Kidstuff Playsystems is a commercial playground equipment manufacturer based in Indiana which ships, installs and provides safety surfacing in all the contiguous 48 US states, and which ships equipment and safety surface materials all over the world.

Kidstuff Playsystems' playground equipment is designed and fabricated in the United States, in Gary, Indiana. In addition, we purchase from American steel and plastics suppliers. Our steel tubing is purchased from Allied Tubing in Harvey IL; our clamps are manufactured in Chicago, IL; our plastic slides, roofs and panels are manufactured in Plymouth, IN, and Plainfield, IN.

Equipment from our current catalog is listed separately, and with photos, on the *GSA Advantage!* website; this text file is to provide additional information on optional additional services and equipment.

### Table of Contents:

- **Terms and Conditions**
- **Additional Products and Services**
  - **Available Materials**
    - **Plastic Decks v Steel Decks**
    - **3.5" OD Steel Posts v 5"OD Steel Posts**
  - **Installation**

    - **Rubber Tile**
    - **Artificial Turf**
    - **Loose Rubber**
    - **Engineered Wood Fiber**
  - **Built-In Sun Shades (available on all models)**
  - **Custom Designs and Playsystem Models not shown on *GSA Advantage!***
- **Our Warranty**
- **Our GSA Price List**

### TERMS AND CONDITIONS

**Prices:** Prices as shown are GSA discounted price for un-customized equipment as shown in the accompanying photographs. Changes to equipment (trading a slide for a climber, for example, or changing from steel to plastic decks) will be calculated at the same GSA discount rate.

Prices are F.O.B. Factory.

**Payment Terms:** Net 30 days from the date of invoice to governmental agencies and tax-supported entities. Service charge is 1.5% per month on all invoices after 30 days.

**Order Acceptance:** All orders are subject to acceptance by Kidstuff Playsystems, Inc., Gary, Indiana.

## KIDSTUFF PLAYSYSTEMS GSA TEXT FILE

**Freight:** Most (not all) items ship from Gary, IN 46403. Call for a freight quote. Charges as determined by the carrier may be prepaid and added to the invoice if desired. Unless specific instructions are given, shipment is made in the way considered best by Kidstuff Playsystems, Inc.

**Loss or Damage:** The bill of lading received at the time of the shipment is Kidstuff Playsystems' receipt from the carrier. The manufacturer is thereby released of all responsibility for loss or damage in transit.

- Be sure to note any apparent damage or shortage on the original freight bill before signing, and have the truck driver sign also.
- Be sure to note any marks indicating possible concealed damage on the original freight bill before signing, and have the truck driver sign also.
- Sign all bills of lading where **no** damage is noted: **"Approved subject to later recount and inspection for hidden damage."**

If the shipment is accepted as-is, and the freight bill is signed clear without exceptions noted thereon, no claim can be filed with the carrier, and Kidstuff Playsystems cannot be responsible for losses incurred.

**Returned Merchandise:** Equipment is custom made for each order. Returns are not accepted without prior authorization from the manufacturer. A 25% handling charge, in addition to freight charges, is made on returned equipment ordered in error.

**Product Specifications:** Those given in the listings were in effect at the time of listing. Kidstuff Playsystems, Inc., reserves the right to discontinue or change the design and specifications of units, and to ship the revised product when such changes have been made.

**Installation Procedures:** Instructions are packed in the box marked "Instructions Inside." All Kidstuff Playsystems equipment is intended to be embedded in concrete unless otherwise indicated. It must also be placed over resilient surfacing material, as the instructions clearly state. The complete directions are to be read and followed without deviation in order to minimize accidents, to assure long equipment life, and to keep the warranty in effect. "Maintenance Instructions" are included are to be followed as directed. Regular maintenance inspections are required and a log should be kept using forms provided by Kidstuff Playsystems, Inc.

