Business Size: Small, Minority-Owned

UEI: RXJKSHD1WP67

CUSTOMER INFORMATION:

1a. Table of awarded special item number(s)

SIN	Description
54151	Software Maintenance Services Software maintenance services create, designs, implements, and/or integrates customized changes to software that solve one or more problems and is not included with the price of the software. Software maintenance services include person-to-person communications regardless of the medium used to communicate: telephone support, online technical support, customized support, and/or technical expertise which are charged commercially.
54151S	Information Technology Professional Services IT Professional Services and/or labor categories for database planning and design; systems analysis, integration, and design; programming, conversion and implementation support; network services, data/records management, and testing.

1a. Identification of the lowest priced model number and lowest unit price for that model for each special item number awarded in the contract.

1c. If the Contractor is proposing hourly rates a description of all corresponding commercial job titles, experience, functional responsibility, and education for those types of employees or subcontractors who will perform services shall be provided. If hourly rates are not applicable, indicate "Not applicable" for this item. See Labor Category Descriptions Page 6.

2. **Maximum Order:** \$500,000.00

3. **Minimum Order:** \$100.00

4. **Geographic Coverage (delivery Area):** Domestic

5. **Point(s) of production (city, county, and state or foreign country):** Same as company address

6. **Discount from list prices or statement of net price:** Government net prices (discounts already deducted).

7. **Quantity discounts:** None

8. **Prompt payment terms:** Net 30 days.

9. **Foreign items (list items by country of origin):** None

10. **Time of Delivery (Contractor insert number of days):** As agreed upon between the contractor and the ordering activity.
- 11a. **Expedited Delivery.** As agreed, upon between the contractor and the ordering activity.
- 11b. **Overnight and 2-day delivery:** N/A
- 11c. **Urgent Requirements.** As agreed, upon between the contractor and the ordering activity.
12. **F.O.B Points(s):** Destination
- 13a. Ordering Address(es): **EVO Technologies, LLC**
ATTN: Bernard Ellis Jr

- 13b. **Ordering procedures:** For supplies and services, the ordering procedures, information on Blanket Purchase Agreements (BPAs), and a sample EPA can be found at the GSA/FSS Schedule homepage (fss.gsa.gov/schedules).
14. **Warranty provision:** N/A
15. **Export Packing Charges (if applicable):** N/A
16. **Terms and conditions of rental, maintenance, and repair (if applicable):** N/A
17. **Terms and conditions of installation (if applicable):** N/A
- 18a. **Terms and conditions of repair parts indicating date of parts price lists and any discounts from list prices (if applicable):** N/A
- 18b. **Terms and conditions for any other services (if applicable):** N/A
19. **List of service and distribution points (if applicable):** N/A
20. **List of participating dealers (if applicable):** N/A
21. **Preventive maintenance (if applicable):** N/A
- 22a. **Environmental attributes, e.g., recycled content, energy efficiency, and/or reduced**

pollutants: N/A

22b. If applicable, indicate that Section 508 compliance information is available for the information and communications technology (ICT) products and services and show where full details can be found (e.g. contractor's website or other location.) ICT accessibility standards can be found at: <https://www.Section508.gov/>. N/A

24. Notification regarding registration in System for Award Management (SAM) database:
Registered.

GSA Awarded Pricing

SIN	Labor Category	Final GSA Price
54151/54151S	Project Manager	\$137.74
54151/54151S	Software Engineer	\$168.06
54151/54151S	Systems Administrator	\$140.71
54151/54151S	Principle Business Analyst	\$119.34
54151/54151S	Database Engineer	\$166.84
54151/54151S	Help Desk Specialist	\$83.79
54151/54151S	Subject Matter Expert	\$149.92
54151/54151S	Web Content Administrator	\$108.82

Labor Categories Descriptions

Project Manager

Minimum Experience: Minimum of 10 years IT experience. Experience includes increasing responsibilities in information systems design and management. Responsible for the overall management of the specific task and ensuring that the technical solutions and schedules in the task order are implemented in a timely manner. Responsible for recruiting, staff oversight, team leadership, and personnel development. Must contribute to Company level technical planning as well as interfaces to other Company activities.

