</tr>
</thead>
<tbody>
<tr>
<td>54151S</td>
<td>$500,000</td>
</tr>
<tr>
<td>54151HEAL</td>
<td>$500,000</td>
</tr>
<tr>
<td>OLM</td>
<td>$250,000</td>
</tr>
</tbody>
</table>

3. Minimum order: $100

4. Geographic coverage (delivery area). Domestic

5. Point(s) of production (city, county, and State or foreign country). Same as Contractor Address

6. Discount from list prices or statement of net price. Government Net Prices (discounts already deducted.)

7. Quantity discounts. 1% for orders over $250k

8. Prompt payment terms. Information for Ordering Offices: Prompt payment terms cannot be negotiated out of the contractual agreement in exchange for other concessions. Net 30 days

9. Foreign items (list items by country of origin). Not Applicable
10a. Time of delivery. (Contractor insert number of days.) To Be Determined at the Task Order level

10b. Expedited Delivery. Items available for expedited delivery are noted in this price list To Be Determined at the Task Order level

10c. Overnight and 2-day delivery. To Be Determined at the Task Order level

10d. Urgent Requirements. To Be Determined at the Task Order level

11. F.O.B. point(s). Destination

12a. Ordering address(es). Same as Contractor Address

12b. Ordering procedures: For supplies and services, the ordering procedures, information on Blanket Purchase Agreements (BPA’s) are found in Federal Acquisition Regulation (FAR) 8.405-3.

13. Payment address(es). Same as Contractor Address

14. Warranty provision. Standard Commercial Warranty Terms & Conditions

15. Export packing charges, if applicable. Not Applicable

16. Terms and conditions of rental, maintenance, and repair (if applicable). Not Applicable

17. Terms and conditions of installation (if applicable). Not Applicable

18a. Terms and conditions of repair parts indicating date of parts price lists and any discounts from list prices (if applicable). Not Applicable

18b. Terms and conditions for any other services (if applicable). Not Applicable

19. List of service and distribution points (if applicable). Not Applicable

20. List of participating dealers (if applicable). Not Applicable

21. Preventive maintenance (if applicable). Not Applicable

22a. Special attributes such as environmental attributes (e.g., recycled content, energy efficiency, and/or reduced pollutants). Not Applicable

22b. If applicable, indicate that Section 508 compliance information is available on Electronic and Information Technology (EIT) supplies and services and show where full details can be found (e.g. contractor’s website or other location.) The EIT standards can be found at: www.Section508.gov/. Not Applicable

23. Unique Entity Identifier (UEI) number. GNEVAPP5XW57
24. Notification regarding registration in System for Award Management (SAM) database. Contractor registered and active in SAM

**Service Contract Labor Standards:** The Service Contract Labor Standards (SCLS), formerly known as the Service Contract Act (SCA), is applicable to this contract as it applies to the entire Multiple Award Schedule (MAS) and all services provided. While no specific labor categories have been identified as being subject to SCLS/SCA due to exemptions for professional employees (FAR 22.1101, 22.1102 and 29 CRF 541.300), this contract still maintains the provisions and protections for SCLS/SCA eligible labor categories. If and/or when the contractor adds SCLS/SCA labor categories to the contract through the modification process, the contractor must inform the Contracting Officer and establish a SCLS/SCA matrix identifying the GSA labor category titles, the occupational code, SCLS/SCA labor category titles and the applicable WD number. Failure to do so may result in the cancellation of the contract.

### Labor Category Descriptions

**Systems Analyst I**

**Functional Responsibilities:**
Applies principles of information systems to develop solutions that match business requirements. Assists users both in functional and technical aspects of systems, applications, and networks. Develops and maintains end-user support documentation. Performs fact-finding and analysis, usually of a single activity or a routine problem; applies established procedures where the nature of the system, feasibility, computer equipment, and programming language have already been decided. Supports senior-level information system personnel to test, validate and troubleshoot system and application issues.

**Minimum Years of Experience:**
0 years of relevant work experience in the field of Information Technology

**Minimum Educational/Degree Requirements:**
BA or BS degree in Information Technology or related field.

**Systems Analyst II**
**Functional Responsibilities:**
Applies principles of information systems to develop solutions that match business requirements. Assists users both in functional and technical aspects of systems, applications, and networks. Maintains and modifies complex systems or develops new subsystems such as an integrated production scheduling, inventory control, cost analysis, or sales analysis record in which every item of each type is automatically processed through the full system of records. Guides users in formulating requirements; advises on alternatives and on the implications of new or revised data processing systems; identifies omissions and errors in requirements and conducts feasibility studies; recommends an optimum approach and develops system design for approved projects. Develops and maintains end-user support documentation. Supports senior-level information system personnel to test, validate and troubleshoot system and applications issues. Supervises junior staff.

