Chem/Bio Sampling Kits

SWB 60002-G

\$22.64

Small Area Sampling (SAS) Kit

The Small Area Sampling (SAS) Kit is designed to sample small areas using a Dacron swab or a gauze pad. Wet or dry samples can be taken with this kit. Two Dacron swabs are included in the SAS Kit that can be moistened with the buffer provided and used for wet areas or powders. The swab can be broken off into the buffer bottle, placed into the 50mL centrifuge tube that is placed into a plastic bag for transport to a laboratory for analysis; or the SAS Kit can be used for taking dry samples using a gauze pad. The gauze pad is used to swipe the sample area and is then placed into the 50mL centrifuge tube. The 50mL tube is placed into a plastic bag for transport to a laboratory for analysis. A chain-of-custody form is included with each kit to record sample collection information. The SAS Kit can be used to test for munitions or munition fragments, terrorist lab/weapons material, packages with suspicious liquids or powders and recon of indoor areas. The SAS Kit is not intended to be used for testing soil, dirt or very dusty, dirty or porous surfaces. The kit is sterilized by Cobalt 60 irradiation at an ISO accredited facility. The sterility of each lot is also verified by random sterility testing.

QSA 700-G

\$434.11

RAPSAK – Residue and Powder Sampling Area Kit

The QSA 700 RAPSAK is a small, light weight, field sampling kit for obtaining residue and powder samples. All components for collecting the sample are sterile and for single use. The kit allows for taking up to nine samples and includes a chain-of-custody form for each sample. A variety of tools for obtaining different size samples are included in the kit. Each kit is individually identified by a serial number.

10193-G

\$29.11

All-in-One Swabs (Pack of 5)

The All-in-One Sample Collection Swab is a simple solution for obtaining a biological sample. Shelf life of one year. "Touch-less Swab" offers significant improvement over traditional swab/buffer/over pack system.

- 0.6mL Sterile PBS
- Dacron Swab

Bio Sampling Kits

SWB 60013-G

\$32.41

SWB 60013T-G (Training)

\$14.56

B2C Bulk Biological Collection Kit

The B2C (Bulk Bio Collection) Kit meets Method A of the ATSM Standard E 2458-10 for bulk sample collection and packaging of visible powders suspected of being biological agents from nonporous surfaces.

SWB 60014-G

\$7.84

S2P Swab Sampling Powder Kit

The S2P (Swab Sampling Powder) Kit meets Method B of the ASTM Standard E 2458-10 for swab sample collection of visible powders suspected of being biological agents from nonporous surfaces. On-site biological screening and presumptive testing can be performed with collected sample.

Chem/Bio Mini Push Pack Sampling Kit

These kits are portable, all-in-one units that contain the tools and supplies needed to take one sample per pack of a liquid, solid, wipe or biological sample. All the components are heat sealed into a one-piece unit and the heat seal is notched for easy opening. Each pack is wrapped inside a non-slip, absorbent liner for which you can lay out the sampling components for ease of use. Each pack is held together with a color-coded Velcro strap to differentiate each type of sampling pack and for easy opening. The Mini Push Packs are similar to the interior modules of the Chem/Bio Sampling Kit, except the pack allows you to take only one sample at a time. Once sampling is complete, all the waste can be placed on the absorbent liner, rolled up, tied with the Velcro, for quick and easy disposal. The Mini Push Pack Kit is also available for training purposes, which contains non-cleaned items.
