**Service Contract Labor Standards**
The Service Contract Labor Standards (SCLS), formerly known as the Service Contract Act (SCA), is applicable to this contract as it applies to the entire Multiple Award Schedule (MAS) and all services provided. While no specific labor categories have been identified as being subject to SCLS/SCA due to exemptions for professional employees (FAR 22.1101, 22.1102 and 29 CRF 541.300), this contract still maintains the provisions and protections for SCLS/SCA eligible labor categories. If and/or when the contractor adds SCLS/SCA labor categories to the contract through the modification process, the contractor must inform the Contracting Officer and establish a SCLS/SCA matrix identifying the GSA labor category titles, the occupational code, SCLS/SCA labor category titles and the applicable WD number. Failure to do so may result in cancellation of the contract.
Labor Category Descriptions:

Sr. Web Services Engineer/Systems Engineer III

**Minimum years of Experience:** Seven (7) years of relevant experience

**Functional Responsibility:** Performs a variety of complex project tasks applied to specialized technology problems. Tasks involve integration of electronic processes or methodologies to resolve total system problems or technology problems. Applies analytical and systematic approaches in the resolution of problems of work floor, organization, and planning. Directs and assists system engineers in the application of system engineering principles to the solutions of secure system design problems. Works closely with other IT groups and customers to define the system design and user interface based on customer needs and objectives. Participates in all phases of the development and implementation process and may act as a project manager on special projects. Ensures the integration of the web services and all other supporting systems.

Systems Architect Mid-Level

**Minimum years of Experience:** Seven (7) years of relevant experience.

**Functional Responsibility:** Establishes system information requirements using analysis of the information engineer(s) in the development of enterprise-wide or large-scale information systems. Designs architecture to include the software, hardware, and communication to support the total requirements and interfaces. Ensures these systems are compatible and in all compliance with the standards for open systems. Evaluates analytically and systematically problems of workflows; organization, and planning and develops appropriate

**Minimum Education:** Bachelor’s Degree

Systems Engineer I

**Minimum years of Experience:** Five (5) years of relevant experience.

**Functional Responsibility:** Performs a variety of complex project tasks applied to specialized technology programs. Tasks involve integration of electronic processes or methodologies to resolve total system problems or technology problems. Applies analytical and systematic approaches in the resolution of problems of workflow, organization, and planning. Directs and assists system engineers in the application of system engineering principles to the solution of secure systems design problems.

**Minimum Education:** Bachelor’s Degree

Web Services/System Engineer II

**Minimum years of Experience:** Five (5) years of relevant experience.

**Functional Responsibility:** Performs a variety of complex project tasks applied to specialized technology problems. Tasks involve integration of electronic processes or methodologies to resolve total system problems or technology problems. Works closely with other IT groups and customers to define the system design and user interface based on customer needs and objectives. Participates in all phases of the development and implementation process and may act as a project manager on special projects. Ensures the integration of the web services and all other supporting systems. Responsible for system tuning, optimization of information/data processing, maintenance, and support of the product environment.

**Minimum Education:** Bachelor’s Degree
