2285 Grissom Drive
St. Louis, MO 63146

15. WARRANTY PROVISION: *After each use, review Med Sled® product line for wear

Ethos Evacuation Strategies, LLC warrants its Med Sled® product line for a 10-year shelf life if:

- Product is stored in non-UV environments,
- Remains free of solvents, salt, corrosive materials, and liquids.
- Stored in a dry (non-wet) condition

Vertical (includes stairwells) Evacuation equipment should be considered similar to fall restraint equipment. After 7 years, a thorough inspection should be completed to ensure stitching integrity of all straps and tethers prior to use. According to the fall restraint guidelines, it is highly recommended to replace the perimeter tether and the braking tether as these components have similar characteristics as fall restraint harnesses that have a recommended life span of 5 to 7 years.

Ethos Evacuation Strategies, LLC also warrants its Med Sled® product line to be free of manufacturer’s defects for one-year and will provide 100% device replacement should a defect be found within this period.

In addition, a 5-year limited warranty is extended and provides for full device or part replacement and/or repair, as deemed necessary by Ethos Evacuation Strategies, LLC sole discretion for defects found within this period. This includes devices used for training but not including subject to normal wear and tear, scratches, or abrasions.

Note: Med Sled® products are designed and manufactured to withstand extreme conditions and environments. However, acts of war, fire and foreign objects that penetrate are not covered under the standard warranty.