**Minimum Years of Experience:**
2 years of relevant work experience in the field of Information Technology

**Minimum Educational/Degree Requirements:**
BA or BS degree in Information Technology or related field.

---

**Systems Administrator I**

**Functional Responsibilities:**
Applies principles of information systems to develop solutions to install, manage, configure and troubleshoot systems, applications, and networks. Comfortable resolving customers’ most complex issues related to system hardware, software, and programs. Plans and performs tests and of system hardware, applications, and operating systems. Supports senior-level information system personnel to test, validate and troubleshoot system and applications issues. Responsible for administration and operation of IT systems. Assists with the day-to-day operational maintenance, support, and upgrades for existing operating systems, workstations, and servers.

**Minimum Years of Experience:**
Two years of relevant work experience in the field of Information Technology

**Minimum Educational/Degree Requirements:**
BA or BS degree in Information Technology or related field.

---

**Database Administrator I**

**Functional Responsibilities:**
Installs, manages, configures, and troubleshoots database systems and all the supporting components including but not limited to applications. Applies principles of information systems to develop customer solutions and troubleshoot database systems, the overall impact on application performance. Designs, develops and implements SQL Server RDBMS systems and database applications to accommodate a variety of user needs. Administers maintains, develops, and implements the integrity, security, and availability of multiple database(s). Configures and maintains database servers and processes, including monitoring of system health and performance, to ensure high levels of performance, availability, and security. Responsible for the implementation of database policies and procedures. Supports senior-level information system personnel to test, validate and troubleshoot system and applications issues.

**Minimum Years of Experience:**
Four years of relevant work experience in the field of Information Technology

**Minimum Educational/Degree Requirements:**
BA or BS degree in Information Technology or related field.
Network Administrator I

**Functional Responsibilities:**
Installs, manages, configures, and troubleshoots network systems and all the supporting components. Applies principles of information systems to develop customer solutions and troubleshoot systems, applications, and networks. Responsible for the implementation of network policies and procedures. Support the escalation and communication of status to agency management and internal customers. Working knowledge is needed in various software systems and architectures, communications protocols: and network hardware devices. Has knowledge of configuration of routers, switches and firewalls. Comfortable resolving customers’ most complex issues related to system hardware, software, and programs. Plans and performs tests of system hardware, applications, operating systems, and computer networks. Supports senior-level information system personnel to test, validate and troubleshoot the system, applications, and network issues.

**Minimum Years of Experience:**
Four years of relevant work experience in the field of Information Technology

**Minimum Educational/Degree Requirements:**
BA or BS degree in Information Technology or related field.

Subject Matter Expert I

**Functional Responsibilities:**
Provides professional-level expertise to troubleshoot systems, networks, and/or applications with minimal supervision. Must be able to design, implement and troubleshoot customers’ most complex issues. Provides and recommends new processes and standards to make systems and applications more secure and efficient. Provides technical knowledge and analysis of mid-level functional systems analysis, design, integration, documentation, and implementation guidance. Advises client of mid-level business processes to meet these goals. Performs analysis for complex client requirements and recommends development or acquisition strategies, as required. Supports junior-level information system personnel to test, validate and troubleshoot system and applications issues.

**Minimum Years of Experience:**
Six years of relevant work experience in the field of Information Technology

**Minimum Educational/Degree Requirements:**
Master’s degree in Information Technology or related field.

Project Manager I

**Functional Responsibilities:**
Responsible for the day-to-day management of projects and personnel assigned to those Information Technology projects. Manages projects and development teams executing in a range of methodologies including waterfall, agile, and lean; Ensures the project meets scope, schedule, and budget; Serves as the Scrum Master for Agile project. Coordinates and leads project timeline and deliverables from inception to closure. Provides overall leadership and guidance to personnel assigned to the project. Responsible for execution or work in accordance with IT quality standards. The Project Manager also ensures stakeholders’ satisfaction and evaluates overall project performance.

**Minimum Years of Experience:**
Six years of relevant work experience in the field of Information Technology

**Minimum Educational/Degree Requirements:**
BA or BS degree in Information Technology or related field

**Health IT Labor Category Description(s)**

**Health IT Systems Analyst I**

**Functional Responsibilities:**
Applies principles of information systems to develop solutions specific to Electronic Health Records, Health Analytics, Personal Health Information Management, Innovative Health IT Solutions, Health Informatics, Emerging Health IT Research and Other Health IT services. Assists users both in functional and technical aspects for systems, applications and networks. Develops and maintains end-user support documentation. Supports senior level information system personnel to test, validate and troubleshoot system and applications issues. Performance of this category may be subject to HITECH, HIPAA, NIST, FIPS and Special Publications FISMA of 2002.

**Minimum Years of Experience:**
0 years of relevant work experience in the field of Health Information Technology

**Minimum Educational/Degree Requirements:**
BA or BS degree Information Technology or related field.

**Health IT Systems Analyst II**

**Functional Responsibilities:**
Analyze business and system requirements and ensures adherence to the design concept and to user standards and for progress in accordance with schedules in health IT environments. Applies principles of information systems to develop solutions that match Health IT business requirements. Assists users both in functional and technical aspects for healthcare systems, applications and networks. Develops and maintains end-user support documentation. Supports senior level information system personnel to test, validate and troubleshoot system and applications issues. Performance of this category may be subject to: HITECH, HIPAA, NIST, FIPS and Special Publications FISMA of 2002. Supervises junior staff.

