Ecosystem Sciences, LLC  Advantage

Why choose Ecosystem Sciences for environmental services? Ecosystem Sciences brings unparalleled resources to its clients.

Quality — Ecosystem Sciences is globally recognized as a quality provider of consulting services. We have won numerous awards for our high quality work products. A majority of our clients engage us for additional work, offering further testament to our strong reputation and the value we provide to our customers.

Experience — With our breadth and depth of experience, Ecosystem Sciences offers a rich consulting skill base and management commitment to applying our world-recognized capability to innovatively reach program objectives. Our insights and understanding of requirements regularly translate into cost savings and performance efficiencies measurable in terms of reduced learning curves, high quality of service, and effective use of leading-edge information technologies. We have served civilian, military, and federal government agencies; state and local governments; private sector and not-for-profit agencies in projects covering a wide range of environmental and business services. These services are described in more detail in the following sections.

Well-Defined Management Practices — Ecosystem Sciences has spent years refining our management practices with the goal of developing a quality product that meets or exceeds client expectation, delivered on time and in budget. Our efforts have not gone without reward; much of our business is follow-on tasks for existing clients. This proves that Ecosystem Sciences delivers what we promise and achieves superior customer satisfaction. Our management approach is to provide a single point of responsibility, the project manager, with the charter of delivering the final product. That is not to say the manager works alone; the full complement of Ecosystem Sciences resources is available to assemble the right team to deliver the right results. Attention is paid to quality at Ecosystem Sciences, with defined standards and processes used throughout the firm.
Benefits of Using the GSA Multiple Award Schedule

GSA’s Multiple Award Schedule multiple-award contracts are intended to provide federal agencies and others with a quick and efficient means of dealing with their environmental needs. The GSA contract vehicle provides clients with services spanning all aspects of environmental planning, assessment, program management, and compliance.

GSA Advantages

GSA has facilitated the acquisition of commercial services for customers by establishing GSA Schedule contracts. Under the Federal Supply Schedule program, GSA enters into government-wide contracts with commercial firms to provide products and services at pre-approved prices and for a given period of time. This streamlined procurement approach significantly reduces the time required to obtain services because GSA has reviewed firm capabilities, negotiated rates, and pre-qualified commercial firms to provide services. The advantages of the Schedules program include:

- Reduction in time required to obtain services (usually a few weeks)
  - Synopsis is not required
  - Competition requirements have been met (FAR 6.102(d)(3))
  - Rates determined to be fair and reasonable
- Can be used by all federal agencies
- Agencies can order directly from the contracted vendor—no transfer of funds to GSA
- No maximum order limitations
- Blanket Purchase Agreements can be used to customize your solution
- Contractor teaming and subcontracting is allowed
Ecosystem Sciences Environmental Service Offerings

Today, environmental management is a universal concern. Government agencies and corporations around the world are seeking timely, cost effective ways to control environmental risk. Ecosystem Sciences has a long and successful track record in providing environmental management and technology services to assist clients in achieving environmental objectives.

Ecosystem Sciences has a dedicated staff of highly qualified environmental professionals. We have conducted numerous assignments pertaining to major environmental programs. We have found through this experience that most assignments require an integrated, multi-disciplinary team. Our team of professionals— with backgrounds in science, ecology, planning, GIS, cartography, and environmental studies—offers a comprehensive and practiced understanding of the issues involved in environmental advisory and management services.

MAS / Categories

- **541620: ENVIRONMENTAL CONSULTING SERVICES**
- **541370GIS: GEOGRAPHIC INFORMATION SYSTEM (GIS) SERVICES**

Under the Multiple Award Schedule Contract, Ecosystem Sciences service offerings are identified. The MAS Categories are listed below along with examples of the types of tasks that could be included under each. These are examples only and are not meant to exclude or limit any environmental services under this schedule.

