<td>Concept2 RowErg with PM5 - GREY</td>
<td><strong>Concept2 RowErg with PM5 - GREY:</strong> The RowErg is the same machine as our popular, time-tested Model D &amp; E indoor rowers but with the new RowErg name. All of our exercise machines are technically ergometers, or “ergs” for short, because ergometers give reliable, repeatable feedback. RowErg includes PM5 Performance Monitor; Flywheel design minimizes noise, maximizes smooth feel of rowing on the water; Easy spiral damper controls feel of each pull; Ergonomic handle promotes natural arm and hand position; Aluminum rail capped with a stainless-steel track for smooth movement of the seat; Adjustable monitor arm for compact storage; Flexfoot footrests adjust for quick and easy sizing; Compact storage: Indoor rower separates easily into two parts for transport and storage. This can be done on a daily basis; no tools are required; Easy assembly. Tools and illustrated instructions included; Caster wheels make it mobile; Every RowErg comes with all you need to get started; RowErgs with PM5s come with a rechargeable battery pack and Suunto chest belt for heart rate monitoring. Standard legs—seat height 14” (36 cm) from floor.</td>

<td>Concept2 BikeErg</td>
<td><strong>Concept2 BikeErg</strong> is the latest addition to Concept2’s line of sport-based ergometers. BikeErg uses the same flywheel design as the Concept2 indoor rowers and SkiErg to create a responsive, continuous ride. The damper is your “gearing”, allowing you to quickly adjust the airflow to the flywheel during the workout. Similar effect to changing gears on a bicycle. Unlike most stationary bikes, the C2 BikeErg has a clutch, so just like a real bike, when you stop pedaling, the flywheel keeps on spinning. Both the saddle and handlebar positions are easily adjustable. The advanced PMS Performance Monitor provides instantaneous feedback for repeatable, comparable data for every ride. It is calibrated so you’ll be able to directly compare your times and distances with other people, as well as track your progress. The BikeErg uses high-strength polygroove belts rather than a chain for a quiet ride. At just 58 lbs, the BikeErg’s aluminum frame makes it both light and durable, while caster wheels make it easy to move around.</td>