Functional Responsibility: Responsible for the performance of relatively small technical projects or a definable portion of a larger technical program in accordance with contract requirements and company policies, procedures and guidelines. Directs and supervises all support resources for the performance of project assignments and activities. Manages the technical direction of a project through the design, implementation, and testing in accordance with project objectives. Responsible for acquiring follow-on business associated with assigned projects and for supporting new business development by leading relatively small proposals or assisting with major proposals. Provides supervisory, technical, and administrative direction to project staff; interfaces with customers; tracks project performance and costs; and prepares plans, charts, tables, and diagrams to assist in analyzing and displaying problems and solutions.

Minimum Education: Requires Master's degree or equivalent.

Software Engineer

Minimum Experience: 10 years - Software development experience. Requires comprehensive knowledge of multiple platforms and operating systems, and of programming languages such as HTML, CSS, jQuery, JavaScript, Python, Angular, C++ or other languages pertinent to the contract. Typically requires some knowledge of one or more systems architectures such as client/server and distributed processing.

Functional Responsibility: Able to provide leadership and participate in complex large software engineering efforts and appropriately coordinating with others. Applies exceptional expertise as a generalist or specialist. Designs and codes software components, units, and modules that meet product specification and development schedules. Tests and debugs assigned components and units. Participates in large systems and subsystem planning. Adheres to product build and release

schedules and strategies. Acts as a technical resource for lower-level developers.

Minimum Education: A Bachelor's degree in computer science/systems, information systems/technology, engineering/engineering technology, software engineering/programming.

Systems Administrator

Minimum Experience: 10 years - Twenty years of technical experience which applies to systems analysis and design techniques for complex computer systems. Requires competence in all phases of systems analysis techniques, concepts and methods; also requires knowledge of available hardware, system software, input/output devices, structure and management practices.

Functional Responsibility: Able to provide leadership and participate in complex large engineering efforts and appropriately coordinating with others. Applies exceptional expertise as a generalist or specialist. Supervises and manages the daily activities of configuration and operation of business systems which may be mainframe, mini, or client/server based. Optimizes system operation and resource utilization, and performs system capacity analysis and planning. Provides assistance to users in accessing and using business systems.

Minimum Education: A Bachelor's degree in computer science/systems, information systems/technology, engineering/engineering technology, software engineering/programming

Business Analyst

Minimum Experience: 12 years of related experience. Provides expertise in the formulation of systems scope and objectives relative to the organization's business plan and industry requirements. Works independently or as a member of a project team responsible for providing technical guidance related to the business implications of the application of various systems. Provides technical consulting on complex projects. Devises and/or modifies procedures to solve the most complex technical problems related to computer equipment capacity and limitations, operating time and form of desired results. Create detailed specifications from which programs will be written.

Functional Responsibility: Defines complex business requirements, understands business issues and data requirements of client's organization and industry. Develops functional and system design specifications. Interacts with client and project management in these activities. Responsible for complying with quality and documentation standards. Provides assistance to users in accessing and using business systems. Provide guidance to less experienced Business System Analysts. Sometimes fulfill similar roles such as knowledge manager, content manager, technical writer, document specialist, configuration management, etc.

Minimum Education: Requires Bachelor's degree

Database Engineer

Minimum Experience: 10 years of related experience. Operates at the system level and has learned skills that will apply across the full system life cycle from requirements through database design and implementation. Is trained in system design and development skill as well as database-related skills.

Functional Responsibility: The Database Engineer's focus is database-centric, based on the understanding that the heart of every information system is the database, but with a solid view of how the database integrates and operates with other system components. Skills include defining data and database requirements, defining database design alternatives, designing logical data models, and designing physical databases. May be a skilled DBA, as is often the case, but in all cases understands advanced database concepts such as replication or parallel operations and knows when, from a system perspective, to apply them as part of the engineered solution. Will set up and test different design scenarios (or to direct these activities) early in the system development life cycle as part of the process of validating the suitability of proposed design alternatives. Test scenarios must generate sufficient performance data to support database design decisions.

