LABOR DESCRIPTIONS, EDUCATION AND PRICING**

SIN	LABOR CATEGORY	DESCRIPTION/EDUCATION	PER	GSA Rate w/IFF
334290, 238910, 334512, 541330L	Program Manager	Responsible for overall program execution, quality, customer satisfaction, and oversees all day-to-day program activities. Serves as the primary contact for the customer. Supervises project managers, technical resources, and subcontractor resources both on site and off. Manages the performance of the program team. Prepares and updates the program management plan (PMP), quality control plan (QCP), communications plan, staffing/resource management plan, and risk management plan. Master's degree or Bachelor's Degree and equivalent combination of education and experience 10 Minimum years of experience.	Hour	\$160.14
334290, 238910, 334512, 541330L	Project Manager	Reports to the Program Manager, the Project Manager manages service operations, project execution, and provides planning, financial, management, administrative, and technical oversight, including the day-to-day operations of all assigned project activities and functions. Bachelor's Degree and/or equivalent combination of education and experience 10 Minimum years of experience.	Hour	\$150.77
334290, 238910, 334512, 541330L	Project Engineer	Provides advanced security engineering skills to address security engineering requirements. Deploys advanced security strategies, tactics, and techniques to develop technical solutions. Engineers advanced solutions taking into consideration installation, troubleshooting, repair, and design requirements for electronic, technical, and physical security systems (ESS/TSS/PSS). Associate degree and/or equivalent combination of education and experience 8 Minimum years of experience.	Hour	\$127.35
334290, 238910, 334512, 541330L	Project Contoller	Provides evaluation of project risk, project finances, overall project performance, change management, forecasting, and reporting. Assists with project decisions and develops, implements, and maintains a project reporting and cost tracking system for the project that satisfies the needs of the project team, management, and client. Bachelor's Degree and/or equivalent combination of education and experience 6 Minimum years of experience.	Hour	\$77.94
334290, 238910, 334512, 541330L	Quality Control / Health & Safety Officer	Manages, plans, coordinates, and heads the quality control program designed to ensure continuous production/service consistent with established standards. In addition, the individual develops and leads safety and health activities under the project. Associate degree and/or equivalent combination of education and experience 6 Minimum years of experience.	Hour	\$88.05
334290, 238910, 334512, 541330L	Deployment Coordinator	Coordinates travel packages, completing all travel requirements for personnel on contract. Plans work schedules for employees. Prepares itineraries and performs ticketing and booking functions. Manages overall travel budget in support of Project Manager. Advises on travel requirements and conditions such as visa, medical, foreign travel, etc. Associate degree and/or equivalent combination of education and experience 4 Minimum years of experience.	Hour	\$47.68
334290, 238910, 334512, 541330L	ESS Field Service Engineer	Implements electronic security system installations and provides electronic security equipment maintenance. Utilizes systems installation and testing techniques to mount, connect, and deploy security equipment. Applies diagnostic techniques to identify problems, investigate causes, and recommend solutions. Completes equipment quality control activities to verify operation of equipment. Undertakes planned and unplanned maintenance interventions. Associate degree and/or equivalent combination of education and experience 4 Minimum years of experience.	Hour	\$67.51

SIN	LABOR CATEGORY	DESCRIPTION/EDUCATION	PER	GSA Rate w/IFF
54151S	AutoCAD Operator (Associate 1)	Responsible for the daily design document preparation of commercial, retail, municipal, and various other civil design projects. Charged with providing the most comprehensive and accurate construction documents feasible in the time allocated. Perform the preparation of civil construction documents in keeping with the firm's design philosophy. That philosophy is to provide the client not only what is necessary from a permitting standpoint, but also to provide the client with a set of documents which will allow the successful bidder to construct the project efficiently and with minimal changes in scope of work. Requires an Associate's Degree in Engineering or Computer Science and two years experience with AutoCAD and related work in the civil design field, or equivalent combination of education and experience demonstrating proficiency in the duties above in the civil design field.	Hour	\$52.77
54151S	AutoCAD Operator (Associate 2)	Responsible for the daily design document preparation of commercial, retail, municipal, and various other civil design projects. Charged with providing the most comprehensive and accurate construction documents feasible in the time allocated. Perform the preparation of civil construction documents in keeping with the firm's design philosophy. That philosophy is to provide the client not only what is necessary from a permitting standpoint, but also to provide the client with a set of documents which will allow the successful bidder to construct the project efficiently and with minimal changes in scope of work. Requires an Associate's Degree in Engineering or Computer Science and four years experience with AutoCAD and related work in the civil design field, or equivalent combination of education and experience demonstrating proficiency in the duties above in the civil design field.	Hour	\$61.66
54151S	AutoCAD Operator (Senior 1)	Responsible for the daily design document preparation of commercial, retail, municipal, and various other civil design projects. Charged with providing the most comprehensive and accurate construction documents feasible in the time allocated. Perform the preparation of civil construction documents in keeping with the firm's design philosophy. That philosophy is to provide the client not only what is necessary from a permitting standpoint, but also to provide the client with a set of documents which will allow the successful bidder to construct the project efficiently and with minimal changes in scope of work. Requires an Associate's Degree in Engineering or Computer Science and six years experience with AutoCAD and related work in the civil design field, or equivalent combination of education and experience demonstrating proficiency in the duties above in the civil design field.	Hour	\$90.71