### ADDITIONAL PRODUCTS AND SERVICES

**Available Materials:** The GSA price given on *GSA Advantage!* for an item is for the item as pictured; if the photograph shows the play structure with plastic decks and 3.5"OD steel posts, that is the structure for which we have posted the price. However, almost all playsystems may be fabricated with either our regular ultra-strong and kid-friendly plastic decks, or with our oversized steel decks. Similarly, most structures are available with either 3.5"OD steel posts or 5"OD steel posts. Changing materials changes the price. Pricing for these variants for most models has been filed with GSA, but space and time preclude us from listing them all on *GSA Advantage!*. At the end of this document is a copy of our price list which shows many of them. If you are interested in a playsystem with steel decks but want to know if it is also available with a smaller footprint and lesser cost with the plastic deck, (or vice versa) please call and request the GSA price for the variant.

**Plastic Decks vs Steel Decks:** Both deck options are tested in rugged conditions and to weight totals many times that likely to be found on the playground. Both the steel and plastic decks are covered equally under our 21 year

## KIDSTUFF PLAYSYSTEMS GSA TEXT FILE

warranty. The main difference between the steel and plastic decks in use is size and cost. The oversized steel decks are much less cost effective than the plastic decks. The specifications for each deck type follow:

**Steel Deck:** This deck is fabricated of formed 12 gauge perforated steel with 12 gauge reinforcing ribs. The deck is PVC-dipped after fabrication in the color of your choice. Square decks are 46" on the sides; right-angle triangular decks have 2 sides 46" long and one 65".

**Plastic Deck:** Square and triangular double-walled decks are rotationally molded of UV-stabilized, high-density polyethylene (HDPE), walls a minimum ¼" thick. Square decks measure 38-1/4" x 38-1/4". Triangle decks are 38-1/4" x 38-1/4" x 52-3/8". All decks incorporate molded-in reinforcement on the bottom for added strength and rigidity. Deck color is stabilized with the use of ultraviolet inhibitors. Holes in each corner of decks allow posts to pass through a molded-in cavity, creating extraordinary toughness and durability in a part designed to provide gentle, kid-friendly impacts for the inevitable bumps and falls on equipment.

**3.5" Steel Posts vs 5" Steel Posts:** Both our 3.5" OD steel posts and our 5" OD steel posts have a yield strength of 45,000 psi (minimum) and tensile strength of 48,000 psi (minimum). There is no appreciable difference in performance. Both meet or exceed all applicable ASTM standards. The choice between them is a question of looks and style. 5" posts look more muscular, and cost more.

**3.5"OD Posts:** Galvanized high-strength steel tubing, 13 gauge; some applications require 11ga or 8ga posts – these are noted in specifications. Posts are cut to length before powder-coating.

**5"OD Posts:** Galvanized high-strength steel tubing, 11 gauge. Posts are cut to length before powder-coating.

## INSTALLATION

The following are our GSA installation rates in the contiguous 48 States:

**Installation of play equipment and park amenities:** 40% of retail list price of equipment, with a minimum charge of \$3000. (Non-GSA pricing: 50% of retail list price.) Model number: **INST01**

**Installation of loose fill safety surface (EWF or loose rubber):** 45% of safety surface materials list price, with a minimum charge of \$3000. (Non GSA pricing: 60% of materials list price.) If installation minimum has been met by the installation of the play equipment, surfacing minimum charge does not apply. Model number: **INST02**

**Installation of freestanding sun shelters:** 80% of retail list price of shelter. (Non-GSA pricing: 100% of list price.) Model number: **INST03**

## KIDSTUFF PLAYSYSTEMS GSA TEXT FILE

### SAFETY SURFACING

Impact-absorbing safety surface prevents deaths and mitigates injuries on the playground. Kidstuff Playsystems strongly advises the use of safety surfacing under all equipment which children can be expected to climb.

If your charter or licensing agency requires you to meet ASTM standards or CPSC guidelines you must use an approved safety surface. Similarly, all GSA eligible clients are expected to install playgrounds and playground surfacing compliant with the Americans with Disabilities Act. All surfaces Kidstuff Playsystems offers meet ASTM standards, CPSC guidelines, and ADA compliance.

