<td><strong>Nomencalture:</strong> Choking Manikin Adult</td>
<td>Simulaids</td>
</tr>
<tr>
<td></td>
<td>Completely realistic manikins available in child, adolescent, and adult sizes. Each life-size head and upper torso allows practice of abdominal thrust, chest thrust, and back blow procedures for clearing FBAO's. Manikins are made with specially selected durable vinyl to create tactile realism. When correct clearing procedures are performed, the manikin will expel the object causing the obstruction. The choking objects provided make excellent practice obstructions. Each manikin has a ribcage, xiphoid process, and jugular notch to provide anatomical reference points for the demonstration of hand placement for CPR technique. This aids in learning the physical shifts necessary. Manikins include choking objects, shirt, and soft carry bag.</td>

**Nomenclature:** AED Training Package  
**Manufacturer:** Simulaids

Item #: 100-2150U  
Retai Price: $646.70

This unit allows students to practice realistic device operation using AHA recommended training scenarios. An identical graphical operator interface and complete audio and visual prompts mimic the AED Plus in its look and operation. Screen messages, audible tones and voice prompts guide the user through all aspects of the rescue from arrival on scene and calling for help, to administering CPR and shock delivery.

**Nomenclature:** Economy Instructor Pack African American  
**Manufacturer:** Simulaids

Item #: 100-2151BU  
Retai Price: $799.70

This package is intended to give instructors the opportunity to replace older equipment or purchase start-up needs in the most economical way possible. The Economy Starter Package includes 1 Economy Adult Sani-Manikin, 4 pack with carry storage bag, 200 Adult Face Shield Lung Systems, 1 Sani-Baby Manikin 4 pack with carry storage bag, and 200 Baby Face Shield Lung Systems.

**Nomenclature:** Economy Instructor Start Up Pack

<td>Simulaids presents the latest package of CPR manikins designed to stretch your training dollar. The Sani CPR Family Pack is a combination of two Economy Adult Sani-Manikins, one Sani-Child, and one Sani-Baby manikin. The easy-to-install airways eliminate the need to clean the units between students. The manikins can be surface cleaned after each session. The foam filling offers resistance for the practice of chest compression and the head tilt/chin lift procedure opens the airway for ventilation. The package includes a carry bag, 100 Adult Face Shield Lung Systems, 100 Child Face Shield Lung Systems, and 100 Baby Face Shield Lung Systems.</td>

<td>Adam and David come with our patented ball valve airway, which replicates the occluded airway of the victim in need of CPR. It opens to allow air into the lungs when proper chin lifts are applied. These lightweight, latex free portable trainers feature channel mouth/nosepieces for each student. Lifelike anatomical landmarks are carotid pulse, sternum, rib cage, and substernal notch. Soft carry case with kneeling pads, instructions for use, 10 mouth/nose pieces, and 10 airway systems with lung included. Electronics indicate correct hand placement, adequate depth of compression and ventilation by illuminating individual light signals. Size: 31” x 17” x 10”. Ship weight 23 lbs. ribcage, and substernal notch. Soft carry case with kneeling pads included.</td>

<td>This rescue/CPR manikin replicates a wide range of real trauma conditions that are likely to confront the rescuer. Used for demonstrating and teaching proper CPR and first aid techniques, its features include resiliency and weight of a human body for realistic practice in transport, rescue, and lifesaving procedures. The lifelike anatomical landmarks include: a chest with sternum, ribcage, and substernal notch with natural resistance to chest compressions. The airway ball valve allows the lungs to inflate only with the head extended and accurately positioned. Add our trauma options to fully utilize the realism of this manikin.</td>

<tr>
<td></td>
<td>This regular-sized Rescue Randy unit has been developed especially for the aero-space industry and wing tank fuel cell rescue training, but it can be utilized in any confined space rescue. It exceeds the flexibility of the Regular Rescue Randy products (1300 series item numbers) because the waist flexes and the head twists to allow positioning of the manikin under dashboards, in tight spots, and under things where the Regular Randy will not go. Flexible 5 ft. 5&quot; Rescue Randy. Size: 50&quot; x 21&quot; x 12&quot;. Sh. wt. 60 lbs.</td>

