East Bay Partnership Labor Category Descriptions SIN 54151S

Applications Developer III

Minimum Education: Bachelors
Minimum Years of Experience: 5

Develop solutions using a wide range of full stack technologies. Participate in all aspects of testing, including test-driven development. Work closely with Architects, Analysts, Designers and other Engineers, with a focus on integrating components to support new feature development. Partner with architect for design and review of products, promotes and drives use of agile and DevOps methodologies and patterns, and contributes to defining and estimating timelines, costs, and feasibility for application development projects. Provides proof-of-concept or minimally viable product prototypes as needed, periodically reviews code from development teams, and serves as a coach and mentor to junior engineers.

Database Specialist II

Minimum Education: Bachelors
Minimum Years of Experience: 3

Administrates organization's database, using database management system to organize and store data. Ascertains user requirements, creates computer databases, and tests and coordinates changes. Interacts with development and end-user personnel to determine application data access requirements, transaction rates, volume analysis, and other pertinent data required to develop and maintain integrated databases. Ensures performance of database.

Database Specialist III

Minimum Education: Bachelors
Minimum Years of Experience: 5

Manages and maintains production and non-production databases. Responsible for standards and design of physical data storage, maintenance, access and security administration. Performs backup and recovery on Database Management Systems, configures database parameters and prototype designs against logical data models, and defines data repository requirements, data dictionaries and warehousing requirements. This position optimizes database access and allocates/re-allocates database resources for optimum configuration, database performance and cost.

May do Performance Tuning and Performance Improvements. Experience with many databases: IDMS, DB2, Oracle, ADABAS, SQL Server, etc.

IT Program Manager

Minimum Education: Bachelors

Minimum Years of Experience: 5

Responsible for managing the overall IT project portfolio. Develops the program strategy, supporting business case, and various enterprise-wide high-level project plans. Ensures integration of projects and adjusts project scope, timing, and budgets as needed, based on the needs of the business. Communicates with IT leadership, business leadership and IT Business Consultants to communicate program strategy, direction, and changes. Responsible for delivering all projects contained in the IT project portfolio on time, within budget and meeting the strategic and business requirements. Responsible for tracking key project milestones and recommending adjustments to Project Managers. Partners with senior leadership of the business community to identify and prioritize opportunities for utilizing IT to achieve the goals of the enterprise. Must possess extensive knowledge and expertise in the use of Project Management methodologies and tools.

IT Project Manager

Minimum Education: Bachelors

Minimum Years of Experience: 3

Responsible for overall coordination, status reporting and stability of complex and cross-functional project oriented work efforts. Manages multiple projects simultaneously. Establishes and implements project management processes and methodologies for the IT community to ensure projects are delivered on time, within budget, adhere to high quality standards and meet customer expectations. Responsible for tracking key project milestones and adjusting project plans and/or resources to meet the needs of customers. Partners with senior management of the business community to identify and prioritize opportunities for utilizing IT to achieve the goals of the enterprise. Must possess extensive knowledge and expertise in the use of Project Management methodologies and tools and understand human resources policies and practices and change management techniques.

Scrum Master

Minimum Education: Bachelors

Minimum Years of Experience: 3

The Scrum Master may facilitate or guide a software development product owner, team, and organization on how to use Agile/Scrum concepts, values, practices, and principles focusing on improving team effectiveness. The Scrum Master leads discussions and decision making and assists in mediation of conflict resolution.

IT Systems Analyst III

Minimum Education: Bachelors

Minimum Years of Experience: 5

Senior-level professional; able to independently accomplish complex requirements. Develops and evaluates new or existing complex systems. Consults with and advises users concerning efficient methods of automating processes. Works with users to define requirements and presents recommendations to automate processes to management. Provides user training for projects when appropriate. Performs analysis, design, and new construction of next generation IT applications. Responsible for understanding the needs of the customers and the realities of commercially available IT products and creating systems requirements that will allow implementation by the development team. Provides application design (including systems requirements), development, testing, and maintenance support of programmatic, administrative, and strategic analysis software applications. Knowledge and skills in identifying/fixing problems within existing software, designing/implementing new systems, and enhancing existing applications. Provides recommendations and solutions for complex problems throughout all phases of the Systems Development Life Cycle (SDLC). Performs configuration management, software integration, and interpretation of software test results, as well as recommending solutions.

