

Federal Supply Schedule 084 – TOTAL SOLUTIONS FOR LAW ENFORCEMENT,
SECURITY, FACILITY MANAGEMENT SYSTEMS, FIRE, RESCUE, AND GUARD
SERVICES

FSC Group 63, Part 1, Special Item No: 246-35-1, 2, 5, 246-42, 246-50,
246-51, and 246-52

**PROFESSIONAL SECURITY ACCESS/FACILITY MANAGEMENT
SERVICES**

Contract Number GS-07F-0326-T

For more information on ordering from Federal Supply Schedules click on the FSS
Schedules button at fss.gsa.gov.

Contract period: April 18, 2007. through April 17, 2012

ELECTRONIC TECHNOLOGIES CORP – USA.
d/b/a
INGERSOLL RAND SECURITY TECHNOLOGIES

A subsidiary of Ingersoll-Rand Company
43 Mill Street
Dover Plains, NY 12522-1049
(703) 527-2744
(703) 527-0383 FAX
www.ETC-US.com.com
Business size. Large

Modification No. PO 0001 and 0002 effective April 18, 2008

1.2 Commercial Services

CUSTOMER INFORMATION:

1.

a. Special Item Number:

- 246-35-1 Access Control Systems: Door entry control by card access, magnetic proximity.
- 246-35-2 Access Control Systems: Door entry control by touch access, dial, digital, keyboard, keypad
- 246-35-5 Access Control Systems: Vehicle Arrest/Security Barrier/Barricade/Bollard Systems, Decorative Barrier Planters.
- 246-42-1 Facility Management Systems
- 246-50 Ancillary Services
- 246-51 Installation Requiring Construction (Davis Bacon)
- 246-52 Professional Services

b. Identification of the lowest priced model number and lowest unit price for this

<u>SIN</u>	<u>Part No.</u>	<u>GSA Net Price</u>
246-35-2	SLOTM	\$0.17

c. Hourly/Daily Rates – Description of skills provided

- i. Project Manager I
 - ii. Project Manager II
 - iii. Project Manager III
 - iv. Project Leader/Senior Systems Engineer
 - v. Security System Designer
 - vi. Security Technician I
 - vii. Security Technician II
 - viii. Technical Writer/Specification Writer
 - ix. Database Developer/Administrator
 - x. Systems Trainer
 - xi. Network Engineer
 - xii. Information Technology Specialist
 - xiii. Principal Systems Integrator/Developer
 - xiv. Staff Systems Integrator/Developer
 - xv. Program Manager
 - xvi. Senior Engineer
 - xvii. Engineer
 - xviii. Project Systems/Logistics Analyst
 - xix. Systems/Logistics Analyst
 - xx. CAD/Draftsperson
 - xxi. Installer – Electrician/Mechanic
 - xxii. Service/Maintenance Technician
2. Maximum order. \$100,000 SINs 246-1,2,5
\$150,000 SINs 246-42-1
\$200,000 SINs 246-50, 51, and 52,

3. Minimum order. \$100.00

4. Geographic coverage (Domestic, 50 states, District of Columbia, Puerto Rico, US Territories).

5. Point(s) of production (US). All services provided under this contract will originated at the ETC or IR headquarters facility through-out the US.
6. Discount from list prices or statement of net price. (Prices Shown is Net.)
7. Quantity discounts. None
8. Prompt payment terms. Net – 30 days form receipt of invoice of date of acceptance, whichever is later.
- 9a. Notification that Government purchase cards are accepted at or below the micro-purchase threshold.
- 9b. Government purchase cards are accepted or not accepted above the micro-purchase threshold.
10. Foreign items (list items by country of origin). Included in Price List.
- 11a. Time of delivery.
The Contractor shall deliver to destination within the number of calendar days after receipt of order (ARO), as set forth below:

SPECIAL ITEM NUMBER DELIVERY TIME (Days ARO)

246-35, 50, and 246-52 60 days or as negotiated between the contractor and ordering agency

11b. Expedited Delivery. 30 Days ARO. On a case by case basis dependent upon stock availability.

11c. Overnight and 2-day delivery. Yes. Customer may contact Contractor for rates for overnight and 2-day delivery.

11d. Urgent Requirements. Agencies can contact the Contractor's representative to affect a faster delivery. Customers are encouraged to contact the contractor for the purpose of requesting accelerated delivery. The Contractor will note in its price list the "Urgent Requirements" clause of its contract and advise agencies that they can also contact the Contractor's representative to affect a faster delivery.

12. F.O.B. point(s). Destination – 48 contiguous U.S., D.C. Inland Carrier – AK, HI, Puerto Rico, U.S. Territories

13a. Ordering address(es).

Orders should be directed to:
Ingersoll Rand Security Technologies
Attn: Steven O. Austin
1655 Fort Myer Drive, Suite 700
Arlington, VA 22209
Telephone: (704) 655-5936
Fax: (866) 848-9537
E-mail: steven_austin@irco.com

13b. Ordering procedures: For supplies and services, the ordering procedures, information on Blanket Purchase Agreements (BPA's) are found in Federal Acquisition Regulation (FAR) 8.405-3.

14. Payment address(es).

Payment may be made by check, wire transfer, or Government purchase card.

Address checks to:

Electronic Technologies Corp – USA
11819.N. Pennsylvania Street
Carmel, IN 46032-4555
For wire transfer information or payment by Government Purchase

Card:

Contact Dewayne Turner at (317)810-3700

15. Warranty provision. Standard Limited Warranty
16. Export packing charges, if applicable. Not Applicable
17. Terms and conditions of Government purchase card acceptance (any thresholds above the micro-purchase level). None
18. Terms and conditions of rental, maintenance, and repair (if applicable). Not Applicable.
19. Terms and conditions of installation (if applicable). Standard Limited Warranty
20. Terms and conditions of repair parts indicating date of parts price lists and any discounts from list prices (if applicable). Open Market. Contact Ingersoll Rand Security Technologies Government office.
- 20a. Terms and conditions for any other services (if applicable). See item number 15, 19 and 20.
21. List of service and distribution points (if applicable). See item number 20a.
22. List of participating dealers (if applicable). Not Applicable.
23. Preventive maintenance (if applicable). Not Applicable.
- 24a. Special attributes such as environmental attributes (e.g., recycled content, energy efficiency, and/or reduced pollutants). Not Applicable.
- 24b. If applicable, indicate that Section 508 compliance information is available on Electronic and Information Technology (EIT) supplies and services and show where full details can be found (e.g. contractor's website or other location.) The EIT standards can be found at: www.Section508.gov/. Yes
25. Data Universal Number System (DUNS) number. **789350154**
26. Notification regarding registration in Central Contractor Registration (CCR) database. Yes, ETC is registered in the (CCR) database.

