Solutions71 Labor GSA MAS Category Descriptions
SIN 54151S Information Technology Professional Services

54151S Computer Systems Engineer
Design and develop solutions to complex applications problems, system administration issues, or network concerns. Perform systems management and integration functions. Possesses and applies expertise on multiple complex work assignments. Assignments may be broad in nature, requiring originality and innovation in determining how to accomplish tasks. Operates with appreciable latitude in developing methodology and presenting solutions to problems. Contributes to deliverables and performance metrics where applicable.

Minimum Education: Associates
Minimum Years of Experience: 3
Training Certificate plus High School with Additional 2 Years relevant experience can substitute for Associates Degree.

54151S Database Administrator
Administer, test, and implement computer databases, applying knowledge of database management systems. Coordinate changes to computer databases. May plan, coordinate, and implement security measures to safeguard computer databases. Possesses and applies expertise on multiple complex work assignments. Assignments may be broad in nature, requiring originality and innovation in determining how to accomplish tasks. Operates with appreciable latitude in developing methodology and presenting solutions to problems. Contributes to deliverables and performance metrics where applicable.

Minimum Education: Associates
Minimum Years of Experience: 3
Training Certificate plus High School with Additional 2 Years relevant experience can substitute for Associates Degree.

54151S Information Security Engineer
Plans, develops, and communicates organizational security policies, standards, and best practices to protect sensitive information and safeguard the computer networks, systems, and data. Researches emerging threats and recommends software and hardware solutions and procedures and security enhancements that neutralize those threats. Analyzes and enhances security controls. Designs, establishes, and executes security strategies. Installs and uses software to protect an organization’s sensitive information. Assists computer users with installation or processing of new security products and procedures. Documents, reviews, maintains, and edits security best practices and policies. Possesses and applies expertise on multiple complex work assignments. Assignments may be broad in nature, requiring originality and innovation in determining how to accomplish tasks. Operates with appreciable latitude in developing methodology and presenting solutions to problems. Contributes to deliverables and performance metrics where applicable.
Minimum Education: Associates
Minimum Years of Experience: 3
Training Certificate plus High School with Additional 2 Years relevant experience can substitute for Associates Degree.

54151S IT Project Manager
Plan, initiate, and manage information technology (IT) projects. Lead and guide the work of technical staff. Serve as liaison between business and technical aspects of projects. Plan project stages and assess business implications for each stage. Monitor progress to assure deadlines, standards, and cost targets are met. Possesses and applies expertise on multiple complex work assignments. Assignments may be broad in nature, requiring originality and innovation in determining how to accomplish tasks. Operates with appreciable latitude in developing methodology and presenting solutions to problems. Contributes to deliverables and performance metrics where applicable.

Minimum Education: Associates
Minimum Years of Experience: 3
Training Certificate plus High School with Additional 2 Years relevant experience can substitute for Associates Degree.

54151S IT Solutions Architect
Designs, presents and administers integrated technology solutions architecture, strategies, policies and standards. Coordinates and oversees architecture implementation and modification activities. Develops a roadmap of the conceptual design for future changes to the architecture of IT solutions. Collaborates with cross-functional teams and clients to ensure compliance with operational processes and define, design and deliver technology requirements, enhancements, and solutions that meet the needs of the organization, its clients, and the end users. Researches, evaluates and implements new technology and industry trends to optimize operational efficiency, infrastructure flexibility, and operational stability. Possesses and applies expertise on multiple complex work assignments. Assignments may be broad in nature, requiring originality and innovation in determining how to accomplish tasks. Operates with appreciable latitude in developing methodology and presenting solutions to problems. Contributes to deliverables and performance metrics where applicable.

Minimum Education: Associates
Minimum Years of Experience: 3
Training Certificate plus High School with Additional 2 Years relevant experience can substitute for Associates Degree.

54151S Software Developer, Applications
Develop, create, and modify general computer applications software or specialized utility programs. Analyze user needs and develop software solutions. Design software or customize software for client use with the aim of optimizing operational efficiency. May analyze and design databases within an application area, working individually or coordinating database development as part of a team. May supervise computer programmers. Possesses and applies expertise on multiple complex work assignments. Assignments may be broad in nature, requiring originality
and innovation in determining how to accomplish tasks. Operates with appreciable latitude in
developing methodology and presenting solutions to problems. Contributes to deliverables and
performance metrics where applicable.

Minimum Education: Associates
Minimum Years of Experience: 3
Training Certificate plus High School with Additional 2 Years relevant experience can substitute for
Associates Degree.

54151S Software Developer, Systems Software
Research, design, develop, and test operating systems-level software, compilers, and network
distribution software for medical, industrial, military, communications, aerospace, business,
scientific, and general computing applications. Set operational specifications and formulate and
analyze software requirements. May design embedded systems software. Apply principles and
techniques of computer science, engineering, and mathematical analysis. Possesses and applies
expertise on multiple complex work assignments. Assignments may be broad in nature, requiring
originality and innovation in determining how to accomplish tasks. Operates with appreciable
latitude in developing methodology and presenting solutions to problems. Contributes to
deliverables and performance metrics where applicable.

Minimum Education: Associates
Minimum Years of Experience: 3
Training Certificate plus High School with Additional 2 Years relevant experience can substitute for
Associates Degree.
