Federal Supply Service

Authorized Professional Services Schedule (PSS) Schedule Price List for TransUnion LLC

About TransUnion

TransUnion is a leading global risk and information solutions provider to businesses and consumers. We provide consumer reports, risk scores, analytical services and decisioning capabilities to businesses. Businesses embed our solutions into their process workflows to acquire new customers, assess consumer ability to pay for services, identify cross-selling opportunities, measure and manage debt portfolio risk, collect debt, verify consumer identities and investigate potential fraud. Consumers use our solutions to view their credit profiles and access analytical tools that help them understand and manage their personal information and take precautions against identity theft.

On-line access to contract ordering information, terms and conditions, up-to-date pricing, and the option to create an electronic delivery order are available through GSA Advantage, a menu driven database system. The internet address for GSA Advantage is: www.gsaadvantage.gov.

For more information on ordering from Federal Supply Schedules, click on the FSS Schedules button at: www.fss.gsa.gov

25. Data Universal Number System (DUNS) number: 095300208
26. Trans Union LLC is registered in the System for Award Management database

The Service Contract Act (SCA) is applicable to this contract and as it applies to the entire Professional Services Schedule and all services provided. While no specific labor categories have been identified as being subject to SCA due to exemptions for professional employees (FAR 22.1101, 22.1102 and 29 CFR 541.300), this contract still maintains the provisions and protections for SCA eligible labor categories. If and/or when the Contractor adds SCA labor categories / employees to the contract through the modification process, the Contractor must inform the Contracting Officer and establish a SCA matrix identifying the GSA labor category titles, the occupational code, SCA labor category titles and applicable wage determination (WD) number. Failure to do so may result in cancellation of the contract.

Credit Reports

TransUnion Credit Reports are the foundation of any effective information management solution. They extract recently updated information from one of the industry’s largest repositories of consumer information and summarize it into a single, convenient form. Through the Credit Report, you receive relevant intelligence to quickly assess a consumer’s status, including credit and payment activity, account balances, public record data, and contact information.

A wide range of powerful add-ons and specialized reports also enable users to customize the TransUnion Credit Report to meet specific industry, population, or agency needs.

Credit Report and Credit Report Add-On Product Pricing

Service	Individual Inquiry Rate	Joint Inquiry Rate*
Credit Report	\$1.058	\$2.116
Employment Credit Report	\$1.820	N/A
Vantage Score 3.0	\$0.036	\$0.072
TU Bankruptcy Model	\$0.050	\$0.100
TU New Account Model	\$0.050	\$0.100
Income Estimator	\$0.030	\$0.060
ID Mismatch Alert	\$0.017	\$0.034
High Risk Fraud Alert	\$0.070	\$0.140
SSN Yr of Issuance	\$0.043	\$0.086
OFAC Name Screen	\$0.058	\$0.116
Credit Summary	\$0.040	\$0.080
Inquiry Analysis	\$0.050	\$0.100
TU Desktop	\$0.020	N/A

*Joint Inquiries are generated for two applying for credit jointly. The joint report is two reports delivered together so the rate for a joint report is double the individual report rate.

Collections Prioritization Engine (CPE)

Collections Prioritization Engine applies an advanced scoring model to your account holder’s key credit characteristics, helping you segment accounts based on the likelihood of recovery. You can set your own cutoff strategies and apply the most efficient treatments to each set of accounts.

Collections Prioritization Engine takes your accounts via batch processing and delivers easy-to-read results within 24 hours. This not only helps you focus your collections efforts correctly, it offers you essential contact data and isolates accounts which require special treatment.

Collections Prioritization Engine (CPE) Pricing

CPE Includes:

- Header Record
- 1 Score
- Bankruptcy Information
- Deceased Information
- Up to 20 Credit Attributes

Monthly Volume	Per Record
0 - 10,000	\$0.299
10,001 - 25,000	\$0.221
25,001 - 50,000	\$0.151
50,001 - 100,000	\$0.131

TransUnion IDVisionSM

TransUnion IDVisionSM (IDVision) is a commercially-available managed service designed to inspect consumer-provided identity information and perform anti-fraud measures in real-time. IDVision provides greater assurance that agency clients are interacting with the intended constituents and not with fraudsters. This capability is critical to protect agency portals and ensure accuracy, integrity and completeness. In addition, in-place user directories can be scanned offline to identify fraud risks or to simply correct previously provided and inaccurate data.

