BY SAFE RESTRAINTS, INC.

COMPANY OVERVIEW

Safe Restraints MISSION: The mission of Safe Restraints, Inc. is to provide products and training that increase security, increase safety for subjects and personnel, and increase protection of property.

About Us

Safe Restraints, Inc. is a registered California small business located in Walnut Creek, CA. We work hand-in-hand with an extended network of law enforcement and security professionals including professional trainers required to fulfill the needs of government agencies in the use of The WRAP™ system products. The WRAP™ is the trusted restraint device used by hundreds of agencies across the US and Canada. Safe Restraints, Inc. is excited to offer The WRAP™ to government agencies through a GSA Contract in support of their commitment to protecting lives, reducing injuries and preserving physical and financial resources.

Evolution of The WRAP™

Founded in 1996 by law enforcement officers, Ron O'Dell and Craig Zamolo, Safe Restraints, Inc. directly understands the immense and complicated dangers that both subjects and law enforcement/first responder professionals face in non-cooperative subject arrest and/or control restraint situations.

In 1994, the International Association of Chiefs of Police (IACP) published an article identifying medical risks associated with restraining people face down. They recommended the safest method to restrain a person was in an upright seated position. At that time, Ron O'Dell and Craig Zamolo, were sergeants with the Walnut Creek Police Department in Walnut Creek, California. They were highly trained in methods of self-defense, non-lethal force, and controlling combative subjects and trained thousands of first responders. This extensive experience led to their being recognized as court experts in Police and Use of Force training and resulting in their assignment to research safer alternatives for restraining people.

After significant research, they concluded that no existing restraint device adequately addressed the recommendation of the IACP. Most existing devices were unreasonable, unsafe, or outdated. This absence of a safe, upright seated restraint device was the starting point for the creation of The WRAP™.

Durable, Effective, Trusted

The WRAP™ is patented manufactured only in the United States by Safe Restraints, Inc. The WRAP™ is so durable that units are still in use that were produced in 1996. The WRAP™ has been found to be safe and 100% effective by the Institute for the Prevention of In-Custody Deaths. Read the study at www.ipicd.com. Its use has been mandated in some states for juvenile institutions.

Continuous Support

Safe Restraints, Inc. offers training for government staff and trainers as well as a Certificate program for trainers. Training is conducted in-house, via internet or remote live webcam.

CUSTOMER INFORMATION (Ordering Guidance)

- 1a. **Special Item Numbers:** SIN 332999 Law Enforcement Personal Equipment
SIN OLM Order-Level Materials
- 1b. **Lowest Priced Item:** SIN 332999, SW001 and JV001, Price: \$1,377.43

25.	DUNS Number:	160853300
26.	CCR (SAM) Registration:	SAM Registration valid and current.

The Calming Effect of The WRAP™

The WRAP restrains a person in a comfortable, seated upright position as recommended by the International Association of Chiefs of Police (IACP). The WRAP creates a “papoose effect” – a position that has a calming effect for the subject. Subjects restrained with The WRAP are not forced to lay face down, which is a more stressful position. The seated upright position is recognized as one of the safest positions for oxygen recovery while creating no pressure against the chest. For more information - please see our website at: www.saferestrains.com

Safety Features of The WRAP™

Locking shoulder harness

- Convenient back storage pocket for equipment such as spit masks and safety gloves.
- Locking carabiner for securing handcuffs
- Stainless steel locking buckles
- Positions person in an upright seated position; recognized as one of the safest positions for oxygen recovery while creating no pressure against the chest.

Leg restraint

- With stainless steel locking buckles
- Holds legs in an extended position
- Eliminates the ability to kick
- High grade mesh allows body heat to escape
- 3-inch straps distribute pressure

Ankle Strap

- With carry handle
- 3 inches wide
- Locks the ankles (crossed)
- Distributes pressure to reduce blood flow restriction

Tactical bag

- With hands free shoulder strap
- Exterior bright yellow marking and interior yellow dividers for ease-of-use in low light.
