Business size: Small business
Service Disabled Veteran Owned Small business
For more information on ordering from Federal Supply Schedules go to the GSA Schedules page at GSA.gov.

Price list current as of Modification #PA-0003 effective August 05th ,2022
Prices Shown Herein are Net (discount deducted)

TABLE OF CONTENTS

General Contract Details p.1

Customer Information p.3

GSA Offerings p.5

SCLS Information p.13

CUSTOMER INFORMATION

1a. Table of awarded special item number(s) with appropriate cross-reference to item descriptions and awarded price(s).

SINs	Recovery	SIN Title
54151S	54151SRC	Information Technology Professional Services
54151HEAL	54151HEALRC	Health Information Technology Services

1b. Identification of the lowest priced model number and lowest unit price for that model for each special item number awarded in the contract. This price is the Government price based on a unit of one, exclusive of any quantity/dollar volume, prompt payment, or any other concession affecting price. Those contracts that have unit prices based on the geographic location of the customer, should show the range of the lowest price, and cite the areas to which the prices apply. 54151S:59.01. See Page 6

1c. If the Contractor is proposing hourly rates, a description of all corresponding commercial job titles, experience, functional responsibility and education for those types of employees or subcontractors who will perform services shall be provided. If hourly rates are not applicable, indicate "Not applicable" for this item. See Page 6

2. Maximum order: SIN 54151S: \$500,000.00
SIN 54151HEAL: \$500,000.00

3. Minimum order: \$100

4. Geographic coverage (delivery area). Domestic.

5. Point(s) of production (city, county, and State or foreign country). 1901 1st Avenue, Suite 192 San Diego, CA 92101

6. Discount from list prices or statement of net price. Government Net Prices (discounts already deducted.)

7. Quantity discounts. None

8. Prompt payment terms. Information for Ordering Offices: Prompt payment terms cannot be negotiated out of the contractual agreement in exchange for other concessions. None

9. Foreign items (list items by country of origin). Not Applicable

10a. Time of delivery. (Contractor insert number of days.) Contact Contractor.

10b. Expedited Delivery. Items available for expedited delivery are noted in this price list. Contact Contractor.

10c. Overnight and 2-day delivery. Contact Contractor.

10d. Urgent Requirements. Contact Contractor.

11. F.O.B. point(s). Destination

12a. Ordering address(es). 1901 1st Avenue, Suite 192. San Diego, CA 92101

12b. Ordering procedures: For supplies and services, the ordering procedures, information on Blanket Purchase Agreements (BPA's) are found in Federal Acquisition Regulation (FAR) 8.405-3.

13. Payment address(es). Ordering Address

14. Warranty provision. As agreed upon between Veterans EZ Info Inc., and the Ordering Activity.

15. Export packing charges, if applicable. Not Applicable

16. Terms and conditions of rental, maintenance, and repair (if applicable). Not Applicable

17. Terms and conditions of installation (if applicable). Not Applicable

18a. Terms and conditions of repair parts indicating date of parts price lists and any discounts from list prices (if applicable). Not Applicable

18b. Terms and conditions for any other services (if applicable). Not Applicable

19. List of service and distribution points (if applicable). Not Applicable

20. List of participating dealers (if applicable). Not Applicable

21. Preventive maintenance (if applicable). Not Applicable

22a. Special attributes such as environmental attributes (e.g., recycled content, energy efficiency, and/or reduced pollutants). Not Applicable

22b. If applicable, indicate that Section 508 compliance information is available on Electronic and Information Technology (EIT) supplies and services and show where full details can be found (e.g. contractor's website or other location.) The EIT standards can be found at: www.Section508.gov/.
Not Applicable

23. Unique Entity Identifier (UEI) number. HH52KZGMV2Y6

24. Notification regarding registration in System for Award Management (SAM) database. Contractor registered and active in SAM

Labor Category	Description	Minimum Education	Minimum Experience Years
Functional Area Expert II - IT	A Functional Area Expert II must have experience and deep knowledge of business, functional and technical areas/disciplines and be able to conduct research on special areas. Must have experience with proposing new solutions to problems in the areas of their functional expertise. Must be able to work and analyze both independently and as part of a team.	Bachelors	10
Functional Area Expert I - IT	A Functional Area Expert I must have experience and knowledge of business, functional and technical areas/disciplines and be able to conduct research on special areas. Must have experience with proposing new solutions to problems in the areas of their functional expertise.	Bachelors	5
Business Analyst, Senior	A Senior Business Analyst has experience in the effective use of data provided by cost estimators to create overall cost versus benefit assessment while considering functional benefits, technical performance, risks, and schedule concerns.	Bachelors	5
Functional Analyst	A Functional Analyst must have experience working with customers, users and project leads in analyzing, designing, implementing and supporting IT business applications and systems. A functional analyst has experience in having primary responsibility for individual projects and systems. Must have experience in testing functionality and matching to requirements.	Bachelors	5
Application Analyst	An Application Analyst must have experience in gathering data regarding performance, cost, and compatibility attributes of commercial off-the-shelf software and development applications. They must also have experience in the study of application and the consumption of system resources and be able to detect problems with software applications.	Bachelors	5