SIN	LABOR CATEGORY	DESCRIPTION/EDUCATION	PER	GSA Rate w/IFF
54151S	AV Systems Engineer	Serves as the main AV system design engineer who designs, maintains, and supports complex electronic analog and digital systems, including video and AV playback, control, distribution, projection, teleconferencing, AV networking, switching and recording systems. Manages outside contracts, including preparing procurement requests and documents, evaluating proposals, scheduling and coordinating work, monitoring progress, and performing acceptance testing. Keeps abreast of developments in the field and using that knowledge to identify and evaluate technologies that might be useful. The engineer must communicate and coordinate with vendors, contractors, colleagues and system users to ensure optimum system design and proper performance of equipment and systems. Requires thorough knowledge of: analog and digital technology; electronics; AV and video systems including video conferencing; basic computer operation; AV networking; technology trends and developments; and media control systems technology. CTS-D certification, knowledge of AutoCAD, and Crestron experience (especially programming and RoomView) are highly desirable. This position requires the ability to conceptualize, design, engineer, implement, and troubleshoot complex electronic AV and teleconferencing systems to meet unique needs; the ability to plan, administer and oversee projects to successful completion; the ability to operate highly technical test instruments; and the ability to serve as a technical resource and to train others in more advanced areas. Ability to communicate effectively with diverse clientele including excellent written and oral communication skills and good interpersonal skills is required. Also required is the ability to supervise contractors in the performance of complex and time-critical tasks with optimum effectiveness and efficiency, often in high-pressure situations. Requires a Bachelor's Degree in electronics technology, engineering, or related field and training/coursework in AV systems design, installation, operation, and maintenance and four years of progressively responsible experience doing design work and project management, or equivalent combination of education and experience.	Hour	\$82.21
54151S	Communications Engineer (Associate 2)	Must be able to create functional system drawings (block diagrams) in a CAD format. Responsible for the overall network design, analysis, implementation, and subsequent management of all systems related activities. Concentration in planning, coordinating, specification development implementation and monitoring of network analysis. Responsible for software life cycle analysis and planning, in coordination with department. Requires an Associate's Degree in Computer Science and Four years of experience required, or equivalent combination of education and experience or a High School Diploma and six years of experience.	Hour	\$64.43
54151S	Communications Engineer (Intermediate 1)	Must be able to create functional system drawings (block diagrams) in a CAD format. Responsible for the overall network design, analysis, implementation, and subsequent management of all systems related activities. Concentration in planning, coordinating, specification development implementation and monitoring of network analysis. Responsible for software life cycle analysis and planning, in coordination with department. Requires an Associate's Degree in an Engineering focus and six years experience or a High School Diploma and eight years experience. Experience and knowledge should include the duties outlined above. Candidate must also be familiar with standard concepts, practices and procedures within this field.	Hour	\$78.75

Candidate must also be familiar with standard concepts, practices and procedures within this field.	Hour	\$96.32
54151S	Communications Engineer (Senior 2)	Must be able to create functional system drawings (block diagrams) in a CAD format. Responsible for the overall network design, analysis, implementation, and subsequent management of all systems related activities. Concentration in planning, coordinating, specification development implementation and monitoring of network analysis. Responsible for software life cycle analysis and planning, in coordination with department. Requires an Associate's Degree with an engineering focus and ten years of related experience, or equivalent combination of education and experience.	Hour	\$138.46
54151S	Deployment Consultant	A Deployment Consultant must have experience in the coordination, scheduling and identification of all long-term, mid-term, and near-term deployment activities. Must have experience in identifying scheduling and coordination issues. Must have experience coordinating with developers, testers, site staff, installation staff and others to ensure that schedules and expectations are completed in a timely manner. Requires an Associate's Degree in Engineering or Computer Science and six years experience, or equivalent combination of education and experience. Relevant experience and knowledge should include developing written deliverables for consulting engagements, working as a liaison between Engineering and Quality Assurance to resolve customer issues, as well as experience with enterprise systems management software.	Hour	\$80.76
54151S	Deployment Engineer (Associate 2)	A Deployment Engineer has experience in executing the deployment of simple and complex IT systems, networks hardware and software and ensuring that that systems are functioning properly upon installation. Has the ability to solve issues that arise on site. Has experience in a variety of deployment environments and execute based on written and verbal instruction. Requires an Associate's Degree in Engineering or Computer Science and four years of experience or equivalent military technical training and six years experience installing wireless systems and equipment, networking equipment, satellite systems and other systems.	Hour	\$58.63
54151S	Deployment Engineer (Intermediate 1)	Has experience in creating plans and approaches for executing product installation. Has extensive experience in working with site managers in execution of installations. Has strong background in installing a variety of IT systems, networks, hardware and software in a variety of complex and simple installation sites. Has ability to identify potential risks, create strategies for mitigating risks. Oversees all aspects on an IT deployment ensuring full commissioning is completed. Requires an Associate's Degree in Engineering or Computer Science and six years of experience or equivalent military technical training and eight years experience installing wireless systems and equipment, networking equipment, satellite systems and other systems.	Hour	\$70.36

