For calculation of the GSA Schedule price (price paid by customers ordering from the GSA Schedule, and the price to be loaded into GSA Advantage), the contractor should deduct the appropriate basic discount from the list price (resulting in the “Net GSA Price”) and add the prevailing IFF amount to the Net GSA Price (resulting in the “GSA Price with IFF”). The current IFF rate is 0.75% of the GSA Price with IFF.

The final Schedule contract award price (i.e., the GSA Price with IFF) is calculated as follows: Net GSA Price divided by (1 minus .0075) which equates to Net GSA Price divided by 0.9925.

Example:

(a) If the list price is $104,166.67, the Net GSA Price is 4% less than that, or $100,000.00.

(b) If Net GSA Price is $100,000.00, the GSA Price with IFF is $100,000.00 / 0.9925 = $100,755.67.

(c) If the GSA Price with IFF is $100,755.67, the IFF is $100,755.67 * 0.75% = $755.67.

7. Quantity Discounts:
   For a single order of multiple identical Clamshelters®, there will be an additional discount (meaning that the Net GSA Price will be reduced based on the GSA Price with IFF of the order before consideration of this quantity discount) as follows:
   - Order over $375,000 up to and including $900,000 ................. 3.0% off of Net GSA Price
   - Order over $900,000 up to and including $2,000,000 ............. 6.0% off of Net GSA Price
