1. SIN 874-4 Instructor Led Training

Security specialists must be accurate, consistent and efficient. However, most new security specialists are required to learn on the job. While hands-on experience is invaluable, ignoring professional training comes with many risks. Misinformation, out-dated techniques, and the use of incorrect tools put your security responsibilities at risk.

Lockmasters Security Institute is the industry leader in innovative physical security education. Our courses cover a wide variety of applications including Law enforcement, Government, Military, Corporate and commercial realities. We give you access to the information, tools and hands-on training for a competent and confident workforce.

Your goals are ours. In your long list of responsibilities, one oversight is one too many. We understand your level of accountability and the pressure you face every day. We have worked within every leading industry over our 50 year history to mitigate risk and increase security.

At Lockmasters Security Institute, we are committed to:

- Hands-on training using custom built labs and real-life scenarios that develop required knowledge, skills and abilities
- Innovation in research and development as well as the development of security training best practices
- Career advancement of each student through college accredited, government certified training and online education

1. SIN 874-4 Instructor Led Training

Basic Safe Penetration Training

\$600.00

This hands-on course was developed for Safe Lock Servicing graduates desiring to have more advanced skills in safe penetration. These skills are required to strategically drill into a container and defeat the locking mechanisms. Students also learn the art of maintaining safe's integrity and will be equipped for this lucrative market upon completion of this course.

Mechanical Safe Lock Servicing Training

\$1090.00

Combination locks have been the most effective security devices in financial institutions, retail businesses and government facilities for many years. These mechanical devices have evolved to include new electronic technologies. Today's technician must have a competency in both types of safe locks. This course will teach you the fundamentals of classifying and servicing each type.

Safe Deposit & Vault Lock Training

\$550.00

The safe deposit lock market continues to grow at exponential rates. As the service market continues to expand, so does the need for competent professionals who can service and maintain these products. Banks are now awarding contracts for individual services on their vault doors, key lock systems, vacuum tubes and most importantly, safe deposit boxes. Many hotels also provide safe deposit boxes for their guests. This course will give you the knowledge and skills to be a technician who is in demand.

Combination Lock Manipulation Training

\$780.00

Professional safe technicians know that manipulation is the ultimate safe opening skill. Manipulation takes advantage of design features and manufacturing tolerances so that a lock will reveal its combination. This allows the technician to open a safe without altering it in any way. In today's competitive market, having knowledge of this powerful diagnostic tool is critical. Students will learn many of the key aspects and techniques involved with this specialty.

Comprehensive Security Specialist Training

\$2325.00

This course prepares security specialists with a thorough understanding of the new threats facing today's security industry. You will learn how to make physical security adjustments, evaluate internal and external threats and develop a comprehensive security program. The knowledge and skills that you gain will make you an invaluable asset for either the government or the private sector.

Command Security Officer Training

\$1400.00

This ten-day course is designed for government personnel who want to have a solid foundation in everything from vulnerability analysis to physical security principles. You will also learn how to develop a comprehensive security program for your workplace. This instruction is perfect for enhancing your current knowledge. In an industry that is constantly changing, you will be equipped to analyze and evaluate both internal and external threats.

GSA Inspector Training

\$730.00

LSI's Inspector Certification course includes training in approved methods of opening, repairing and inspecting GSA containers and vault doors. In addition to this, students will be able to provide replacement labels if the inspected equipment meets the required security standards.

Force Protection Training

\$1150.00

This course provides Department of Defense (DoD) and Government Security Personnel with the necessary training to enable them to create a comprehensive Force Protection plan.

Access Control Technician

\$2450.00

Upon completion the student will be able to specify, install and service basic access control systems consisting of battery operated single door stand alone systems and centrally controlled hard wired, multi door access systems. The student will develop a working knowledge of access control system architecture and of the various authentication technologies currently available in the market. In addition the student will have a working knowledge and practical hands on experience installing different access control systems. The student will also acquire a practical knowledge of the basic concepts of low voltage electricity as it applies to any access control system, and an understanding of communication formats such as RS232, RS485, Wiegand, and RF.

Electronic Safe Lock Servicing

\$1090.00

This 5-day course teaches you the operating principles, installation and programming of electronic safe locks. You will learn hands-on how to install, program, diagnose and troubleshoot, as well as drill and defeat UL type 1 high security electronic safe combination locks.

Physical Security & Hardware Evaluation

\$550.00

The Physical Security course will introduce you to the basic elements of basic physical security techniques, along with the direction to implement a security program. Emphasis will be placed on designing a physical security program to be as effective and unobtrusive as possible. In addition, an introduction to security hardware and access control systems will increase the effectiveness of evaluations, recommendations and/or purchasing decisions.

Security Surveys & Hardware Evaluation

\$550.00

This course covers the processes for conducting, documenting and reporting various security surveys and/or security audits. Students learn about Threat Assessment and Risk Assessment issues and will also learn how to identify pre-incident indicators. The course concludes by giving students practice in conducting full security surveys.

Course Development and Administration

\$150.00 per hour

LSI offers Course Development and Test Administration customized to each particular organization's needs. These courses can range from technical instruction in the security field to management/security services type training. We would first evaluate the training needs of the organization and then develop a plan to accommodate those needs. At this point, we would begin course development and eventually the instruction of that material.

The price offered here is the same as is commercially available. There is a 0% discount offered for Course Development and Test Administration.

1. Course Development \$150.00 per hour
2. Test Administration \$150.00 per hour
3. Any special requirements will be evaluated on a situation basis and an estimate will be provided to the client before any development occurs.