SIN	LABOR CATEGORY	DESCRIPTION/EDUCATION	PER	GSA Rate w/IFF
54151S	ERP and Change Functional Expert (III)	An ERP Programmer has experience in designing, coding, developing, testing and documenting enterprise resource programs using advanced technologies, such as IP or web-based technology. Technologies include HTML, CGI applications, PERL or Javascript, and Java. Does modifications to, and maintenance of, existing programs and procedures. May be required to create procedural forms and documentation, including flow charts and system documentation. May lead a small team of programmers on a project. Requires a Bachelor's Degree and ten years experience, or equivalent combination of education and experience.	Hour	\$221.38
54151S	Helpdesk Technician (Intermediate 1)	General experience includes information systems development, network and other work in the client/server field, or related fields. Demonstrated ability to communicate orally and in writing and a positive customer service attitude. Supervision and direction to staff who are responsible for phone and in person support to users in the areas of e-mail, directories, standard Windows desktop applications, and applications developed, deployed or supported under this schedule. These personnel serve as the first point of contact for troubleshooting hardware/software PC, and printer problems. Requires an Associate's Degree and three years experience, or equivalent combination of education and experience.	Hour	\$54.84
54151S	Helpdesk Technician (Senior 1)	General experience includes information systems development, network and other work in the client/server field, or related fields. Demonstrated ability to communicate orally and in writing and a positive customer service attitude. Supervision and direction to staff who are responsible for phone and in person support to users in the areas of e-mail, directories, standard Windows desktop applications, and applications developed, deployed or supported under this schedule. These personnel serve as the first point of contact for troubleshooting hardware/software PC, and printer problems. 54151S	Information Assurance Specialist	Performs numerous information assurance services for Federal Civilian, Military, Law Enforcement, and Intelligence Agencies. Verifies compliance with established security procedures and standards, identifies and documents vulnerabilities, and makes recommendations on mitigating actions in conformance with Agency, NIST, OMB, and other guidelines. Provides life-cycle security services including certification & accreditation (C&A), develops security architectures and solutions, performs security test and evaluations, and assists clients in attaining their protection goals. Assists clients with making decisions concerning information assurance requirements and security management including incident reporting and training and awareness. Requires a Bachelor's Degree and four years experience within the field, or equivalent combination of education and experience. Requires a Bachelor's Degree and four years experience within the field, or equivalent combination of education and experience.	Hour	\$90.54

SIN	LABOR CATEGORY	DESCRIPTION/EDUCATION	PER	GSA Rate w/IFF
54151S	IT Asset Technician (Associate 2)	General requirements include the ability to process and properly allocate all inventory, as well as test, modify or send items to vendor/repair depot for service and monitor until part is received. Must be able to generate "Real Property" Transfer documentation for end-of-life items. Should have the ability to stage all items according to demand/Asset Center work order and to pick inventory and log all equipment movement into inventory logs. Can build items, if needed, according to engineering specifications and configure items as needed. Requires an Associate's Degree in Computer Science and four years experience, or equivalent combination of education and experience, required or a High School Diploma and six years of experience.	Hour	\$32.26
54151S	IT Asset Technician (Intermediate 1)	General requirements include the ability to process and properly allocate all inventory, as well as test, modify or send items to vendor/repair depot for service and monitor until part is received. Must be able to generate "Real Property" Transfer documentation for end-of-life items. Should have the ability to stage all items according to demand/Asset Center work order and to pick inventory and log all equipment movement into inventory logs. Can build items, if needed, according to engineering specifications and configure items as needed. Has ability to program, commission, test, log, label equipment, and document asset management information according to the Asset Tracking Process. Can Pack equipment for shipping and generate shipping order. Requires an Associate's Degree in Computer Science and four years experience, or equivalent combination of education and experience, required or a High School Diploma and six years of experience.	Hour	\$61.35
54151S	LMR Engineer (Associate 1)	Performs technical work in the fields of Land Mobile Radio (LMR) and wireless communications systems engineering, design and implementation, maintenance, troubleshooting, and repair. Responsible for program review, compliance with licensing regulations, requirements gathering, design review, change management. Implements working knowledge of LAN/WAN equipment and concepts. Performs hardware/software analysis to provide comparative data of performance characteristics and suitability within the existing systems environment. Experience with Desktop Communications Consoles is useful. Portable/Mobile Radio Programming or similar experience with Radio Frequency Encryption Management. Duties will include opening and tracking of trouble tickets with providers and responding to in house help desk trouble tickets. Requires an Associate's Degree in an Engineering focus and two years experience within the field, or equivalent combination of education and experience. Relevant experience includes but is not limited to the duties described above.	Hour	\$92.87
54151S	LMR Engineer (Intermediate 1)	Requires advanced knowledge of two way radio maintenance and installation. Motorola and Alcatel experience is necessary. Must have worked on large two way systems with a variety of two way products. Requires an Associate's Degree in an Engineering focus and six years experience within the field, or equivalent combination of education and experience. Relevant experience includes but is not limited to the duties described above.	Hour	\$103.18

