**Course Description and Objectives:**

The Professional Practices for Business Continuity Professionals are defined as the skills, knowledge and procedures BC professionals need in order to lead a BC planning effort. This 5-day course includes 32 hours of instruction followed by the Qualifying Exam. Instructors offer a fast-paced overview of DRI International’s business continuity planning model and delineate the knowledge, skills and procedures needed to effectively execute each stage. Instructors present a case study exercise and other select exercises depending on the experience in the room. Upon completion of the course participants will be reminded of the BC planning stages and requirements to effectively implement each one, confirm their understanding of industry terminology, learn recent trends, and be able to articulate the roles of the BC planner, business components and executive management in developing, testing and maintaining BC plans. These are essential elements of the DRI International Qualifying Examination. The course will be divided into twelve lessons as follows:

**Lesson 1: BCM Project Management & Executive Support**

In this lesson you will learn how to establish the need for a business continuity program in your organization and how to obtain management support. You will also learn how to organize and manage the process of developing a business continuity program. This lesson identifies the requirements and imperatives of project management methodologies required to develop an enterprise-wide Business Continuity Program.

**Lesson 2: Risk Assessment and Analysis**

This lesson introduces the basic concepts of Risk Management and develops familiarity with the methodologies and models used in the Business Continuity Management profession, by providing an understanding of what a risk assessment is all about, why a risk assessment is important to a business continuity program, the elements of a risk assessment, and how these are utilized to build a business continuity program.

**Lesson 3: Business Impact Analysis**

This lesson introduces the reasons for and value of conducting a Business Impact Analysis. The student will understand methodologies, terms and definitions such as Mission Critical business processes, Recovery Time Objectives (RTO), and Acceptable Exposure to Loss.

**Lesson 4: Developing Business Continuity Strategies**

This lesson introduces the student to the challenges of selecting the appropriate strategies for recovery of business processes, critical functions, operations and the supporting information technologies within the specified recovery time objective. It defines alternative strategies, assesses the strengths and weaknesses of strategies and methodologies for presentation to management. We will identify the process steps involved in the analysis and strategy determination. This will be directly linked and supported by the data gathering activities accomplished during the risk assessment and BIA.
Lesson 5: Emergency Preparedness and Response

The purpose of this lesson is to provide an understanding of the emergency management structure and the planning necessary to manage a crisis for your organization. This will include identification, escalation, and notification procedures. It covers the challenges of reviewing and coordinating emergency evacuation programs in place in organizations, or working with the responsible areas to develop or enhance existing programs. Life safety procedures, emergency response procedures, and plan activation procedures are reviewed in detail. Specifically, you will learn how to lead your organization in implementing an action plan structure and mobilizing in response to an emergency. It will focus on procedures for activating the Emergency Operations Center and corresponding command centers, securing the area, assessing the damage, and salvage and restoration activities.

Lesson 6: Crisis Communications

All plans must include communication elements, and this chapter is designed to assist the student in making all the necessary preparations for managing an emergency. This lesson focuses on how to develop procedures that will allow you to effectively communicate with all audiences, to identify and train spokespeople, to develop key messages, and to work effectively with the media.

Lesson 7: Coordination with External Agencies

In Lesson 7, the student will learn to apply communication techniques, investigate partnering, and also review the Incident Command System. It also addresses compliance issues with applicable statutes or regulations. The student will understand terminology, priorities of first responders, and how to interface with emergency agencies.

Lesson 8: Plan Activation

In this lesson, you will learn about the emergency management structure and the planning necessary to manage a crisis for your organization. Specifically, you will learn how to lead your organization in implementing an action plan to structure and mobilize in response to an emergency. This lesson will focus on procedures for activating the Emergency Operations Center and corresponding command centers, securing the area, assessing the damage, and salvage and restoration activities.

Lesson 9: Plan Development

This lesson is designed to cover the application of skills and information gathered in putting the BCM program into action by identifying the components of the planning process including plan methodology, implementation, organization, and documentation. In order to develop the actual BCM plan document, you will need to lead your organization in several decisions on the approach, methodology and the plan document structure. DRI will address and discuss these issues to allow you as the planner to facilitate your organization in making these determinations. Experienced planners recognize that the plan document that best meets the needs of the organization and the personnel are most comfortable with using will be the plan document structure that is successful. This chapter will conclude with the elements of plan administration and plan documentation.

Lesson 10: Awareness and Training Programs

This lesson is designed to assist the student in developing the elements of a BC training and awareness program that will create and maintain organizational awareness and enhance the skills required to develop, implement, maintain, and execute all Business Continuity initiatives. The student will learn to differentiate the needs of demographic groups and teams within the BCM program. Students will gain from hands-on interactive activities designed to assist all professionals in enhancing the visibility and reach of their BCM programs.

Lesson 11: Testing and Exercise Programs

The students will learn and apply various techniques to improve the timeliness and quality of the BCM team response. Lesson 11 thoroughly reviews a variety testing and exercise programs and how to develop them for your organization. Interactive activities will help students to enhance the resiliency of their programs.