IT Test Engineer II

Minimum Education: Bachelors

Minimum Years of Experience: 3

Leads the testing, debugging, refining of computer software to produce the required product, and prepares program-level and user-level documentation. Reviews user application system requirements documentation; designs, defines and documents unit and application test plans; transforms test plans into test scripts and executes those scripts. Ensures proper execution of test scripts and documentation of test results in test logs or defect tracking systems. Ensures that test designs and documentation support all applicable client, agency or industry standards.

IT Technical Consultant II

Minimum Education: Bachelors

Minimum Years of Experience: 5

Provides IT technical expertise in emerging information technology areas. Analyzes and develops effective solutions. Responsible for defining the software architecture, the detailed design and development of enterprise, client/server and N-tiered web-enabled applications. Assists customers to achieve a specific solution related to the organization's utilization of information technology products and services.

IT Subject Matter Expert

Minimum Education: Bachelors

Minimum Years of Experience: 5

Provides subject matter proficiency for Information Technology-related programs. Provides technical, managerial, and administrative direction for problem definition, analysis, requirements development and implementation for complex systems in the subject matter area. Makes recommendations and advises on system improvements, business processes, and/or optimization or maintenance efforts in the following specialties: information systems architecture; networking; telecommunications; automation; communications protocols; risk management; software; life-cycle management; and software development methodologies

Enterprise Solutions Specialist II

Minimum Education: Bachelors

Minimum Years of Experience: 5

Integrates a broad range of solutions in support of client requirements for IT projects. Formulates and defines system scope and objectives, develops or modifies processes to solve problems for computer systems and business and electronic interfaces to achieve desired results through the use of innovative technologies. Develops and applies advanced engineering and design methods, theories, and research techniques in the investigation and solution of complex and advanced system requirements, hardware/software interfaces, and applications, and solutions.

Enterprise Solutions Specialist III

Minimum Education: Bachelors

Minimum Years of Experience: 7

Contributes overall strategic vision and integrates a broad range of solutions in support of client requirements for IT projects. Formulates and defines system scope and objectives, develops or modifies processes to solve complex problems for computer systems and business and electronic interfaces to achieve desired results through the use of innovative technologies. Develops and applies advanced engineering and design methods, theories, and research techniques in the investigation and solution of complex and advanced system requirements, hardware/software interfaces, and applications, and solutions. Responsible for design, development, engineering, integration, and architecture.

IT Business Analyst II

Minimum Education: Bachelors

Minimum Years of Experience: 5

Conducting examinations of IT system and program business requirements to assess needs, collect information, and identify alternative methods and solutions. Provides research and analytical support to strategic planning, training development, problem solving, quality management, financial analysis, and business process reengineering. Analyzes process and re-engineering, with an understanding of technical problems and proposes IT business solutions. Focuses on developing and improving business processes, both within the technology and business organizations. Has a strong understanding of information systems, business processes, the key drivers and measures of success for the business, and the short and long-term direction of the business and technology

Information Security Subj Matter Expert II

Minimum Education: Bachelors

Minimum Years of Experience: 5

Responsible for ensuring that the organization's networks, as well as information, is secure. Employs continuous advanced monitoring of intrusion detection/prevention and other perimeter defense devices. Ensures appropriate data encryption (in transit and at rest) levels based on protection needs of targeted data. Maintains awareness of system/network cybersecurity posture to include vulnerability scanning to facilitate application of quick and effective corrective measures, while ensuring configuration management requirements are met. Provides technical knowledge and information assurance analysis support to include cybersecurity assessments of applications, operating systems, internet-facing interfaces, intranet, and other interconnections. Strong knowledge and experience of best practices as well as appropriate authoritative guidance for physical security, network cybersecurity, security risk assessments, critical infrastructure protection, continuity and contingency planning, emergency preparedness, security awareness, and security training. Provides in-depth analysis of existing systems vulnerabilities including possible intrusion/entry points, resource manipulation, denial of service, and/or destruction of resources. Provides technical support and analysis to document organizational information protection framework and supports policy and procedure preparation and implementation. Leads teams and has some latitude for unreviewed actions and decision making.

In addition, certifications, professional licenses, and vocational technical training may be substituted for experience or education with the written approval of the ordering activity.

Degree	Experience Equivalence*	Other Equivalence
Associate's	1 year relevant experience	Vocational or technical training in work-related field
Bachelor's	Associate's degree + 2 years relevant experience, or 4 years relevant experience	Professional certification
Master's	Bachelor's + 2 years relevant experience, or Associate's + 4 years relevant experience	Professional license
Doctorate	Master's + 2 years relevant experience, or Bachelor's + 4 years relevant experience	

* Successful completion of each year of higher education that has not yet resulted in a degree may be counted 1-for-1 for a year of experience.