SIN	LABOR CATEGORY	DESCRIPTION/EDUCATION	PER	GSA Rate w/IFF
54151S	Logistician	Must have a strong background in business as well as a working knowledge and 'hands-on' operational experience in a number of logistical areas such as IT and telecommunications equipment procurement, inventory and warehouse management, supply chain management, production planning and/or production management. Past experience in defining standardized business processes and performing 'fit/gap' analysis and providing alternate solutions is highly preferred. Must have good analytical, interpersonal skills and communication skills to work with all parts of the business as well as the ability to translate business requirements and processes for the purpose of meeting the needs of the end user. Requires a High School diploma with five years experience, or a Bachelors Degree in a Business, Computer Science or Engineering focus with one year relevant experience, or an Associate's Degree in a Business, Computer Science or Engineering focus with three years of relevant experience. Relevant experience should include detailed knowledge and strong configuration skills in logistics modules and military programs. Candidate should also display in-depth knowledge of inventory records and control, property management, government requirements, and the ability to negotiate with subcontractors.	Hour	\$52.77
54151S	Network Engineer	Responsible for the design and implementation of data communications or telecommunications networks. Plans and monitors the installation of communication circuits and recommends enhancements. Manages and monitors LANs and associated equipment (e.g., bridges, routers, hubs, modem pools, gateways, etc.). Analyzes interface requirements between WANs and other computer networks. Analyzes network characteristics (e.g., traffic, connect time, transmission speeds, packet sizes and throughput). Conducts short and long term planning to meet communications system requirements. Requires a Bachelor's Degree in an Engineering focus and six years of relevant experience, or equivalent combination of education and experience. Relevant experience should include a good understanding of various network technologies and operating systems as well experience in supporting enterprise IP networks.	Hour	\$82.09
54151S	Principal Information Engineer	Applies an organization-wide set of disciplines for the planning, analysis, design, and construction of information systems on an enterprise-wide basis or across a major sector of the enterprise. Performs enterprise strategic systems planning, enterprise information planning and business area analysis. Performs process and data modeling in support of the planning and analysis efforts using both manual and automated (Integrated Computer-Aided Software Engineering (ICASE)) tools. Applies reverse engineering and re-engineering disciplines to develop migration strategies and planning documents. Requires a Bachelor's Degree in Engineering or Computer Science and six years experience, or equivalent combination of education and experience. Relevant experience includes but is not limited to development, functional and data requirements analysis, systems analysis and design, programming, program design and documentation preparation.	Hour	\$118.09

The Extraction Kit has the capability to extricate casualties from all terrain to include water obstacles during day or night and transition a patient to a rigid litter for ground/air evacuation. The Extraction Kit has the capability to safely access and recover casualties from high angle terrain and urban obstacles using rope and rigging equipment. It has the capability to pry and cut wreckage to facilitate rapid extrication and is able to lift and move large object i.e. vehicles, wreckage, building debris, etc, high enough to remove casualties trapped underneath.(Coyote)	EA	\$37,513.83
339113R	TICS.00.8200.M	THE TICS FIELD CARE (TFC) MOBILITY KIT (The TICS Field Care (TFC) Mobility Kit has the capability to secure and safely transport a casualty on a rigid litter through all phases of TCCC to Level III medical treatment. The mobility Kit includes additional medical supplies and a rigid litter that meets CBRNE criteria, is hands-free capable, self-contained and compatible with US/North Atlantic Treaty Organization (NATO) medical evacuation transport equipment. The litter has retractable handles, automatic locking hinges, slip-resistant, and chemical-resistant light weight fabric.(Multicam)	EA	\$9,515.92
339113R	TICS.00.8200.C	THE TICS FIELD CARE (TFC) MOBILITY KIT (The TICS Field Care (TFC) Mobility Kit has the capability to secure and safely transport a casualty on a rigid litter through all phases of TCCC to Level III medical treatment. The mobility Kit includes additional medical supplies and a rigid litter that meets CBRNE criteria, is hands-free capable, self-contained and compatible with US/North Atlantic Treaty Organization (NATO) medical evacuation transport equipment. 339113R	TICS.00.8300.M	THE TICS TRANSPORTATION (TT) KIT (MULTICAM)	The TICS Transportation (TT) Kit has the capability to monitor casualty vital signs to include blood pressure, oxygen saturation, heart rate, temperature, and carbon dioxide levels. Devices have a readable screen under any light or light sensitive condition and the ability to manually cancel audio-visual alarms. The Transport Kit has the capability to provide casualty electric cardiac therapy to include external defibrillation. The Transport Kit integrates the latest technologies in order to provide casualty mechanical ventilation with oxygen generation up to 3 LPM at 93 percent concentrations. It also provides for advanced airway management capabilities with an emergency cricothyrotomy kit and a rapid intubation system that, when used with the included Glide Scope Ranger, increases the probability of a first-time intubation. The kit incorporates all the elements needed for advanced fluid management. The Transport Kit has the capability to warm casualties with decreased bodily temperature using a full-body wrap with hood and heat packs while utilizing battery and/or vehicle power. The kit has the capability to mount the medical equipment to the rigid litter specified in Mobility. The kit has a ruggedized wireless handheld computer capable of recording an injured soldier's name, vital statistics, and the initial	EA	\$100,151.66

SIN 532420L Option 2 Lease Terms and Conditions**

Option 2 Lease Terms and Conditions contains a cancellation clause, in which the fee must be in accordance with applicable legal principles.

