

For Federal GSA Contract Clients Only

SCHEDULE OF SUPPLIES/SERVICES

Solicitation 7CFM-H6-04-0873-B

Schedule 66: Scientific Equipment and Services

ANALYTICAL SUPPORT

GSA Contract No.: GS-07F-6029R

Business Size: Large

Period of Performance 1 Jun 2016 – 16 Aug 2020

(Modification No PO-0017)

Revised: 1 June 2016

NON PERSONAL SERVICES: Provide services under this SIN to include but are not limited to, wet chemistry and associated physical tests; instrumental chemistry; chromatography; microbiological testing; environmental testing; drinking water, waste water, hazardous waste, mold and industrial hygiene analysis; optics/photometry; surface analysis; asbestos testing; microscopy; expert testimony; sampling support and training, chemical analysis, material characterization, special studies, organic solvents, bulk materials, asbestos and fiber analysis, toxicology, surface contamination, hazardous waste characterization, non-potable water, pharmaceutical testing asbestos sampling, indoor air quality, TCLP, lead, surveys; consulting.

Customer Information

Schedule Title: Schedule 66, Scientific Equipment and Services

Contract Number: GS-07F-6029R

Contract Period: 17 Aug 2015 –16 Aug 2020

CONTRACTOR:

Bureau Veritas North America, Inc.
22345 Roethel Dr.
Novi, MI 48375
800-996-2050
Fax: 248-344-2655
E-Mail: michael.wantland@us.bureauveritas.com

CONTRACTOR'S ADMINISTRATION SOURCE:

Michael J. Wantland, Manager Government Programs
800-996-2050
Michael.Wantland@us.bureauveritas.com

BUSINESS SIZE: Large

CUSTOMER INFORMATION:

1a. TABLE OF AWARDED SPECIAL ITEM NUMBERS (SIN's)

SIN 873-1 Mechanical Testing and Analysis - Services for mechanical testing and analysis include, but are not limited to, material strength testing (compression, ductility, fracture, fatigue, shear, torsion, and metallography); calibration and testing of mechanical equipment; acoustic/vibration testing (noise, shock resistance); hydraulic/pneumatic testing; metrology (time, length, mass, volume, pressure, etc.); non-destructive evaluation (x-ray, radiographic, ultrasonic, leak); environmental simulation/climatic testing; forensic, failure analysis, and expert testimony; building and welding inspection (site monitoring, field surveys, quality assurance, certification; and related training).

SIN 873-2 Chemical Testing and Analysis Services - Services for chemical testing and analysis include, but are not limited to, wet chemistry and associated physical tests; viscosity/density testing; electrochemistry testing; chromatography (GC,LC,SFC,SFE,HPLC, GS/MS, LC/MS,GPC,GFC,IC, column, thin layer, paper); spectroscopy (AA, FTIR, UV/VIS,XRD, NMR,ICP,MS, fluorescence, Raman); thermal analysis (DSC,DTA, TGA, TMA); surface analysis/microscopy (SAM, SEM,TEM, SIMS, ion); Optic/photometry testing (appearance, color, reflectance, gloss, transmittance, luminance); occupational/drug testing (monitor or measure employees exposure to hazardous substance abuse screening); biological testing (biochemical, toxicological, pharmacological, bacteriological).; environmental and hazardous waste analysis

(priority pollutants, pesticides, herbicides, metals, PCB's, petroleum); water analysis; food testing (taste, odor, texture); and related training.

1b. LOWEST PRICED MODEL NUMBER AND PRICE FOR EACH SIN: Please see price list.

1c. HOURLY RATES: Please see price list for hourly rates.

2. MAXIMUM ORDER*: \$500,000

*If the best value selection places your order over the Maximum Order identified in this catalog/pricelist, you have an opportunity to obtain a better schedule contract price. Before placing your order, contact the aforementioned contractor for a better price. The contractor may (1) offer a new price for this requirement (2) offer the lowest price available under this contract or (3) decline the order. A delivery order that exceeds the maximum order may be placed under the schedule contract in accordance with FAR 8.404.

3. MINIMUM ORDER: \$10.00

4. GEOGRAPHIC COVERAGE: Domestic, 50 states, Washington DC, Puerto Rico, US Territories and to a CONUS port or consolidation point for orders received from overseas activities.

5. POINT(S) OF PRODUCTION: Not Applicable

6. DISCOUNT FROM LIST PRICES:

A 20% discount is applied to all fees listed in our commercial fee schedule.

7. QUANTITY DISCOUNT:

Batch Size (Single Submittal)	Percent Discount
15-29 Same Analyte	5%
30-49 Same Analyte	10%
>50 Same Analyte	15%

8. PROMPT PAYMENT TERMS: 1% discount off invoiced amount if paid in full within 15 calendar days of the invoice date. (1% net/15)

9a. GOVERNMENT PURCHASE CARDS ARE ACCEPTED UP TO THE MICRO-PURCHASE THRESHOLD.

