</table>

OLM - Any proposed OLMs must be in support of the order and shall not exceed 33.33% of the total order value.

This maximum order threshold is a dollar amount at which it is suggested that the ordering agency request higher discounts from the contractor before issuing the order. The contractor may: (1) Offer a new lower price, (2) Offer the lowest price available under the contract, or (3) Decline the order within five (5) days. In accordance with the Maximum Order provisions contained in the Schedule, a delivery order may be placed against the Schedule contract even though it exceeds the maximum order threshold.

3. MINIMUM ORDER LIMITATION: $100

4. GEOGRAPHIC COVERAGE (DELIVERY AREA): The geographic scope of this contract is the 48 contiguous United States and District of Columbia.

5. POINT OF PRODUCTION: United States

6. BASIC DISCOUNT: Prices shown are NET Prices; Basic Discounts have been deducted

7. DISCOUNTS: Additional 1% discount for each individual order of $500,000 or more.

8. PROMPT PAYMENT TERMS: Net 30 Days from receipt of invoice or date of acceptance, whichever is later.

9. FOREIGN ITEMS: None
10a. **TIME OF DELIVERY**: Not applicable to professional services.

LABOR CATEGORIES DESCRIPTIONS
SIN 518210C Cloud Related IT Professional Services

Cloud Analyst - I
Analyze business requirements to assess needs, collect information, and identify alternative methods and solutions for implementation of cloud solutions. Develop project documentation and test work units for cloud information systems according to project specifications. Assist with developing and documenting new/redesigned business processes in a cloud environment.

Education - Bachelor’s Degree
Minimum Experience – 1 Year

Cloud Analyst - II
Analyze business requirements to assess needs, collect information, and identify alternative methods and solutions for implementation of cloud solutions. Develop project documentation and assist with test execution and documentation, including executing and documenting test plans, scripts and test results. Assist with developing and documenting new/redesigned business processes in a cloud environment. Provide guidance and oversight to more junior team members.

Education - Bachelor’s Degree
Minimum Experience – 4 Years

Cloud Analyst - III
Lead efforts to identify and analyze business requirements to assess needs, collect information, and identify alternative methods and solutions for implementation of cloud solutions. Review and develop project documentation and assist with test execution and documentation, as required. Develop and document new/redesigned business processes in a cloud environment. Provide guidance and oversight to more junior team members.

Education - Bachelor’s Degree
Minimum Experience – 8 Years
Cloud Developer I
Support cloud development and migration efforts utilizing a wide range of tools to implement/re-implement systems in a cloud architecture. Understand system requirements and support testing activities when needed.

Education - Bachelor’s Degree
Minimum Experience – 1 Year

Cloud Developer II
Applies experience in cloud development and migration to solve complex business problems. Utilize a wide range of tools to implement/re-implement systems in a cloud architecture. Design cloud-based database schemas that provide maximum flexibility for the interrogation of data. Partner with architect for design and review of products, promotes and drives use of agile and DevOps methodologies and patterns, and contributes to defining and estimating timelines, costs, and feasibility for cloud development projects.

Education - Bachelor’s Degree
Minimum Experience – 4 Years

Cloud Developer III
Applies expertise in cloud development and migration to solve complex business problems. Utilize a wide range of tools to implement/re-implement systems in a cloud architecture. Design cloud-based database schemas that provide maximum flexibility for the interrogation of data. Partner with architect for design and review of products, promotes and drives use of agile and DevOps methodologies and patterns, and contributes to defining and estimating timelines, costs, and feasibility for cloud development projects. Provides proof-of-concept or minimally viable product prototypes as needed, periodically reviews code from development teams, and serves as a coach and mentor to junior cloud developers.

Education - Bachelor’s Degree
Minimum Experience – 8 Years

Cloud Engineer I
Supports technical analysis and design of cloud-based applications. Work closely with the Program Manager and Cloud Architect to effectively build the application according to requirements and deliver high quality results.

Education - Bachelor’s Degree
Minimum Experience – 1 Year

Cloud Engineer II
Provides technical analysis, design, and development of cloud-based applications. Applies experience in cloud software development to solve complex business problems. Adept at migrating systems to a cloud architecture from disparate platforms and utilizing a wide range of tools to implement/re-implement systems in a cloud architecture. Work closely with the Program or Project Manager and Cloud Architect to interpret business requirements, effectively design and execute on cloud strategy, and deliver high quality results. Must be able to communicate technical and non-technical information clearly, answer technical questions from customers, and be able provide efficient cloud solutions to problems.
Cloud Engineer III
Provides technical leadership in the analysis, design, and development of cloud-based applications. Applies expertise in cloud software development to solve complex business problems. Adept at migrating systems to a cloud architecture from disparate platforms and utilizing a wide range of tools to implement/re-implement systems in a cloud architecture. Partners with the Program or Project Manager and Cloud Architect to interpret business requirements, provide guidance to technical teams, effectively design and execute on cloud strategy according to requirements, and deliver high quality results. Must be able to communicate technical and non-technical information clearly, answer technical questions from customers, and be able provide efficient technical solutions to problems.