<td>This 5 ft. 5&quot; tall, full body, foam-filled, latex free, lightweight manikin, has joint mobility for easy positioning in all types of environments. Standard features include: carotid pulse controlled by a squeeze bulb, Simulaids patented ball valve airway system, removable face pieces for controlling cross-contamination, and anatomical landmarks for determining proper hand position for compressions. Five lung systems and five removable face pieces are also included. The available options are a lower IV Arm, Trauma Moulage Kit, Transport Rescue Head (to preserve the CPR head during rugged rescue evolutions) and a carry bag. Order item No. 2725 &quot;with Electronics&quot; and receive a device that will illuminate individual light signals showing correct hand placement, adequate depth of compression, and ventilation. Visit simulaids.com for a complete list of moulages included with the optional Trauma Moulage Kit. Size 50&quot; x 21&quot; x 11&quot;. Ship weight 52 lbs.</td>

**Nomanculttare:** JT Brad CPR Manikin W/carry bag  
**Manufacturer:** Simulaids

Item #: 100-2804U  
Retail Price: $239.70

Our newest CPR manikin, JT Brad continues the tradition of rugged dependability, accurate compression resistance for adults, simple anti-cross contamination control, and all of the features you associate with Brad. Jaw Thrust Brad utilizes simple moving-parts technology for the instruction of the jaw thrust maneuver. Unique to the industry is the function of ventilating the patient when the proper maneuver is done without tilting the head. New AHA standards encourage you to push harder push faster. This manikin fortifies how hard you must push!

This Brad-style takes on a new look with Arabian features and skin color. The replacement lungs remain the same, so you can incorporate another ethnic group into your CPR training classes with minimal expense. Chin-lift/head-tilt technique opens the airway and anatomical landmarks encourage proper hand placement. Adult effort chest compressions can be eliminated by removing the chest plate from under the skin and small adult or adolescent compressions can be experienced. Helal comes with three mouth pieces, three airway systems, and a carry bag.

This unit allows students to practice realistic device operation using AHA recommended training scenarios. An identical graphical operator interface and complete audio and visual prompts mimic the AED Plus in its look and operation. Screen messages, audible tones, and voice prompts guide the user through all aspects of the rescue from arrival on scene and calling for help to administering CPR and shock delivery. The convenient handheld remote control for instructor use is preprogrammed with the eight American Heart Association Heartsaver AED training scenarios and offers a manual scenario function, plus attach pads, low battery, and call-for-service simulations. The training unit is powered by six "C" cell batteries (not included) or an AC adapter. Supplied with training electrode kit, training remote control, AC adapter, handheld cord, operator manual, administration guide, and one-year limited warranty. Shipped in two boxes. 28" x 18" x 10". Sh. wt. 15 lbs. 17" x 12" x 16". Sh. wt. 11 lbs.

This detailed adult intubation head comes mounted for clinical teaching and practice of advanced airway management. Intubation procedures and skills, including anatomy knowledge and recognition, endotracheal intubation, nasotracheal intubation, use of field emergency airway adjunct tubes like LMA and Combitube, securing, and suctioning, and maintenance of the installation can all be practiced with this unit. A soft carry bag, lubricant, and instructions for use are included.

Detailed anatomy featured on the adult intubation trainer stands out. Get a clear picture of human anatomy from the sculpted alveolar sac, bronchial tree, and blood vessel structures of the cross sectioned and exposed flexible lungs, to the interior main bronchus and oral/nasal pharyngeal spaces. Combine these details with an airway complicated by breakout teeth, tongue edema, and laryngospasm, and this airway trainer rates hard. An anatomical stomach that swells with esophageal intubation, or excessive pressure with the BVM during rescue breathing, together with the vomiting capability of this manikin makes this an exceptional educational tool for multitasking. Includes instructions for use, soft carry bag, and lubricant.

Simulaids NEW full arm IV trainer gives unlimited access to the major veins in the arm and hand, and a deltoid IM injection site. Antecubital, basilic and cephalic sites, coupled with the dorsal metacarpal veins, allow students to practice various area skills all on the same arm. The IM site contains a foam pad designed to be squeezed out and dried to facilitate multiple uses. Unit includes blood reservoirs and a supply of blood. Inexpensive skin, veins, and injection site can be easily replaced in the field.

**Item # 15-1303**

**Nomenculation:** eBook: BLS Provider Manual (German)  
**Retail Price:** $22.94

The German eBook version of the required student text for taking the Basic Life Support (BLS) course in a classroom-based format. This manual contains all the information students need to successfully complete the BLS course. Designed for use by a single student, this text is also ideal for use as a reference tool before and after the course. Includes an electronic version of the BLS pocket reference card. Based on the 2015 American Heart Association Guidelines for CPR and ECC, PC, Mac®, and iOS compatible. Please include an e-mail address when ordering. The access code and instructions on how to access the eBook will be e-mailed to you, usually within 1 business day. NOTE: This product is not eligible for the standard 30-day return policy. Prior to purchasing an American Heart Association eBook for a classroom-based course, students should check with their Instructor or Training Center Coordinator to ensure that mobile devices will be allowed in the classroom.