9b. GOVERNMENT PURCHASE CARDS ARE ACCEPTED ABOVE THE MICRO-PURCHASE THRESHOLD.

10. FOREIGN ITEMS: Not Applicable.

11a. TIME OF DELIVERY:

Turnaround Time	
Industrial Hygiene Analysis (routine)	5 Business Days
Asbestos	5 Business Days or less
Mold (Microbiological) Analysis	5 business Days

11b. EXPEDITED DELIVERY:

Expedited Turnaround Time	
Industrial Hygiene Analysis	1-2 Business Days
Asbestos	8 hours-1 Business Day
Mold (Microbiological-non culturable) Analysis	1-2 Business Days
Mold (Microbiological culturable)	5-7 Business Days (Estimate only)

11c. OVERNIGHT AND 2-DAY DELIVERY: 24 Hour or less delivery is available. Contact the Bureau Veritas contractor representative for rates and availability.

11d. URGENT REQUIREMENT: Agencies should contact the Bureau Veritas Contractor's representative to arrange for a faster delivery.

12. FOB POINT: Destination

13a. ORDERING ADDRESSES:

Bureau Veritas North America, Inc.
13225 Cepeda
Helotes, TX 78023

Bureau Veritas North America, Inc.
22345 Roethel Drive
Novi, MI 48375

Not Applicable.
- 24b. SECTION 508 COMPLIANCE FOR EIT:** Not Applicable.
- 25. DATA UNIVERSAL NUMBER SYSTEM (DUNS) NUMBER:** 078415114
- 26. NOTIFICATION REGARDING REGISTRATION IN CENTRAL CONTRACTOR REGISTRATION (CCR) DATABASE:** Bureau Veritas North America, Inc. is registered in the CCR database. Registration is valid until June 2012 and will be renewed/updated as required.

INTRODUCTION

Bureau Veritas has provided laboratory services to global corporations, state agencies, and consultants for over 50 years. The Laboratory network presently has a staff of 104 including four Certified Industrial Hygienists. Our Bureau Veritas HSE laboratory was formerly known as Clayton Group Services, Inc. and NATLSCO Risk & Safety Services, Inc. Our laboratory division, specializing in health, safety, and environmental services (HSE), is known nationwide as one of the premier providers of analytical services. Our core capabilities include analysis for:

- Industrial hygiene
- Asbestos and other microscopy services
- Materials characterization
- Pharmaceuticals
- Process containment and surrogates
- Method development and/or validation

Analyses are conducted to allow clients to assess exposures against various state and federal requirements and each client's internal monitoring needs. We utilize appropriate methods, including those selected from:

- OSHA Analytical Methods Manual
- NIOSH Manual of Analytical Methods (NMAM)
- Environmental Protection Agency (EPA)
- Methods developed internally by Bureau Veritas
- Journal articles and other resources

Assessing environmental and occupational health problems requires reliable and accurate analyses. To help you meet this need, our laboratories combine sophisticated instrumentation, modern laboratory facilities, the latest analytical techniques, experienced laboratory professionals, and rigorous quality assurance programs. Bureau Veritas is committed to quality, accuracy, timeliness, defensibility, and client confidentiality. This commitment applies to all analytical abilities which span a broad range of sample matrices and program requirements.

Sound analytical data is essential for accurate evaluation of environmental and occupational health problems. Bureau Veritas' laboratories have a reputation for providing accurate, reliable, timely, and legally defensible analyses. Our client services and analytical staff can help clients select sampling methods, access analytical requirements, and determine applicable standards and regulations. Bureau Veritas' analytical capabilities cover a broad range of sample matrices and program requirements.

Bureau Veritas' U.S. laboratories occupy approximately 20,000 square feet of functionally-designed space. Facilities have been designed to maximize productivity while isolating certain work areas to prevent interferences or cross-contamination.

Some of our modern and up to date instrumentation includes the following:

- Gas chromatography (GC), utilizing various detectors (FID, NPD, FPD, ECD, and TCD)
- GC with mass spectrometers (GC/MS)
- GC/MS – utilizing thermal desorption (from sorbent tubes)
- High pressure liquid chromatography (HPLC), coupled with photodiode array, ultraviolet, visible, and fluorescent detectors
- HPLC with a mass spectrometers (LC/MS/MS)
- Inductively coupled argon- plasma spectrometers (ICP)
- ICP with mass spectrometers (ICP-MS)
- Ion chromatographs (IC)
- X-ray diffraction spectrometer (XRD)
- Ultraviolet/visible light spectrometers, ion selective electrodes, and titrimetric apparatus for general chemistry analysis.
- Thermal-optical analyzers (for diesel particulate)
- Phase contrast microscopes (PCM)
- Polarized light microscopes (PLM)
- Electron microscopes - scanning (SEM) and transmission (TEM)

We continue to add state-of-the-art equipment to meet expanding needs and the lower detection limits set by regulatory agencies.