To the extent an Offeror wishes to propose alternative lease terms and conditions that provide for lower discounts/prices based on the ordering activity's stated intent to fulfill the projected term of a lease including option years, while at the same time including separate charges for early end of the lease, the following terms apply. These terms address the timing and extent of the ordering activity's financial obligation including any potential charges for early end of the lease.

52.207-5	Option to Purchase Equipment	Feb 1995
52.227-14	Rights in Data-General	May 2014

1. LEASING PRICE LIST NOTICE

- a. Contractors must include the following notice in their contract price list for SIN 532420L:

“The ordering activity is responsible for the obligation of funds consistent with applicable law. Agencies are advised to review the lease terms and conditions contained in this price list prior to ordering and obligating funding for a lease.”

2. STATEMENT OF ORDERING ACTIVITY INTENT

- a. The ordering activity and the Contractor understand that a delivery order issued pursuant to this SIN is a lease arrangement and contemplates the use of the product for the term of the lease specified in such delivery order (the “Lease Term”). In that regard, the ordering Activity, as lessee, understands that the lease provisions contained herein and the rate established for the delivery order are premised on the ordering Activity's intent to fulfill that agreement, including acquiring products for the period of time specified in the order. Each lease hereunder shall be initiated by a delivery order which shall, either through a statement of work or other attachment, specify the product being leased, and the required terms of the transaction.
- b. Each ordering activity placing a delivery order under the terms of this option intends to exercise each renewal option and to extend the lease until completion of the Lease Term so long as the need of the ordering activity for the product or functionally similar product continues to exist and funds are appropriated. Contractor may request information from the ordering activity concerning the essential use of the products.

3. LEASE TERM

- a. The date on which the ordering activity accepts the products is the Commencement Date of the lease. For acceptance to occur, the products must operate in accordance with the product's published specifications and statement of work. Acceptance shall be in accordance with the terms of the contract or as otherwise negotiated by the ordering activity and the Contractor.

- b. Any lease is executed by the ordering activity on the basis that the known requirement for such product exceeds the initial base period of the delivery order, which is typically 12 months, or for the remainder of the fiscal year. Pursuant to FAR and/or DFAR 232.703-3(b), delivery orders with options to renew that are funded by annual (fiscal year) appropriations may provide for initial base periods and option periods that cross fiscal years as long as the initial base period or each option period does not exceed a 12 month period.. This cross fiscal year authority does not apply to multi-year leases.
- c. The total Lease Term will be specified in each delivery order, including any relevant renewal options of the ordering activity. All delivery orders, whether for the initial base period or renewal period, shall remain in effect through September 30 of the fiscal year (unless extended by statute), through any earlier expiration date specified in the delivery order, or until the ordering activity exercises its rights hereunder to acquire title to the product prior to such expiration date. The ordering activity, at its discretion, may exercise each option to extend the term of the lease through the lease term. Renewal delivery orders shall not be issued for less than all of the product and/or software set forth in the original delivery order. Delivery orders under this SIN shall not be deemed to obligate succeeding fiscal year funds. The ordering activity shall provide the Contractor with written notice of exercise of each renewal option as soon as practicable. Notice requirements may be negotiated on an order-by-order basis.
- d. Where an ordering activity's specific appropriation or procurement authority provides for contracting beyond the fiscal year period, the ordering activity may place a delivery order for a period up to the expiration of the Lease Term, or to the expiration of the period of availability of the multi-year appropriation, or whatever is appropriate under the applicable circumstances.

4. LEASE TERMINATION

- a. The ordering activity must elect the Lease Term of the relevant delivery order. The Contractor (and assignee, if any) will rely on the ordering activity's representation of its intent to fulfill the full Lease Term to determine the monthly lease payments calculated herein.
 - i. The ordering activity may terminate or not renew leases under this option at no cost, pursuant to a Termination for Non-Appropriation as defined herein (see paragraph (c) below). In any other event, the ordering activity's contracting officer may either terminate the relevant delivery order for cause or Termination for Convenience in accordance with GSAR 552.212-4 paragraphs (l) and (m).
 - ii. The Termination for Convenience at the end of a fiscal year allows for separate charges for the early end of the lease (see paragraph (d) below). In the event of termination for the convenience of the ordering activity, the ordering activity may be liable only up to the amount beyond the order's Termination Ceiling. Any termination charges calculated under the Termination for Convenience clause must be determined or identified in the delivery order or in the lease agreement.
- b. Termination for Convenience of the Ordering Activity: Leases entered into under this option may not be terminated except by the ordering activity's contracting office responsible for the delivery order in accordance with GSAR 552.212-4, Contract Terms and Conditions Commercial Items, paragraph (l) Termination for Convenience of the ordering activity. The costs charged to the ordering activity as the result of any Termination for Convenience of the ordering activity must be reasonable and may not exceed the sum of the fiscal year's payment obligations less payments made to date of termination plus the Termination Ceiling.

