

**GENERAL SERVICES ADMINISTRATION Federal Supply Service**

**Authorized Federal Supply Service Pricelist**

On-line access to contract ordering information, terms and conditions, up-to-date pricing, and the option to create an electronic delivery order are available through GSA Advantage!®, a menu-driven database system. The internet address for GSA Advantage!® is: [GSAAdvantage.gov](http://GSAAdvantage.gov).

**GSA Multiple Award Schedule (MAS)**

**Contract Number: 47QTCA23D0037**

**SIN 54151S (Information Technology Professional Services)**  
**SIN 54151HACS (Highly Adaptive Cybersecurity Services)**  
**SIN 518210C (Cloud Computing and Cloud Related IT Professional Services)**  
**SIN ANCILLARY (Ancillary Supplies and Services)**  
**SIN 511210 (Software Licenses)**

**Contract Period: January 9, 2022 – January 8, 2028**

**Business Size: Large**

**Contract Director: Corionna Canada**  
**[corionna.canada@criterion-sys.com](mailto:corionna.canada@criterion-sys.com)**  
**703-942-5800 x351**

**Criterion Systems, Inc.**  
**8330 Boone Blvd, Suite 400, Vienna, VA 22182**  
**(703) 942-5800**  
**(703) 942-5729 FAX**

**For more information on ordering from Federal Supply Schedules  
go to the GSA Schedules page at [GSA.gov](http://GSA.gov).**

**Price List Current through Modification PO-0001 effective January 9, 2022**

**Customer Information**

1a. Table of awarded special item number(s) with appropriate cross-reference to item descriptions and awarded price(s).

Special Item Number	Special Item Description
54151S	Information Technology Professional Services
54151HACS	Highly Adaptive Cybersecurity Services (HACS)
518210C	Cloud Computing and Cloud Related IT Professional Services
ANCILLARY	Ancillary Supplies and Services
511210	Software Licenses
OLM	Order-Level Materials (OLM)

1b. Identification of the lowest priced model number and lowest unit price for that model for each special item number awarded in the contract. This price is the Government price based on a unit of one, exclusive of any quantity/dollar volume, prompt payment, or any other concession affecting price. Those contracts that have unit prices based on the geographic location of the customer should show the range of the lowest price and cite the areas to which the prices apply.

**See Pricing Below.**

1c. If the Contractor is proposing hourly rates, a description of all corresponding commercial job titles, experience, functional responsibility, and education for those types of employees or subcontractors who will perform services shall be provided. If hourly rates are not applicable, indicate "Not applicable" for this item.

**See Pricing Below.**

2. Maximum Order:

**\$500,000**

3. Minimum Order:

**\$100.00**

4. Geographic coverage (delivery area):

**Worldwide**

5. Point(s) of production (city, county, and State or foreign country):

**Worldwide**

6. Discount from list prices or statement of net price:

**Prices shown are NET Prices; Basic discounts have been deducted.**

7. Quantity Discounts:

**None**

- 
8. Prompt payment terms:  
**0% - NET 30 days from receipt of invoice or date of acceptance, whichever is later. Information for Ordering Offices: Prompt payment terms cannot be negotiated out of the contractual agreement in exchange for other concessions.**
9. Foreign Items:  
**None**
- 10a. Time of delivery:  
**As negotiated with ordering activity.**
- 10b. Expedited Delivery:  
**Contact contractor**
- 10c. Overnight and 2-day delivery:  
**Contact contractor**
- 10d. Urgent Requirements:  
**Ordering activities are encouraged to contact the contractor for purposes of obtaining accelerated delivery.**
11. F.O.B Point(s):  
**Destination**
- 12a. Ordering address(es):  
**Criterion Systems, Inc.  
8330 Boone Blvd, Suite 400  
Vienna, Virginia 22182**
- 12b. Ordering procedures:  
**For supplies and services, the ordering procedures, information on Blanket Purchase Agreements (BPAs) are found in Federal Acquisition Regulation (FAR) 8.405-3.**
13. Payment address(es):  
**Criterion Systems, Inc.  
8330 Boone Blvd, Suite 400  
Vienna, Virginia 22182**  
**Bank account information for EFT payments will be shown on the invoice**
14. Warranty provision: **Not applicable**