Sampling Media

Most sampling media is provided free of charge. Some specialty or short hold time media is charged at actual cost. Please contact the laboratory for further information.

Electronic Deliverables

Bureau Veritas has expertise in providing electronic deliverables in a variety of formats for upload into client databases. Consultation with our LIMS Administrator is available to discuss your requirements, document file specifications, and develop a customized file. Please contact the laboratory for further details.

Quality Control Deliverables

All reports normally include the client's laboratory request form and a final report on Bureau Veritas letterhead. Additionally, we can provide:

QA Level I QC Summary report, which includes method blank, laboratory control spike (LCS), and Matrix spike/ duplicate (MS/MSD), where applicable.	No Charge
QA Level II Minimum Charge \$75 per sample set. (includes QC Summary report, plus raw data and calibration curve)	15%
QA Level III Minimum Charge \$100 per sample set. (full CLP package, including forms, only available for organic analyses)	25%

Accreditation

American Industrial Hygiene Association (AIHA) Accreditation #100967, established 1973

- Industrial Hygiene - Metals, Silica, Fibers/Asbestos, Organic Solvents (Tubes and Passive Monitors), Bulk Asbestos.
- Environmental Lead. Accredited for Air, Paint, Soil and Dust.
- Beryllium Proficiency Analytical Testing Program.
- Pharmaceutical Round Robin Proficiency Analytical Testing.
- Environmental Microbiology. Fungal – Culturable: Air, Bulk and Surface. Direct Examination: Air, Bulk and Surface.

TNI NELAP Accredited Laboratory
Primary Accrediting Authority: Florida Department of Health, Bureau of Laboratories, #E87952.

American Industrial Hygiene Association (AIHA) Accreditation #101140, established 1973

- Industrial Hygiene – Metals, Organic Solvents (Tubes and Passive Monitors)
- Environmental Lead. Accredited For Air and Dust.
- Pharmaceutical Round Robin Proficiency Analytical Testing.

American Industrial Hygiene Association (AIHA) #100651, established 1987

- Industrial Hygiene - Fibers/Asbestos, Bulk Asbestos.

National Voluntary Laboratory Accreditation Program (NIST/NVLAP) #101125-0

- Airborne asbestos analysis.
- Bulk asbestos fiber analysis.

TNI NELAP Accredited Laboratory
• Primary Accrediting Authorities (PAA): NY Department of Health (NYDOH), #11645 and Florida Department of Health, Bureau of Laboratories, E87946

Various States – See website

Certificates/License

- State of Michigan, Dept. of Community Health, Board of Pharmacy Analytical Laboratory Controlled Substance License #5304000064
- U.S. Department of Justice DEA Controlled Substance Registration Certificate #RB0267535

- Illinois Controlled Substances License #003-097-000875-01.
- US Department of Justice DEA Controlled Substance Registration Certificate #RN0185430.

A complete list of state credentials/certifications are available on the website or contact the laboratory.

For specific scopes of AIHA accreditation, by location, please see www.aihaaccreditedlabs.org.

For details on specific state certifications, please see the laboratory website at www.us.bureauveritas.com/labs.

Note the Environmental Lead Program (AIHA) is recognized by the USEPA under Title X, National Lead Laboratory Accreditation Program (NLLAP).

Sampling Media

All necessary supplies (filters, tubes, passive monitors, solutions, etc) are provided FREE OF CHARGE with the understanding that either the samples or unused supplies are returned to the Bureau Veritas laboratory within 60 days. International locations have 120 days to return sample media. Lost, damaged, expired or non-returned supplies will be invoiced at replacement cost after that time, unless prior arrangements are made. Media can be ordered via toll free numbers on page 1 or on our website at www.us.bureauveritas.com/labs.

Sampling media will be shipped free inside the contiguous United States. Overnight delivery is invoiced at cost to the client. International shipments will be invoiced to the client. The following are the responsibility of the client and will be invoiced: 1) Hazardous materials fees and 2) Customs or import fees.

Electronic Data Deliverables

Bureau Veritas has expertise in providing electronic data deliverables in a variety of formats for upload into client databases. Our final reports are transmitted to clients as a PDF image file using Adobe Acrobat. By supplying your e-mail address, this file can be automatically sent upon completion of the report. The e-mail final report can be copied to a regional or corporate contact if desired.