- c. **Termination for Non-Appropriation:** The ordering activity reasonably believes that the bona fide need will exist for the entire Lease Term and corresponding funds in an amount sufficient to make all payments for the lease Term will be available to the ordering activity. Therefore, it is unlikely that leases entered into under this option will terminate prior to the full Lease Term. Nevertheless, the ordering activity's contracting officer may terminate or not renew leases at the end of any initial base period or option period under this paragraph if (a) it no longer has a bona fide need for the product or functionally similar product; or (b) there is a continuing need, but adequate funds have not been made available to the ordering activity in an amount sufficient to continue to make the lease payments. If this occurs, the ordering activity will promptly notify the Contractor, and the product lease will be terminated at the end of the last fiscal year for which funds were appropriated. Substantiation to support a termination for non- appropriation shall be provided to the Contractor upon request.
 - d. **Termination Charges:** At the initiation of the lease, termination ceilings will be established for each year of the lease term. The termination ceiling is a limit on the amount that a Contractor may be paid by the ordering activity on the Termination for Convenience of a lease. No claim will be accepted for future costs: supplies, maintenance, usage charges or interest expense beyond the date of termination. In accordance with the bona fide needs rule, all termination charges must reasonably represent the value the ordering activity received for the work performed based upon the shorter lease term. No Termination for Convenience costs will be associated with the expiration of the lease term.
 - e. At the order level, the ordering activity may, consistent with legal principles, negotiate lower monthly payments or rates based upon appropriate changes to the termination conditions in this section.
4. The following terms and conditions may be included.
- a. **ASSIGNMENT OF CLAIMS**
GSAR 552.232-23, Assignment of Claims, is incorporated herein by reference as part of these lease provisions. The ordering activity's contracting officer will acknowledge the assignment of claim for a lease in accordance with FAR 32.8. The extent of the assignee's protection is in accordance with FAR 32.804. Any setoff provision must be in accordance with FAR 32.803.
 - b. **PEACEFUL POSSESSION AND UNRESTRICTED USE**
In recognition of the types of products available for lease and the potential adverse impact to the ordering activity's mission, the ordering activity's quiet and peaceful possession and unrestricted use of the product shall not be disturbed in the event the product is sold by the Contractor, or in the event of bankruptcy of the Contractor, corporate dissolution of the Contractor, or other event. The product shall remain in the possession of the ordering activity until the expiration of the lease. Any assignment, sale, bankruptcy, or other transfer of the leased product by the Contractor will not relieve the Contractor of its obligations to the ordering activity, and will not change the ordering activity's duties or increase the burdens or risks imposed on the ordering activity.
 - c. **COMMENCEMENT OF LEASE**
The date on which the ordering activity accepts the products is the Commencement Date of the lease. Acceptance is as defined elsewhere in the contract, or as further specified in the order.
 - d. **INSTALLATION AND MAINTENANCE**
 - i. Installation and Maintenance, when applicable, normally are not included in the charge for leasing. The Contractor may require the ordering activity to obtain installation and maintenance services

from a qualified source. The ordering activity may obtain installation and/or maintenance on the open market, from the Contractor's schedule contract, or from other sources. The ordering activity may also perform installation and/or maintenance in house, if qualified resources exist. In any event, it is the responsibility of the ordering activity to ensure that maintenance is in effect for the Lease term for all products leased.

- ii. When installation and/or maintenance are ordered under this schedule to be performed by the Contractor, the payments, terms and conditions as stated in this contract apply. The rates and terms and conditions in effect at the time the order is issued shall apply during any subsequent renewal period of the lease. The maintenance rates and terms and conditions may be added to the lease payments with mutual agreement of the parties.

e. MONTHLY PAYMENTS:

- i. Prior to the placement of an order under this Special Item Number, the ordering activity and the Contractor must agree on a "base value" for the products to be leased. For Lease to Ownership (Capital Lease) the base value will be the contract purchase price (less any discounts). For Lease with Option to Own (Operating Lease), the base value will be the contract purchase price (less any discounts), less a mutually agreed upon residual value (pre-stated purchase option price at the conclusion of the lease) for the products. The residual value will be used in the calculation of the original lease payment, lease extension payments, and the purchase option price.
- ii. To determine the initial lease term payment, the Contractor agrees to apply the negotiated lease factor to the agreed upon base value: **Lease factor five (5) percent over the rate for the three year Treasury Bill (T-Bill) at the most current U.S. Treasury auction.**

For Example: Lease factor one (1) percent over the rate for the three year (or other term) Treasury Bill (T-bill) at the most current U. S. Treasury auction.
The lease payment may be calculated by using a programmed business calculator or by using "rate" functions provided in commercial computer spreadsheets.

- iii. For any lease extension, the extension lease payment will be based on the original residual value, in lieu of the purchase price. The ordering activity and the Contractor shall agree on a new residual value based on the estimated fair market price at the end of the extension. The formula to determine the lease payment will be that in 5.b. Above.
- iv. The purchase option price will be the fair market value of the product or payment will be based upon the unamortized principle, as shown on the payment schedule as of the last payment prior to the date of transfer of ownership, whichever is less.
- v. The point in time when monthly rates are established is subject to negotiation and evaluation at the order level.
- vi. In the event the ordering activity desires, at any time, to acquire title to product leased hereunder, the ordering activity may make a one-time lump sum payment.

f. LEASE END/DISCONTINUANCE OPTIONS

- i. Upon the expiration of the Lease Term, Termination for Convenience, or Termination for Non-Appropriation, the ordering activity will return the Product to the Contractor unless the ordering activity by 30 days written notice elects either:
 - 1. to purchase the product for the residual value of the product, or