Identity data asserted by constituents is checked in real-time against TransUnion's highly curated array of U.S. person identity attributes. IDVision is powered by TransUnion's extensive coverage of personal data, which is critical to identifying underserved, emerging or thin-file users within an agency's user-base.

IDVision capabilities may be deployed as a holistic service, or as a modular component(s). Following are primary IDVision components:

- **Identity Verification**
- **IDVision Alerts**
- **Digital Verification**
- **Identity Authentication**
- **ID Passcode**

IDENTITY VERIFICATION

Identity Verification assesses the risk associated with an identity transaction, comparing user-provided details against multiple sources of data to confirm an applicant's identity. TransUnion's extensive data sources and complex algorithms allow Identity Verification to achieve high hit rates using a minimal amount of data. Below is a summary of Identity Verification's automated functions:

- Identity elements are confirmed, and also analyzed to spot unusual patterns of usage, links to other identities or suspicious behavior for thorough fraud and compliance checks
- Applicant information is screened against government watch lists
- Alert messages are provided that are based upon behavioral analysis, velocity checks and pattern matching, which are particularly effective at identifying synthetic fraud
- Detailed matching summary reveals discrepancies between the information provided by the consumer and multiple authoritative cross-industry checks of consumer activity
- Identity risk scoring including details that explain the nature of the risk(s)
- Pattern and velocity analysis with enhanced detection algorithms detect sophisticated fraud

Account Verification:

Account Verification is an add-on to Identity Verification which confirms financial and non-financial account information as provided by a constituent.

IDVISION ALERTS

IDVision Alerts use predictive analytics and an array of data sources to quickly identify signs of fraud risk such as:

- Unusual patterns of identity usage
- Suspected links to other identities
- Patterns suggesting fabricated or synthetic identities
- Government watch lists

DIGITAL VERIFICATION

Digital Verification evaluates consumer devices in real time, looking for anomalies, examining device reputations, and piercing through obfuscation (i.e. proxies) to determine a device's true location. Digital Verification assesses the risk of the online transaction from the moment a customer begins to interact with an agency's web portal. It examines the device being used (device fingerprinting), how it's being used (user behavior analytics), and an individual's online identity. This risk analysis, coupled with the results of other IDVision components, provides deeper insights into risk than traditional identity proofing.

IDENTITY AUTHENTICATION

Identity Authentication provides multiple modes of consumer authentication to balance risk and access. Identity Authentication can send a one-time passcode to a verified phone, and/or deploy dynamic knowledge-based authentication (out of wallet and/or in-wallet) exams to authenticate the user.

Synthetic Fraud Score:

TransUnion's Synthetic Fraud Score is a proprietary predictive risk score. It determines the likelihood that an identity as provided by a constituent is synthetic. Synthetic Fraud Scores are available for either Fair Credit Reporting Act permissible purpose or Gramm-Leach-Bliley Act permitted use.

Compliance with NIST SP800-63-2 (and -3):

IDVision has been approved as conforming to the NIST Special Publication 800-63-2 by SAFE-BioPharma (https://www.safe-biopharma.org/SAFE_Trust_Framework.html). TransUnion has self-assessed IDVision as compliant to NIST SP800-63-3 and expects approval in the first half of 2018.

Data Breach Services

TransUnion offers a suite of services around data breaches, credit monitoring, fraud protection, and fraud response. Our credit monitoring service includes, at a minimum, the following features: unlimited access to TransUnion Credit Report; unlimited access to VantageScore® credit scores and analysis; 24x7 credit monitoring alerting individuals to changes in their credit report; online credit dispute access; toll-free access to credit specialists; up to \$1,000,000 in identity theft insurance with no deductible (certain limitations and exclusions may apply); unlimited toll-free 24/7 access to identity theft insurance specialists; unlimited access to credit management and identity theft prevention resources; and, identity restoration services available for victims of identity theft.

All agencies will receive activation codes which can be used to turn on credit monitoring services. The government agency will distribute these codes to individual employees or consumers that might be potentially impacted by a data breach. The individuals then use their code to sign-up (90 day enrollment period) for the credit monitoring service. This sign-up can be accomplished by visiting the website www.transunionmonitoring.com and entering an individual activation code. At this point, enrollees will obtain instant unlimited access to TransUnion’s credit monitoring service for the length of time selected by the government agency.

Data Breach Services from TransUnion Consumer Interactive Pricing Per Enrollment

1 Bureau Credit Monitoring*	Per activation for 1-year of “TUCM”***
1-150,000	\$5.85
