LABOR CATEGORY DESCRIPTIONS

Associate Analyst I

Functional Responsibility: Assists in research, writing, and computer applications. Acquires data from clients. Develops and uses commercial software applications in support of task or contract goals. Inputs data to computer models. Operates, maintains, and adapts computer models. Analyzes model outputs as required by task or contract goals. Writes initial drafts of technical reports, contract deliverables, and client briefings. May interact with client in meeting task requirements according to task manager guidance.

Minimum Education: Bachelor’s degree in business, public policy, economics, political science, communications, planning, technology and policy, math, statistics, engineering, physical science, healthcare or related discipline. Two years of relevant experience may be substituted for degree requirement.

Minimum/General Experience: 1 year of experience. Strong microcomputer skills and knowledge of commercial software packages.
**Associate Analyst II**

**Functional Responsibility:** Position requires effective task participation and good writing and communication skills. Incumbents in this position begin working under close supervision and, over time, function with greater independence. Prepares draft sections of deliverables and proposals. Incorporates review comments into final deliverables. Coordinates progress with other work team members. Performs data collection (survey work, library research, computer research).

**Minimum Education:** Bachelor’s Degree in business administration, public policy, economics, political science, communications, planning, statistics, technology and policy, healthcare or related discipline. Two years of relevant experience may be substituted for degree requirement.

**Minimum/General Experience:** 2 years of relevant work experience in one or more of the following service areas: business administration, public policy, economics, political science, communications, planning, science, statistics, technology and policy.

**Associate Analyst III**

**Functional Responsibility:** Assists in research, writing, and computer applications, under general direction. May acquire data from clients as necessary. May develop and use commercial software applications in support of task or contract goals. Helps specify computer models and determine analytical approaches to meeting task or contract goals. Inputs data to computer models. Operates, maintains and adapts computer models. Analyzes model outputs as required by task or contract goals. Write drafts of technical reports, contract deliverables, and client briefings. Can interact independently with client in meeting task requirements. May assume role of task manager on some projects.

**Minimum Education:** Bachelor’s degree in business, public policy, economics, political science, communications, planning, technology and policy, math, statistics, engineering, physical science, healthcare or related discipline. Two years of relevant experience may be substituted for degree requirement.

**Minimum/General Experience:** Minimum of 3 years. Experience requirement may be met with a Master’s degree in a related field. Strong microcomputer skills and knowledge of commercial software packages.

**Business Analyst**

**Functional Responsibility:** Under direct supervision, assists in formulating and defining systems scope and objectives through research and fact-finding combined with a basic understanding of business systems and industry requirements. Includes analysis of business and user needs, documenting requirements, and revising existing system logic difficulties as necessary under direction of experienced Systems Analysts. Competent to consider most business implications of the application of technology to the current business environment.
**Minimum Education:** Bachelor’s degree in a technical, engineering, scientific, managerial, business, healthcare or other discipline related to area of expertise. Two years of relevant experience may be substituted for degree requirement.

**Minimum/General Experience:** Three to five (3-5) years applied experience in specific area of expertise including relevant functional experience. Experience includes: support of program management, process documentation exposure to information technologies, and development of deliverables. A Business Analyst implements consulting tools to satisfy project requirements by performing benchmark analyses, financial, and statistical modeling, and interviewing clients. Other experience includes: identifying strategic synergies within project scope.

**Associate**

**Functional Responsibility:** Primary requirements for position include a solid technical, functional and/or quantitative background, good writing skills, computer literacy, and good research skills. Position works under general supervision and requires attention to detail as well as an ability to learn new things quickly. Advanced knowledge in technical area of expertise. May supervise tasks of Research Assistant/Analysts. Constructs analysis on a variety of issues for public and private sector clients. Prepares (with Senior Associate or Project Manager) work plans, analytical approaches, and schedules. Identifies and resolves conflicting problems. Drafts and presents analysis to managers.

**Minimum Education:** Bachelor’s Degree in business administration, public policy, economics, political science, communications, planning, statistics, technology and policy, healthcare or related discipline. Two years of relevant experience may be substituted for degree requirement.

**Minimum/General Experience:** 4 years of relevant work experience in one or more of the following service areas: business administration, public policy, economics, political science, communications, planning, statistics, technology and policy.

**Consultant I**

**Functional Responsibility:** With direction from Consultant III or higher level project team members, assist with tasks, including entering or organizing quantitative and qualitative data from public sources, experts, and other sources, analysis and assessment of qualitative and quantitative data and perform research on relevant topics to support the services being provided, and presentations for the relevant set of services.