ETC/Ingersoll Rand Security Technologies, participates on the following GSA Contracts as an Authorized Reseller:

RESTOCKING POLICY:

IR Schlage: Products may not be returned unless Customer receives written authorization from Company. Return merchandise authorization (“RMA”) number must be provided by Company. Product must be returned to Company within 90 days of issuance of RMA. Such RMA number and any accompanying RMA documents, the original invoice number, and a written explanation for the return Products in order for the Company to inspect and approve a credit for the return. Only those Products which have been in Customer’s inventory no more than 180 days for the date of shipment by Company and which are current, standard, non-obsolete, non-specially manufactured, unused, in their original condition as at the time of sale by Company to Customer, and are in their original packaging may be considered by Company for return. In the event Company approves a return, a credit will be made to Customer’s account less freight, and handling and reprocessing charge of 35% of the net material value on the original invoice. Products requiring reconditioning to return the Products to a saleable condition may be credited to a Customer’s account less freight, and a handling and reprocessing charge of 50% of net material value and less 2% for the cash discount allowance on the original invoice.

- b. IR Access Control – Same policy as IR Schlage.
- c. IR Time and Attendance – Same policy as IR Schlage.
- d. Delta Turnstile: For Standard Products, are accepted for unused products subject to a 35% restocking fee. For customer made products, there is no return for these items.

ORDERING PROCEDURES FOR SERVICES (REQUIRING A STATEMENT OF WORK)

FAR 8.402 contemplates that GSA may occasionally find it necessary to establish special ordering procedures for individual Federal Supply Schedules or for some Special Item Number (SINs) within a Schedule. GSA has established special ordering procedures for services that require a Statement of Work. These special ordering procedures take precedence over the procedures in FAR 8.404 (b)(2) through (b)(3).

When ordering services over \$100,000, Department of Defense (DOD) ordering offices and non-DOD agencies placing orders on behalf of DOD must follow the policies and procedures in the Defense Federal Acquisition Regulation Supplement (DFARS)(208.404-70 – Additional ordering procedures for services. When DFARS 208.404-70 is applicable and there is a conflict between the ordering procedures contained in this clause and the additional ordering procedures for services in DFARS 208.404-70, the DFARS procedures take precedence.

GSA has determined that Electronic Technologies Corporation (ETC) prices for services contained in this price list are fair and reasonable. However, the ordering office using this contract is responsible for considering the level of effort and mix of labor proposed to perform a specific task being ordered and for making a determination that the total firm-fixed price or ceiling price is fair and reasonable.

(a) When ordering services, ordering offices shall—

(1) Prepare a Request (Request for Quote or other communication tool):

- (i) A Statement of Work (a performance-based statement of work is preferred) that outlines, at a minimum, the work to be performed, location of work, period of performance, deliverable schedule, applicable standards, acceptance criteria, and any special requirements. (i.e., security clearances, travel, special knowledge, etc.) should be prepared.
- (ii) The request should include the statement of work and request the contractors to submit either a firm-fixed price or a ceiling price to provide the services outlined in the statement of work. A firm-fixed price order shall be requested, unless the ordering office makes a determination that it is not possible at the time of placing the order to estimate accurately the extent of duration of the work or to anticipate cost with any reasonable degree of confidence. When such a determination is made, a labor hour or time-and-materials quote may be requested. The firm-fixed price shall be based on the prices in the schedule contract and shall consider the mix of labor categories and level of effort required to perform the

services described in the statement of work. The firm-fixed price of the order should also include any travel cost or other direct charges related to performance of the services

- (iii) The request may ask the contractors, if necessary or appropriate, to submit a project plan for performing the task, and information on the contractor's experience and/or past performance performing similar tasks.
- (iv) The request shall notify the contractors what basis will be used for selecting the contractor to receive the order. The notice shall include the basis for determining whether the contractor are technically qualified and provide an explanation regarding the intended use for any experience and/or past performance information in determining technical qualification of responses.

(2) Transmit the Request to Contractors:

Based upon an initial evaluation of catalogs and price lists, the ordering office should identify the contractors that appear to offer the best value (considering the scope of services offered, pricing and other factors such as contractors' locations, as appropriate) and transmit the request as follows:

- (i) The request shall be provided to at least three (3) contractors if the proposed order is estimated to exceed the micro-purchase threshold, but not exceed the maximum order threshold.
- (ii) For proposed orders exceeding the maximum order threshold, the request shall provide to an appropriate number of additional contractors that offer services that will meet the agency's needs.
- (iii) In addition, the request shall be provided to any contractor who specifically requests a copy of the request for the proposed order.
- (iv) Ordering offices should strive to minimize the contractors' cost associated with responding to requests for quotes for specific orders. Requests should be tailored to the minimum level necessary for adequate evaluation and selection for order placement. Oral presentations should be considered, when possible.

(3) Evaluate Responses and Select the Contractor to Receive the Order:

After responses have been evaluated against the factors identified in the request, the order should be placed with the schedule contractor that represents the best value.

(See FAR 8,404)

- (b) The establishment of **Federal Supply Schedule Blanket Purchase Agreement (BPAs)** recurring services is permitted when the procedures outlined herein are followed. All BPAs for services must define the services that may be ordered under the BPA, along with delivery of performance time frames, billing procedures, etc. The potential volume of order under BPAs, regardless of the size of individual orders, may offer the ordering office the opportunity to secure volume discounts. When establishing BPAs, ordering offices shall—
- (1) Inform contractors in the request (based on the agency's requirement) if a single BPA or multiple BPAs will be established, and indicate the basis that will be used for selecting the contractors to be awarded the BPAs.
 - (i) **SINGLE BPA:** Generally, a single BPA should be established when the ordering office can define the tasks to be ordered under the BPA and establish a firm-fixed price or ceiling price for individual tasks or services to be ordered. When this occurs, authorized users may place the order directly under the established BPA when the need for services arises. The schedule contractor that represents the best value should be awarded the BPA.
 - (ii) **MULTIPLE BPAs:** When the ordering office determines multiple BPAs are needed to meet its requirements, the ordering office should determine which contractors can meet any technical qualifications before establishing the BPAs. When establishing multiple BPAs, the procedures in (a) (s) above must be followed. The procedures at (a) (2) do not apply to orders issues under multiple BPAs. Authorized users must transmit the request for quote for an order to all BPA holders and then place the order with the BPA holder that represents the best value.
 - (2) **Review BPAs Periodically:** Such reviews shall be conducted at least annually. The purpose of the review is to determine whether the BPA still represents the best value (See FAR 8.404)
- (c) The ordering office should give preference to small business concerns when two or more contractors can provide the services at the same firm-fixed price or ceiling price.
- (d) When the ordering office's requirement involves both products as well as executive, administrative and/or professional, services, the ordering office should total the prices for the products and the firm-fixed price for the services and select the contractor that represent the best value. (See FAR8.404).

