

Texas Cool Vest

GSA Contract # GS-07F-0497T Special Item # 633-99

Texas Cool Vest, LLC is a small company with a simple easy solution for people who have to work in heated or hot working environments. We make a variety of styles and models of cooling vests for daily, military and industrial uses. There are thousands of our Texas Cool Vests in use in Iraq and Afghanistan and Industrial work places throughout the United States. These are quality made products and are 100% made in the USA.

The vest itself simply serves to hold our 65 degree F. cooling packs comfortably providing skin contact and protect the cooling packs from the sun and outside temperature. The cooling packs use a phase change material that freezes solid at 65 degrees F. They last an average of 2 – 2.5 hours at a 100 degree temperature. The cooling packs recharge in ice water in just 20 minutes and can be recharged over and over again. 65 degrees F. is close to the temperature of air conditioning and can be worn day and night, if needed, with no ill effects on the body. Our body friendly 65 degree F. phase change material is a key to our success.

The terms of our basic discount and volume discount varies by model. Payment terms are net 30 days. We offer free shipping within the continental United States. Minimum order is one unit and maximum order being \$50,000. Delivery time is approximately 20 days after receipt of order or if expedited delivery is required approximately 5 days after receipt of order. We have a 90 day warranty from date of purchase. Returnee is to pay all costs of transportation on returned products not exceeding 10 units, except when incorrect product was mistakenly shipped.

We are excited about the opportunity to be of service through the GSA Advantage System. Our prices are discounted deeply down to just one unit. Give us a chance at your business. A Texas Cool Vest will be the best tool you will buy all year, I guarantee it. “The Cool Vest Guy”.
