COMPRESSORS UNLIMITED INTL., LLC

Compressors Unlimited International, LLC specializes in remanufacturing replacement compressors used in larger air conditioning and refrigeration units. These units include brand names such as Carrier®, Copeland®, Trane®, and York® just to name a few.

We are committed to quality, both in the product we sell and in the work we provide. Remanufacturing compressors to exact, original factory specifications is our business. All OEM specifications are met to the letter in order to maintain our standards of remanufacturing excellence. All compressor cylinders, liners, main bearings, crankshaft and rod journals are inspected to confirm that they adhere to OEM specifications and wear tolerances.

We can remanufacture a customer's defective compressor and have it back in place, fully operational, in a short turnaround time. Compressor down-time equals loss of business. That's why fast service is our priority. Our large inventory of products allows us to fulfill most orders within hours of first contact. The remanufactured compressor is ready for installation as soon as the defective compressor is removed. We accept the defective compressor in exchange, provided that the body is not cracked and can be remanufactured.