**Item # 15-1308**

**Nomenculation:** BLS Provider Manual (German)  
**Retail Price:** $22.94

This manual in German contains all the information students need to successfully complete the BLS course in a classroom-based format. Designed for use by a single student, this text is also ideal for use as a reference tool before and after the course. Full-color softcover, 104 pages, 8 1/2" x 11", plus a BLS reference card. Based on the 2015 American Heart Association Guidelines for CPR and ECC.

**Item # 15-1400**

**Nomenculation:** 2015 HeartCode® BLS (Online Key Code)  
**Retail Price:** $28.50

This item is the online portion of the Basic Life Support (BLS) course when taken in a blended-learning format. Once students pass the included exam at the end of the online portion, they participate in a classroom-based training session featuring discussion, skills practice, and testing. Successful completion of both the online and classroom portions, including skills practice and testing with a certified American Heart Association BLS Instructor, qualifies students for a BLS provider course card. The online program includes eSimulations and other interactive activities, and allows students to choose between in-facility and prehospital tracks to best meet their learning needs. PC and Mac® compatible.

**Item # 15-1401**

**Nomenculation:** Heartsaver CPR/AED online Part 1 Keycode  
**Retail Price:** $15.00

This item is the online portion of the Heartsaver CPR AED course when taken in a blended-learning format. Upon completion of the online portion, students participate in a hands-on session featuring skills practice and testing. Successful completion of both the online and hands-on portions, including skills practice and testing with a certified American Heart Association BLS or Heartsaver Instructor, qualifies students for a Heartsaver CPR AED provider course card. The online program includes audio, video, and interactive activities. PC and Mac® compatible. Please include an e-mail address when ordering. The access key and instructions on how to log in and register for the course will be e-mailed to you, usually within 1 business day. NOTE: You must purchase one online access key for each student trained. This product is not eligible for the standard 30-day return policy. (Note: Instructors must purchase the standard Heartsaver First Aid CPR AED Instructor materials to teach the blended-learning hands-on session.)

**Item # 15-1402**

**Nomenculation:** HS First Aid online Part 1 Keycode  
**Retail Price:** $20.00

This item is the online portion of the Heartsaver First Aid course when taken in a blended-learning format. Upon completion of the online portion, students participate in a hands-on session featuring skills practice and testing. Successful completion of both the online and hands-on portions, including skills practice and testing with a certified American Heart Association BLS or Heartsaver Instructor, qualifies students for a Heartsaver First Aid provider course card. The online program includes audio, video, and interactive activities. PC and Mac® compatible. Please include an e-mail address when ordering. The access key and instructions on how to log in and register for the course will be e-mailed to you, usually within 1 business day. NOTE: You must purchase one online access key for each student trained. This product is not eligible for the standard 30-day return policy. (Note: Instructors must purchase the standard Heartsaver First Aid CPR AED Instructor materials to teach the blended-learning hands-on session.)

PALS Instructor Essentials Online is the self-directed, online portion of the PALS Instructor Essentials course. The PALS Instructor Essentials course is designed to prepare Instructor candidates to teach AHA Instructor-led and blended-learning courses. Candidates who successfully complete the course receive access to a printable certificate granting them entrance to the hands-on, faculty-led session. They must pass this session to qualify for a PALS Instructor card, which qualifies them to teach the PALS provider classroom-based course and conduct HeartCode® PALS hands-on sessions, as well as the PEARs Instructor-led course. PC and Mac® OS X compatible (not compatible with iOS). Please include an e-mail address when ordering. The access key and instructions on how to log in and register for the course will be e-mailed to you, usually within 1 business day. **NOTE:** You must purchase one online access key for each candidate trained. This product is not eligible for the standard 30-day return policy.

These Static Pre-Circumcision and Post-Circumcision Models assist practitioners as an education aid to help explain the procedure and end result. Models accurately sized and include glans penis, frenulum, meatus, foreskin, and coronal margin landmarks.

Practice male and female urinary catheterization on Simulaids’ newly designed anatomically correct models. Training is enhanced by a new material that has a realistic feel and flexibility. Both models utilize a 16 FR catheter and can be used to demonstrate balloon inflation procedures. The models are individually mounted on a training stand and can be used on a tabletop or for patient simulation. A fluid reservoir allows for urine output upon successful completion of the insertion procedure. Instructors are able to teach sterile technique and insertion and removal of catheter, as well as practice preparing the patient for the procedure.
