# shade is our passion

Apollo Sunguard has been in the business of shade since 1993. As the oldest privately-owned shade manufacturer in the country, we're proud to be a leader in shade innovation.

We're committed to offering quality shade products backed by the best customer service and strongest warranty in the industry.

From government agencies, like NASA and the Marine Corp., to public parks, professional sports venues and more, Apollo Sunguard is proud to shade America.

*We deliver innovative solar protection and clean energy solutions to improve life.*

## ENGINEERED FOR STYLE & STRENGTH

Apollo Sunguard offers 32 different styles of shade structure, with 17 different fabrics and 11 standard frame colors available. With so many different options to choose from, there is sure to be a shade structure to meet your needs.

Our products are designed to be aesthetically pleasing, while also effective. Our cloths can block up to 96 percent of the sun's UV rays, and they're mold, mildew and fire resistant. We're also the only shade manufacturer to offer built-in, easy-to-use Quick Release Systems, which allow our fabrics to be easily removed.

All of our products are made in our 38,000 square-foot manufacturing facility in Sarasota, Florida, which allows us to maintain the highest level of quality standards.

Apollo Sunguard is a service-disabled veteran-owned small business. With all of our products made in the U.S.A., we're proud representatives of the American manufacturing industry. It's an honor to have our shades protecting American government and military personnel all over the world.

## FABRICATION

### Superior Engineering & Design

Apollo Sunguard designs shade structures that are architecturally appealing and functional, providing the most effective shade solutions. All our structures are engineered to withstand wind loads in accordance with the current version of the American Society of Civil Engineers (ASCE) 7, International Building Code (IBC), and applicable city, county and state codes.

#### FABRIC AND THREAD

We use a high-density polyethylene material with ultraviolet additives that is breathable. Our fabric resists mildew and mold and our advanced stitching thread is non-aging.

#### STEEL

Our shade structures are made from structural steel and Allied Steel products made from cold-rolled, galvanized tubular steel with a triple layer of protection. Allied products outperform most steels in tensile strength and long-term corrosion resistance, as well as saltwater spray and other weathering tests. Apollo Sunguard uses a special galvanized welding wire and then triple treats each weld with zinc (ZRC) coating for extreme corrosion protection. Hot dip galvanization is also available and is recommended for marine and aquatic environment installations.

### *Our Signature Kedar Plate System ensures long lasting, superior performance.*

#### 1 Custom Shade Sail

Designed, fabricated and reinforced for exact fit

#### 2 Stainless Steel Cable & Studs

Factory pre-installed, no field measuring or cutting required

#### 3 Adjustable Cable Studs

Allows for field adjustment for the perfect wrinkle-free cable tension

#### 4 QRS – Quick Release System™

Single tension bolt with safety nut for easy fabric removal and attachment; eliminates large gaps between sail and column

#### 5 Hidden Electronic Infrastructure

Custom designed to accommodate lighting, security, fans and more

#### 6 Stainless Steel Fabric Connections

Factory pre-installed 316 marine grade stainless steel; custom designed and precision laser cut plates with engraved identification

#### 7 Apollo Sunguard's Signature 360° "Halo" Ring

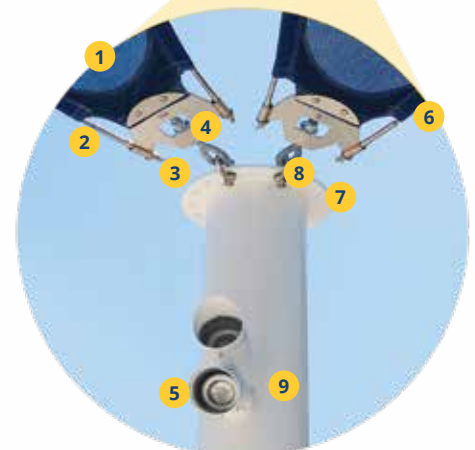

Design allows for multiple sail connections to a single column at a multiple phase of a shade project, providing ease of sail installation

#### 8 Articulating Connection

Certified load rated, specifically designed for high tension rigging with a safety locking system

#### 9 Engineered Heavy Duty Columns

High yield, high tensile, powder coated with zinc-enriched epoxy undercoat for maximum corrosion resistance

## THE APOLLO SUNGUARD DIFFERENCE

	MAJOR COMPETITOR WARRANTY	APOLLO SUNGUARD WARRANTY

339920PARK	Apollo Sunguard	120 Fabric	SHADE STRUCTURE- SHADE ACCESSORIES - Select the Sunguard 120 fabric option when your site requires a heavier fabric cover. This fabric is rated for 120mph winds. Priced by the square foot. We use a high-density polyethylene fabric with ultraviolet additives, which is known for its great strength, vibrant colors and durability. The fabric is rachel knitted which ensures fabric stability and prevents it from fraying, even when cut. This special knitting also ensures a consistent shade pattern. The breathable fabric allows for air flow and lowers the temperature up to 20 degrees. Apollo Sunguard specializes in pre-engineered and custom shade structures. Our structures provide the best protection against ultraviolet radiation and heat, and are designed/engineered to meet or exceed International Building Code (IBC), national and local building codes. Apollo Sunguard provides a 20 year non-prorated warranty on its steel framework and a 15-year non-prorated warranty on its fabric covers - the strongest warranty in the industry.	1	\$0.81