2. to extend the term of the Lease, as mutually agreed. To compute the lease payment, the residual value from the preceding lease shall be the initial value of the leased product. A new residual value shall be negotiated for the extended lease and new lease payments shall be computed.
- ii. Relocation - The ordering activity may relocate products to another location within the ordering activity with prior written notice. No other transfer, including sublease, is permitted. ordering activity shall not assign, transfer or otherwise dispose of any products, or any interest therein, or crate or suffer any levy, lien or encumbrance then except those created for the benefit of Contractor or its assigns.
 - iii. Returns
 1. Within fourteen (14) days after the date of expiration, non-renewal or termination of a lease, the ordering activity shall, at its own risk and expense, have the products packed for shipment in accordance with manufacturer's specifications and return the products to Contractor at the location specified by Contractor in the continental US, in the same condition as when delivered, ordinary wear and tear excepted. Any expenses necessary to return the products to good working order shall be at ordering activity's expense.
 2. The Contractor shall conduct a timely inspection of the returned products and within 45 days of the return, assert a claim if the condition of the product exceeds normal wear and tear.
 3. Product will be returned in accordance with the terms of the contract and in accordance with Contractor instruction.
 4. With respect to software, the ordering activity shall state in writing to the Contractor that it has:
 - i. deleted or disabled all files and copies of the software from the equipment on which it was installed;
 - ii. returned all software documentation, training manuals, and physical media on which the software was delivered; and
 - iii. has no ability to use the returned software.
- g. UPGRADES AND ADDITIONS
- i. The ordering activity may affix or install any accessory, addition, upgrade, product or device on the product ("additions") provided that such additions:
 1. can be removed without causing material damage to the product;
 2. do not reduce the value of the product; and
 3. are obtained from or approved by the Contractor, and are not subject to the interest of any third party other than the Contractor.
 - ii. Any other additions may not be installed without the Contractor's prior written consent. At the end of the lease term, the ordering activity shall remove any additions which:
 1. were not leased from the Contractor, and
 2. are readily removable without causing material damage or impairment of the intended function, use, or value of the product, and restore the product to its original configuration.

- iii. Any additions that are not so removable will become the Contractor's property (lien free).
 - iv. Leases of additions and upgrades must be co-terminus with that of the product.
- h. **RISK OF LOSS OR DAMAGE**
- The ordering activity is relieved from all risk of loss or damage to the product during periods of transportation, installation, and during the entire time the product is in possession of the ordering activity, except when loss or damage is due to the fault or negligence of the ordering activity. The ordering activity shall assume risk of loss or damage to the product during relocation, (i.e., moving the product from one ordering activity location to another ordering activity location), unless the Contractor shall undertake such relocation.
- i. **TITLE**
- During the lease term, product shall always remain the property of the Contractor. The ordering activity shall have no property right or interest in the product except as provided in this leasing agreement and shall hold the product subject and subordinate to the rights of the Contractor. Software and software licenses shall be deemed personal property. The ordering activity shall have no right or interest in the software and related documentation except as provided in the license and the lease. Upon the Commencement Date of the Lease Term, the ordering activity shall have an encumbered license to use the software for the Lease Term. The ordering activity's encumbered license rights in the software will be subject to the same rights as provided to a purchaser of a license under the terms of this contract except that the ordering activity will not have an unencumbered, paid-up license until it has made all lease payments for the full Lease Term in the case of a Lease To Ownership or has otherwise paid the applicable purchase option price.
- j. **TAXES**
- The lease payments, purchase option prices, and interest rates identified herein exclude all state and local taxes levied on or measured by the contract or sales price of the product furnished hereunder. The ordering activity will be invoiced for any such taxes as Contractor receives such tax notices or assessments from the applicable local taxing authority. Pursuant to the provisions of FAR 52.229-1 State and Local Taxes, the ordering activity agrees to pay tax or provide evidence necessary to support an exemption from the tax.
- k. **ADDITIONAL LEASE TERMS**
- Offeror may propose additional lease terms and conditions for billings, payments, and/or invoices, as long as they are consistent with the terms and conditions specified elsewhere.

**INFORMATION TECHNOLOGY CATEGORY
HARDWARE SUBCATEGORY
SIN 811212 Hardware Repair Service Order Terms**

1) Service Areas

- a) The maintenance and/or repair service rates per the contract are applicable to any ordering activity locations within a **N/A** (**insert miles) mile radius of the Contractor/Original Equipment Manufacturer (OEM) service points.. If any additional charge is to apply because of the greater distance from the Contractor/OEM service locations, the mileage rate or other distance factor shall be negotiated at the Task Order level.
- b) When maintenance and/or repair services cannot be performed at the ordering activity installation site, the repair services will be performed at the Contractor's plant(s) listed below:

7735 Old Georgetown Rd Fl. 12

Address

2) Loss or Damage

When the Contractor moves equipment to its/OEM location for repairs, the Contractor shall be responsible for any damage or loss, from the time the equipment is removed from the ordering activity installation, until the equipment is returned to such installation.

3) Scope

- a) The Contractor shall provide maintenance for all equipment listed herein, as requested by the ordering activity during the contract term. Repair service and repair parts/spare parts shall apply

exclusively to the equipment types/models within the scope of the Information Technology Category.