Formats commonly used for upload into a customer database include Excel, ASCII (both fixed-length and delimited) and XML files. A map of the standard output file can be supplied for formatting purposes. Bureau Veritas has experience with many commercially available database products as well as custom designed databases. Consultation with our LIMS Administrator is available to discuss your requirements, document file specifications and develop a customized file. Please contact the laboratory for further details.

Turnaround Time and Priority Analysis Surcharges

Standard turnaround time is five working days for most Industrial Hygiene, asbestos and microbiological samples. Specialized analyses such as pharmaceuticals, mercaptans, nitrosamines and some others may require a longer turnaround time.

A surcharge is normally added for expedited service. Below is a chart indicating the available turnaround times and applicable surcharges for most Industrial Hygiene sample analysis methods. Please see the Asbestos and Microbiological sections below for specific pricing and turnaround times available. **Expedited services can normally be arranged with prior notification. Please contact the laboratory to discuss your project needs in advance.**

Turnaround Time	Surcharge
24 hours	100%
48 hours	75%
72 hours	50%

Blanks

Analysis of each client field blank is charged at the same rate as sample analysis. Blanks with multiple compounds will be invoiced for the first analyte only.

Quantity Discount Schedule

The following discount schedule will be given on published list pricing for those sample sets submitted at one time involving 15 or more identical analyses, billed as a single batch.

Number of Identical Samples	Percent Discount
15-29	5
30-49	10
50 or more	15

Payment Terms

Payment terms are Net 30. Bureau Veritas accepts Visa, MasterCard, and American Express or will invoice against a purchase order. Prepayment may be required based upon credit or payment history. Prices are subject to change without notice. Prompt payment terms available at 1% discount off invoiced amount if paid in full within 15 calendar days of the invoice date.

Sampling Equipment

Bureau Veritas provides industrial hygiene sampling pumps and calibrators, IAQ equipment, aerosol and particle counters, stack emission equipment and other sampling instruments for a nominal fee. Pumps are available as low as \$6/day.

When Bureau Veritas Laboratories assists you with your equipment needs, there is no change in your negotiated analytical fees or discounts. We would be pleased to send you a complete inventory and an equipment price quote for your project. Damaged equipment will be invoiced at replacement cost.

Investigative Analytical Services

When you have reached a point in your investigation where you need to step away and have a fresh perspective without preconceptions, Bureau Veritas has the experience and background to analyze the issue. The Bureau Veritas Laboratory network brings the unique skill set of critical thinking, technical expertise and vast analytical resources to apply to your problem.

These services use a different approach to laboratory analysis than the typical identification or quantification. In an investigative project, we consider each client project as a partnership in problem solving and root cause analysis. Working with you, our scientists create specific work plans to address your unique problem.

Our expertise has solved a wide variety of common problems including identifying reasons for manufacturing and product failures through contaminant identification and materials characterization, identification of odor-causing IAQ and occupational health issues, and assembling information and data for litigation support.

When there are no clear cut answers to “What is this odor?” “What is this unknown substance?” or “Why did my product or process fail?” contact Bureau Veritas for the answer.

Since each project is unique, all pricing is by quotation after development of a detailed work plan.

Industrial Hygiene

For Scan packages, see pages 15 - 19.

Metals by AA/ICP/ICP-MS

GSA Fee: \$24 First Analyte / \$14.40 Each Additional Analyte

Routine Metals (call lab to determine compatibility)

Aluminum	Boron	Cobalt	Iron	Molybdenum	Rhenium	Tellurium	Yttrium
Antimony	Cadmium	Copper	Lanthanum	Nickel	Rhodium*	Thallium	Zinc
Arsenic	Calcium	Gallium	Lead	Palladium	Selenium	Tin	Zirconium
Barium	Cerium	Gold	Lithium	Phosphorus	Silver	Titanium	
Beryllium	Cesium	Indium	Magnesium	Platinum	Sodium	Uranium	
Bismuth	Chromium	Iridium	Manganese	Potassium	Strontium	Vanadium	

*Additional charges for standard purchase may apply.