Education - Bachelor’s Degree
Minimum Experience – 8 Years

Cloud IT Specialist I
Provides requirement analysis, systems design, development, installation, testing, system certification and accreditation, and/or operational support for cloud-based systems. Performs basic analysis of alternatives, systems design, integration, testing, and problem diagnosis/resolution.

Education - Bachelor’s Degree
Minimum Experience – 1 Year

Cloud IT Specialist II
Provides requirement analysis, systems design, development, installation, testing, system certification and accreditation, and/or operational support for cloud-based systems. Performs analysis of alternatives, systems design, integration, testing, and problem diagnosis/resolution. Provides business, functional, and/or technical leadership, reviews of work products, and makes business, functional, and/or technical recommendations, as needed, for changes in the supported cloud architecture. Assist in ensuring operational readiness by providing functional or technical expertise in developing and modifying cloud-based applications.

Education - Bachelor’s Degree
Minimum Experience – 4 Years

Cloud IT Specialist III
Provides requirement analysis, systems design, development, installation, testing, system certification and accreditation, and/or operational support for cloud-based systems. Performs analysis of alternatives, systems design, integration, testing, and problem diagnosis/resolution. Provides business, functional, and/or technical leadership, reviews of work products, and makes business, functional, and/or technical recommendations, as needed, for changes in the supported cloud architecture. Assist in ensuring operational readiness by providing functional or technical expertise in developing and modifying cloud-based applications. May prepare cost-benefit and return-on investment analysis as input to broader decision on cloud-based systems and tools. Provides coaching and support to other Cloud specialists. Support design of client's Cloud...
environments and provides leadership in infrastructure migration methodologies and techniques including mass app movements into the cloud.

Education - Bachelor’s Degree
Minimum Experience – 8 Years

Cloud Program Manager III
Responsible for coordinating, defining, staffing, and managing single Cloud program in accordance with client requirements and company guidelines. Directs, organizes, and monitors information technology-cloud services provided by team. Responsible for meeting program cost, schedule, and performance objectives. Works with the project business owner and/or executive to oversee delivery performance, ensure delivery quality and report schedule, cost, and execution performance. Organizes, directs, and coordinates the planning and production of all contract support activities.

Education - Bachelor’s Degree
Minimum Experience – 10 Years

Cloud Program Manager IV
Responsible for coordinating, defining, staffing, and managing large Cloud program(s) in accordance with client requirements and company guidelines. Directs, organizes, and monitors information technology-cloud services provided by team. Responsible for meeting program cost, schedule, and performance objectives. Works with the project business owner and/or executive to oversee delivery performance, ensure delivery quality and report schedule, cost, and execution performance. Has full accountability for the planning and production of all contract support activities.

Education - Bachelor’s Degree
Minimum Experience – 12 Years

Cloud Project Manager
Responsible for coordinating, defining, staffing, and managing single Cloud project(s) in accordance with client requirements and company guidelines. Directs, organizes, and monitors information technology-cloud services provided by team. Works with the program manager or project business owner to oversee delivery performance, ensure delivery quality and report schedule, cost, and execution performance.

Education - Bachelor’s Degree
Minimum Experience – 6 Years

Cloud Project Manager II
Responsible for coordinating, defining, staffing, and managing single or multiple Cloud project(s) in accordance with client requirements and company guidelines. Directs, organizes, and monitors information technology-cloud services provided by team. Works with the program manager or project business owner to oversee delivery performance, ensure delivery quality and report schedule, cost, and execution performance. Organizes, directs, and coordinates the planning and production of all contract support activities.

Education - Bachelor’s Degree
Minimum Experience – 8 Years

Cloud Subject Matter Expert I
Provides subject matter proficiency for cloud-based programs. Provides technical and functional direction for problem definition, analysis, requirements development and implementation for complex systems. Makes recommendations and advises on technical improvements, business processes, and/or optimization or maintenance efforts in the following specialties: cloud architecture; networking; automation; communications protocols; and risk management. Plays a critical role in performing cloud readiness assessments, transitioning applications to the cloud, and building systems that are cost efficient and employ security practices at the highest degrees of compliance with industry standards. Serve as a subject matter expert in Cloud Strategy, Cloud Migration Assessments and Roadmap, Cloud Infrastructure & Engineering, and Cloud Managed Services.