- b) Equipment placed under maintenance and/or service shall be in good operating condition.
 - i) In order to determine that the equipment is in good operating condition, the equipment shall be subject to inspection by the Contractor, without charge to the ordering activity.
 - ii) Costs of any repairs performed for the purpose of placing the equipment in good operating condition shall be borne by the Contractor, if the equipment was under the Contractor/OEM guarantee/warranty or maintenance responsibility prior to the effective date of the maintenance order.
 - iii) If the equipment was not under the Contractor/OEM responsibility, the costs necessary to place the equipment in proper operating condition are to be borne by the ordering activity, in accordance with the provisions of the contract.

4) Responsibilities

- a) For equipment not covered by a maintenance contract or warranty, repair service personnel shall complete repairs as soon as possible after notification by the ordering activity that service is required. Within the service areas, this repair service should normally be done within 4 hours after notification.
- b) If the Ordering Activity task or delivery order specifies a factory authorized/certified service personnel then the Contractor is obligated to provide such a factory authorized/certified service personnel for the equipment to be repaired or serviced, unless otherwise agreed to in advance between the Ordering Activity and the Contractor.

5) Repair Service Rate Provisions

- a) Charges for repair service will include the labor charge, computed at the rates set forth below, for the time during which repairmen are actually engaged in work, and, when applicable, the charge for travel or transportation.
- b) Multiple Machines: When repairs are ordered by the ordering activity on two or more machines located in one or more buildings within walking distance of each other, the charges will be computed from the time the repairman commences work on the first machine, until the work is completed on the last machine. The time required to go from one machine to another, or from one building to another, will be considered actual work performance, and chargeable to the ordering activity, provided the time consumed in going between machines (or buildings) is reasonable.
- c) At the Contractor/OEM's Facility
 - i) When equipment is returned to the Contractor/OEM's Facility for adjustments or repairs which are not covered by the guarantee/warranty provision, the cost of transportation, packing, etc. from the ordering activity location to the Contractor's plant, and return to the ordering activity location, shall be borne by the ordering activity.
 - ii) The ordering activity should not return defective equipment to the Contractor/OEM for adjustments and repairs or replacement without prior consultation and instruction.
- d) At the Ordering Activity Location (Within Established Service Areas)
 - i) When equipment is repaired at the ordering activity location, and repair service rates are established for service areas or zones, the listed rates are applicable to any ordering

activity location within such service areas or zones. No extra charge, time, or expense will be allowed for travel or transportation of repairmen or machines to or from the ordering activity office; such overhead is included in the repair service rates.

- e) At the Ordering Activity Location (Outside Established Service Areas)
 - i) If repairs are to be made at the ordering activity location, and the location is outside the service area terms defined in the GSA Price list. Rates negotiated at the task order will apply.
 - ii) When the overall travel charge computed at the above mileage rate is unreasonable (considering the time required for travel, actual and necessary transportation costs, and the allowable ordering activity per diem rate for each night the repairman is required to remain overnight at the ordering activity location), the ordering activity shall have the option of reimbursing the Contractor for actual costs, provided that the actual costs are reasonable and allowable. The Contractor shall furnish the ordering activity with a report of travel performed and related expenses incurred. The report shall include departure and arrival dates, times, and the applicable mode of travel.
- f) Labor Rates
 - i) Regular Hours: Contract rates shall entitle the ordering activity to repair service during the period 8:00 a.m. to 5:00 p.m., Monday through Friday, exclusive of holidays observed at the ordering activity location. There shall be no additional charge for repair service, which was requested during regular hours, but performed at the convenience of the Contractor outside the regular hours.
 - ii) After Hours: Should the ordering activity require that service be performed outside of regular hours, charges for such service, if any, will be specified in the GSA Price List (I-FSS-600 CONTRACT PRICE LISTS (OCT 2016). Periods of less than one hour will be prorated to the nearest quarter hour.
 - iii) Sundays and Holidays: When the ordering activity requires that repair service be performed on Sundays and Holidays observed at the ordering activity location, the Sundays and Holidays repair service rates shall apply, and will be specified in the GSA Price List (I-FSS-600 CONTRACT PRICE LISTS (OCT 2016). Periods of less than one hour will be prorated to the nearest quarter hour.

Repair Service Rates

	Minimum Charge * - Regular Hours	Hourly Rate - After Hours	Hourly Rate - Sunday and Holidays
Contractor/OEM Facility	See SIN 54151S Hourly rates	N/A	N/A
Ordering Activity Location (Within Established Service Areas)	N/A	N/A	N/A
Ordering Activity Location (Outside Established Service Areas)	N/A	N/A	N/A

***MINIMUM CHARGES INCLUDE FULL 1 HOURS ON THE JOB. Shipping Cost is not included and will need to paid by ordering agency. FRACTIONAL HOURS, AT THE END OF THE JOB, WILL BE PRORATED TO THE NEAREST QUARTER HOUR.**

4) Repair Parts/Spare Parts Rate Provision

- a) All parts, furnished as spares or as repair parts in connection with the repair of equipment, unless otherwise indicated in the GSA Price list shall be new, standard parts manufactured by the OEM.
- b) All parts shall be furnished at the prices indicated in the Contractor's commercial pricelist dated 2022, at a discount of 0% from such listed prices.
