Alcohol Monitoring Systems Company History

Like many of the great technologies that impact our world today, the flagship product of AMS, the SCRAM Continuous Alcohol Monitoring® (SCRAM CAM®) system, was started in the garage of a forward-thinking engineer. With a career history working on DOT-approved, handheld breath testing devices, our company founders identified a substantial need to better manage alcohol monitoring long-term in the criminal justice system.

In 1989 they began research into the world of transdermal alcohol testing. And in 1997, their vision came clearly into focus, with the founding of Alcohol Monitoring Systems, Inc.

Decades later, AMS has evolved with the changing technologies, the changing marketplace, and the changing needs of our customers and our communities. Our focus today, led by the success of our flagship SCRAM CAM product, continues to be delivering technology solutions that are on the leading edge of what courts, agencies, and treatment providers need, and how our technologies can truly Make a Difference in the lives of offenders, their families, and their communities.

Overview of Schedule Offerings

| SIN | SIN Description |
|-----------|---|
| 334290 | Security and Detection Systems - Includes security and detection systems and devices, such as gas detectors, pressure level monitoring, patient/detainee monitoring systems, etc. NOTE: Excludes vehicular alarms. NOTE: Subject to Cooperative Purchasing |
| 334516 | Analytical Instruments - Includes analytical equipment for laboratory use, such as testing equipment, etc. |
| ANCILLARY | Ancillary Supplies and Services - Ancillary supplies and/or services are support supplies and/or services which are not within the scope of any other SIN on this schedule. These supplies and/or services are necessary to compliment a contractor's offerings to provide a solution to a customer requirement. This SIN may be used for orders and blanket purchase agreements that involve work or a project that is solely associated with the supplies and/or services purchased under this schedule. NOTE: When used in conjunction with a Cooperative Purchasing eligible SIN, this SIN is Cooperative Purchasing Eligible. |
| NEW | Introduction of New Supplies and Services - Includes the introduction of new supplies, technology and services categorically related to items already on GSA contract, which may be in commercial development and/or not yet introduced to the federal government. |
| OLM | SUBJECT TO COOPERATIVE PURCHASING – OLMs are supplies and/or services acquired in direct support of an individual task or delivery order placed against a Schedule contract or BPA. OLM pricing is not established at the Schedule contract or BPA level, but at the order level. Since OLMs are identified and acquired at the order level, the ordering contracting officer (OCO) is responsible for making a fair and reasonable price determination for all OLMs. OLMs are procured under a special ordering procedure that simplifies the process for acquiring supplies and services necessary to support individual task or delivery orders placed against a Schedule contract or BPA. Using this new procedure, ancillary supplies and services not known at the time of the Schedule award may be included and priced at the order level. |

Special Item Number (SIN) 334290 - Security and Detection Systems
Shelf Allowance (for daily rental equipment only)

Customers are allowed a 20% shelf stock allowance. This means that 20% of their total inventory (both in use and not in use) may sit on the shelf (not in use), at no charge. Over the course of a billing month, the total billable days for shelf equipment that is above and beyond 20% of the total billable days, will be billed at the rates listed below.

| Total Inventory Volume | SCRAM CAM | SCRAM House Arrest | SCRAM GPS | SCRAM Remote Breath |
|------------------------|-----------|--------------------|-----------|---------------------|
| 1-49 units | \$1.82 | \$0.70 | \$0.74 | \$1.48 |
| 50-149 units | \$1.75 | \$0.67 | \$0.74 | \$1.45 |
| 150-499 units | \$1.69 | \$0.64 | \$0.70 | \$1.38 |
| 500+ units | \$1.66 | \$0.64 | \$0.65 | \$1.35 |

Example: ABC County Probation had 100 SCRAM Remote Breath devices in their inventory for the entire month of November. They had 70 clients being monitored with SCRAM Remote Breath the entire month. 30 devices sat on their shelf (not in use) for the entire month. With a 20% shelf allowance, ABC County will not be charged billable days for November on 20 of their shelf devices (20% shelf allowance). Because 10 devices on the shelf were above their 20% allowance, they will be billed for 10 devices at \$1.45/day for November. 10 SCRAM Remote Breath shelf devices (x) \$1.45 for the 50-149 volume tier (x) 30 billable days in November = \$435.00 billed for exceeding 20% shelf allowance in November.

Lost or Damaged Allowance (for leased equipment only): Customers are allowed a 5% Lost or Damaged Allowance. This means that 5% of their total inventory (both in use and not in use) may be reported to AMS as "lost" or returned to AMS as "damaged", at no charge. At the end of a 12 month billing cycle or the termination of contracting for equipment and services, customers will be billed for the listed GSA purchase price of that piece of equipment for the number of devices lost or damaged above 5% of their average total inventory for the year.

Example: ABC County had an average of 100 SCRAM GPS devices for a full, 365-day, billable year. They reported 5 devices as "lost" and returned 2 devices to AMS as reported as "damaged" by the participants who were wearing them - 7 total devices reported as lost or damaged for the year. (Note: inoperable or malfunctioning devices that were not determined to be damaged by the participant either through an AMS failure analysis or as reported by the customer will not count towards this calculation.) Because 2 devices were above their 5% lost or damaged allowance, they will be billed at the listed GSA purchase price for 2 SCRAM GPS devices.
