ABOUT EMSI

EMSI is a premier all-hazards, full-service, multi-discipline incident management and emergency management services and solutions provider. We specialize in multiple aspects of incident management and emergency management including:

*Training
Responses*

Workshops

*Consulting
Products*

Exercises

The EMSI Difference

- ✓ Decades of incident management and emergency management knowledge, leadership skills, and experience
- ✓ Proven expert practitioners, leaders, instructors, mentors, coaches, and innovators
- ✓ All-Hazards experience applicable to our varied client's needs
- ✓ Thorough understanding and appreciation of government and commercial sector history, culture, missions, and operations, and a desire to embrace entity processes
- ✓ Innovative approach to services resulting in focused solutions

Since its inception in 2000, EMSI has played a major role in helping to shape the response cultures of a wide spectrum of government and industry clients, including various local, state, national, international and private sector entities. Comprised of nationally and internationally experienced all-risk, all-hazards incident management experts, EMSI's seasoned cadre gives us exceptional background and perspective in supporting and enhancing incident and responder needs. Our services are key to our client's ability to prepare, train, exercise, and respond to emergencies of any cause, size, or complexity.

A global leader in the training and application of the Incident Command System (ICS), our services include a full spectrum of training development and delivery, customized functional workshops, Incident Management Team (IMT) training and team building, all types of exercises (TTX, FE, CPX, FSE, NNX, PREP) and exercise coaching, comprehensive IMT evaluation, ICS and IMT coaching, leadership development and training, and wide-ranging response support. Our reputation as a premier ICS and IMT training and exercise provider, and as ICS practitioners with IMT experience, is second to none. Through our thoroughly vetted and approved cadre of Subject Matter Experts (SMEs), we have assembled one of the most qualified and professional teams of practitioners and IMT members with all-hazards incident management experience in the world; we focus on quality, not simply quantity.

EMSI was founded by members of the original FIRESCOPE Task Force that developed ICS in the 1970s, and our team members have played a part in the development of ICS since its earliest inception. From the beginning, our staff members were involved in the original implementation of ICS, as well as the continued evolution of ICS from a predominantly fire-based system in Southern California to a national and international, all-risk, all-hazards model. Our team members include the original Type 1 Incident Commanders and IMT members under ICS. Our deep knowledge of the origins and design intent, as well as ICS flexibility, allows us to assist in applying the system to any situation without compromising it.

For years, our dedicated cadre has translated their exceptional emergency management and incident management backgrounds into enhanced learning for students. Serving as Area Commanders (ACs), Incident Commanders (ICs), and other Command and General Staff (C&GS) positions on Type 1 national and all-hazards IMTs, our cadre has managed highly complex, all-risk, all-hazards incidents throughout the U.S. and abroad.

We continue to develop and offer industry leading incident management solutions to a broad client base. Our clients span all levels of government and private industry, and we deliver our services on a global basis, delivering and developing system level training and position-specific training. Our clients today include:

- Major oil and gas and Fortune 500 companies, including their Business Units around the world
- Pipelines and railroads
- Federal, state, local government sector clients
- International entities

While we never stop improving, some things are unchanged at the core of who we are:

Our uncompromising commitment to excellence and quality

Our pledge to always serve our clients and improve their capabilities

Our commitment to never stop learning, whether that entails advances in incident management and emergency management or embracing new clients and their missions

Our deep respect and appreciation for our clients

ABOUT GSA SCHEDULE 00CORP

GSA Schedule 00CORP General

GSA has consolidated its professional services offerings into one Schedule. The new solution encompasses the same professional services offerings previously managed under eight separate schedules, but provides federal customers a more streamlined approach to procuring complex professional services requirements.

Advantages of Using the GSA Schedule 00CORP

PSS gives federal agencies the ability to use a single contract to procure simple to complex fixed-price or labor-hour professional services. When using PSS to acquire the professional services, agencies can:

- Use simplified acquisition procedures to issue a Request for Quotation (RFQ) using either your agency's solicitation system or GSA's eBuy solicitation system, or issue an RFQ directly to contractors using your agency's procedures.
- Allow unique Contractor Team Arrangements to bring a wide variety of industry partners to the negotiating table.
- Customize terms and conditions in task orders – or through Blanket Purchase Agreements – to meet specific requirements.
- Allows Order-Level Materials supplies and services to be acquired in direct support of an individual task or delivery order that are not established in the FSS contract.
- Be assured that required FAR terms and conditions are incorporated in the contract.
- Ensure adequate participation by small businesses, including setting aside RFQs for various socioeconomic subgroups.
- Save time by using the streamlined procurement procedures of FAR Subpart 8.4.

Authorized Users

All federal and appropriately warranted Contracting Officers are authorized to award task orders against PSS.

Placing an Order

To access PSS, visit GSA's eLibrary and select "00CORP" in the "Quick Search" dropdown box. Once you've decided which services you need, you can use GSA's eBuy to electronically post and receive quotations in a secure environment. Other resources that can help you properly use GSA Schedules include:

- FAR Subpart 8.405-1 through 8.405-3- Ordering procedures
- GSA's MAS desk reference guide
- GSA Schedules ordering guidelines
- GSA's online training resources
- In-person training and live web-based training for PSS by contacting professionalservices@gsa.gov

Appendix A

SIN 00CORP-500 Order-Level Materials

Pursuant to GSA Acquisition Manual Clause 538.72, Order-Level Materials, EMSI provides supplies and services in direct support of EMSI's other SIN offerings which are unknown before a task or delivery order is placed against this FSS contract, including:

- **Direct Materials**
- **Other Direct Costs**
- **Indirect Costs**
- **Subcontracts for supplies and incidental services for which there is not a labor category specified in this FSS contract,**

Prices of Order-Level Materials supplies and services are not established in this FSS contract.

