The Comfort First Filtered Diffuser (CFFD) saves energy by providing superior air distribution, which creates an even room temperature allowing the AC unit to cycle on less often and for a shorter amount of time. Consistent room temperature throughout the room also allows the thermostat to be increased one to three degrees, with each degree saving as much as 5% of energy consumption. This improved room temperature can also eliminate the use of space heaters.  
  
The CFFD & CAF will reduce pollutants in offices due to filtering the supply air with a MERV 8 - 14 filters. Improving indoor air quality (IAQ) improves health and welfare of office workers and helps reduce sick time.