- (e) The ordering office, at a minimum, should document orders by identifying the contractor from which the services were purchased, the services purchased, and the amount paid. If other than a firm-fixed price order is placed, such documentation should be including the basis for the determination to use a labor-hour or time-and-materials order. For agency requirements in excess of the micro-purchase threshold, the order file should document the evaluation of Schedule contractors' quotes that formed the basis for the selection of the contractor that received the order and the rationale for any trade-offs made in making the selection.

ORDERS

a. Agencies may use written orders, EDI orders, Blanket Purchase Agreements, individual purchase orders, or task orders for ordering services under this contract. Blanket Purchase Agreements shall not extend beyond the end of the contract period; all services and delivery shall be made and the contracts terms and conditions shall continue in effect until the completion of the order. Orders for tasks which extend beyond the fiscal year for which funds are available shall include FAR 52.232.19 Availability of Funds for the Next Fiscal Year. The purchase order shall specify the availability of funds and the period for which funds are available.

b. All task orders are subject to the terms and conditions of the contract. In the event of conflict between a task order and the contract, the contract will take precedence.

PERFORMANCE OF SERVICES

a. The Contractor shall commence performance of services on the date agreed to by the Contractor and the ordering office.

c. The Contractor guarantees the satisfactory completion of the services performed under the task order and that all contract personnel utilized in the performance of services under the task order shall have the education, experience, and expertise as stated in task order.

d. Any Contractor travel required in the performance of services must comply with the Federal Travel Regulation of Joint Travel Regulations, as applicable, in effect on the date(s) the travel. Contractors cannot use GSA city pair contracts.

INVOICES

The Contractor, upon completion of the work ordered, shall submit invoices for security consulting services. Progress payments may be authorized by the ordering office on individual orders if appropriate. Progress payments shall be based upon completion of

defined milestones or interim products. Invoices shall be submitted monthly for recurring services performed during the preceding month.

PURCHASE OF OPEN MARKET ITEMS

NOTE: Open Market Items are also known as incidental items, non-contracts items, non-Schedule items, and items not on a Federal Supply Schedule contract.

For administrative convenience, an ordering activity contracting officer may add items not on the Federal Supply Multiple Award Schedule (MAS) – referred to as open market items – to a Federal Supply Schedule blanket purchase agreement (BPA) or an individual task or delivery order, **only if**

- (1) All applicable acquisition regulations pertaining to the purchase of the items not on the Federal Supply Schedule have been followed;
- (2) The ordering activity contracting officer has determined the price for the items not on the Federal Supply Schedule if fair and reasonable;
- (3) All clauses applicable to items not on the Federal Supply Schedule are included in the order.

CLIN	JOB TITLE	POSITION DESCRIPTION, EXPERIENCE & EDUCATION
246-52 001	Project Manager	<p>Functional Responsibility: Responsible, with full authority, for management, performance and completion of projects such as security systems, security software applications, systems integration activities, facilities management, network operations, and engineering studies. Establishes and monitors master plans and schedules. Oversees the development of design concepts, test and acceptance criteria, and directs overall integration and installation activities. Establishes and maintains contact with client, business partners, and project team members to ensure conformance to customer requirements.</p> <p>Minimum Qualifications: Masters Degree in an associated discipline and 10 or more years related experience or an equivalent combination of education and training that provides the required skills, knowledge and abilities. At least 5 years must have been in a supervisory capacity.</p>
246-52 004	Project Leader/Senior Systems Engineer	<p>Functional Responsibility: Provides technical management and supervision to a team of technical or functional specialists and/or engineers and information technology experts supporting a particular client project. Analyzes Requirements Definition to establish functional requirements that are both technically sound and cost effective. Identifies capabilities and deficiencies of system design. Conceptually designs systems based upon analysis of the business domain, information technology environment, interfaces, software requirements, and network architectures as elements of total system design. Prepares specifications for implementations or applications. Establishes test plans and validation procedures to measure system performance and reliability.</p> <p>Minimum Qualifications: Baccalaureate Degree in an associated discipline and a minimum of 8 years related experience or an equivalent combination of education and training that provides the required skills, knowledge and abilities. At least 2 years must have been in a supervisory capacity.</p>
246-52 005	Security Systems Designer	<p>Functional Responsibility: Parlays security industry experience in the design, installation, test, and maintenance of integrated security systems and components in support of burglar, fire, intrusion, and access control. Proficient in developing project installation plans, site surveys, and documentation in support of systems design and implementation at facilities and installations. Proficient with installation codes, practices, and procedures including all security industry standards, manufacturer recommendations, and OSHA guidelines. Applies problem solving, innovation, and sophisticated integration practices in accordance with information technology best practices. Performs feasibility studies and analysis.</p> <p>Minimum Qualifications: Baccalaureate Degree in an associated discipline and a minimum of 7 years related experience, applicable security trade certifications or an equivalent combination of education and training that provides the required skills, knowledge and abilities.</p>

CLIN	JOB TITLE	POSITION DESCRIPTION, EXPERIENCE & EDUCATION
246-50/51 006	Security Technician I	<p>Functional Responsibility: Assists in the design and performs the installation of security systems. Develops or reviews designs by analyzing engineering data and schematics. Applies engineering practices to develop, prepare, or recommend schematics, designs, specifications, electrical drawings and parts lists. Conducts tests using equipment and procedures; sets up and operates equipment; records data, measures, and problems requiring resolution at a higher level; and analyzes data and prepares test reports. Conducts tests or experiments and redesigns as necessary; and records and evaluates data and reports findings. Provides technical guidance to lower level technicians.</p> <p>Minimum Qualifications: Associates Degree, military electronic specialization schools, applicable security trade certification(s) and a minimum of 3 - 4 years related experience or an equivalent combination of education and training that provides the required skills, knowledge and abilities.</p>
246-50/51 007	Security Technician II	<p>Functional Responsibility: Assists in the design and performs the installation of security systems. Develops or reviews designs by analyzing engineering data and schematics. Receives initial instructions, equipment requirements, and advice from supervisor or engineer as needed; performs recurring work independently or with supervision. Follows specific layouts, diagrams, and procedures. Troubleshoots the equipment and system and correct malfunctions.</p> <p>Minimum Qualifications: High school diploma, military electronic specialization schools, applicable security trade certification(s) and a minimum of 2 - 3 years related experience or an equivalent combination of education and training that provides the required skills, knowledge and abilities.</p>
246-52 008	Technical Writer/ Specification Writer	<p>Functional Responsibility: Produces documentation in support of security projects. Works with functional specialists to document system user requirements into easy to understand sequential guides and instructions. Documents other systems specifications and instructions at their baseline and modifies during system lifecycle. Performs administrative support functions as an adjunct to other contract activities. Uses advanced word processing applications and prepares plans, charts, tables, diagrams, and presentation materials.</p> <p>Minimum Qualifications: Associates Degree in an associated discipline and a minimum of 3 - 4 years related experience or an equivalent combination of education and training that provides the required skills, knowledge and abilities.</p>