15. Export packing charges, if applicable:

**Not applicable**

16. Terms and conditions of rental, maintenance, and repair (if applicable):

**Not applicable**

17. Terms and conditions of installation (if applicable):

**Not applicable**

18a. Terms and conditions of repair parts indicating date of parts price lists and any discounts from list prices (if applicable):

**Not applicable**

18b. Terms and conditions for any other services (if applicable):

**Not applicable**

19. List of service and distribution points (if applicable):

**Not applicable**

20. List of participating dealers (if applicable):

**Not applicable**

21. Preventive maintenance (if applicable):

**Not applicable**

22a. Special attributes such as environmental attributes (e.g., recycled content, energy efficiency, and/or reduced pollutants):

**Not applicable**

22b. If applicable, Section 508 compliance information is available on Electronic and Information Technology (EIT) supplies and services and show where full details can be found at [www.criterion-sys.com](http://www.criterion-sys.com). The EIT standards can be found at: [www.Section508.gov/](http://www.Section508.gov/)

23. Unique Entity Identifier (UEI) number:

**MPGNDNHHWM33**

24. Notification regarding registration in System for Award Management (SAM) database:  
**Criterion Systems, Inc. is registered in the System for Award Management database.**

**Terms and Conditions Applicable to Cloud and Cloud-Related IT Professional Services (Category SIN: 518210C)**

<b>Labor Category</b>	<b>Labor Category Description</b>	<b>Experience</b>	<b>Education</b>
Computer Security Analyst, Junior	Fully applies basic principles, theories, and concepts to the development, maintenance, and implementation of information security standards, procedures, and guidelines. Solves moderately complex technical problems, ensuring that systems and organizational databases are protected from unauthorized access and use. Monitors systems, identifies threats, and handles disaster recovery operations.	3	Bachelors
Computer Security Analyst	Applies advanced principles, theories, and concepts to the development, maintenance, and implementation of information security standards, procedures, and guidelines. Solves complex technical problems, ensuring that systems and organizational databases are protected from unauthorized access and use. Monitors systems, identifies threats, and handles disaster recover operations. Interfaces with user community to understand their security needs, implementing procedures to accommodate them. Familiar with domain structures, network protocols, user authentication, digital signatures, firewalls, and security best practices.	5	Bachelors
Computer Security Analyst, Senior	Applies leading-edge principles, theories, and concepts to the development, maintenance, and implementation of information security standards, procedures, and guidelines. Solves very complex technical problems, ensuring that systems and organizational databases are protected from unauthorized access and use. Monitors systems, identifies threats, and handles disaster recovery operations. Interfaces with user community to understand their security needs, implementing procedures to accommodate them. Understands domain structures, network protocols, user authentication, digital signatures, firewalls, and security best practices. Identifies network vulnerabilities and recommends remedial action.	7	Bachelors
Program Manager	Provides team leadership and creativity in the development and implementation of services engagements. Directs multiple and complex projects or sub-projects, including project financials. Manages and leads large work teams. Sets objectives and priorities for the project staff. Assigns and reviews tasks, performance, and staffing requirements. Identifies and pursues new business opportunities within the existing client bases.	8	Bachelors
Project Manager	Manages projects of moderate risk and complexity. May have deputy responsibility for a large program/project. Oversees program/project budget and schedules. May have primary responsibility for program/project growth. Serves as primary customer contact. Total value	7	Bachelors