Lead in paint	\$12.80
Tungsten or Cobalt (OSHA ID-213)	\$44 First Analyte / \$20 Each Additional Analyte
Mercury (Cold Vapor)	\$41.60
Nickel Carbonyl (22-mm filter and collection tube in series)	\$68
Phosphine	\$64

Acids/Anions by Ion Chromatography

GSA Fee: \$44 First Analyte / \$20 Each Additional Analyte

Anions*:	Fluoride	Chloride	Nitrate	Phosphate	Sulfate
Acids:	Hydrobromic acid	Hydrofluoric acid	Sulfuric acid		
	Hydrochloric acid	Nitric acid	Phosphoric Acid	Formic acid	

*Contact the laboratory for a complete listing

Hexavalent Chromium (OSHA ID-215 Version 2)	\$54.40
Hexavalent Chromium – air sample with paint spray or dried (OSHA ID-215 Version 2)	\$68
Hexavalent Chromium – paint or solid matrix samples	\$68

Solvents - Gas Chromatography Analyses (FID)

Charcoal Tube	Solvent Vapors	\$35.20 First Analyte / \$17.60 Each Additional Analyte
Solid Sorbent Tubes (Silica Gel, Tenax, Anasorb)	Routine Organic Compounds	\$35.20 First Analyte / \$17.60 Each Additional Analyte
Passive Solvent Samplers (Single Section or Double Section)	Solvent Vapors	\$44 First Analyte / \$17.60 Each Additional Analyte
Total Hydrocarbon Scan (Quantitated "as Hexane")		\$48

Analysis by Specialty Detectors for Gas Chromatography (ECD, NPD, FPD)

See detailed listing

Industrial Hygiene (Cont'd)

High Pressure Liquid Chromatography

Routine IH	\$65.60 First Analyte / \$36 Each Additional Analyte
Routine Pharmaceutical	\$76 First Analyte / \$40 Each Additional Analyte
Analytes requiring special HPLC detectors or low-level quantitation	\$88 First Analyte / \$44 Each Additional Analyte

Minimum sample requirement – There is a 3-sample minimum for active pharmaceutical ingredient (API) samples. If less than three samples are received, the client will be invoiced for three samples.

Surrogates

A variety of surrogates are available and selection is dependent upon the application or particular process. Surrogate sensitivities range from 0.2 nanograms to 5 nanograms per sample. For project pricing, please contact the laboratory.

Lactose, Mannitol, Riboflavin, Naproxen sodium	\$68 / sample
Acetaminophen	\$112 / sample

LC/MS/MS

GSA Fee / Analyte

PFOA (Perfluorooctanoic Acid) PFOS (Perfluorooctane Sulfonate)	
OSHA Versatile Sampler – 2 results	\$160
OSHA Versatile Sampler – 3 results (filter plus each sorbent section)	\$176

For other perfluorinated acids, please contact the laboratory.

With the pharmaceutical market moving to compounds with greater potency, the need for increased sensitivity has been recognized analytically. To address this need, Bureau Veritas offers selected analyses by LC/MS/MS.

		\$160 First Analyte/\$44 Each Additional Analyte
17-beta Estradiol	Estradiol valerate	Norgestimate
Bleomycin sulfate	Ethinyl estradiol	Norelgestromin
Calcitriol	Levonorgestrel	Pemetrexed disodium
Cholecalciferol (Vitamin D3)	Norethindrone	
Estradiol	Norethindrone acetate	
		\$148 First Analyte / \$44 Each Additional Analyte
17-alpha-Hydroxyprogesterone caproate	Finasteride	Salmeterol xinafoate
Cyclophosphamide monohydrate	Fluticasone propionate	Trenbolone acetate
Decitabine	Methotrexate	
Dexamethasone	Promestriene	
		\$112 First Analyte / \$44 Each Additional Analyte
Albuterol (Salbutamol)	Hydromorphone (base or HCl)	Thyroxine sodium
Dutasteride	Norgestrel	Risperidone
Estriol	Progesterone	
Ethinodiol diacetate	Sufentanil (base, citrate, or HCl)	
Fentanyl (base, citrate, or HCl)	THC (Tetrahydrocannabinol)	

Gravimetric

GSA Fee/Sample

Total Dust	\$13.60
Respirable Dust (specify 2- or 3-piece cassettes)	\$13.60
Thoracic Particulate (PM 10 – LEED Specification)	\$20
Inhalable Dust (IOM Sample)	\$20

Silica

X-Ray Diffraction Analysis

Air Samples

Quartz & Cristobalite	\$60
Crystalline Silica Scan (Quartz, Cristobalite & Tridymite)	\$72
Respirable dust	\$13.60
(Air samples for silica should include gravimetric analysis in order to calculate employee exposure according to the OSHA PEL.)	

