Authorized Federal Acquisition Service Information Technology Schedule

Pricelist General Purpose Commercial Information Technology Equipment, Software and Services

Contractor has been awarded all Special Item Numbers under the cooperative purchasing program.

SIN 54151S - Information Technology (IT) Professional Services

- FPDS Code D301 IT Facility Operation and Maintenance
- FPDS Code D302 IT Systems Development Services
- FPDS Code D303 IT Data Entry Services
- FPDS Code D306 IT Systems Analysis Services
- FPDS Code D307 Automated Information Systems Design and Integration Services
- FPDS Code D308 Programming Services
- FPDS Code D309 Information and Data Broadcasting or Data Distribution Services
- FPDS Code D310 IT Backup and Security Services
- FPDS Code D311 IT Data Conversion Services
- FPDS Code D314 IT System Acquisition Support Services. Includes preparation of statement of work, benchmarks, specifications, etc.
- FPDS Code D316 IT Network Management Services
- FPDS Code D317 Automated News Services, Data Services, or Other Information Services. Buying data, the electronic equivalent of books, periodicals, newspapers, etc.
- FPDS Code D399 Other Information Technology Services, Not Elsewhere Classified

Peace Haven Corp.

INFORMATION FOR ORDERING ACTIVITIES
APPLICABLE TO ALL SPECIAL ITEM NUMBERS

CUSTOMER INFORMATION

1a. Table of awarded special item number(s) with appropriate cross-reference to item descriptions and awarded price(s).

Special Item No. 54151S – IT Professional Services
Special Item No. OLM - Order-Level Materials (OLMs)

1b. Identification of the lowest priced model number and lowest unit price for that model for each special item number awarded in the contract. This price is the Government price based on a unit of one. Exclusive of any quantity dollar volume, prompt payment or any other concession affecting the price. Those contracts that have unit prices based on the geographic location of the customer should show the range of the lowest price and cite the areas to which the prices apply.

Not Applicable

1c. If the contractor is proposing hourly rates. A description of all corresponding job titles, experience, functional responsibility and education for those types of employees or subcontractors who will perform services shall be provided. If hourly rates are not applicable, indicate “Not applicable” for this item.

See GSA pricing beginning on page 18

2. Maximum order.

Special Item No. 54151S IT Professional Services $500,000.00
(HACS) Special Item No. OLM Order-Level Materials (OLMs) $100,000.00

3. Minimum order:

Special Item No. 54151S IT Professional Services $100.00
(HACS) Special Item No. OLM Order-Level Materials (OLMs) $100.00

4. Geographic coverage (delivery area)

Worldwide

5. Point(s) of production (city, county, and State or foreign country)

Peace Haven Federal, LLC
205 Van Buren St Ste 120 Herndon, Va 20170
Ph. (703) 992-4806
6. Discount from list prices or statement of net price.

Discount1 : 3 % if Payment is made within 10 days

Discount2 : 2 % if Payment is made within 20 days

7. Quantity discounts

3% Discount on orders over $150K

8. Prompt payment Terms

Net 30 days

9a. Notification that Government purchase cards are accepted at, or below the micro-purchase threshold.

Government purchase card is accepted at, or below the micro-purchase threshold.

9b. Notification that Government purchase cards are accepted or are not accepted above the micro-purchase threshold

Yes

10. Foreign items (list items by country of origin)

None

11a. Time of delivery (Contractor insert number of days)

TBD between the Ordering Activity and the Contractor

11b. Expedited delivery. The Contractor will insert the sentence “Items available for expedited delivery are noted in this price list,” under this heading The Contractor may use a symbol of its choosing to highlight items in its price lists that have expedited delivery.

TBD between the Ordering Activity and the Contractor

11c. Urgent requirement. The Contractor will note in its price list under the “Urgent Requirements” clause of its contract and advise agencies that they can also contact the Contractor’s representative to effect a faster delivery.

TBD between the Ordering Activity and the Contractor

12. F.O.B. point(s)

FOB Destination

13a. Ordering address(es)

Peace Haven Federal, LLC
205 Van Buren St Ste 120 Herndon, VA 20170
Ph. (703) 992-4806
13b. Ordering procedures: For supplies and services, the ordering procedures, information on Blanket Purchase Agreements (BPA’s) are found in Federal Acquisition regulation (FAR) 8.405-3.