Appendix B

SIN 874-1 Integrated Consulting Services Price List and Labor Category Description

EMSI provides consultation, training, exercises, and response services. We can supplement Incident Management Team (IMT) positions or provide entire teams. We also provide off-site and on-site services, up to full-time employees (FTEs).

EMSI offers substitution between education and experience requirements for each labor category.

Travel expenses are reimbursable at cost in accordance with clause C-FSS-370 at the Task Order level.

Other Direct Costs (ODCs): EMSI provides ODCs in support of this SIN through SIN 00CORP-500. Details are in Appendix A.

Training Courses Price List and Descriptions

Course Title	Course Number	Course Length (Days)	Price
Intermediate Incident Management Team	EM-ICS-320	3	\$23,857.25
Description			
This course focuses on the functions of Command, Command Staff, General Staff, Situation Unit Leader, Resources Unit Leader and Documentation Unit Leader in the planning process. It reviews functional responsibilities and what each position contributes to the development of an Incident Action Plan. Students practice learning points with a scenario based exercise that runs the length of the course. Students will graduate with the capability to perform on a Type 3 or Type 4 incident.			
Course Title	Course Number	Course Length (Days)	Price
Incident Response Planning	EM-ICS-341	4	\$27,170.34
Description			
This course focuses on the responsibilities of the functional units assigned to the Planning Section of an Incident Management Team. It is designed to enhance and exercise the student's knowledge of NIMS ICS as it pertains to the planning process during the initial response and the transition to extended response operations using an Incident Action Plan.			
Course Title	Course Number	Course Length (Days)	Price
All-Hazard Situation Unit Leader	EM-ICS-346	3	\$20,248.17
Description			
This course provides functional training on the roles and responsibilities of the Situation Unit Leader. The course is designed to enhance student's skills when using NIMS ICS and is exercise intensive to help enforce critical learning points.			
Course Title	Course Number	Course Length (Days)	Price
All-Hazard Resources Unit Leader	EM-ICS-348	3	\$19,522.77
Description			
This course provides functional training on the roles and responsibilities of the Resource Unit Leader. The course is designed to enhance student's skills when using NIMS ICS and is exercise intensive to help enforce critical learning points.			
Course Title	Course Number	Course Length (Days)	Price
Advanced Incident Command System	EM-ICS-400	2	\$12,815.40
Description			
This course covers the complexities of managing multi-jurisdictional and multi-agency incidents and how to apply various options related to major or complex incident management.			

Course Title	Course Number	Course Length (Days)	Price
Advanced Incident Commander	EM-ICS-410	4	\$27,564.15
Description			
This course focuses on the roles and responsibilities of the Incident Commander in an inter-agency response. It is designed to enhance the student's ability to perform their duties using NIMS ICS. This course is designed to be very exercise intensive and provides the student the opportunity to demonstrate the skills necessary to perform as a Type 2 Incident Commander in an all-hazards response environment.			
Course Title	Course Number	Course Length (Days)	Price
Liaison Officer	EM-ICS-412	3	\$22,766.56
Description			
This course provides functional training on the roles and responsibilities of the ICS Liaison Officer. It is intended to enhance and exercise the student's knowledge of NIMS ICS as it pertains to performing the numerous duties of the Liaison Officer during all phases of the response. The course is interactive and requires the student to demonstrate the necessary skills needed to be a successful Liaison Officer.			
Course Title	Course Number	Course Length (Days)	Price
All-Hazard Operations and Planning Section Chief	EM-ICS-430/440	5	\$39,489.97
Description			
Upon completion of the course, the student will have demonstrated the knowledge and skills necessary to perform the duties and responsibilities of the Operations and Planning Section Chiefs in the Incident Command System at the Type 2 level.			
Course Title	Course Number	Course Length (Days)	Price
Area Command	EM-ICS-620	3	\$25,624.76
Description			
This course focuses on the roles and responsibilities of Area Command Teams along with partner agencies and organizations to manage incidents requiring multiple Incident Management Teams or incidents of extraordinary significance that require a higher level of management. Scenarios are used to demonstrate the coordination between the on-scene Incident Management Teams and Area Command.			
Course Title	Course Number	Course Length (Days)	Price
Incident Command System for Initial Responders	EM-ICS-IR	1	\$6,394.44
Description			
This course provides the Initial Responder with an overview of their roles and responsibilities during the initial phase of response. It is designed to enhance and exercise the responder's understanding of NIMS ICS as it pertains to their involvement during a response. The course highlights interactions between the responder and Incident Command throughout the initial phases of the all-hazards response.			

Course Title	Course Number	Course Length (Days)	Price
Incident Command System for Technical Specialists	EM-ICS-THSP	2	\$14,855.59
Description			
This course provides the Technical Specialist with an overview of their roles and responsibilities during all phases of response. It is designed to enhance and exercise the technical specialist's understanding of NIMS ICS as it pertains to their involvement during a response. The course highlights ongoing interactions between the Technical Specialist and Incident Command throughout all phases of the all-hazards response.