CLIN	JOB TITLE	POSITION DESCRIPTION, EXPERIENCE & EDUCATION
246-52 009	Database Developer/Administrator	<p>Functional Responsibility: Applies an understanding of database management principles to conduct development, programming, and integration of databases in support of business/ functional activities, to include security and security integration projects. Establishes procedures for the DBMS and collects data elements and prepares database specifications. Develops, maintains, and controls the data dictionary. Responsible for the logical and physical design. Creates schemas and flow diagrams of database structures for management review to ensure proper support of security objectives. Maintains, refines, tests, and enhances the database and modifies logical relationships as necessary. Implements procedures for testing the back-up and recovery procedures of systems. Monitors statistics, conducts performance tuning, and prepares reports as required.</p> <p>Minimum Qualifications: Baccalaureate Degree in an associated discipline and a minimum of 5 years related experience or an equivalent combination of education and training that provides the required skills, knowledge and abilities.</p>
246-52 010	Systems Trainer	<p>Functional Responsibility: Develops and conducts technical training courses in security systems use and applications, commercial/third party software or proprietary systems, and specialty security locks and integrated devices. Develops terminal learning objectives and prepares lesson plans and audio-visual aids from engineering documentation, field service requirements, or software documentation. Works with sales professionals, software engineers, applications developers, functional experts, or technical support experts to ensure that course materials reflect current and relevant applications features. Instructs participants in classroom and laboratory sessions. Develops training procedures with a goal of improving content and communication. Provides concurrent management-level briefings, and overviews of specific areas of interest. Leverages technical knowledge of systems hardware, network and/or software applications as required, and other devices into effective performance-oriented training sessions.</p> <p>Minimum Qualifications: Baccalaureate Degree in an associated discipline and 5 years of experience or an equivalent combination of education and training that provides the required knowledge, skills, and abilities.</p>
246-52 011	Network Engineer	<p>Functional Responsibility: Performs a wide range of highly technical duties associated with the design, implementation and support of Local Area Network and Wide Area Network environments and related services. This includes, but is not limited to assisting with the integration of security systems hardware and software into the physical and logical architecture of the enterprise's existing information technology topography. Supervises staff members performing cable installation, network system planning and set-up, installation, monitoring, testing and servicing. Evaluates network loading, client/server hardware configuration, and emerging technology applications for enterprise-wide support. Works with senior staff members to plan and/or execute network budgeting issues. Creates schemas for top level management reviews of systems for organizational or project related implementation.</p> <p>Minimum Qualifications: Baccalaureate Degree in Computer Science, engineering or an associated discipline and a minimum of 7 -8 years of related experience that provides the required knowledge, skills, and abilities.</p>

CLIN	JOB TITLE	POSITION DESCRIPTION, EXPERIENCE & EDUCATION
246-52 012	Information Technology Specialist	<p>Functional Responsibility: Researches and evaluates new and emerging technology to support strategic planning initiatives required to meet business needs within the security domain. Performs evaluations, site surveys, requirements analysis and definition, technology prototyping, and cost analyses related to information technology and the integration of security technology into the IT infrastructure. Develops "proof of concept" through use of techniques such as rapid prototyping as a means for accelerating delivery of turnkey systems. May recommend changes in technology that support new and/or revised business practices.</p> <p>Minimum Qualifications: Baccalaureate Degree in an associated discipline and 5 - 7 years of progressive experience in researching, developing, testing, implementing and/or integrating emerging security technology to support new or existing business systems or an equivalent combination of education and training that provides the required knowledge, skills, and abilities.</p>
246-52 013	Principal System Integrator/Developer	<p>Functional Responsibility: Directs a broad range of hardware and software development projects and the translation of design specifications into applications meeting stated performance criteria. Oversees, redesign, debugging, and software refinements to produce the required product. Directs the preparation of required technical documentation and reports, including both program-level and user-level documentation. Creates architecture enhancements that reduce operating time or improve efficiency. Develops concepts to modify legacy systems and software as well as develops the concept for special-purpose applications to ensure efficiency and integrity between systems. Oversees requirements for design, programming, documentation and implementation of hardware and software applications that requires knowledge of legacy technologies and systems for effective development and deployment of new and redesigned systems and supporting software. Directs and manages in all phases of hardware and software development with emphasis on analysis, design, packaging, producibility, coding, testing, documentation, and acceptance. Responsible for identifying new and emerging technologies to support strategic planning initiatives required to meet customer needs. Directs assessments, evaluations, selections, site surveys, requirements analysis and definition, technology prototyping, and cost analyses related to the design and redesign of hardware systems and the supporting software applications.</p> <p>Minimum Qualifications: The qualified individual shall have a Bachelor's degree in computer science, information systems, electrical engineering, mechanical engineering, environmental engineering, telecommunications, business or other related analytical, scientific or technical discipline. The minimum/general experience may be reduced by two (2) years for a Master's degree in a technical discipline. An additional two (2) years of experience over and above the minimum/general requirement can be substituted with an Associates degree. An additional four (4) years experience can be substituted over and above the minimum/general requirement without a degree. This additional experience must be gained from a combination of education, training, or certification (technical diploma) that provides the requisite knowledge, skills, and abilities. Individuals shall have acquired the education and experience in one or more of the following areas of specialization:</p>