Labor Category	Description	Minimum Education	Minimum Experience Years
Program Manager	A Program Manager must have experience with diverse IT projects both large and small. Must be able to manage a portfolio of projects. Must be well versed in full systems development life cycle, enterprise wide network engineering, strategic information planning, business process reengineering, structure and management practices. Must be able to identify and mitigate risks to the program. Must be able to manage to cost, schedule and performance.	Master's	15
Program Analyst	A Program Analyst must have knowledge in how to plan, analyze and evaluate the effectiveness of operating programs. Must be able to use source data to evaluate the effectiveness of programs and business processes. Must be able to use qualitative and quantitative analytical skills to assess the effectiveness of the operations.	Bachelors	5
Project Manager	A Project Manager must have experience managing Information Technology related projects. Must be well versed in life cycle and project management methodologies. Must have experience in tracking costs, schedule and performance progress. Must be able to identify and mitigate risks.	Bachelors	10
Project Analyst	The Project Analyst must have experience in creating, applying and maintaining tools to track program, project, or task performance data, including cost, schedule, and performance data. Must have experience in the creation of routine and ad hoc reports. Must be able to provide oral and written discussion of analytical findings using narrative and graphic forms.	Bachelors	5
Architect, Senior	Extensive experience in design and development of IT architecture. Experience must include a wide range of work in creating diagrams and documentation with all components that comprise IT systems including network topology.	Master's	10
Software/System Architect, Senior	A Senior Software/System Architect must have extensive experience in the coordination of program and project leaders to identify requirements for system architecture. Must be able to identify strategies for addressing requirements. Must have extensive experience with analysis of requirements against fiscal, schedule, and performance issues. Has extensive experience in taking program requirements and is able to create an architecture vision having experience in high volume and high availability networks and systems. Experience in creating and conveying to team members the architectural vision for a program or project. Is responsible for dictating design choices to software developers, including but not limited to: platforms, coding and technical levels. Experience in establishing and enforcing standards and practices. Overseeing the development team, he manages the full life cycle of the software development process. Has extensive software development experience and thorough knowledge of a variety of programming languages, logic and network topology/administration.	Master's	10
Architect	Experience in design and development of IT architecture. Experience in creating diagrams and documentation with all components that comprise systems including network topology.	Bachelors	5
Configuration Manager, Senior - IT	A Senior Configuration Manager must have experience and be able to develop, document, and implement detailed plans for ensuring configuration control for IT programs, projects, and tasks. When issues arise, must be able to identify and implement solutions. Maintain	Bachelors	10

Labor Category	Description	Minimum Education	Minimum Experience Years
	thorough records and documentation to ensure accurate product builds, part ordering and product and/or software updates.		
Database Analyst	A Database Analyst has experience in gathering and compiling data necessary to analyze a multitude of database products. Can evaluate data to quickly identify problems, issues and gaps. Has the knowledge and skill to recommend solutions that will improve performance of databases.	Bachelors	1
Database Administrator	A Database Administrator has experience in managing the routine operations and maintenance of databases and ensuring their reliable and efficient performance.	Bachelors	1
Software Engineer, Senior	A Senior Software Engineer has extensive experience and knowledge to design, code, test, debug and document software in a variety of programming languages. Has the knowledge of the latest programming languages and techniques.. Has extensive experience in creating strategies for developing IT systems and applications. Has experience in evaluating alternative approaches and selecting optimal approaches.	Bachelors	5
Software Engineer	A Software Engineer has experience in developing computer software code. Should have experience in a variety of software programming languages. Should have experience in a variety of business systems and applications. Also has experience in designing, testing, debugging and documenting software.	Bachelors	1
Technical Applications/System Analyst	A Technical Applications/Systems Analyst must have IT experience in the analysis, design, and integration of information systems and commercial-off-the-shelf (COTS) software. Must be well versed in understanding structured analysis and design methodologies for the translation of systems requirements from business needs. Must be able to evaluate cost factors and risk.	Bachelors	1
IT Security Analyst (ISSO)	An IT Security Analyst designs, develops, engineers, and implements security solutions for an organization. Performs complex risk analyses which also include risk assessment. Establishes and satisfies information assurance and security requirements based upon the analysis of user, policy, regulatory, and resource demands. Support customers at the highest levels in the development and implementation of doctrine and policies. Performs analysis, design, and development of security features for system architectures.	Bachelors	1
Security Analyst	A Security Analyst analyzes and defines security requirements. Designs, develops, engineers, and implements security solutions. Guides effort to gather and organize technical information about an organization's mission goals and needs, existing security products, and ongoing programs in the IT security arena. Perform risk analyses which also includes risk assessment. Develop security standards.	Bachelors	1
System Administrator, Senior	A Senior System Administrator has the thorough knowledge to create plans to assure effective management, operations, and maintenance of systems and/or networks. Manages teams of system admins and is able to prioritize work and identify high risk critical problems and dedicate appropriate resources. Ha extensive knowledge of a wide variety of systems and networks to include high volume/high availability systems.	Bachelors	5
System Administrator	A System Administrator must have experience in conducting routine system administration tasks and logging data in system admin logs. Systems administrators are responsible for maintaining system	Bachelors	1

