<td><strong>Concept2 SkiErg Floor Stand - The floor stand provides an alternative method of supporting the SkiErg if wall mounting is not an option. It makes the SkiErg free standing, allowing you to use the SkiErg anywhere. With a steel support and wood interior, the floor stand is tough and well-built, yet has caster wheels to move it easily into and out of place. The anti-skid, wear-resistant base offers firm footing. The floor stand is suitable for use with most wheelchairs.</strong></td>

<tr>
<td>192-08</td>
<td><strong>Concept2 BikeErg. - The Concept2 BikeErg is the latest addition to Concept2’s line of sport-based ergometers. BikeErg uses the same flywheel design as the Concept2 Indoor rowers and SkiErg to create a responsive, continuous ride. The damper is your “gearing”, allowing you to quickly adjust the airflow to the flywheel during the workout. Similar effect to changing gears on a bicycle. Unlike most stationary bikes, the C2 BikeErg has a clutch, so just like a real bike, when you stop pedaling, the flywheel keeps on spinning. Both the saddle and handlebar positions are easily adjustable. The advanced PM5 Performance Monitor provides instantaneouss feedback for repeatable, comparable data for every ride. It is calibrated so you’ll be able to directly compare your times and distances with other people, as well as track your progress. The BikeErg uses high-strength polygroove belts rather than a chain for a quiet ride. At just 58 lbs, the BikeErg’s aluminum frame makes it both light and durable, while caster wheels make it easy to move around.</strong></td>
