## **Products Descriptions**

### **The Stryker Tabletop Gunner Trainer**

The Stryker RWS Tabletop Gunnery Trainer is a stand-alone PC-based training device. The system allows new Commanders to become familiar with the RWS prior to any qualification, field exercise or combat situations. The trainer also provides training to locate, identify, and engage enemy targets in accordance with the Stryker HBCT Gunnery Manual standards.

Both the M2 .50 caliber and the MK19 weapons are supported. The system utilizes a high resolution display with touchscreen for system and instructor controls and for training exercise control. A high-fidelity control grip is provided to move the weapon platform and fire the weapon. When training is launched, a window appears that depicts the Stryker Fire Control Unit (FCU) including a visual representation of each bezel component. The bezel is operated through the touchscreen. The display and bezel depicts the actual size of the Stryker FCU. The training control window is on the left side of the FCU display. The training window shows controls to launch training, to display exercise and situational data, and crew records. The FCU display depicts data displayed in each weapon system mode based on switch positions and settings. Exercise scoring is saved for the NCOIC and is presented at the end of each exercise so the Company Commander can track each individual's performance.

Exercises are developed to HBCT Gunnery standards. Once the Commander/Gunner has demonstrated proficiency with the FCU and controls, he has the ability to select exercises representing live combat situations.

### **Spares Package**

Initial spares package to support the Stryker Tabletop Gunnery Trainer. The package includes line item replacements for key device components. This package will support up to 5 Trainers and includes: one 23" touchscreen monitor, one USB Stryker Commander's Grip, one Shuttle computer, one video card, four USB cables, and one VGA cable. Additional packages are recommended for orders in excess of 5 Trainers.

### **Driver Station Accessory**

The Driver Station is a crew compartment for the Stryker driver crewmember that enables crew coordination training. Essential driving controls and driver vision blocks, driver seat with seat shaker, aural cue system, cables, and interface software are included. The compartment is mounted on lockable casters for easy positioning, and has forklift hoist points. This accessory connects to and utilizes software contained in the Stryker RWS Table-Top Gunnery Trainer. Visual and target databases are synchronized with the RWS Gunnery displays. Operation independent of the Stryker RWS Table-Top Trainer is not supported. Prices include all hardware, cables, power cord, and shipping to installation locations.

### **Extended Warranty – 3 Year**

This extended warranty coverage is for previously fielded RWS Table Top Trainers and strictly covers twice-annual travel to installation site(s) for Information Assurance patches, routine maintenance and replacement of normal wear and tear or failed items. Abuse or user damage is not covered.

### **Spares for Driver Station**

Recommended initial spares package to support the Stryker Driver Trainer and Instructor/Operator Station (IOS). The package includes line item replacements for key device components such as computers, monitors, cables, displays, headsets, and other pertinent hardware. This package will support up to 5 Trainers. Additional packages are recommended for orders in excess of 5 Trainers.

### **Software Upgrade to TC 3-20.31 Gunnery Manual Standards**

This product allows users to upgrade previously purchased Stryker RWS table Top trainers with software that supported HBCT gunnery standards to the new version that supports TC 3-20.31.