14. **Payment address(es)**

Peace Haven Federal, LLC  
205 Van Buren St Ste 120 Herndon, VA 20170  
Ph. (703) 992-4806

15. **Warranty provision.**

N/A

16. **Export packing charges, if applicable**

N/A

17. **Terms and conditions of Government purchase acceptance (any thresholds above the micro-purchase level) Purchase at, or below the micro purchase threshold**

N/A

18. **Terms and conditions of rental, maintenance, and repair (if applicable)**

N/A

19. **Terms and conditions of installation (if applicable)**

N/A

20. **Terms and conditions of repair parts indicating date of parts price lists and any discounts from list price (if applicable)**

N/A

20a. **Terms and conditions for any other services (if applicable)**

N/A

21. **List of service distributions points (if applicable)**

N/A

22. **List of participating dealers (if applicable)**

N/A

23. **Preventative maintenance (if applicable)**

N/A
24a. Special attributes such as environmental attributes (e.g. recycled content, energy efficiency, and/or reduced pollutants)

N/A

24b. If applicable, indicate that Section 508 compliance information is available on Electronic and Information Technology (EIT) supplies and services and show where full details can be found (e.g. contractor’s website or other location.) The EIT standards can be found at: [www.Section508.gov](http://www.Section508.gov)

25. Data Universal Numbering Systems (DUNS) number

079267481

Yes

LABOR CATEGORY DESCRIPTIONS

A. Subject Matter Experts

Subject Matter Expert - Artificial Intelligence

The Artificial Intelligence Subject Matter Expert will be responsible for planning and designing an organization's systems infrastructure, including the implementation and design of artificial intelligence. The expert will develop, modify, test and maintain the technology. The expert will have extensive knowledge of Natural Language Process (NLP) and machine learning. The expert will diagnose problems and provides recommendations for improvement on existing and new technology. The expert will need excellent interpersonal skills to ensure effective collaboration with team members.

Education and Experience Requirements:
- BS Degree in computer science or equivalent
- 7 years of experience in Artificial Intelligence
Certifications: DoD 8570 Certification

Subject Matter Expert – IoT Robotics

The IoT Robotics Subject Matter Expert will be responsible for continuous integration, automatic deployment of applications and securing development. The expert must have expert knowledge in industry standard compliance. The expert will verify and validate systems and meet internal and external requirements. The expert will diagnose problems and provides recommendations for improvement on existing and new systems. The expert will work collaboratively with the IoT Robotics team.

Education and Experience Requirements:
- BS Degree in computer science or equivalent
- 7 years of experience in IoT Robotics
Certifications: DoD 8570 Certification

Subject Matter Expert – DevSecOps

The DevSecOps Subject Matter Expert will support the continuous integration and continuous deployment activities for the engineering team. The team will be supported in engineering playbooks, training and developing standards and guidelines for engineers in their use of Ansible. The expert will verify and validate the security systems. The expert should have the ability to explain concepts and collaborate with the DevOps team. The expert should have extensive experience in open source technologies and broad knowledge of technology used by DevOps engineers focusing on security. The expert should have comprehensive knowledge of in cloud technology and infrastructure automation. The DevSecOps Subject Matter Expert should have expansive experience with DevOps, and automated tools such as Jenkins, Puppet, Ansible and/or Chef.

Education and Experience Requirements:
- BS Degree in computer science or equivalent
- 7 years of experience in DevSecOps
Certifications: DoD 8570 Certification – Security+ CE
B. Success Manager

**Success Manager - Artificial Intelligence**

The Artificial Intelligence Success Manager will be responsible for planning and designing an organization's systems infrastructure, including the implementation and design of artificial intelligence. The manager will assist in the development, modification, testing and maintenance of the technology. The manager will have extensive hands on experience and knowledge of Natural Language Process (NLP) and machine learning. The manager will diagnose problems and provides recommendations for improvement on existing and new technology. The manager should have excellent soft and leadership skills.

**Education and Experience Requirements:**
- BS Degree in computer science or equivalent
- MS Degree in Artificial Intelligence
- 5 years of experience in Artificial Intelligence

**Success Manager – IoT Robotics**

The IoT Robotics Success Manager will be responsible for overseeing continuous integration, automatic deployment of applications and securing development. The manager must have expert knowledge in industry standard compliance. The manager will verify and validate systems and meet internal and external requirements. The manager will diagnose problems and provides recommendations for improvement on existing and new systems. The manager will have experience in advocating top programing practices and standards. The manager will work with business partners and collaboratively work on development with them for customer-focused and maintainable solutions. The manager should have excellent soft and leadership skills.

**Education and Experience Requirements:**
- BS Degree in computer science or equivalent
- MS Degree in IT Management or equivalent
- 5 years of experience in IoT Robotics

**Success Manager – DevSecOps**

The DevSecOps Success Manager will manage the continuous integration and continuous deployment activities for the engineering team. The team will be supported and given guidelines in engineering playbooks, training and developing standards and guidelines for engineers in their use of Ansible. The manager will verify and validate the security systems. The manager will have extensive knowledge and experience in open source technologies and security technology used by DevOps engineers. The manager should have comprehensive knowledge of in cloud technology and infrastructure automation. The DevSecOps Manager should have expansive experience with DevOps, and automated tools such as Jenkins, Puppet, Ansible and/or Chef. The manager should have excellent soft and leadership skills.

