The Whitlock Group is a systems integration firm focused on the design, procurement, engineering, installation and services of audiovisual, videoconferencing, video-streaming, digital signage, video-production and broadcast solutions. When you need a custom solution, come to The Whitlock Group. We represent over 400 product manufacturers, giving us the ability to design and implement systems based on each customer's unique requirements.

Even after we complete a customer's project, we want to ensure long-term total satisfaction. Therefore, we offer comprehensive Preventative Services Contracts and Maintenance Agreements with depot bench repair services, troubleshooting helpdesk support and dispatched on-site and loaner equipment to ensure optimal systems operation at all times. From conception to completion, you will enjoy worry-free service and support with The Whitlock Group.

OUR SPECIALTIES:
• Boardrooms/Conference Rooms
• Training Facilities
• Classrooms
• Auditoriums/Theaters
• Videoconferencing Facilities
• Telepresence Environments
• Sanctuaries
• Digital Signage Systems
• Video Streaming Solutions
• Network Operations Centers
• TV Studios
• Master Control Rooms
• Digital Production Suites
The Arlington County Emergency Communications Center (ECC) serves as the 9-1-1 emergency reporting center for Arlington County, VA and the dispatch center for Arlington County Police, Fire, Rescue and Emergency Medical Service units. The ECC also dispatches Fire/Rescue and Emergency Medical Service calls for its neighbor, the City of Falls Church. The Whitlock Group was selected to install advanced audiovisual systems for the Dispatch Center, Watch Desk Room and Roll Call Room at the ECC. The install involved a 2x7 Barco video wall with 50” diagonal cubes and fourteen Barco 47” LCD panels throughout these functional areas Dispatch Center, Watch Desk Room, Roll Call Room, and the Reception Area.
The priority mission of the Border Patrol is to prevent terrorists and terrorist weapons, including weapons of mass destruction, from entering The United States. Border Patrol agents patrol almost 6,000 miles of international land bordering Canada and Mexico as well as almost 2,000 miles of coastal borders.

The Whitlock Group completed the design-build of a 2 x 7 cube wall (14 cubes total) of 50” Christie cubes, controlled by both an Avitech and a Christie processor. This 14 cube video wall system allows operators to view multiple pieces of information whether video from surveillance cameras, data from computers, or videoconferences on one large display solution. Live images may be sent in real time to the Department of Homeland Security headquarters for observation and analysis. The images can be enlarged to expand to multiple cubes or minimized for viewing as picture in picture or thumbnail formats. Overall control of inputs and other audiovisual aspects of the video wall are provided by a custom programmed Crestron control system. The cubes are mounted on a Whitlock designed moving base to provide service access to the rear of the wall. The Whitlock Group also provided a 360 surveillance software package to provide mouse control of The Border Patrol’s surveillance cameras along the border. Custom Evans Consoles were provided for the dispatchers and supervisors.