Minimum Education: Requires Bachelor's degree or equivalent.

Help Desk Specialist

Minimum Experience: 10 years of related experience in computer hardware, software, networking systems, and in the set-up, configuration, use, and troubleshooting of computer systems.

Functional Responsibility: Closes activities of tickets assigned. Responsible for providing in-depth and high level, support to end-user community on hardware, software and network related problems, questions, and use. May provide training and guidance to more junior help desk personnel. Provides first level problem resolution on the telephone with users, walks the user through a series of steps to determine problem and classify level, priority and nature of problem. If unable to diagnose problem and/or problem requires physical interaction with end user dispatches field engineers from appropriate team. Opens, tracks and closes trouble tickets; ensures problem ownership and promotes end-user satisfaction.

Minimum Education: Requires Bachelor's degree (in Computer Science or related field) or equivalent.

Subject Matter Expert

Minimum Experience: Renowned expertise in functional domains such as finance, personnel, acquisition, etc. or technical disciplines such as computer security, network engineering, etc. Extensive experience as technical leaders and senior Project Managers. Prepares and delivers presentations to colleagues, subordinates, and government representatives. Assures the proper use of current or requested testing and documentation techniques. Produces, reviews substantive and complex documentation reflecting detailed knowledge of areas as identified in the statement of work. Prepares monthly status reports. May be assigned to customer site. May prepare and present briefings.

Minimum Education: Requires Master's degree in Business, Engineering, Management Sciences, Computer Science, Information Systems.

Web Content Administrator

Minimum Experience: 2 years of related experience.

Functional Responsibility: Responsible for managing and maintaining digital content across websites and online platforms. Updating, organizing, and maintaining website content using Content Management Systems (CMS) like WordPress, Drupal, SharePoint, Microsoft 365. Optimizing content for search engines (SEO) and tracking performance using tools like Google Analytics. Ensuring content is visually appealing and user-friendly, often requiring knowledge of HTML, CSS, and JavaScript. Reviewing content for accuracy, accessibility, and compliance with data privacy regulations. Working with marketing, IT, and design teams to align content with branding and business goals. Identifying and resolving website functionality issues to improve user experience.

Minimum Education: Requires Bachelor's degree (in Computer Science or related field) or equivalent.

Web Designer

Minimum Experience: 5 years of related experience.

Functional Responsibility: Responsible for creating visually appealing and user-friendly websites. Website design & layout developing site structure, wireframes, and mockups to ensure a seamless user experience. Enhancing usability, accessibility, and responsiveness across different devices for UI/UX Optimization. Designing icons, banners, buttons, and other interactive components for graphic and visual elements. Using HTML, CSS, JavaScript, and design tools to bring concepts to life. Ensuring cross-browser compatibility and fixing functionality issues. Incorporating multimedia elements like images, videos, and animations. Regularly updating content, fixing broken links, and optimizing performance.

Minimum Education: Requires Bachelor's degree (in Computer Science or related field) or equivalent.

Web Software Developer

Minimum Experience: 10 years of related experience.

Functional Responsibility: Responsible for designing, developing, and maintaining web applications and systems. Writing clean, efficient, and scalable code using languages like JavaScript, HTML, CSS, Python, PHP, Java, or C#. **Front-End & Back-End Development:** Building user interfaces with HTML, CSS, JavaScript frameworks (React, Angular, Vue.js) and managing server-side logic with Node.js, Django, or Spring Boot. Testing and debugging by conducting unit tests, integration tests, and performance optimization. Collaborating and documenting by working with designers, product managers, and stakeholders to ensure project success.

Minimum Education: Requires Bachelor's degree (in Computer Science or related field) or equivalent.