**Minimum Education:** Bachelor’s degree in business, public policy, economics, political science, communications, planning, technology and policy, math, statistics, engineering, physical science, healthcare or related discipline. Two years of relevant experience may be substituted for degree requirement.

**Minimum Experience:** Two years of relevant work experience in business, public policy, economics, political science, communications, planning, technology and policy.
General Experience: Experience includes working on project teams to provide services in one or more relevant service areas, including: consulting services, facilitation services; survey services; training services; quality assurance services; and program integration and project management services. With direction from Consultant III or project leader, capable of assisting with analytical, methodological, and management tools needed to organize, perform and deliver the services being provided, statistical analysis software packages, or evaluation methodologies.

Consultant II

Functional Responsibility: With direction from project leaders, perform tasks, including collection of quantitative and qualitative data from public sources, experts, and other sources, analysis and assessment of qualitative and quantitative data, writing of methods, approaches, summaries, evaluations and results, research on relevant topics to support the services being provided, and presentations for the relevant set of services. May assist in organizing sub-task approaches and schedules with direction from, and under the supervision of, project leaders.

Minimum Education: Bachelor’s degree in business, public policy, economics, political science, communications, planning, technology and policy, math, statistics, engineering, physical science, healthcare or related discipline. Two years of relevant experience may be substituted for degree requirement.

Minimum Experience: Four years of relevant work experience in business, public policy, economics, political science, communications, planning, technology and policy, math, statistics, engineering, physical science, healthcare or related discipline.

Consultant III

Functional Responsibility: With direction from project leaders, lead teams to perform tasks, including collection of quantitative and qualitative data from public sources, experts, and other sources, perform as well as oversee analysis and assessment of qualitative and quantitative data, writing of methods, approaches, summaries, evaluations and results, research on relevant topics to support the services being provided, and presentations for the relevant set of services. Assist in organizing sub-task approaches and schedules with direction from, and under the supervision of, project leaders.

Minimum Education: Bachelor’s degree in business, public policy, economics, political science, communications, planning, technology and policy, math, statistics, engineering, physical science, healthcare or related discipline. Two years of relevant experience may be substituted for degree requirement.
Minimum Experience: Six years of relevant work experience in business, public policy, economics, political science, communications, planning, technology and policy, math, statistics, engineering, physical science, healthcare or related discipline.

General Experience: Experience includes working on project teams to provide services in one or more relevant service areas, including: consulting services, facilitation services; survey services; training services; quality assurance services; and program integration and project management services. Lead teams under supervision from project leaders, capable of using relevant analytical, methodological, and management tools needed to oversee the delivery of the services being provided, statistical analysis software packages, or evaluation methodologies.

Consultant V

Functional Responsibility: Provide direction to teams that perform tasks, including collection of quantitative and qualitative data from public sources, experts, and other sources, analysis and assessment of qualitative and quantitative data, writing of methods, approaches, summaries, evaluations and results, research on relevant topics to support the services being provided, and presentations for the relevant set of services. Supervise and organize sub-task approaches and schedules and work with clients.

Minimum Education: Bachelor’s degree in business, public policy, economics, political science, communications, planning, technology and policy, math, statistics, engineering, physical science, healthcare or related discipline. Master Preferred. Two years of relevant experience may be substituted for degree requirement.

Minimum Experience: Ten years of relevant work experience in business, public policy, economics, political science, communications, planning, technology and policy, math, statistics, engineering, physical science, healthcare or related discipline.

General Experience: Experience includes managing project teams to provide services in one or more relevant service areas, including: consulting services, facilitation services; survey services; training services; quality assurance services; and program integration and project management services. Experience in managing teams that use relevant analytical, methodological, and management tools needed to organize, perform and deliver the services being provided, statistical analysis software packages, or evaluation methodologies.

Service Contract Labor Standards: The Service Contract Labor Standards (SCLS), formerly known as the Service Contract Act (SCA), is applicable to this contract as it applies to the entire Multiple Award Schedule (MAS) and all services provided. While no specific labor categories have been identified as being subject to SCLS/SCA due to exemptions for professional employees (FAR 22.1101, 22.1102 and 29 CRF 541.300), this contract still maintains the provisions and protections for SCLS/SCA eligible labor categories. If and/or when the contractor adds SCLS/SCA labor categories to the contract through the modification process, the contractor must inform the Contracting Officer and establish a SCLS/SCA matrix identifying the GSA labor category titles, the occupational code, SCLS/SCA labor category titles and the applicable WD number. Failure to do so may result in cancellation of the contract.