CLIN	JOB TITLE	POSITION DESCRIPTION, EXPERIENCE & EDUCATION
246-52 014	Staff System Integrator/Developer	<p>Functional Responsibility: Manages a broad range of hardware and software development projects and the translation of design specifications into applications meeting stated performance criteria. Oversees testing, redesign, debugging, and software refinements to produce the required product. Supervises the preparation of required technical documentation and reports, including both program-level and user-level documentation. Manages the enhancements to reduce operating time or improve efficiency. Leads the modification of legacy systems and software as well as develops the concept for special-purpose applications to ensure efficiency and integrity between systems. Develops requirements for design, programming, documentation and implementation of hardware and software applications that requires knowledge of legacy technologies and systems for effective development and deployment of new and redesigned systems and supporting software. Manages and leads in all phases of hardware and software development with emphasis on analysis, design, packaging, producibility, coding, testing, documentation, and acceptance. Responsible for identifying new and emerging technologies to support strategic planning initiatives required to meet customer needs. Directs assessments, evaluations, selections, site surveys, requirements analysis and definition, technology prototyping, and cost analyses related to the design and redesign of hardware systems and the supporting software applications.</p> <p>Minimum Qualifications: The qualified individual shall have a Bachelor's degree in computer science, information systems, electrical engineering, mechanical engineering, environmental engineering, telecommunications, business or other related analytical, scientific or technical discipline. CLIN	JOB TITLE	POSITION DESCRIPTION, EXPERIENCE & EDUCATION
246-52 015	Program Manager	<p>Functional Responsibility: Serves as the contractor's single contract manager, and shall be the contractor's authorized technical interface with the Government Contracting Officer (CO), Contracting Officer's Representatives (CORs), government management personnel, and customer agency representatives. Responsible for providing technical and managerial leadership of a major program in a specialized area of technology and for overall contract performance. Basic responsibilities include:</p> <ul style="list-style-type: none"> • Ensuring appropriate staffing required for major programs, projects or tasks • Managing and tracking program, project or task finances • Developing subordinate program, project or task personnel • Providing appropriate technical and administrative management oversight to engineers, scientists, analysts, logisticians, technicians, support personnel, etc., engaged in one or more fields of expertise • Scheduling and allocating work, providing advice and guidance, and resolving problems to meet technical performance and financial objectives • Developing new and refining existing process to enhance quality and productivity • Reviewing and evaluating work of staff and preparing periodic performance reports • Ensures the product quality and timeliness of efforts <p>Minimum Qualifications: This position requires a minimum of twelve (12) years of progressive experience which includes: managing, directing, and implementing complex hardware and software projects, demonstrated ability to provide guidance and direction for projects, proven expertise in the management and control of funds and resources, and demonstrated capability in managing multi-task contracts. Must possess extensive knowledge of engineering and management concepts, procedures and practices. General experience includes increasing responsibilities in information systems design and management; management of a diverse group of functional activities, subordinate groups of technical and administrative personnel; and management and control of funds and resources, and demonstrated capability in managing complex, multi-task commercial and government contracts.</p>

CLIN	JOB TITLE	POSITION DESCRIPTION, EXPERIENCE & EDUCATION
246-52 016	Senior Engineer	<p>Functional Responsibility: Applies engineering skills in the analysis, specification, development, integration, production, testing, and acquisition of systems, subsystems, or components. Evaluates and recommends commercial-off-the-shelf (COTS) applications, products, and methodologies that can provide interoperable, portable, and scalable technology solutions. Applies reverse engineering and reengineering disciplines to develop production planning and strategic migration documents. Ensures subsystem interoperability, system compatibility and overall compliance with open systems architecture standards. Conducts or supervises the preparation of electrical schematics, mechanical layouts, and creation of wiring diagrams; development of design solutions, and establishment of relevant procurement and design documentation. Establishes performance and technical standards and develop appropriate tests to assess, debug and validate system performance. Performs evaluation of alternatives and assessment of risks and costs. Documents the results of complex analysis and design tasks. May act as team lead and plans project/task coordination, management and engineering. Provides comprehensive definition of all aspects of system development from analysis of mission needs to verification of system performance. Can provide management oversight and daily supervision of team personnel and/or lead/coordinate complex task/project teams.</p> <p>Minimum Qualifications: This position requires a minimum of twelve (12) years experience, of which at least eight (8) years must be specialized. Specialized experience includes: establishment of system requirements; performance of systems engineering, trade studies, engineering analyses, and system evaluations; development of system designs and technical specifications; and testing and evaluating systems for acceptance. Additional experience includes the use of automated design tools (such as Pro/ENGINEER, Solid Works, etc.) to create and model system designs and processes, development of assembly/subassembly models, performance of simulations, and development of bill of materials (BOM) for system designs, and performance of hardware/software assessments. General experience includes skills in interfacing software with imbedded and non-imbedded hardware systems, application of computer-aided software engineering (CASE) tools, and software system development. Demonstrated ability to communicate orally and in writing. Supervisory experience in managing and providing direction to engineers, programmers, and analysts.</p>

CLIN	JOB TITLE	POSITION DESCRIPTION, EXPERIENCE & EDUCATION
246-52 017	Engineer	<p>Functional Responsibility: Applies engineering skills in the analysis, specification, development, integration, production, testing, and acquisition of systems, subsystems, or components. Evaluates and recommends commercial-off-the-shelf (COTS) applications, products, and methodologies that can provide interoperable, portable, and scalable technology solutions. Prepares electrical schematics, mechanical layouts, and wiring diagrams; develops design solutions, and prepares relevant procurement and design documentation. Implements performance and technical standards and conducts appropriate tests to assess, debug and validate system performance. Develops block diagrams and logic flow charts. Translates detailed design into prototype or production hardware/software. Prepares system operation/maintenance to user/operator-level documentation. Enhances software to reduce operating time or improved performance efficiency. Analyzes problems and develops system requirements and performance specifications. Creates performance measurements and conducts system assessments. Develops metadata describing hardware/software design and attribute descriptions. Assists in the management of projects including preparation/delivery of presentations. May design moderately complex systems. Prepares technical reports of work efforts. Under general supervision, performs various engineering or scientific assignments in the fields of research and development, test and evaluation, advanced development, production and deployment. Assists in developing standards and techniques. May assist as team lead and executes project/task coordination, management and engineering.</p> <p>Minimum Qualifications: This position requires a minimum of four (4) years experience, of which at least two (2) years must be specialized. Specialized experience includes: establishment of system requirements; performance of systems engineering, trade studies, engineering analyses, and system evaluations; development of system designs and technical specifications; and testing and evaluating systems for acceptance. Additional experience includes the use of automated design tools (such as Pro/ENGINEER, SolidWorks, etc.) to create and model system designs and processes, development of assembly/subassembly models, performance of simulations, and development of bill of materials (BOM) for system designs, and performance of hardware/software assessments. General experience includes strong oral and written communication skills and possesses a solid knowledge of principles and practices involved in research, prototyping, engineering development, testing, evaluation, and production. Must possess strong organizational skills and strong interpersonal skills to understand organizational/customer requirements. May possess supervisory experience in managing engineers, programmers, and analysts.</p>