Education - Bachelor’s Degree
Minimum Experience – 8 Years

Cloud Subject Matter Expert II
Provides technical, functional, managerial, and administrative direction for problem definition, analysis, requirements development and implementation for complex systems. Makes recommendations and advises on technical improvements, business processes, and/or optimization or maintenance efforts in the following specialties: cloud architecture; networking; automation; communications protocols; and risk management. Plays a critical role in performing cloud readiness assessments, transitioning applications to the cloud, and building systems that are cost efficient and employ security practices at the highest degrees of compliance with industry standards. Serve as a subject matter expert in Cloud Strategy, Cloud Migration Assessments and Roadmap, Cloud Infrastructure & Engineering, and Cloud Managed Services.

Education - Bachelor’s Degree
Minimum Experience – 10 Years

Cloud Subject Matter Expert III
Provides thought leadership and best practices within the Cloud domain. Makes recommendations and advises on technical improvements, business processes, and/or optimization efforts in the following specialties: cloud architecture; networking; automation; communications protocols; and risk management. Plays a critical role in performing cloud readiness assessments, transitioning applications to the cloud, and building systems that are cost efficient and employ security practices at the highest degrees of compliance with industry standards. Serve as a subject matter expert in Cloud Strategy, Cloud Migration Assessments and Roadmap, Cloud Infrastructure & Engineering, and Cloud Managed Services.

Education - Bachelor’s Degree
Minimum Experience – 12 Years

Cloud Subject Matter Expert IV
Provides industry-leading trends, thought leadership, best practices, and proven, repeatable success within the Cloud domain. Trusted partner and expert on Cloud Strategy, Cloud Migration Assessments and Roadmap, Cloud Infrastructure & Engineering, and Cloud Managed Services.
Education - Bachelor’s Degree
Minimum Experience – 15 Years

Enterprise Cloud Architect I
Provides leadership in infrastructure migration methodologies and techniques including mass app movements into the cloud. Provides design of client Cloud environments, leverages technical cloud architectural knowledge, and focuses on delivery of Cloud Strategies. Prepares reports, studies, and documentation, delivers presentations, and drives to technical decisions.

Education - Bachelor’s Degree
Minimum Experience – 10 Years

Enterprise Cloud Architect II
Provides leadership in infrastructure migration methodologies and techniques including mass app movements into the cloud. Provides design of client Cloud environments, leverages technical cloud architectural knowledge, and focuses on delivery of Cloud Strategies. Prepares reports, studies, and documentation, delivers presentations, and drives to technical decisions. Provides coaching to junior Enterprise Cloud Architects.

Education - Bachelor’s Degree
Minimum Experience – 12 Years

Enterprise Cloud Architect III
Provides leadership in infrastructure migration methodologies and techniques including mass app movements into the cloud. Provides design of client Cloud environments, leverages technical cloud architectural knowledge, and focuses on delivery of Cloud Strategies. Prepares reports, studies, and documentation, delivers presentations, and drives to technical decisions. Provides coaching to junior Enterprise Cloud Architects. Delivers white papers, presentations, and leads Cloud technology forums.

Education - Bachelor’s Degree
Minimum Experience – 15 Years

SIN 54151S Information Technology Professional Services

Application Developer - I
Develop solutions using a wide range of full stack technologies. Participate in all aspects of testing, including test-driven development. Work closely with Architects, Analysts, Designers and other Engineers, with a focus on integrating components to support new feature development.

Education - Bachelor’s Degree
Minimum Experience – 1 Year

Application Developer - II
Develop solutions using a wide range of full stack technologies. Participate in all aspects of testing, including test-driven development. Work closely with Architects, Analysts, Designers and other Engineers, with a focus on integrating components to support new feature development.
development. Partner with architect for design and review of products, promotes and drives use of agile and DevOps methodologies and patterns, and contributes to defining and estimating timelines, costs, and feasibility for application development projects.

Education - Bachelor’s Degree  
Minimum Experience – 4 Years

**Application Developer - III**
Develop solutions using a wide range of full stack technologies. Participate in all aspects of testing, including test-driven development. Work closely with Architects, Analysts, Designers and other Engineers, with a focus on integrating components to support new feature development. Partner with architect for design and review of products, promotes and drives use of agile and DevOps methodologies and patterns, and contributes to defining and estimating timelines, costs, and feasibility for application development projects. Provides proof-of-concept or minimally viable product prototypes as needed, periodically reviews code from development teams, and serves as a coach and mentor to junior engineers.