Labor Category	Labor Category Description	Experience	Education
	of programs/projects is generally between \$10 million and \$25 million (life of contracts). May be responsible for programs/projects of a lesser dollar value if they are more complex or developmental in nature.		
QA Analyst	Performs complex tasks related to specialized inspection and testing of project output to ensure that quality standards are met. Develops and refines processes related to quality control and project failure identification and design standards verification. Reviews project development documentation to ensure specifications are designed to meet inspection and testing standards. Initiates corrective action for procedural, product, or process deficiencies. Interfaces with customers, vendors, and various company departments to resolve quality problems and provide information. Participates in and may lead audits.	6	Bachelors
Software Engineer, Junior	Designs, develops, troubleshoots, and analyzes software programs. Performs systems modeling, simulation, and analysis. Designs and develops compilers, assemblers, utility programs, and operating systems. Advises hardware design engineers on machine characteristics that affect software systems, such as storage capacity, processing speed, and input/output requirements. As required, provides inputs for documentation of new or existing programs.	3	Bachelors
Software Engineer, Senior	Develops and applies advanced methods, theories, and research techniques in the investigation and solution of highly complex and difficult software applications and problems requiring the expert application of advanced knowledge. Plans, conducts, technically directs, and evaluates projects or major phases of significant projects, managing the efforts of engineers and technical support staff in the performance of assigned projects. Recommends corrections in technical applications and analysis. Provides technical consultation to other organizations.	10	Bachelors
Subject Matter Expert	High level of knowledge of client needs for special projects. May possess certifications in a specific technical or management discipline. Develops specifications for moderately complex applications and business information systems.	5	Bachelors
Subject Matter Expert, Senior	An expert in the subject matter field. Provides high level systems analysis, design, integration, documentation, and implementation advice on complex studies. Participates in a phases of study development. Possesses certifications in a specific technical or management discipline. Prepares and delivers senior management presentations and briefings as required.	8	Bachelors
Systems Analyst	Performs analysis, design, and development of simple to intermediate computer systems. Assists in the determination of user needs with the maintenance of single product modules and subsystems. Assists in the design and development of simple utility	5	Bachelors

Labor Category	Labor Category Description	Experience	Education
Systems Engineer, Junior	<p>programs and operating systems.</p> <p>Analyzes existing systems and defines, designs, and develops new system requirements. Determines system specifications, input/output processes, and working parameters for hardware/software compatibility. Coordinates design of subsystems and integration of total system. Identifies, analyzes, and resolves program support deficiencies.</p>	3	Bachelors
Systems Engineer	<p>Develops and applies advanced methods, theories, and research techniques in the investigation and solution of complex and difficult system design requirements and problems. Plans, conducts, and technically directs projects or major phases of significant projects. Reviews completion and implementation of systems additions and/or enhancements and recommends corrections in technical application and analysis to management. Evaluates vendor capabilities to provide required products or services.</p>	6	Bachelors
Systems Engineer, Senior	<p>Develops and applies advanced methods, theories, and research techniques in the investigation and solution of complex and difficult system design requirements and problems requiring the expert application of advanced knowledge. Plans, conducts, and technically directs projects or major phases of significant projects, managing the efforts of engineers and technical support staff in the performance of assigned projects. Reviews completion and implementation of systems additions and/or enhancements, and recommends corrections in technical application and analysis to management.</p>	10	Bachelors
Support Specialist	<p>Provides second-tier support to end users for either PC, server, or mainframe applications and hardware. Interacts with network services, software systems engineering, and/or applications development to restore service and/or identify and correct core problem. Simulates or recreates user problems to resolve operating difficulties. Recommends systems modifications to reduce user problems.</p>	6	Bachelors
Support Specialist, Senior	<p>Provides second-tier support to end users for either PC, server, or mainframe applications and hardware. Interacts with network services, software systems engineering, and/or applications development to restore service and/or identify and correct core problem. Simulates or recreates user problems to resolve operating difficulties. Recommends systems modifications to reduce user problems. Ensures the timely process through which problems are controlled. Includes problem recognition, research, isolation, resolution, and follow-up steps.</p>	10	Bachelors
Database Administrator, Junior	<p>Develops, implements, administers, and maintains policies and procedures for ensuring the security and integrity of database</p>	3	Bachelors

Labor Category	Labor Category Description	Experience	Education
	management systems. Implements data models, database designs, data access, and table maintenance codes. Resolves database performance and capacity issues and replication and other distributed data issues.		
Database Administrator	Provides expertise and guidance in the use of database management systems. Designs, implements, and maintains databases with respect to access methods and time, device allocation, validation checks, file organization, indexing methods, protection and security, documentation, guidelines, and statistical methods. Establishes procedures for operations of the database and database management systems. Collects data elements and prepares database specifications. Develops, maintains, and controls the data dictionary.	6	Bachelors

