**Service Contract Labor Standards:** The Service Contract Labor Standards (SCLS), formerly known as the Service Contract Act (SCA), is applicable to this contract as it applies to the entire Multiple Award Schedule (MAS) and all services provided. While no specific labor categories have been identified as being subject to SCLS/SCA due to exemptions for professional employees (FAR 22.1101, 22.1102 and 29 CRF 541.300), this contract still maintains the provisions and protections for SCLS/SCA eligible labor categories. If and / or when the contractor adds SCLS/SCA labor categories to the contract through the modification process, the contractor must inform the Contracting Officer and establish a SCLS/SCA matrix identifying the GSA labor category titles, the occupational code, SCLS/SCA labor category titles and the applicable WD number. Failure to do so may result in cancellation of the contract.
**Labor Category Descriptions**

**Program Manager**

Responsibilities: Directs all phases of programs from inception through completion. Responsible for the cost, schedule and technical performance of company programs or subsystems of major programs. Participates in the negotiation of contract and contract changes. Coordinates the preparation of proposals, business plans, proposal work statements and specifications, operating budgets and financial terms/conditions of contract. Acts as primary customer contact for program activities, leading program review sessions with customer to discuss cost, schedule, and technical performance. Establishes design concepts, criteria and engineering efforts for product research, development, integration and test. Develops new business or expands the product line with the customer. Establishes milestones and monitors adherence to master plans and schedules, identifies program problems and obtains solutions, such as allocation of resources or changing contractual specifications. Directs the work of employees assigned to the program from technical, manufacturing, and administrative areas.

**Education:** Master’s Degree

**Minimum Experience:** 16 years

---

**Project Manager**

Responsibilities: Responsible for all aspects of project performance; manages and supervises personnel; oversees the successful completion of assigned tasks; assists the Program Manager in working with the Government Contracting Officer and COR. Under the guidance of the Program Manager, responsible for the overall management of the specific task.

**Education:** Bachelor’s Degree,

**Minimum Experience:** 10 years

---

**Application Engineer**

Responsibilities: Analyzes functional business applications and design specifications for functional activities. Translates detailed design into computer software. Tests, debugs and refines the computer software to produce the required product. Prepares program level and user level documentation. Enhances software to reduce operating time or improve efficiency.

**Education:** Master’s Degree

**Minimum Experience:** 10 years

---

**QA Manager**

---

5
**Responsibilities:** Performs detailed analysis of error propagation and maintains quality assurance statistics. Determines resources required for quality control. Conducts formal and informal reviews.

**Education:** Bachelor’s Degree

**Minimum Experience:** 10 years

---

**QC Specialist**

**Responsibilities:** Reviews work products for correctness, reviews program documentation to assure government standards/requirements are adhered to. Coordinates with the Project Manager and the Quality Assurance Manager to ensure user satisfaction.

**Education:** Bachelor’s Degree

**Minimum Experience:** 6 years

---

**Technical Lead**

**Responsibilities:** Supports the design of technical project specifications for the implementation of application software projects and database development projects. They support the day-to-day technical activities of the project team and ensure the standard system methodologies are employed. They also perform detailed software design and detailed database conversion design and are directly involved in the coding and implementation of complex and strategic portions of application software and database conversion projects. They are proficient in COTS software products; web, desktop, and server software development languages; data formats; and other technologies. They design and develop QA/QC programs and support design and code reviews, database reviews, and other QA/QC activities throughout the project life cycle. They apply subject matter expertise to design, develop, and deliver training content and supporting technologies, leveraging adult learning methodologies.

**Education:** Bachelor’s Degree

**Minimum Experience:** 10 years

---

**Software Testing Technician**

**Responsibilities:** Design, develop, implement, and maintain test automation frameworks to be used by development and test engineers using C# as a primary programming language. Work with a team of dedicated software engineers and product engineers to design and author test cases for unit, functional, performance, scalability, and durability testing based on user requirements. Collaborate with software engineers, product engineers, and other stakeholders to build and test functionality. Assist in determining product quality and release readiness. Develop the integration tests in Java/Python/SOAPUI. Deploy and schedule the integration tests to run daily and share status in an easy-to-understand manner. Manage the suite of integration tests; refactor and re-engineer them as needed. Manage the integration test framework and dashboards. Drive best practices for test driven development

**Education:** Bachelor’s Degree