**Minimum Years of Experience:**
2 years of relevant work experience in the field of Health Information Technology

**Minimum Educational/Degree Requirements:**
BA or BS degree in Information Technology or related field.

**Health IT Systems Administrator I**

**Functional Responsibilities:**
Responsible for maintaining Highly specialized experience in one or more phases of systems development, systems integration, or network engineering for Health IT programs and activities. Applies principles of information systems to develop solutions to install, manage, configure and troubleshoot systems, applications and networks in a healthcare setting. Comfortable resolving Healthcare customers’ most complex issues related to healthcare system hardware, software and programs. Plans and performs tests and of system hardware, applications and operating systems. Performance of this category may be subject to: HITECH, HIPAA, NIST, FIPS and Special Publications FISMA of 2002. Supports senior level information system personnel to test, validate and troubleshoot system and applications issues.

**Minimum Years of Experience:**
Two years of relevant work experience in the field of Health Information Technology
Minimum Educational/Degree Requirements:
BA or BS degree in Information Technology or related field.

Health IT Database Administrator I

Functional Responsibilities:
Installs, manages, configures and troubleshoots database systems and all the supporting components to include but not limited to applications. Understands and applies HIT, Enterprise Performance Life Cycle (EPLC), and Electronic Health Records (EHRs), Health Information Exchange (HIE) principles and health standards to database requirements. Applies principles of information systems to develop healthcare customer solutions and troubleshoot database systems, the overall impact on application performance. Responsible for the implementation of database policies and procedures. Supports senior-level information system personnel to test, validate and troubleshoot system and applications issues.

Minimum Years of Experience:
Four years of relevant work experience in the field of Health Information Technology

Minimum Educational/Degree Requirements:
BA or BS degree in Information Technology or related field.

Health IT Network Administrator I

Functional Responsibilities:
Installs, manages, configures, and troubleshoots network systems and all the supporting components. Applies principles of information systems to develop healthcare customer solutions and troubleshoot systems, applications, and networks. Responsible for the implementation of network policies and procedures. Comfortable resolving healthcare customers’ most complex issues related to system hardware, software, and programs. Plans and performs tests of system hardware, applications, operating systems, and computer networks. Supports senior-level information system personnel to test, validate and troubleshoot the system, applications, and network issues. Understands the principles of HIPAA audit, compliance and remediation related to health IT networks. Able to remediate routers, switches and firewall based on the health industry standards in order to protect and secure Electronic Health Records (HER).

Minimum Years of Experience:
Four years of relevant work experience in the field of Information Technology

Minimum Educational/Degree Requirements:
BA or BS degree in Information Technology or related field.

Health IT Subject Matter Expert I

Functional Responsibilities:
Provides professional-level expertise to troubleshoot healthcare systems, networks, and/or applications with minimal supervision. Serves as subject matter expert, possessing in-depth knowledge of a particular area, such as electronic health records, health information exchanges, health analytics, personal health information management, innovative Health IT solutions, health informatics, business, computer science, engineering, mathematics, public health, behavioral health, applicable federal policies, regulations and standards, or the various sciences. Must be able to design, implement and troubleshoot customers’ most complex issues. Provides and recommends new processes and standards to make
systems and applications more secure and efficient. Supports junior-level information system personnel to test, validate and troubleshoot system and applications issues.

**Minimum Years of Experience:**
Six years of relevant work experience in the field of Health Information Technology

**Minimum Educational/Degree Requirements:**
Master’s degree in Information Technology or related field.

---

**Health IT Project Manager I**

**Functional Responsibilities:**
Responsible for the day-to-day management of projects and personnel assigned to those projects. Coordinates and leads project timeline and deliverables from inception to closure. Be familiar with the functioning of electronic health records, health information exchanges, health informatics, and health IT services. Interpret Agency health IT, public health or clinical initiatives and client requirements and provides guidance and direction to subordinate project personnel to ensure adherence to standards. Perform enterprise-wide horizontal integration planning and interface to other functional systems. Provides overall leadership and guidance to personnel assigned to the project. Strong understanding of Affordable Care Act programs such as hospital readmissions, Physician Quality Reporting System (PQRS), and Value Based Purchasing. The Health IT Project Manager also ensures stakeholders’ satisfaction and evaluates overall project performance.

**Minimum Years of Experience:**
Six years of relevant work experience in the field of Health Information Technology

**Minimum Educational/Degree Requirements:**
BA or BS degree in Information Technology or related field

---

*See Education/Experience Equivalency below*

---

**Education/Experience Equivalency**

The labor category definitions in our Pricelist describe the functional responsibilities and education and experience requirements for each labor category. These requirements are a guide to the types of experience and educational background of typical personnel in each labor category.

Education and experience may be substituted for each other. Each year of relevant experience may be substituted for 1 year of education, and vice versa. In addition, certifications, professional licenses, and vocational technical training may be substituted for experience or education with the written approval of the ordering activity.

<table>