Environmental Consulting Services

Ecosystem Sciences services include, but are not limited to:

- Planning and Documentation Services for the development, planning, facilitation, coordination, and documentation of and/or for environmental initiatives
- Environmental Assessment (EA) and Environmental Impact Statement (EIS) preparation under the National Environmental Policy Act (NEPA)
- Endangered species, wetland, watershed, and other natural resource management plans
- Environmental program and project management
- Environmental regulation development
- Climate change adaptation and resiliency planning and implementation support, including but not limited to, identifying climate risks and impacts; applying and interpreting climate and impact assessment model outputs; development and/or implementation of solutions to build climate resilience, reduce identified climate risks,
and/or provide both climate change mitigation and adaptation benefits; climate decision support, risk management, and vulnerability assessments and analyses; and climate risk communications

- Environmental, technical, economic and/or risk analysis
- Permitting
- Communication, graphics and design
- Other environmentally related studies and/or consultations

**Geographic Information System (GIS) Services**

This SIN provides geographic information system (GIS) services in support of environmental programs. Ecosystem Sciences services include, but are not limited to:

- Creation/enforcement of environmental legislation
- Cultural resource GIS (CRGIS)
- Environmental cost assessment
- Environmental impact analyses
- Environmental regulatory compliance
- Groundwater monitoring
- Growth forecast modeling
- Habitat conservation plans
- Habitat modeling
- Image analysis support
- Mapping, Cartography, and Mashups (e.g., combining data from more than one source into a single integrated tool to include aerial mapping);
- Migration pattern analysis
- Natural resource planning
- Remote sensing for environmental studies
- Terrestrial, marine, and/or atmospheric measuring/management
- Vegetation mapping;
- Watershed characterization for mitigation planning
- Cartography
- Communication, graphics and design
## Ecosystem Sciences Labor Rates

### Ecosystem Sciences Labor Category Descriptions

<table>
<thead>
<tr>
<th>Title/Role (GSA)</th>
<th>Labor Category Definitions</th>
<th>Min Education</th>
<th>Min Experience</th>
</tr>
</thead>
<tbody>
<tr>
<td>Principal</td>
<td>Performs program, operational, or technical management of large or complex, multi-discipline programs, projects or assignments. Advanced knowledge and the ability to originate and apply new and unique methods and procedures. Responsible for resources, technical direction, cost and schedule performance, and quality. Frequently manages multiple programs or projects concurrently and supplies technical advice and counsel to other professionals. Typical background include but are not limited to biology, ecology, water resources, fisheries, wildlife, environmental planning, ecological design, GIS and information sciences.</td>
<td>BS or MS degree</td>
<td>Minimum 8 years experience</td>
</tr>
<tr>
<td>Senior Scientist</td>
<td>Plans, conducts, and supervises programs, projects, or assignments. Obtains and coordinates resources to execute plans within cost and schedule restraints. Generally provides technical leadership and guidance on assignments. Collects, verifies and analyzes data and drafts reports of findings. May function as a technical expert on assignments. Typical background include but are not limited to biology, ecology, water resources, fisheries, wildlife and information sciences.</td>
<td>BS or MS degree</td>
<td>Minimum 6 years experience</td>
</tr>
<tr>
<td>Senior Environmental Planner</td>
<td>Plans, conducts, and supervises programs, projects, or assignments. Obtains and coordinates resources to execute plans within cost and schedule restraints. Generally provides technical leadership and guidance on assignments. Collects, verifies and analyzes data and drafts reports of findings. May function as a technical expert on assignments. Typical background include but are not limited to environmental planning, ecological design, water resources, GIS and information sciences.</td>
<td>BS or MS degree</td>
<td>Minimum 6 years experience</td>
</tr>
<tr>
<td>Subject Matter Expert</td>
<td>Provides expertise in a technical discipline. Provides technical and managerial direction for problem definition, approach methodology, analysis of findings, recommendations, and implementation for complex or extremely complex projects and assignments.</td>
<td>BS or MS degree</td>
<td>Minimum 6 years experience</td>
</tr>
<tr>
<td>Associate</td>
<td>Provides expertise in a technical discipline. Serves as assignment leader or key contributor on projects of limited scope and complexity. Collects, verifies and analyzes data. Operates under the direction of a program, project, or assignment leader. Typical background include but are not limited to biology, ecology, water resources, fisheries, wildlife, environmental planning, ecological design, GIS and information sciences.</td>