Bulk Samples	\$120
--------------	-------

Scans & Panels

Aldehyde Scans

GSA Fee/Sample

EPA IP-6 Full Scan:

Tube/Passive Monitor: \$176 (Field Blank \$65.60)

Acetaldehyde	Decanal	Isobutyraldehyde	Propionaldehyde
Acrolein	Formaldehyde	Isovaleraldehyde	p-Tolualdehyde
Benzaldehyde	Glutaraldehyde	Nonanal	Undecanal
Butyraldehyde	Heptaldehyde	Octylaldehyde	Valeraldehyde
Crotonaldehyde	Hexaldehyde		

EPA TO-11

\$180 (Field Blank \$65.60)

Acetaldehyde	Butanone, 2-	Formaldehyde	Pentanaldehyde
Acetone	Butyraldehyde	Hexaldehyde	Propanaldehyde
Benzaldehyde	Crotonaldehyde	Methacrolein	Tolualdehyde (total)

Amines

NIOSH 2010 Aliphatic Amines - Scan 2

Ethylamine	Diethylamine	Dimethylamine	Methylamine	\$124 (Field Blank \$60)
------------	--------------	---------------	-------------	--------------------------

NIOSH 2010 Aliphatic Amines - Scan 3

Butylamine	Isopropylamine, n-	Cyclohexylamine	Triethylamine	\$124 (Field Blank \$60)
------------	--------------------	-----------------	---------------	--------------------------

Anti-Neoplastic/Cytotoxins Panel

USP 797 Testing

Call lab for pricing

Cyclophosphamide	Ifosphamide	5-Fluorouracil	Methotrexate
------------------	-------------	----------------	--------------

Additional compounds available:

Bleomycin Sulfate	Docetaxel	Irinotecan
Capecitabine	Doxorubicin Hydrochloride	Paclitaxel
Cladribine	Etoposide	"Platin" compounds
Cytarabine	Gemcitabine	Topotecan
Daunorubicin Hydrochloride		

Cold/Flu Panel

\$76 First Analyte / \$40 Ea. Add'l (Field Blank \$76)

Acetaminophen	Dextromethorphan Hydrobromide	Naloxone
Caffeine	Diphenhydramine Hydrochloride	Phenylephrine Hydrochloride
Chlorpheniramine Maleate	Doxylamine succinate	Pseudoephedrine Hydrochloride
Codeine	Hydrocodone	Salicylic acid

Scans & Panels (cont.)

Flavorings Panel

OSHA Method 1013/1016 \$35.20 First Analyte / \$17.60 Ea. Add'l (Field Blank \$35.20)
 Acetoin Diacetyl 2,3-Heptanedione 2,3-Hexanedione 2,3-Pentanedione

Hydrocarbon Scans

Routine:

Benzene Toluene Ethylbenzene Xylene (all isomers) \$64 (Field Blank CT \$35.20)
 (Blank OVM \$44)

Enhanced:

Benzene Toluene Ethylbenzene Xylene (all isomers) \$84 (Field Blank CT \$35.20)
 Total hydrocarbons quantitated "as hexane" (Blank OVM \$44)

Inorganic Acid Scan

\$124 (Field Blank \$41.60)

Hydrobromic Acid Hydrofluoric Acid Phosphoric Acid
 Hydrochloric Acid Nitric Acid Sulfuric Acid

Isocyanates Scan

HDI MDI 2,4-TDI 2,6-TDI \$136 (Field Blank \$65.60)

Metal Scans

NIOSH 7300 / NIOSH 7303 / SW-6010C (28 Metals) \$132 (Field Blank \$19.20)

Aluminum	Chromium	Manganese	Sodium
Antimony	Cobalt	Molybdenum	Strontium
Arsenic	Copper	Nickel	Thallium
Barium	Iron	Potassium	Tin
Beryllium	Lead	Phosphorus	Titanium
Cadmium	Lithium	Selenium	Vanadium
Calcium	Magnesium	Silver	Zinc

OSHA ID-125 Welding Fume (13 Metals) \$112 (Field Blank \$24)

Antimony	Cobalt	Manganese	Zinc
Beryllium	Copper	Molybdenum	
Cadmium	Iron	Nickel	
Chromium	Lead	Vanadium	

Narcotics Panel

\$76 First Analyte / \$40 Ea. Add'l (Field Blank \$76)

Codeine	Hydromorphone Hydrochloride	Oxycodone
Codeine phosphate	Morphine	Oxycodone Hydrochloride
Hydrocodone	Morphine sulfate	Oxymorphone
Hydrocodone bitartrate	Noroxymorphone	Oxymorphone Hydrochloride
Hydromorphone		

Scans & Panels (cont.)

Nitrosamine Scan

GSA Fee/Sample

NIOSH 2522

\$192 (Field Blank \$80)

n-Nitrosodibutylamine	n-Nitrosomorpholine
n-Nitrosodiethylamine	n-Nitrosopiperidine
n-Nitrosodimethylamine	n-Nitrosopyrrolidine
n-Nitrosodipropylamine	

Organotin Scan

NIOSH 5526

\$176 (Field Blank \$80)

Methyltin chlorides scan (mono, di-, tri-) OR Butyltin chlorides scan (mono, di-, tri-)

Pesticide Scans

EPA TO-10A Organochlorine (21)

\$120 (Field Blank \$64)

Aldrin	DDD, 4'4'-	Endrin	Add PCB for an additional \$32
BHC, alpha	DDE, 4'4'-	Endrin aldehyde

ASTM Soil Method PLM/TEM Quantitative (includes sieving)	\$360.00	\$270.40	\$224.80	\$180.00	\$172.00

PCM - Phase-contrast microscopy

PLM - Polarized light microscopy

TEM - Transmission electron microscopy

SEM - Scanning electron microscopy

All microscopy techniques are performed at Kennesaw, GA laboratory location only.