Monitors and manages system resources, including CPU usage, disk usage, and response times to maintain operating efficiency. Performs systems security administration functions, including creating user profiles and accounts. Other duties may include setting up administrator accounts, maintaining system documentation, tuning system performance, installing system wide software and allocating mass storage space. Interacts with users and evaluates vendor products. Makes recommendations to purchase hardware and software, coordinates installation and provides backup recovery. Develops and monitors policies and standards for allocation related to the use of computing resources. May be assigned responsibility for less experienced staff.</p> <p>Considered an emerging authority, who applies extensive technical expertise. Develops technical solutions to complex problems. Exercises considerable latitude in determining objectives and approaches to assignment. Bachelor's (or equivalent) with 8 - 10 yrs of experience, or a Master's with 6 - 8 yrs of experience.</p>	8	Bachelors
Cybersecurity Architect (Junior)	<p>Ensures that the stakeholder security requirements necessary to protect the organization's mission and business processes are adequately addressed in all aspects of enterprise architecture including reference models, segment and solution architectures, and the resulting systems supporting those missions and business processes. Ensures that acquired or developed system(s) and architecture(s) are consistent with organization's cybersecurity architecture guidelines. Defines and documents how the</p>	2	Bachelors

	<p>Reviews and evaluates systems and software for adherence to government or commercial directives, standards, guidelines, and criteria concerning software safety and systems safety. Confirms design mitigations are captured in the design and its documentation and verifies implementation. May perform as a project lead with the responsibility for the instruction, assigning, direction, and monitoring of the performance of assigned systems developers / analyst working on a specific project.</p> <p>Career level with a complete understanding and wide application of technical principles, theories and concepts. Working under only general direction, provides technical solutions to a wide range of difficult problems. Independently determines and develops approach to solutions. Bachelor's (or equivalent) with 5 - 7 yrs of experience, or a Master's and 3 to 5 yrs of experience.</p>		
Cybersecurity Software Developer (Senior)	<p>Provides expertise and direction in the development and/or modification of computer-based scientific, technical, and business software systems. Uses expertise to design develop, code, test, and debug software. May work in one or several areas, such as equipment or software design, engineering evaluation or test, configuration management procedures, statistical analysis and modeling. Works with users to define existing or new system scope and objectives. Provides analytical support and technical advice during the conceptualization, development, and implementation phases. Plans and schedules new applications systems projects with user, systems software, and computer center operations personnel, including the identification of objectives, time frames, costs, and manpower requirements. Performs tasks necessary to ensure the identification and documentation of hazards within software systems using various analysis tools and techniques. Reviews and evaluates systems and software for adherence to government or commercial directives, standards, guidelines, and criteria concerning software safety and systems safety. Confirms design mitigations are captured in the design and its documentation and verifies implementation. May perform as a project lead with the responsibility for the instruction, assigning, direction, and monitoring of the performance of assigned systems developers / analyst working on a specific project.</p> <p>Considered an emerging authority, who applies extensive technical expertise. Develops technical solutions to complex problems. Exercises considerable latitude in determining objectives and approaches to assignment. Bachelor's (or equivalent) with 8 - 10 yrs</p>	8	Bachelors

Cybersecurity Information Assurance Engineer (Junior)	Under general supervision, audits new and existing information systems applications to ensure that appropriate controls exist, that processing is efficient and accurate, and that systems procedures are in compliance with corporate standards	2	Bachelors
Cybersecurity Information Assurance Engineer (Intermediate)	Under general supervision, develops information systems assurance programs and control guidelines, assists in resolving technical problems, priorities, and methods.	5	Bachelors
Cybersecurity Information Assurance Engineer (Senior)	Responsible for all activities relating to information assurance procedures and systems. Develops information systems assurance programs and control guidelines. Confers with and advises subordinates on administrative policies and procedures and resolving technical problems, priorities, and methods. Consults with and advises other sections regarding internal controls and security procedures. Prepares activity and progress reports relating to the information systems audit function.	8	Bachelors
Cybersecurity Incident Responder (Junior)	<p>Contribute to the functional management and oversight of the collection and analysis of threat intelligence, event analysis, automation and orchestration, and incident response. Contribute to the execution of Cyber Security operations, incident response, and investigations spanning across all functions of the Corporate Security organization. Rapidly and accurately determine the source of a security incident and moving quickly to identify and apply containment, mitigation, and remediation steps. Leverage the corporate incident case management solution to document and report on incidents to meet audit, compliance and legal requirements. Conduct in-depth root cause analysis on complex malware and user/system behavior events. Gather and analyze forensic evidence for cyber security incidents and investigations. Design and implement threat and event analysis automation to improve the speed and accuracy of incident identification and mitigation. Develop and document enhanced event analysis and incident response processes and procedures. Serve as a member of an incident response and monitoring team. Perform investigations to identify attack vectors, confirm infections, and suggest mitigation tactics. Develops technical solutions and Standard Operating Procedures (SOPs) for incident response, network security, advanced analytic tools, and data visualization techniques. Collaborate with technical teams to identify, resolve, and mitigate vulnerabilities.</p> <p>Experienced with frequent use and application of technical standards, principles and theories. Works under general</p>	2	Bachelors