Labor Category	Description	Minimum Education	Minimum Experience Years
	efficiency. Experience in maintaining troubleshooting a wide variety of systems and networks to include high volume/high availability systems. Must have knowledge on a number of debugging protocols and processes. Must be able to troubleshoot problems and issues identified by customers and implement corrective actions quickly.		
Test Engineer, Senior - IT	A Senior Test Engineer must have experience working with developers, end users and organizations to create test plans and test scripts. Coordinate with test sites and other team participants to plan test events. experience in creating reports. Tracks problems and reports on errors that are identified. Must have experience with configuring necessary hardware and operating environments as needed to complete assigned testing. Must have comprehensive technical expertise on IT products, operating systems, software, hardware, systems and networks and specialized environments. Must have experience in writing or assisting in the development of test plans and test procedures. Must manage the defect database under the guidance of senior QA engineers.	Bachelors	5
Test Engineer - IT	A Test Engineer must have experience in the coordination and execution of test events in accordance with approved test plans, procedures and scripts. Must have knowledge and skills to ensure that test environments are set up accurately. Must be able to create test reports. The test engineer must be able to test IT hardware, software, systems and networks.	Bachelors	1
Technical Writer - IT	A Technical Writer must have experience in explaining highly technical data and information in simplistic grade school language for end users of complex IT systems and projects. Must be able to use a variety of word processing, spreadsheet, graphics and scheduling tools. Must have experience in being able to gather and convert data into a written narrative.	Associates	1
Test Engineer, Senior - HEALTH	A Senior Test Engineer must have experience working with developers, end users and organizations to create test plans and test scripts. Coordinate with test sites and other team participants to plan test events. experience in creating reports. Tracks problems and reports on errors that are identified. Must have experience with configuring necessary hardware and operating environments as needed to complete assigned testing. Must have comprehensive technical expertise on IT products, operating systems, software, hardware, systems and networks and specialized environments. Must have experience in writing or assisting in the development of test plans and test procedures. Must manage the defect database under the guidance of senior QA engineers.	Bachelors	5
Test Engineer - HEALTH	A Test Engineer must have experience in the coordination and execution of test events in accordance with approved test plans, procedures and scripts. Must have knowledge and skills to ensure that test environments are set up accurately. Must be able to create test reports. The test engineer must be able to test IT hardware, software, systems and networks.	Bachelors	1
Configuration Manager, Senior - HEALTH	A Senior Configuration Manager must have experience and be able to develop, document, and implement detailed plans for ensuring configuration control for IT programs, projects, and tasks. When issues arise, must be able to identify and implement solutions. Maintain	Bachelors	10

	gaps. Has the knowledge and skill to recommend solutions that will improve performance of databases.		
Health IT Database Administrator	A Health IT Database Administrator has experience in managing the routine operations and maintenance of databases and ensuring their reliable and efficient performance. Must have experience in databases related to health information technology.	Bachelors	5
Configuration Manager, Senior - HEALTH	A Senior Configuration Manager must have experience and be able to develop, document, and implement detailed plans for ensuring configuration control for IT programs, projects, and tasks. When issues arise, must be able to identify and implement solutions. Maintain thorough records and documentation to ensure accurate product builds, part ordering and product and/or software updates.	Bachelors	10
Health IT Software Engineer, Senior	A Health IT Senior Software Engineer has extensive experience and knowledge to design, code, test, debug and document software in a variety of programming languages. Has the knowledge of the latest programming languages and techniques.. Has extensive experience in creating strategies for developing Health IT systems and applications. Has experience in evaluating alternative approaches and selecting optimal approaches.	Bachelors	5
Health IT Software Engineer	A Health IT Software Engineer has experience in developing computer software code. Should have experience in a variety of software programming languages. Should have experience in a variety of health systems and applications. Also has experience in designing, testing, debugging and documenting software.	Bachelors	1
Health IT Security Analyst Senior	A Health IT Senior Security Administrator has experience in managing security programs for a variety of Health IT products, systems and networks both small and large and complex. Is able to ensure that records are maintained, security updates are promulgated, and staff are properly briefed. Experience in coordinating with organizational security teams to ensure program consistency and compliance with all security requirements. Has a thorough knowledge of organizational and agency level security requirements and ensures that systems and personnel comply with these standards.	Bachelors	10
Health IT Security Analyst	A Health IT Security Analyst has experience in the concepts, terms, processes, policy and implementation of health information security. Must have experience and knowledge of the latest security measures at all stages of an information system life cycle. Must have the ability to solve complex problems involving a wide variety of information systems.