**Education and Experience Requirements:**
- BS Degree in computer science or equivalent
- MS Degree in IT Management or equivalent
- 5 years of experience in DevSecOps
C. Software Engineer - Artificial Intelligence

Software Engineer III – Artificial Intelligence

The engineer will be responsible for planning and designing an organization's artificial intelligence infrastructure, including the implementation and design of hardware and software. The engineer will analyze, develop, modify, test and maintain the system. The engineer will design, develop and test new features in the applications. The engineer will be responsible for regular communication with others involved in the development process. The engineer will implement, test, and bug-fix functionality. The engineer will be responsible for the design and implementation of software projects. The engineer will provide support to end users. The engineer will design, build, and maintain efficient and reliable technology.

Education and Experience Requirements:
• BS Degree in computer science or equivalent
• 5 years of experience in Artificial Intelligence

Software Engineer II – Artificial Intelligence

The engineer will be responsible for planning and designing an organization's artificial intelligence infrastructure, including the implementation and design of hardware and software. The engineer will analyze, develop, modify, test and maintain the system. The engineer will design, develop and test new features in the applications. The engineer will be responsible for regular communication with others involved in the development process. The engineer will implement, test, and bug-fix functionality. The engineer will be responsible for the design and implementation of software projects. The engineer will provide support to end users. The engineer will design, build, and maintain efficient and reliable technology.

Education and Experience Requirements:
• BS Degree in computer science or equivalent
• 4 years of experience in Artificial Intelligence

Software Engineer I – Artificial Intelligence

The engineer will be responsible for planning and designing an organization's artificial intelligence infrastructure, including the implementation and design of hardware and software. The engineer will analyze, develop, modify, test and maintain the system. The engineer will design, develop and test new features in the applications. The engineer will be responsible for regular communication with others involved in the development process. The engineer will implement, test, and bug-fix functionality. The engineer will be responsible for the design and implementation of software projects. The engineer will provide support to end users. The engineer will design, build, and maintain efficient and reliable technology.

Education and Experience Requirements:
• BS Degree in computer science or equivalent
• 3 years of experience in Artificial Intelligence

Certifications: DoD 8570 Certification
D. Software Engineer- IoT Robotics

Software Engineer III – IoT Robotics

The engineer will develop and supplement solutions which account for scalability and optimize performance. The engineer will produce high quality production-ready code in an agile environment. The engineer will design and implement back end and front end components and services. The engineer will support top programming practices and standards. The engineer will collaborate closely with the team to build new features and infrastructure.

Education and Experience Requirements:
• BS Degree in computer science or equivalent
• 5 years of experience in Artificial Intelligence

Software Engineer II – IoT Robotics

The engineer will develop and supplement solutions which account for scalability and optimize performance. The engineer will produce high quality production-ready code in an agile environment. The engineer will design and implement back end and front end components and services. The engineer will support top programming practices and standards. The engineer will collaborate closely with the team to build new features and infrastructure.

Education and Experience Requirements:
• BS Degree in computer science or equivalent
• 4 years of experience in Artificial Intelligence

Software Engineer I – IoT Robotics

The engineer will develop and supplement solutions which account for scalability and optimize performance. The engineer will produce high quality production-ready code in an agile environment. The engineer will design and implement back end and front end components and services. The engineer will support top programming practices and standards. The engineer will collaborate closely with the team to build new features and infrastructure.

Education and Experience Requirements:
• BS Degree in computer science or equivalent
• 3 years of experience in Artificial Intelligence
E. Software Engineer- DevSecOps

Software Engineer III – DevSecOps

The engineer will have demonstrated skill with at least one or more configuration management/scripting technology (such as Ansible/Chef/Puppet). The engineer will have at least 5 years of hands-on experience with CI/CD tools. The engineer will develop and automate repeatable tasks. The engineer will implement performance tuning of infrastructure components. The engineer will have broad experience with software security, secure coding, or software assurance tools and techniques.

Education and Experience Requirements:
• BS Degree in computer science or equivalent
• 5 years of experience in DevOps

Software Engineer II – DevSecOps

The engineer will work with customers to troubleshoot the platform and issues related to integrations with other internal systems. The engineer will integrate and automate the program’s security posture. The engineer will have experience documenting, crafting, and testing APIs. The engineer will monitor hardware and container metrics for the purposes of maintaining cluster health and identifying thresholds for scaling. The engineer will develop and automate repeatable tasks. The engineer will implement performance tuning of infrastructure components.

Education and Experience Requirements:
• BS Degree in computer science or equivalent
• 4 years of experience in DevOps

Software Engineer I – DevSecOps

The engineer will work with customers to troubleshoot the platform and issues related to integrations with other internal systems. The engineer will integrate and automate the program’s security posture. The engineer will monitor hardware and container metrics for the purposes of maintaining cluster health and identifying thresholds for scaling. The engineer will develop and automate repeatable tasks. The engineer will implement performance tuning of infrastructure components.

Education and Experience Requirements:
• BS Degree in computer science or equivalent
• 3 years of experience in DevOps