Here is a brief description and the GSA pricing for each of the 6 types of safety surfacing Kidstuff Playsystems offers. Additional information is available on all surfaces; contact us. All surfaces except engineered wood fiber have multiple color options. Surfacing prices are F.O.B. factory – call for a quote including shipping.

**KidSoft:** Unitary surface of encapsulated and covered rubber nuggets. Critical Fall Height: 13ft. May be applied over well-drained earth, grass, stone, concrete or asphalt. **GSA pricing, installed on existing surface: \$16.95 / square foot. Wheelchair ramps \$910 each (1 required).** Minimum order 1000sf. (Retail pricing \$21/sf, \$1300/ramp) Model number: **KS01**. Ramp is **KS02**.

**Poured-in-Place Rubber:** Unitary surface of rubber granules, held together with a chemical binder. Critical Fall Height varies with the thickness of the application, with CFH from 4ft to 8ft. Some savings may be available if CFH required is less than 8ft. PIP must be installed over paved surface: well-cured concrete or asphalt or compacted aggregate stone. **GSA pricing, including installation but exclusive of paved base: \$16.95 / square foot.** Minimum order 1000sf. (Retail pricing \$21/sf.) Model number: **PIP35**.

**Rubber Tile:** Unitary surface of 2'x2' molded rubber tiles. Critical Fall Height varies with the thickness of the tile, with CFH from 2ft to 8ft. Some savings may be available if CFH required is less than 8ft, Beveled edges, corners, wheelchair ramps are additional. Rubber Tile must be installed over paved surface: well-cured concrete or asphalt or compacted aggregate stone. **GSA pricing, including installation but exclusive of paved base: \$12.80 / square foot.** Minimum order 1000sf. (Retail pricing \$16/sf.) Model number: **TILE**.

**Artificial Turf:** Unitary surface of polyethylene “grass” fabric over post-industrial cross-link, closed cell polyethylene pads. Critical Fall Height varies with the thickness of the application, with CFH from 6ft to 12ft. Some savings may be available if CFH required is less than 12ft. Artificial Turf must be installed over paved surface: well-cured concrete or asphalt or compacted aggregate stone. **GSA pricing, including installation but exclusive of paved base: \$20.80 / square foot.** Minimum order 1000sf. (Retail pricing \$26/sf.) Model number: **XG03**.

**Playground-grade Loose Rubber/Rubber Nuggets:** A loose fill surface made from buffings of recycled tires with any metal bits extracted. 6” is the minimum recommended commercial application for loose rubber. Critical Fall Height for 6” is 11ft. Loose Rubber must be installed over grass or earth, and not over hard surfaces like concrete or asphalt. Playground grade Loose Rubber settles to a surface firm enough for wheelchair access and is ADA compliant.

A price per square foot is impossible to tender, as the size and shape of the area to be covered dictate the ratios of the materials. Here is a list of the GSA prices for the components:

## KIDSTUFF PLAYSYSTEMS GSA TEXT FILE

<b>LR01</b>	<b>Loose rubber, one ton</b>	<b>GSA price \$533</b>	(Retail price \$820)
<b>GF01</b>	<b>Geotextile fabric, 1 sq yd</b>	<b>GSA price \$1.30</b>	(Retail price \$2)
<b>9250</b>	<b>Border Timber, 4ft</b>	<b>GSA price \$29</b>	(Retail price \$44)
<b>9251</b>	<b>Border Timber Stake, 30in</b>	<b>GSA price \$10</b>	(Retail price \$16)
<b>80813</b>	<b>Wheelchair Ramp, 2 section</b>	<b>GSA price \$910</b>	(Retail price \$1300)

**For Installation cost, see above section.**

**Engineered Wood Fiber (EWF):** A loose fill surface made from shredded trees. 9" (compressed – 12" fresh) is the minimum recommended commercial application for loose rubber. Critical Fall Height for 9" is 9ft. EWF must be installed over grass or earth, and not over hard surfaces like concrete or asphalt. Engineered Wood Fiber settles to a surface firm enough for wheelchair access and is ADA compliant.