Microscopy – Materials Characterization

Bureau Veritas offers a comprehensive set of surface and materials characterization techniques and testing services for a variety of sample types including metals/alloys, textiles, residues, building materials, corroded surfaces, composites and polymers.

We provide chemical analysis services, specifically, surface analysis, identification of polymers, plastics, contaminants, organic films, fibers, liquids and trace organic compounds. We perform materials analysis in the fields of electronics, automobile, aerospace, biomedical, chemical and pharmaceutical.

Our breadth of techniques and services, consultative approach, and array of analytical instrumentation enable us to help you solve product failure, physical defect, emissions and contamination issues.

PLM- Materials Characterization (uses optical properties of light to ID larger particles)	\$100
TEM-Materials characterization (includes selected area electron diffraction (SAED) and energy dispersive spectroscopy (EDS). Includes ID of very small particles, less than 10 µm)	\$260
SEM-Materials characterization (uses morphology and EDS to identify larger particles)	\$260
SEM/EDS (electron dispersive spectroscopy)	
Qualitative	\$200
Quantitative	\$220
Particle sizing (TEM or SEM)	\$260
Nanoparticle or Nanofiber Analysis	Call for quotation

Penicillium and *Cladosporium* species ID on MEA

Call for pricing

Mycotoxin analysis (MYC)

Laboratory requires advance notification to confirm project specifications and meet client requirements.

Each mycotoxin or fungal species	Presence/Absence	\$540
Qualitative scan	Presence/Absence	\$1,120

Bacteria Testing

Heterotrophic Plate Count and Coliform Analysis of water and environmental samples

Call for pricing

Specialty Services

Methods Development/Validation Services

Bureau Veritas provides method development/validation services for compounds which sampling and analysis protocols are not available in the public domain. This service is available for active pharmaceutical ingredients, proprietary chemicals, and intermediates as well as final products in the client pipeline. Our protocol is based on standard development and validation protocols, knowledge of industry standards and years of expertise. The Bureau Veritas protocol can be used as is or as a starting point for customization to meet your requirements. Alternately, a validation protocol can be provided to the laboratory and a quote developed based upon those specifications. The basic elements of a development/validation project are listed below for review.

In order to begin a development/validation project, the client must provide an Occupational Exposure Limit (OEL) or other defined control limit/range, as well as reference material if the target compound is not commercially available. Pricing is by quotation and varies depending upon the defined scope of the validation, the technology employed, and the nature of the target molecule. Bureau Veritas has expertise with a broad range of compounds and techniques to efficiently develop a new method and meet client specifications.

Elements of a Standard Project

Method Development

- Selection of appropriate analytical technique
- Demonstration of selectivity, sensitivity, precision and resolution
- Demonstration of analytical range (ruggedness and robustness)
- Sampling media selection

Method Validation

- Extraction efficiency from the media
- Analyte stability during sampling (sampling efficiency)
- Storage stability of collected samples relative to time and storage conditions
- Stability of extracted samples
- Determination and demonstration of method accuracy and precision
- Comprehensive written method and validation report

Method Transfer

- Validation according to client requirements of existing sampling and analytical methods

Surface Contamination

Bureau Veritas has successfully adapted industrial hygiene analytical methods to address surface sampling for either housekeeping or product contact surface cleaning validation purposes. Analysis can be performed from swipes, swabs, or rinses. These methods are intended to evaluate only the surface sampling and other procedures that differ from air sampling methods and are not intended to re-evaluate analytical procedures. Contact the laboratory to discuss method suitability for your application.

Process Containment Evaluation

Process containment can be evaluated through the use of surrogates. Surrogates offer an effective and safe technique for evaluating containment and process control of highly potent or hazardous materials. Bureau Veritas offers containment evaluation following The ISPE Good Practice Guide: Assessing the Particulate Containment Performance of Pharmaceutical Equipment as a standard methodology for use in testing the containment efficiency of solids handling systems. The use of surrogate materials provides an opportunity to evaluate and measure the effectiveness of process containment controls and correct any deficiencies prior to introduction of a high potency material into the process.