Education - Bachelor’s Degree  
Minimum Experience – 6 Years

**Business Analyst - I**
Analyze business requirements to assess needs, collect information, and identify alternative methods and solutions for information technology systems. Write individual epic and user stories that are clear, concise, and ready for development teams to implement.

Education - Bachelor’s Degree  
Minimum Experience – 1 Year

**Business Analyst - II**
Identify and analyze business requirements to assess needs, collect information, and identify alternative methods and solutions for information technology systems. Focuses on research and analytical support, problem solving, and quality management. Writes individual epic and user stories that are clear, concise, and ready for development teams to implement. Provides coaching to junior business analysts as needed.

Education - Bachelor’s Degree  
Minimum Experience – 4 Years

**Business Analyst - III**
Lead efforts to identify and analyze business requirements to assess needs, collect information, and identify alternative methods and solutions for information technology systems. Focuses on research and analytical support, problem solving, and quality management. Writes individual epic and user stories that are clear, concise, and ready for development teams to implement. Support software development team in an agile lifecycle, review developed features, and provide guidance and oversight to more junior team members.

Education - Bachelor’s Degree  
Minimum Experience – 6 Years
IT Subject Matter Expert I
Provides subject matter proficiency for information technology programs. Provides technical and functional direction for problem definition, analysis, requirements development and implementation for complex systems. Makes recommendations and advises on system improvements, business processes, and/or optimization or maintenance efforts in the following specialties: information systems architecture; networking; automation; communications protocols; risk management; software; life-cycle management; and software development methodologies.

Education - Bachelor’s Degree
Minimum Experience – 10 Years

IT Subject Matter Expert II
Provides technical, functional, managerial, and administrative direction for problem definition, analysis, requirements development and implementation for complex systems. Makes recommendations and advises on system improvements, business processes, and/or optimization or maintenance efforts in the following specialties: information systems architecture; networking; automation; communications protocols; risk management; software; life-cycle management; and software development methodologies.

Education - Bachelor’s Degree
Minimum Experience – 12 Years

IT Subject Matter Expert III
Provides thought leadership and best practices within the information technology domain. Makes recommendations and advises on system improvements, business processes, and/or optimization efforts in the following specialties: information systems architecture; networking; automation; communications protocols; risk management; software; life-cycle management; and software development methodologies.

Education - Bachelor’s Degree
Minimum Experience – 15 Years

IT Subject Matter Expert IV
Provides industry-leading trends, thought leadership, best practices, and proven, repeatable success in the information technology domain. Trusted partner and expert on system improvements, business processes, and/or optimization efforts in the following specialties: information systems architecture; networking; automation; communications protocols; risk management; software; life-cycle management; and software development methodologies.

Education - Bachelor’s Degree
Minimum Experience – 20 Years

IT Program Manager III
Responsible for coordinating, defining, staffing, and managing single Information Technology program in accordance with client requirements and company guidelines. Directs, organizes, and monitors information technology professional services provided by team. Responsible for meeting program cost, schedule, and performance objectives. Works with the project business owner and/or executive to oversee delivery performance, ensure delivery quality and report
schedule, cost, and execution performance. Organizes, directs, and coordinates the planning and production of all contract support activities.

Education - Bachelor’s Degree
Minimum Experience – 10 Years

**IT Program Manager IV**
Responsible for coordinating, defining, staffing, and managing large Information Technology program(s) in accordance with client requirements and company guidelines. Directs, organizes, and monitors information technology professional services provided by team. Responsible for meeting program cost, schedule, and performance objectives. Works with the project business owner and/or executive to oversee delivery performance, ensure delivery quality and report schedule, cost, and execution performance. Has full accountability for the planning and production of all contract support activities.

Education - Bachelor’s Degree
Minimum Experience – 12 Years

**IT Project Manager**
Responsible for coordinating, defining, staffing, and managing single Information Technology project(s) in accordance with client requirements and company guidelines. Directs, organizes, and monitors information technology professional services provided by team. Works with the program manager or project business owner to oversee delivery performance, ensure delivery quality and report schedule, cost, and execution performance.

Education - Bachelor’s Degree
Minimum Experience – 6 Years

**IT Project Manager - II**
Responsible for coordinating, defining, staffing, and managing single or multiple Information Technology project(s) in accordance with client requirements and company guidelines. Directs, organizes, and monitors information technology professional services provided by team. Works with the program manager or project business owner to oversee delivery performance, ensure delivery quality and report schedule, cost, and execution performance. Organizes, directs, and coordinates the planning and production of all contract support activities.

