FIRM OVERVIEW

An end-to-end team productivity solution for the price of a hit-or-miss program.

Team Results is an organizational productivity improvement company that uses 21st-century ideas proven in the modern business and government workplace.

Gone are the team-building games, ropes courses, hackneyed catchphrases and pseudo-science of yesteryear. In their place comes a new era of modern ideas, based on originality, credibility, results and measurement - and all done with fun and laughter. This is real and up-to-date training used by some 30 Federal organizations like OPM and the State Department, not traditional “team building” or entertainment.

A Team Results program will equip your work team with their own proven, practical strategies that will raise work productivity by 20 to 60 percent, depending on the program you choose. Our goal is to get you two years of team progress in a program taking two days. The results will last at least one year and we will measure them for that year.

Government is teamwork. Here are some common examples, all from government clients, of performance outcomes our programs have achieved:

- Driving the uptake of change;
- Accelerating the pace of new government initiatives;
- Optimizing outreach within and across organizations;
- Driving and preserving high-performance organizational culture;
- Optimizing and recalibrating relationships between work areas and departments;
- Onboarding new leaders or leaders in new roles;
- Delivering elite results with a staff development program in your organization;
- Pre-deployment preparation for diplomats, law enforcement and military;
- Addressing and resolving sensitive, persistent or difficult work issues.

Working across Government since 1996 has allowed us to gain relevant expertise in most departments and most areas of activity. Government employees are the experts on what they do, but the environment is complex, nuanced and takes years to understand. Team Results has made that investment every day since 1996.

The unique feature of our programs is that they offer much more than just information. Your team will be actually doing the workplace productivity improvement on the program, not just talking about it or making plans. This is a program with an original approach, delivered by credible people, getting practical results which will be measured and reported back to you in writing. It is also a full end-to-end service with no hidden extras and yet is price-competitive with one-shot training events.

Join leading organizations like OPM, the FDA. NIH, the NRC, the State Department and top-100 companies like Toyota and Pfizer to experience the Team Results difference.

Anticipated budget cuts will require high team support for new Departmental policies aimed at doing more with less. As Director of your agency, you decide that that a key project team needs to focus on real-world strategies for this support. Severely limited in time and budget, you book a Rapid Response program with Team Results. Immediate results and follow-ups with measurement both show that attitude has changed as a result of better strategies, and productivity rises measurably as resistance to change decreases in the following weeks and months.

The Service Contract Act (SCA) is applicable to this contract as it applies to the entire MAS Schedule and all services provided. While no specific labor categories have been identified as being subject to SCA due to exemptions for professional employees (FAR 22.1101, 22.1102 and 29 CRF 541.300), this contract still maintains the provisions and protections for SCA eligible labor categories. If and/or when the contractor adds SCA labor categories/employees to the contract through the modification process, the contractor must inform the Contracting Officer and establish a SCA matrix identifying the GSA labor category titles, the occupational code, SCA labor category titles and the applicable wage determination number. Failure to do so may result in cancellation of the contract.