Lesson 12: Maintaining & Updating Plans

This lesson is designed to provide the ability to review, maintain, and update the BCM plan. It is designed to help students to maintain the BCM program over time, including updating procedures as needs change.
This lesson is provides the student with an overview and working knowledge of Professional Practice 8 and assists in developing processes to maintain the currency of continuity capabilities and the plan document in accordance with the organization’s strategic direction.

Course Description and Objectives:
The BCP 501 is a rapid business continuity planning refresher course covering the Professional Practices for Business Continuity Professionals in preparation for the DRI International Qualifying Exam. This 3-day course features 16 hours of instruction followed by the Qualifying Examination. Instructors take a fast-paced approach to the Professional Practices with emphasis on BC planning and the knowledge, skills and procedures needed to effectively implement each step of the planning process. The course will cover the following topics:

Disaster Recovery Planning
- Risk Analysis and Business Impact Analysis
- Identifying and Selecting Planning Teams
- Risks, Controls, Relationships, and Critical Functions
- Definition of Critical Functions and Applications
- Emergency Planning and Control of Communications Networks
- Managing Recovery Plan Development
- Developing the Plan
- Evaluation and Selection of Alternatives
- Setting Priorities
- Alternative Strategies
- Basic Plan Design
- Testing and Maintenance of the Plan
- Measurement Tools
- Effectiveness Evaluation and Audit Reports
- Developing Public Relations and Crisis Communication Procedures
- Initiation and Escalation Procedures
- Components of a Proactive Crisis Communication Plan
- Identifying Audiences
- Coordinating and Working with Public Authorities
- Identifying the Professional's Role
- Introduction to the Incident Command System
Course Title: Masters Case Study Review Post DRJ
Course Reference Number: BCP 601
Length of Course: 2 days (16 hours of instruction plus exam)
Minimum/Maximum Number of Participants: Minimum: 7 Maximum: 30
Price for Additional Students Above Minimum: N/A
Support Materials Provided: Yes
Commercial Course Price: $1,695.00
Discount % offered to GSA: 15%
GSA Course Price: $1,451.64

Course Description and Objectives:
This intensive two day (16 hour) course prepares participants for the MBCP (Master Business Continuity Professional) Case Study Exam. This course is intended for professionals with more than 5 years of experience in business continuity and disaster recovery planning. The course addresses all phases of business continuity planning. The Masters Case Study Exam is a challenging four and a half hour case study that assesses the candidate's knowledge and the application of that knowledge.

INSTRUCTION: Days 1 - 2, 8:30 am - 5:00 pm MASTERS EXAM: Day 3, 8:30 am - 1:00 pm

The course price includes continental breakfast, lunch, and occasional refreshment breaks. NOTE: It is mandatory that you bring your personal laptop to the BCP-601 COURSE and MASTERS EXAM. DRII will not provide a laptop for you. Please bring your laptop to class. DRII will provide power strips.

Also, you will need to have Microsoft Word 2003 or Microsoft Word 2007 on your laptop to take the exam. Your exam will be administered via USB drive. If you are bringing a company-owned laptop for use in your exam, please insure it will read and save Word files to USB drives not supplied by your organization.

Course Outline:
• Introduction and overview of the Professional Practices for Business Continuity Planners Project Initiation and Management Risk Evaluation
• Control Business Impact Analysis Developing Business Continuity Strategies Emergency Response and Operations Developing and Implementing Business Continuity Plans Awareness
• Training Programs Maintaining and Exercising Business Continuity Plans Public Relations and Crisis Communication Coordination with Public Authorities
Course Title | Novice and Experienced Auditor Training

GSA Course Price | $2,483.63

Course Description and Objectives:

BCLE-AUD is designed for novice and experienced corporate planners, internal and external auditors, personnel interested in self-assessing programs, personnel assessing program for clients, and personnel performing audits to better measure their state of preparedness. This course is an interactive program that provides training, tools and hands-on experience to help attendees understand the key components of disaster/emergency management and business continuity.

This course covers relevant standards, laws and regulations, the process of risk assessment, vulnerability analysis, loss prevention, risk mitigation, and the development, implementation, testing and maintenance of plans and procedures. Course materials delve into existing legal and regulatory requirements by industry and country, as well as emerging requirements. Specifically BS25999, NFPA 1600, ASIS, DRI International’s professional practices, financial services, insurance, healthcare, utilities, public sector guidance and a host of others will be explored. In addition, careful attention will be paid to the processes by which disaster/emergency management and business continuity programs are initiated with an eye toward corporate governance, policy, and procedures.