Administrative Assistant	Provide administrative support to project teams. Assist in the preparation of deliverables.	2	High School

## Education/Experience Substitution Policy

We recognize that successful performance depends on having personnel with the right skills and experience. These skills and experience are acquired through a proper mix of education and professional experience. We have found that skills required to support advanced technology efforts, today's problems and tomorrow's challenges, are not always supported by the traditional combination of formal education and work experience. Therefore, we have incorporated substitution allowances between equivalent education and experience in order to provide the quality of services required by the customer at the most reasonable price.

The following tables present substitution equivalencies for education and experience requirements.

### ***Substitutions for Educational Requirements***

Additional years of related experience may be substituted for degree requirements.

Degree Requirement	Equivalent Experience Substitution
High School	GED
Associate's	High School plus two years related experience
Bachelor's	High school plus four years related experience or Associate degree plus two years related experience
Master's	Bachelor's degree plus two years related experience or Six years related experience
Doctorate / PhD	Master's degree plus two years or Eight years related experience

### ***Substitutions for Work Experience Requirements.***

A related degree may be substituted for years of related work experience.

Degree	Equivalent Years of Experience
Bachelor's	Two
Master's	Four
Doctorate/PhD	Six

Successful completion of higher education which has not yet resulted in a degree may be counted as one year of experience for each year of college completed.

## GSA Labor Rates

**SCLS Matrix**

SCLS Eligible Contract Labor Category/Fixed Price Service	SCLS Equivalent Code Title	WD Number
Administrative Assistant	01020 - Administrative Assistant	2015-4281

The Service Contract Labor Standards, formerly the Service Contract Act (SCA), apply to this contract and it includes SCLS applicable labor categories. Labor categories and fixed price services marked with a (\*\*) in this pricelist are based on the U.S. Department of Labor Wage Determination Number(s) identified in the SCLS/SCA matrix. The prices awarded are in line with the geographic scope of the contract (i.e., nationwide).

**GSA Software**

*ID Dataweb GSA Price List      Prices are inclusive of Industrial Funding Fee (IFF)*

SIN	Part Number	Product Description	GSA Price
511210	IDW-101-001-01	AXN Cloud-based Software Modules: Annual License fee plus per user fee for utilizing the AXN network and individual services. The AXN Core Service Module includes use of the AXN itself, including the Administrative Management Console, full access to the network of attribute providers, and help desk support. Requires a minimum purchase of \$3,000.00 per year (requires a minimum purchase of 12,000 credentials). Pricing is per-credential per year.	\$0.24
511210	IDW-102-001-01	AXN Cloud-based Software Modules: Annual License fee plus per user fee for utilizing the AXN network and individual services. The AXN Risk Score and Policy Service Module aggregates scores and signals from all selected attribute providers and converts to a single score from 0-100 to indicate trust. Organizations can map their own weights and values to the AXN Trust Score, enabling tailored scores directly reflecting the organization's compliance and risk requirements. In addition, organizations can map PASS, FAIL and STEP UP decisions to their transactions - simplifying workflow and policy. This module also enables the customer to create multi-step verification processes - triggering step ups and fallbacks depending on results. Requires a minimum purchase of \$6,000.00 per year (requires a minimum purchase of 12,000 credentials). Pricing is per-credential per year.	\$0.48
511210	IDW-103-001-01	AXN Cloud-based Software Modules: Annual License fee plus per user fee for utilizing the AXN network and individual services. The AXN Reporting, Compliance and Auditing Module allows top-down executive reporting, covering metrics, trends, and general analytics. In addition, Administrators have access to individual transaction details, including individual metrics and tests leading to decisions. Requires a minimum purchase of \$1,200.00 per year (requires a minimum purchase of 24,000 credentials). Pricing is per-credential per year.	\$0.05