CLIN	JOB TITLE	POSITION DESCRIPTION, EXPERIENCE & EDUCATION
246-52 018	Project System Logistics Analyst	<p>Functional Responsibility: Must assure that the most effective and economical means of support are planned and applied during all stages of the life cycle. Requires the application of ILS "elements" to systems and programs: (1) maintenance plan, (2) manpower and personnel, (3) supply support, (4) support and test equipment, (5) training and training devices, (6) technical data, (7) computer resources support, (8) packaging, handling, storage, and transportation, and (9) facilities. Develops, revises, or selects training courses and provides oversight in the prepares training catalogs, courseware, multi-media, and lesson plans. Develops instructor materials, such as course outline, background material, and training aids as well as student materials, such as course manuals, workbooks, handouts, completion certificates, and course critique forms. Conducts formal classroom courses, workshops, seminars, and computer-based training. Directs the preparation of milestone status reports and deliverables/presentations to customers. Must provide logistical interface with technical specialists (e.g., engineers, supply and maintenance specialists, software developers, technical data experts, project managers, system planners, training specialists) and with contract personnel. Provides daily supervision and direction to support staff. Reviews and approves recommendations for approval of major systems installations. Responsible for planning and evaluating system and logistic readiness. Determines trends; deficiencies in the provision of spare parts, repair manuals, test equipment, and other necessary support items; deficiencies in manpower and training; and system performance capabilities. Coordinates with logistics functional specialists, planning offices, program/project management, and representatives of such support functions as manpower, training, and budget. Develops and analyzes policies, procedures, and regulatory requirements; evaluates impact on current support operations; and plans and coordinates changes and future actions with technical and program specialists and program/project managers.</p> <p>Minimum Qualifications: This position requires a minimum of twelve (12) years experience, of which at least ten (10) years must be specialized. Specialized experience includes: hardware and software systems analyses and design knowledge as well as software design and database implementation; design/development of documentation of data requirements; and the application of management principles of Integrated Logistics Support (ILS) to ensure support resources are developed, acquired, tested, and deployed as an integral part of the system acquisition process to maintain system readiness. Specific work experience involves understanding the requirements for funding, manpower, materiel, facilities, and services needed for system support and correlating those requirements with program/project plans to assure that the needed support is provided at the right time and place. Must have experience in developing or performing system and logistics management operations that involve planning, coordinating, or evaluating the logistical actions required for system support and the integration of separate functions in planning or implementing logistics support. May have instructor platform time and experience in developing computer-based multimedia training material development.</p>

CLIN	JOB TITLE	POSITION DESCRIPTION, EXPERIENCE & EDUCATION
246-52 019	Systems Logistics Analyst	<p>Functional Responsibility: Must assure that the most effective and economical means of support are planned and applied during all stages of the life cycle. Requires the application of ILS "elements" to systems and programs: (1) maintenance plan, (2) manpower and personnel, (3) supply support, (4) support and test equipment, (5) training and training devices, (6) technical data, (7) computer resources support, (8) packaging, handling, storage, and transportation, and (9) facilities. Responsibilities include development of logistic concepts early in the life cycle, preparation of the ILS Plan, coordination of support deficiency resolution, and analysis of support effectiveness. Investigates problems and deficiencies and develops and coordinates corrective action plans. Prepares presentations, briefings, reports, analyses, and recommendations that assist in the formulation of decisions regarding long- and short-range logistics program planning and execution. Prepares training material to fit user requirements for all relevant applications. Makes recommendations, if needed, for approval of major systems installations. Compiles and analyzes data that describes such factors as the availability and state of system support process, system operation and maintenance personnel, training related to support systems, long- and short-range planning for system support, and responsiveness of numerous program and logistics functions in meeting support requirements. Can provide daily supervision and technical direction to staff. Prepares milestone status reports and deliverables/presentations to customers. Coordinates with appropriate levels to ensure problem solution and user satisfaction.</p> <p>Minimum Qualifications: This position requires a minimum of eight (8) years experience, of which at least four (4) years must be specialized. Specialized experience includes: hardware and software systems analyses and design knowledge as well as software design and database implementation; knowledge of program planning, funding, and management information systems, broad knowledge of organization and functions of activities involved in providing logistical support, and coordination/evaluation of functional specialists to identify specific requirements and to develop and adjust plans and schedules for the actions needed to meet each requirement on time. Specific work experience involves understanding the requirements for funding, manpower, materiel, facilities, and services needed for system support and correlating those requirements with program/project plans to assure that the needed support is provided at the right time and place. Must have experience in developing or performing system and logistics management operations that involve planning, coordinating, or evaluating the logistical actions required for system support and the integration of separate functions in planning or implementing logistics support. May have instructor platform time and experience in developing computer-based multimedia training material development. Must have applied the management principles of Integrated Logistics Support (ILS) to ensure support resources are developed, acquired, tested, and deployed as an integral part of the system acquisition process to maintain system readiness.</p>

CLIN	JOB TITLE	POSITION DESCRIPTION, EXPERIENCE & EDUCATION
246-52 020	CAD / Draftsperson	<p>Functional Responsibility: Four years electronic security system engineering experience in engineering design, planning, and production. Specific areas of expertise include: access control programming, setup, testing and support. Applies software, hardware, and applied standards of electronic security system skills in analysis, specification, development, integration, and acquisition of systems for electronic security system applications. Evaluates and recommends COTS applications and methodologies to provide interoperable security solutions.</p> <p>Minimum Education: A bachelor's degree from an accredited university or college is required. A high school diploma or G.E.D. plus an additional four years of related experience in addition to that required above may be substituted for a bachelor's degree. Each additional year of college or training within a related field is equivalent to a year of experience required above.</p>

<p>246-50/51 021</p>	<p>Installer</p>	<p>Minimum/General Experience: Four years experience in assisting with the installation of security systems. Reviews designs, analyzes engineering data, and troubleshoot problem areas.</p> <p>Functional Responsibility: Provide assistance in the installation of security systems. Reviews designs by extracting and analyzing a variety of engineering data. Receives initial instructions, equipment requirements, and advice from supervisor or engineer as needed; performs recurring work independently; work is reviewed for technical adequacy or conformity with instructions. May troubleshoot and correct malfunctions. Follows specific layout and diagrams to construct and package simple devices and subunits of equipment. Assists in design modifications by compiling data related to design, specifications, and materials that are pertinent to specific items of equipment or component parts. Documents previous operational failures and modifications. Uses judgment and initiative to recognize inconsistencies or gaps in data and seek sources to clarify information.</p> <p>Minimum Education: An associate's degree from an accredited university or college is required. A high school diploma or G.E.D. plus an additional two years of related experience in addition to that required above may be substituted for an associate's degree. Each additional year of college or training within a related field is equivalent to a year of experience required above.</p>

