Multiple Award Schedule

Incorporated in 1992, AnythingIT, LLC a leader in providing IT Asset Exchange/Sale Value Recovery/E-Waste/Data Destruction & Disposition Solutions for legacy IT equipment into the information technology marketplace globally. AnythingIT holds a GSA Schedule with the United States Government and has received Congressional Recommendation for IT Asset Management, Forensic Data Scrub (Department of Defense 5220.22M certified), Trade-In (Exchange/Sale), Donation processing, and Disposal services solutions. AnythingIT operates out of facilities across the United States, Canada, Europe as well as Asia Pacific.

Carrying a significant past performance record for service to both Federal, Civilian & Defense as well as State & Local agencies, AnythingIT has continually developed top-shelf solutions surrounding requirements of its customer base to ensure e-waste regulatory compliance of the various markets its services. Of note is the innovative Recycle Tomorrow Program, a vehicle by which organizations can effectively budget for their future IT asset disposition requirements and ensure they are in full compliance with regulatory standards.

To summarize, we provide the following services:

Nationwide removal of IT assets (optional, equipment can be shipped into ANYTHINGIT)

Inventorying services (Data Collection (both onsite and depot)

Real-time market valuation via AnythingIT website (Value IT)

http://www.anythingit.com/programlogin.html

Data Destruction (DoD5220.22M/HIPAA Compliant)

Re-marketing via FMR 102.39 Exchange/Sale of legacy IT equipment Recycling – DEP/EPA

**Title:** IT Software Service

**Minimum Experience:** Not Applicable.

**Functional Duties:** Equipment testing/evaluation to determine future use Test, Audit, Process (TAP) Report and record software licensing

**Minimum Education:** Not Applicable.

**Title:** IT Data Wipe Service

**Minimum Experience:** Not Applicable.

**Functional Duties:** The IT Data Wipe Specialist using a patented data overwrite technology will completely eliminate all data from a computer’s hard drive. Data storage areas are repeatedly overwritten in such a way that the original data cannot be recovered using data recovery and/or computer forensics software. This process involves writing data on the hard disk drive tracks from the first sector the last sector the subject hard disk drive. The software goes a bit farther with this security process and therefore its processes conform to U. S. DoD computer security standards. US DoD standards require that the data overwrite process involve one pass with
a character and then a second overwrite pass using the compliment of the first character overwrite. A third pass is then written on the same storage areas with a random character. Within minutes of running DataScrub, old or no longer-needed computers are ready to be sold, donated or returned from lease with absolute confidence that others cannot recover sensitive information. DataScrub permanently wipes all data and all programs clean, including the operating system. It is the only way, short of destroying the computer, to completely erase every sector, cluster, byte, and bit with no damage to your hard drive.

**Minimum Education**: Not Applicable.
