructure. Takes part in contributing to governance boards to ensure proposed projects and initiatives are in alignment with corporate strategy and objectives. Responsible for defining, documenting, and reviewing the proper implementation of architectures that achieve corporate strategy and business outcomes. Provides guidance and advice on enterprise business process change efforts and assist in the development and implementation of process re-engineering and IT enablement in support of workflows and operations.</td>
</tr>
<tr>
<td><strong>Specialized Experience:</strong></td>
<td>Responsible for the development and maintenance of architectural artifacts using industry standard EA Frameworks for enterprise, systems, data, and technical architectures. Advises leadership regarding systems and business processes evolution leveraging ‘as is’ and ‘to be’ architectures. Ensures systems development efforts comply with reference architectures and standards.</td>
</tr>
<tr>
<td><strong>Duties:</strong></td>
<td>Translates business strategy into concrete solutions, designs, architectures and supports the execution of the architectures in the support of strategy. Responsibilities include the creation of strategies aligning IT to the organization, development of IT strategies, identification, and analysis of the organization’s drivers to derive useful context, and analysis</td>
</tr>
</tbody>
</table>
of the current IT ecosystem to detect critical deficiencies and recommend solutions for improvement.

<table>
<thead>