246-42-1	SMS	SCWS	Client Workstation, Badging Station - Includes: 1 tower style workstation, 17" Flat Screen Monitor, 104-key Keyboard, Mouse. Note: this configuration is for additional workstations associated with all versions of Schlage client application software.	Morris County, New Jersey	\$3,957.96
246-35-2	SMS	SENROLL	Enrollment Reader - The enrollment reader can be used in conjunction with the SMS software to facilitate enrollment of credentials into the system. The software will automatically store the credential information in the database upon presentation of the credential to the reader. The unit contains read heads for proximity/smart card, iBotton and magnetic stripe. The reader can be connected to the PC using wither a serial port or a USB port (the latter via an inline USB/Serial converter supplied with the unit).	Morris County, New Jersey	\$897.68
Express Level Software Packages					
246-42-1	SMS	SXPR-SFT-1	Express Offline Lock Software - Designed for offline locks of fewer then 500 users and/or 100 access points. Reporting of last 1000 events cabability will retrieve audit trails. Must be installed on a computer that meets the minimum requirements (refer to software datasheet).	Morris County, New Jersey	\$244.82
246-42-1	SMS	SXPR-CIP	Express Offline Lock Software, Programming Cable and Interface - Designed for offline locks of fewer then 500 users and/or 100 access points. Reporting capability will retrieved audit trails, access privileges granted and time functions. Must be installed on a computer that meets a minimum requirements (refer to software datasheet).	Morris County, New Jersey	\$440.68
246-42-1	SMS	SXPR-CIP-HH	Express Offline Lock Software, Programming Cable, Interface and Handheld Programming Device - Designed for offline locks of fewer then 500 users and/or 100 access points. Reporting capability will retrieved audit trails, access privileges granted and time functions. Must be installed on a computer that meets the minimum requirements (refer to software datasheet).	Morris County, New Jersey	\$1,240.43

Schlage Proximity & Contactless Smart Card Readers					
246-35-2	SMS	SXF1050	Proximity Reader - Mini Mullion Style - This reader is 125kHz Proximity technology. Compatible with HID proximity, GE/Casi ProxLite, XceedID and more. Tri-state LED (red, green, amber) and audible status alert. Weigand interface. Dimensions: 4.1Hx1.72Wx1D. Power Requirements: 5-16VDC. Read ranges vary depending on credential used (generally 3"). Standard color is black, also available in charcoal.	Morris County, New Jersey	\$130.57
246-35-2	SMS	SXF1060	Contactless Reader - Mini Mullion Style - This reader is 13.56MHz Contactless Smart Card technology. Meets both ISO stand 14443 and 15693. Compatible with 13.56MHz MiFare and ISO-X. Tri-state LED (red, green, amber) and audible status alert. Weigand interface. Dimensions: 4.1Hx1.72Wx1D. Power Requirements: 5-15VDC. Standard color is Black, also available in charcoal.	Morris County, New Jersey	\$179.54
246-35-2	SMS	SXF1100	Multi-Technology Mullion Proximity & Contactless Smart Card Reader - Readers are both 125kHz Proximity and 13.56MHz Contactless Smart Card technologies. Meets both ISO 14443 and 15693. Compatible with HID proximity, most 13.56MHz, GE/Casi ProxLite, XceedID	Morris County, New Jersey	\$269.30

SIN#	Brand Name	Model Number	Item Name/Description	Country of origin	GSA Net Price
246-35-2	SMS	SXF2100	Multi-Technology Mid-range Proximity & Contactless Smart card Reader - Readers are both 125kHz Proximity and 13.56MHz Contactless Smart Card technologies. Meets both ISO 14443 and 15693. Compatible with HID proximity, most 13.56MHz, GE/Casi ProxLite,XceedID and more. Tir-state LED (red, green, amber) and audible status alert. Wiegand interface. Dimensions: 4.1Hx1.72Wx1D. Power Requirements: 6-16VDC. Standard color is Black, also available in charcoal.	Morris County, New Jersey	\$342.75
246-35-2	SMS	SXF2110	Multi-Technology Mid-range Keypad Proximity & Contactless Smart Card Reader -Readers are both 125kHz Proximity and 13.56MHz Contactless Smart Card technologies. Meets both ISO 14443 and 15693. Compatible with HID proximity, most 13.56MHz, GE/Casi ProxLite,XceedID and more. Tir-state LED (red, green, amber) and audible status alert. Wiegand interface. Dimensions: 4.1Hx1.72Wx1D. Power Requirements: 6-16VDC. Standard color is Black, also available in charcoal.	Morris County, New Jersey	\$489.65
Contactless Smart Card Credentials					
246-35-2	SMS	SXF9440	Contactless Smart Card - The clamshell style card is a highly durable card. The card comes with a vertical slot punch. The card features 13.56MHz Smart Card technology with 10k bit memory ISO15693. Minimum card order is 100.	Morris County, New Jersey	\$3.59
246-35-2	SMS	SXF9540	Contactless Smart Card - The ISO compliant card is similar in size and thickness to traditional credit cards. The smooth surface is ideal for custom printing. The card features 13.56MHz Smart Card technology with 10K bit memory ISO15693. Minimum card order 100	Morris County, New Jersey	\$4.40
246-35-2	SMS	SXF9640	Smart Keytags - The keytag/keyfob is a tear drop shaped tag which can be added to any keying. The tag features 13.56MHz Smart Card technology with 10K bit memory ISO15693. Minimum card order is 100.	Morris County, New Jersey	\$5.06
HID Proximity Readers					
246-35-2	SMS	S5365	MiniProx Proximity Reader - The S5365 Proximity Reader has a slim, mullion style design. Its secure potted electronics is ideal for indoor or outdoor applications. 125kHz transmit frequency. Wiegand interface. The MiniProx Reader accepts 5-16DC volts. Dimensions: 6.0"x1.7" x 1.0" (15.2 x 4.3 x 2.54 cm). Charcoal Gray (Optional Color: Beige)	Morris County, New Jersey	\$204.02

