1b. Identification of the lowest priced model number and lowest unit price for that model for each special item number awarded in the contract. This price is the Government price based on a unit of one, exclusive of any quantity/dollar volume, prompt payment, or any other concession affecting price. Those contracts that have unit prices based on the geographic location of the customer, should show the range of the lowest price, and cite the areas to which the prices apply.

1c. If the Contractor is proposing hourly rates, a description of all corresponding commercial job titles, experience, functional responsibility and education for those types of employees or subcontractors who will perform services shall be provided. If hourly rates are not applicable, indicate “Not applicable” for this item.
Senior Biologist / Project Manager: Minimum of Bachelor of Science degree and at least four years work experience in a natural resources related field including ecology, wildlife biology, forestry, botany and/or environmental science. Knowledge of the ecology of endangered, threatened, and candidate species required. Botanical experience preferred, including taxonomy, plant identification and sampling procedures and regulatory wetlands evaluation and determination. Provide advice, guidance and technical assistance on natural resource and environmental services including:

- Sampling and analysis procedures to collect occurrence, distribution and other data about target species within a focal project area.
- Assess relevant impacts of inventory information to overall project objectives.
- Generate summary reports of analyses, results and potential project impacts.
- Identify and implement habitat management measures that provide optimal benefit for project target species and minimize and mitigate project impacts.
- Develop and implement a variety of natural resource management plans including Habitat Conservation Plans, game and non-game management plans, and ecological restoration plans.
- Evaluate and minimize/mitigate potential project impacts to various natural resource elements, including watersheds, wetlands, wildlife, plant communities and forest resources.

Compliance / Project Manager: Minimum of Bachelor of Science degree and at least four years work experience in a natural resources related field including ecology, wildlife biology, forestry, botany and/or environmental science. Knowledge of federal regulatory acts and laws including National Environmental Policy Act (NEPA), Endangered Species Act (ESA), Clean Water Act (CWA), National Historic Preservation Act (NHPA) and National Forest Management Act (NFMA), Migratory Bird Treaty Act, and Bald and Golden Eagle Protection Act preferred. Experience in writing Biological Assessments (BA), Biological Evaluations (BE), Environmental Assessments (EA) and other regulatory compliance documents including the acquisition of special use permits is necessary. Wetlands delineation training and certification is also required. Work cooperatively with the client to provide advice, technical assistance and necessary assessments, documents, and support to ensure regulatory compliance for the project. Remain current on all applicable regulatory changes to environmental laws and regulations as they occur and attend periodic training as necessary and available.

GIS Manager: Minimum of Bachelor of Science degree and at least two years’ experience in Geographic Information Systems (GIS), geography or other applicable fields, including experience with ArcGIS software version 10.0 or greater and GIS data management. A working knowledge and field experience in the use of Global Positioning Satellite (GPS) receivers, computer interface, and GPS field-data acquisition, differential correction, and data management is also preferred. Provide GIS-GPS technical support in support of Raven’s natural resource and environmental consulting services and to clients whose projects require these services, including spatial data, database management and mapping. Attend periodic professional training as needed to improve GIS-GPS services and remain aware of changes in technology and the availability, quality, and web source or other locations for public domain GIS data.
Field Biologist: Minimum of Bachelor of Science degree and two years’ experience in natural resource related field including ecology, wildlife biology, forestry, botany and/or environmental science. Knowledge of the ecology of endangered, threatened, and candidate species required. Botanical experience preferred, including taxonomy, plant identification and sampling procedures and regulatory wetlands evaluation and determination. Provide technical support, advice and data acquisition in support of Raven’s natural resource and environmental consulting services. Work independently as necessary, assisting with and directing field surveys and inventory data collection, database management and data entry, and GPS field data acquisition. Coordinate and supervise equipment and field activities of field personnel and subcontractors to execute project objectives.

Forestry Technician: Minimum of Bachelor of Science Degree in biology, forestry or natural resource management with two years of work experience in the forest industry and/or natural resource management. Support and inform Raven’s natural resource and environmental consulting services by assisting with acquisition, collation and management of forest management specific data including: inventory data, timber harvest data, GPS field data acquisition and development of summary data reports.

Biological Technician: Minimum of Bachelor of Science Degree in biology, forestry or natural resource management with two years of work experience in the forest industry and/or natural resource management. Support and inform Raven’s natural resource and environmental consulting services by assisting with inventory data collection, endangered species occurrence and habitat surveys, endangered species habitat management, mark and tally, data entry and analysis, GPS field data acquisition and development of summary reports.

Administrator: Minimum of Bachelor Science or Bachelor of Arts Degree and two years’ experience in business administration, business management or related field. Support Raven’s natural resource and environmental consulting services by assisting with document management, information exchange with clients, accounts payable and receivable, contract/purchase order compliance, risk management, safety and workforce compliance and client account administration.