The tools provided will allow planners to perform audits in accordance to appropriate standards and regulations. Emphasis on audit requirements and documentation will aid in the evaluation of records, organizational roles and responsibilities, process flows and corporate oversight.
Chapter

Upon completion of the course participants will know:

- The strategic purpose of each BC planning stage along with the knowledge, skills and procedures needed to accomplish it
- Industry terminology
- The respective planning roles of the BC planner, the business components and senior management
- Resolutions to common roadblocks

Course Chapters:

Chapter 1: BCM Program Development and Project Management Principles

Chapter 1 contains an introduction followed by four lessons. You will learn how to establish the need for a business continuity program in your organization and how to obtain management support. You will also learn how to organize the program and manage the process. This chapter identifies the requirements and imperatives of project management methodologies required to develop an enterprise-wide Business Continuity Program.

Chapter 2: Data Gathering

This chapter introduces the basic concepts of Risk Management and develops familiarity with the methodologies and models used in the Business Continuity Management profession, by providing an understanding of what a risk assessment is all about, why a risk assessment is important to a business continuity program, the elements of risk assessment, and how these are utilized to build a business continuity program. It also introduces the reasons for and value of conducting a Business Impact Analysis. The student will understand methodologies, terms and definitions such as Mission Critical business processes, Recovery Time Objectives (RTO), and Acceptable Exposure to Loss. Chapter 2 contains seven lessons and an introduction.

Chapter 3: Developing Business Continuity Strategies

Chapter 3 contains five lessons and an introduction, and introduces the student to the challenges of selecting the appropriate strategies for mitigation and for the recovery of business processes, critical functions, operations and the supporting information technologies within the specified recovery time objective. It defines alternative strategies, and assesses the strengths and weaknesses of strategies and methodologies for presentation to management. We will identify the process steps involved in the analysis and strategy determination. This will be directly linked and supported by the data gathering activities accomplished during the risk assessment and BIA.

Course Description and Objectives:

The Professional Practices for Business Continuity Professionals are the skills, knowledge and procedures BC professionals must know to lead their organizations through a comprehensive BC planning process that results in an effective business continuity plan. This 10-day course includes 72 hours of instruction followed by the Qualifying Exam. Instructors take participants through DRI International’s BC planning model to illustrate the skills, knowledge and procedures required for each stage of BC planning. The course explores each planning stage in-depth using case examples, course exercises, participant work experiences and lessons learned.

Upon completion of the course participants will know:

- The strategic purpose of each BC planning stage along with the knowledge, skills and procedures needed to accomplish it
- Industry terminology
- The respective planning roles of the BC planner, the business components and senior management
- Resolutions to common roadblocks

GSA Course Price: $3,896.73
Chapter 4: Developing Business Continuity Plans

The business continuity plan is made up of many components and this chapter will closely look at each of these components over 12 separate lessons, beginning with roles and responsibilities. One purpose of this chapter is to provide an understanding of the emergency management structure and the planning necessary to manage a crisis for your organization. Chapter 4 introduces identification, escalation, and notification procedures that are part of building emergency response procedures. It covers the challenges of reviewing and coordinating emergency evacuation programs in place in organizations, or working with the responsible areas to develop or enhance existing programs. Life safety procedures, emergency response procedures, and plan activation procedures are reviewed in detail. Specifically, you will learn how to lead your organization in implementing an action plan structure and mobilizing in response to an emergency. It will focus on procedures for activating the Emergency Operations Center and corresponding command centers, securing the area, assessing the damage, and salvage and restoration activities. All plans must include communication elements and this chapter is designed to assist the student in making all the necessary preparations for managing an emergency. It focuses on how to develop procedures that will allow you to effectively communicate with all audiences, to identify and train spokespersons, to develop key messages, and to work effectively with the media. Chapter 4 also examines coordination with external agencies and addresses compliance issues with applicable statutes or regulations. The student will learn to apply communication techniques, investigate partnering, and also review the Incident Command System. It also addresses compliance issues with applicable statutes or regulations. The student will understand terminology, priorities of first responders, and how to interface with emergency agencies. In order to develop the actual BCM plan document you will need to lead your organization in several decisions on the approach, methodology and the plan document structure. We will address and discuss these issues to allow you as the planner to facilitate your organization in making these determinations. Experienced planners recognize that the plan document that best meets the needs of the organization and the personnel are most comfortable with using will be the plan document structure that is successful. This chapter will conclude with the elements of plan administration and plan documentation.

Chapter 5: Implementing the Business Continuity Plan

This chapter is designed to assist the student in developing the elements of a BCM training and awareness program that will create and maintain organizational awareness and enhance the skills required to develop, implement, maintain, and execute all Business Continuity initiatives. The student will learn to differentiate the needs of demographic groups and teams within the BCM program. Students will also learn and apply various techniques to improve the timeliness and quality of the BCM team response. Interactive activities will help students to enhance the resiliency of their programs through the use of testing and exercising their business continuity plans. Once plans are developed, they need to be maintained. Chapter 5 also assists in developing processes to maintain the currency of continuity capabilities and the plan document in accordance with the organization’s strategic direction.