SIN#	Brand Name	Model Number	Item Name/Description	Country of origin	GSA Net Price
246-35-2	SMS	S5355K	ProxPro Proximity reader with Keypad (wall mount) - The ProxPro Proximity Card Reader with Keypad combines all of the electronics into a single enclosure that mounts to a standard single-gang electrical box. With its weatherproof design, the reader is easily mounted wither indoor or outdoor. 125hKz transmit frequency. The ProxPro Reader accepts 5-16DC volts. Dimensions: 5.0" x 5.0" x 1.0" (12.7 x 12.7 x 2.5 cm) Charcoal Gray (optional Color Beige)	Morris County, New Jersey	\$424.36
246-35-2	SMS	S5375	MaxiProx Long Range Proximity reader (wall mount) - The signal processing techniques incorporated in this reader provide a high tolerance to burst and other transient types of ambient RF interference. 125kHz transmit frequency. Weigandinterface. The MaxiProx Reader accepts 12-24DC volts. Dimension 11.8' x 11.8" x 1.0 (30 x 30 x 2.54 cm). Charcoal Gray (only)	Morris County, New Jersey	\$659.39
246-35-2	SMS	S5395	ThinLine II Switch Plate Proximity Reader (wall mount) - Thinline II Switch Plate Proximity Reader is housed in an industry-standard switch plate style.125kHz transmit frequency. Weigand interface. The Thinline II Reader accepts 5-16DC volts.Dimensions: 4.7" x 3.0" x .68" (11.9 x 7.6 x 1.7 cm). Black (Optional colors: Beige, White, Gray)	Morris County, New Jersey	\$204.02
246-35-2	SMS	S5455	ProxPro II Reader (wall mount) - The ProxPro II is a proximity card reader that mounts to a single gang box. The S5455 has anIP65 rating. The reader can be mounted to glass (using the optional glass mounting kit). 125kHz transmit frequency. Weigand interface. The ProxPro II Reader accepts 5-16DC volts. Dimensions: 5.0" x 5.0" x 1.0" (12.7 x 12.7 x 2.5 cm). Charcoal Gray (Optional colors: Beige,)	Morris County, New Jersey	\$236.66
246-35-2	SMS	S6005B	Prox Point Proximity Reader - Prox Point Plus Proximity Reader is housed in a small, unobtrusive weather proof housing.125kHz transmit frequency. Weigand interface. The Prox Point Plus Reader accepts 5-16DC volts.Dimensions: 3.1" x 1.7" x .66 (7.9 x 4.4 x 1.7 cm) Available in Black.	Morris County, New Jersey	\$115.88
HID Proximity Credentials					
246-35-2	SMS	S1326	ProxCARD II with Schlage Logo - The ProxCARD II incorporates 125kHz proximity technology. The standard ProxCARD II is approximately the size of a credit card and is thin and flexible enough to be carried in a wallet or on a strap clip. The S1326 card comes standard with the Schlage Logo and sequentially numbered heat stamp. The S1326 is also available in plain white. (Cards will be shipped with Schlage logo unless otherwise specified). Minimum order is 100 cards.	Morris County, New Jersey	\$2.94

246-35-2	SMS	S1336	DuoProx II Proximity Card (Magnetic Stripe) - The DuoProx II Multiple Technology Card offers 125kHz proximity, magnetic stripe, heat stamp and photo identification technologies on a single access control card. The DuoProx II card meets ISO standards for thickness. For use with all direct image printers and magnetic stripe readers. Minimum order is 100 cards.	Morris County, New Jersey	\$7.67
246-35-2	SMS	S1346	ProxKey II (Proximity Keyfob) - The ProxKey II Proximity Keyfob incorporates 125kHz proximity technology into a device approximately the size of an automotive key and will fit most key rings. The ProxKey II Keyfob can be programmed with information formatted for universal compatibility with all HID proximity readers. (Each ProxKey II Keyfob is provided a sequential external number for easy identification and control). Dimensions: 1.90" x 0.90" x 0.345" (4.83 x 2.29 x 088 cm). Minimum order is 100 keyfobs.	Morris County, New Jersey	\$5.87
246-35-2	SMS	S1351	HID ProxPass Vehicle Tag - ProxPass is a 125kHz active tag specifically designed for vehicle access control. The ProxPasstag provides "hands free" access when used with the HID 5375 MaxiProx reader. Available in beige only with the HID logo. The ProxPass has a read range of 6 to 8 feet. Must order minimum of 10.	Morris County, New Jersey	\$35.91
246-35-2	SMS	S1386	ISOPROX II Proximity Card - The ISOPROX II 125kHz Proximity Access Card offers proximity technology and photo identification on a single access control card. The ISOPROX II card meets ISO standards for thickness, is for use with all direct image printers and comes with a sequentially numbered heat stamp. Can be printed on both sides of the card. Minimum order is 100 cards.	Morris County, New Jersey	\$5.39
246-35-2	SMS	S1391	MicroProx Tag - The MicroProx Tag provides the convenience of HID's 125kHz proximity technology in a small disk-shaped transponder. Simply attach the adhesive-backed Tag to any nonmetallic card or device, and you instantly have a proximity card! Provides a sequential external number for easy identification and control. Minimum order is 100 tags.	Morris County, New Jersey	\$4.00
246-35-2	SMS	S1397	Smart IsoProx Proximity Card with Smart Chip - The SmartProx 125kHz proximity card combines the thin card features of the ISOPROX 125kHz proximity card with optional 13.56 MHz contact smart card technology. Note: Special order form specifying which chip must accompany order. Minimum order is 100 cards.	Morris County, New Jersey	\$6.13
246-35-2	SMS	S1398	Smart DuoProx Proximity Card with Smart Chip - The Smart DuoProx proximity card combines the thin card features of the 125kHz and Magnetic Stripe DuoProx card with optional 13.56 MHz contact smart card technology. Note: Special order form specifying which chip must accompany order. Minimum order is 100 cards.	Morris County, New Jersey	\$7.18

Demo Kits					
246-42-1	SMS	SDEMO-ENT	Enterprise Demonstration Kit - Allows the capability of demonstrating the SMS Enterprise Software. The kit includes: The Enterprise software modules, 1 Reader Controller, 1 Schlage Multi-technology Reader, preprogrammed cards, easy connectors for Schlage VIP or Schlage Wireless readers (readers not included), 2 Panic Toggles, 2 Door Held/Forced Open switches, 2 IP cameras, and one Embedded Digital Video Storage Unit. Housed in a hard plastic case sized for airline overhead compartments. Requires Laptop (not included)	Morris County, New Jersey	\$2,611.44
246-42-1	SMS	SDEMO-PRE	Premier Demonstration Kit - Allows the capability of demonstrating the SMS Premier Access Control Software. The kit includes: The Premier software modules, 1 Reader Controller, 1 Proximity Reader, preprogrammed cards, easy connectors for Schlage VIP and Schlage Wireless readers (readers not included), and a 4 port hub. Housed in a hard plastic case sized for airline overhead compartments. Requires Laptop (not included).	Morris County, New Jersey	\$1,632.05
246-42-1	SMS	SDEMO-SEVMS	Premier SDEMO-PRE Option Camera Option - Camera option for use with SDEMO-PRE only. Includes (2) IP cameras for demonstrating the SEVMS. No additional equipment required.	Morris County, New Jersey	\$979.29
246-42-1	SMS	SDEMO-SVSU	Premier SDEMO-PRE Option Camera Option - Camera option for use with SDEMO-PRE only. Includes (2) IP cameras for demonstrating the SEVMS. No additional equipment required.	Morris County, New Jersey	\$1,958.58
246-42-1	SMS	SDEMO-GP	SVSU Video Demonstration Kit - 4-channel demonstration unit for SVSU. The kit includes: 2 analog fixed cameras and tripods, 1 Schlage Video Storage Unit and one network cable.	Morris County, New Jersey	\$2,644.08