Education - Bachelor’s Degree
Minimum Experience – 8 Years

**IT Specialist I**
Provides requirement analysis, systems design, development, installation, testing, system certification and accreditation, and/or operational support for information technology systems. Performs basic analysis of alternatives, systems design, integration, testing, and problem diagnosis/resolution.

Education - Bachelor’s Degree
Minimum Experience – 1 year
IT Specialist II
Provides requirement analysis, systems design, development, installation, testing, system certification and accreditation, and/or operational support for information technology systems. Performs analysis of alternatives, systems design, integration, testing, and problem diagnosis/resolution. Provides business, functional, and/or technical leadership, reviews of work products, and makes business, functional, and/or technical recommendations, as needed, for changes in the supported technical architecture. Assist in ensuring operational readiness by providing functional or technical expertise in developing and modifying information technology applications. Design and implement modifications or enhancements to any system functionality within systems.

Education - Bachelor’s Degree
Minimum Experience – 4 Years

IT Specialist III
Provides requirement analysis, systems design, development, installation, testing, system certification and accreditation, and/or operational support for information technology systems. Performs analysis of alternatives, systems design, integration, testing, and problem diagnosis/resolution. Provides business, functional, and/or technical leadership, reviews of work products, and makes business, functional, and/or technical recommendations, as needed, for changes in the supported technical architecture. Assist in ensuring operational readiness by providing functional or technical expertise in developing and modifying systems. Design and implement modifications or enhancements to any system functionality. Perform operational readiness of systems by providing infrastructure technical expertise. May prepare cost-benefit and return-on-investment analysis as input to broader decision on information technology systems and programs. Provides coaching and support to other IT specialists.

Education - Bachelor’s Degree
Minimum Experience – 6 Years

Software Engineer I
Primary responsibility is technical analysis, design, and development of Information Technology-related applications. Work closely with the Program Manager and Technical Lead to effectively build the application according to requirements and deliver high quality results.

Education - Bachelor’s Degree
Minimum Experience – 1 year

Software Engineer II
Provides technical analysis, design, and development of Information Technology-related applications. Work closely with the Program or Project Manager, Architect, and Technical Lead to interpret business requirements, effectively build the application according to requirements, and deliver high quality results. Must be able to communicate technical and non-technical information clearly, answer technical questions from customers, and be able provide efficient technical solutions to problems.

Education - Bachelor’s Degree
Minimum Experience – 4 Years
Software Engineer III
Provides technical leadership in the analysis, design, and development of Information Technology-related applications. Partners with the Program or Project Manager and Architect to interpret business requirements, provide guidance to technical teams, effectively build the application according to requirements, and deliver high quality results. Must be able to communicate technical and non-technical information clearly, answer technical questions from customers, and be able provide efficient technical solutions to problems.

Education - Bachelor’s Degree
Minimum Experience – 6 Years

Technical Architect I
Applies, as appropriate, enterprise architecture techniques, coding design, transaction/workflow analysis, activity and data modeling, internal control and risk analysis, modern business methods, and performance measurement techniques. Works under supervision to generate recommendations to personnel performing systems analysis and system/subsystem development tasks. Reviews and prepares system documents and specifications. Prepares reports, studies, and documentation, delivers presentations, and participates in meetings.

Education - Bachelor’s Degree
Minimum Experience – 10 Years

Technical Architect II
Applies, as appropriate, enterprise architecture techniques, coding design, transaction/workflow analysis, activity and data modeling, internal control and risk analysis, modern business methods, and performance measurement techniques. Generates recommendations to personnel performing systems analysis and system/subsystem development tasks. Reviews and prepares system documents and specifications. Prepares reports, studies, and documentation, delivers presentations, and participates in meetings. Provides coaching to more junior Technical Architects as needed.

Education - Bachelor’s Degree
Minimum Experience – 12 Years

Technical Architect III
Provides technical direction to personnel performing systems design and development. Applies, as appropriate, enterprise architecture techniques, coding design, transaction/workflow analysis, activity and data modeling, internal control and risk analysis, modern business methods, and performance measurement techniques. Generates recommendations to personnel performing systems analysis and system/subsystem development tasks. Reviews system documents and specifications. Prepares reports, studies, and documentation, delivers presentations, and participates in meetings. Delivers white papers, presentations, and leads technology forums.

Education - Bachelor’s Degree