A price per square foot is impossible to tender, as the size and shape of the area to be covered dictate the ratios of the materials. Here is a list of the GSA prices for the components:

<b>EWF01</b>	<b>Engineered Wood Fiber, 1 cu yd</b>	<b>GSA price \$17</b>	(Retail price \$26)
<b>GF01</b>	<b>Geotextile fabric, 1 sq yd</b>	<b>GSA price \$1.30</b>	(Retail price \$2)
<b>9250</b>	<b>Border Timber, 4ft</b>	<b>GSA price \$29</b>	(Retail price \$44)
<b>9251</b>	<b>Border Timber Stake, 30in</b>	<b>GSA price \$10</b>	(Retail price \$16)
<b>80813</b>	<b>Wheelchair Ramp, 2 section</b>	<b>GSA price \$910</b>	(Retail price \$1300)

**For Installation cost, see above section.**

Freight is additional on all purchases.

### BUILT-IN SUN SHADES

Almost any Kidstuff Playsystems, Inc., playsystem can have one or more 18' x 18' sun shelters built-in. (See the picture of the #6600ss on *GSA Advantage!*) **The GSA price to do so is \$5170 per shade.** (The retail price for this is \$6895). If the structure is one which has roofs in its design, the roofs will be deleted and their cost credited against the cost of the sun shade. Model number: **71818 PT**

### CUSTOM DESIGNS AND PLAYSYSTEM MODELS NOT SHOWN ON *GSA ADVANTAGE!*

We are glad to design custom playsystems to fit your space. There is no charge for the design work, and the structure will be subject to the same GSA discount schedule as a comparable catalog structure.

This is also true for modifying a catalog playsystem (say, by removing a climber and adding an activity wall) – the cost of the deleted equipment will be subtracted and the cost of the added equipment will be added to the retail price, then the resultant structure will receive the appropriate GSA discount.

Further, some new structures appear on our website, [www.kidstuffplaysystems.com](http://www.kidstuffplaysystems.com), which have not been posted to *GSA Advantage!* Any Kidstuff Playsystems, Inc., playsystem on our website will receive the appropriate GSA discount.

## KIDSTUFF PLAYSYSTEMS GSA TEXT FILE

### OUR WARRANTY

#### Warranty on Installation

Installation labor is warranted for one year to be free from defect and compliant with ASTM standard F1487.

#### Warranty on Surfacing

Each surfacing manufacturer offers its own warranty. A copy of the appropriate warranty is available for each of the safety surfaces Kidstuff Playsystems offers.

#### Warranty on our Equipment

All playground equipment requires regular care and maintenance. Kidstuff Playsystems provides you, the purchaser, with a maintenance system to keep your equipment in top condition for many years. All warranty claims shall be accompanied by copies of your up-to-date maintenance records. Warranty becomes effective when equipment is paid for in full.

Kidstuff Playsystems warrants all its products against defects in materials or workmanship for twenty-one years as follows (vandalism and abuse are excluded):

##### Warranty

Year 1: Free repair or replacement – any defective element of a Kidstuff playsystem will be shipped and installed at our cost.

Year 2: 100% free replacement of defective parts, excluding shipping and installation.

Years 3-21: Kidstuff warrants the components of your system on a prorated basis, starting at 95% in year 3.

For example, if a part of your playsystem fails in year seven, you will receive a 75% credit (calculated from the part price at time of purchase) toward a new replacement part for your unit. Shipping and installation are owner's expenses during this portion of the warranty period. If Kidstuff elects to repair your part during any phase of this warranty, shipping back to Gary, Indiana, will be at our expense. If we elect to repair a part, the owner agrees to disassemble, package/pallet and load the item.

Please be aware that Kidstuff Playsystems sells some products which are manufactured by others. Such items are excluded from this warranty and are covered by that of the actual manufacturer. The installation portion of this warranty applies only to the contiguous 48 states of the USA.

We at Kidstuff Playsystems take pride in our products and believe that if you follow the maintenance program that is provided to you, your Kidstuff playsystem will be exercising the minds and bodies of children for years to come and you will be telling your friends and associates that you can't buy a better, safer or tougher playsystem than a Kidstuff Playsystem.