A variety of surrogates are available and selection is dependent upon the application or particular process. Common surrogates are Lactose, Mannitol, Naproxen sodium, Riboflavin and Acetaminophen. Surrogate sensitivities range from 0.2 nanograms to 5 nanograms per sample and include non-API materials for your consideration. Please call the laboratory to discuss which surrogate is most appropriate for your application.

Toxicology Services

Toxicology services are offered independently or in support of Bureau Veritas' method development and validation services. Consultation is provided by a board-certified toxicologist. Curriculum vitae are available upon request.

Toxicology Services

- Occupational Exposure Limit (OEL) establishment
- Toxicology data interpretation
- Risk assessment in support of new drug development
- Impact of chemicals on human health
- Preparation of dossiers for FDA submission

Pricing is by quotation or on an hourly basis.

Labor Position Descriptions

Director/Manager/Principal

Bachelor's degree or advanced degree in science or engineering. Fifteen or more years of related experience. Plans, coordinates, and directs varied and complex technical and administrative operations, providing clients with technical excellence and timely response. Interprets study results and provides recommendations to clients. Demonstrated ability to create methods and procedures, anticipate and resolve issues autonomously, and direct staff to meet project goals. Participates in professional business development activities and provides overall professional visibility for the firm (e.g. publication of papers, presentations and professional meetings, active participation in appropriate organizations, etc.)

Expert Witness

Bachelors or advanced degree in science or engineering. Minimum of ten years experience in related field. Works with clients and attorneys to provide solutions, expert opinions, and strategic analysis. Provide written or oral pre trial depositions and testimony during trials. Prepare and give complex presentations and exhibits on subject matter.

Auditor

Bachelor's degree in science or engineering or equivalent. Two or more years of related experience. Inspects and reviews complex technical designs and reports compliance and non-compliance with the project's terms and conditions for Application for Certification, Permits and Laws, Ordinances, Regulations and Standards. Records and reports findings and verifies non-compliance issues have been resolved.

Project Manager

Bachelor's degree or advanced degree in science or engineering. Twelve plus years of related experience. Executes complex technical assignments and manages all aspects of a project including budgeting, scheduling, fieldwork oversight, and report development. Negotiates with state and federal regulatory agencies, interprets project results and provides recommendations to clients. Reviews proposals and reports prepared by staff to ensure technical excellence and timeliness.

Program Manager, Senior Consultant - Licensed, i.e. Certified Industrial Hygienist (CIH), Professional Engineer

Bachelor's degree in science or engineering. Twelve plus years of related experience. Executes complex technical assignments, including supervision of project staff, interprets project results, provides recommendations to clients, and ensures technical excellence and timeliness. Coordinates work projects for national accounts. Reviews proposals and reports prepared by staff and assists in internal training of staff.

Chemist

Bachelors degree or higher in chemistry, biology or related science. Five or more years related experience in laboratory operations. Analyze organic and inorganic compounds to determine chemical and physical properties, composition, structure, relationships, and reactions, utilizing chromatography, spectroscopy, and spectrophotometry techniques. Develop, improve, and customize products, equipment, formulas, processes, and analytical methods. Compile and analyze test information to determine process or equipment operating efficiency and to diagnose malfunctions. Confer with scientists and engineers to conduct analyses of samples, interpret test results, or develop nonstandard tests. Direct, coordinate, and advise personnel in test procedures for analyzing components and physical properties of materials. Organize, direct and interpret quality assurance and quality control procedures, policies and results. Write technical papers and reports; prepare standards and specifications for processes, facilities, products, and tests.

Project Manager, Senior Consultant (Unlicensed)

Bachelor's degree or higher in science or engineering. Ten plus years of related experience. Executes complex technical assignments, including supervision of project staff, and ensures technical excellence and timeliness. Interprets project results and provides recommendations to clients. Takes an active role in proposal preparation and client presentations and participates in peer review of proposals and reports.

Consultant

Bachelor's degree in science or engineering. Five plus years of related experience. Plans and executes technical projects with minimal supervision. Prepares routine proposals, interprets project results, prepares reports for senior review, provides recommendations to clients, and participates in peer review of proposals and reports.

Consultant - Staff Level

Bachelor's degree in science or engineering. One to six years of related experience. Executes progressively complex technical assignments with some supervision and prepares reports for approval by supervisor or manager. Responds to clients inquiries in a timely manner and participates in professional development activities and continuing education.

Laboratory Technician

Associates degree or higher in chemistry, biology or related science. One or more years experience in laboratory operations. Conduct chemical analysis of air, water, soil and other matrixes using manual, automatic or microscope analyzers to detect contaminants. Adjust, set up, maintain and clean laboratory equipment. Evaluate results of experiments and tests to ensure consistency to methods and quality control/quality assurance program requirements. Analyze and record test results to issue lab reports that use graphs, charts, and narratives. Preparing standard volumetric reagents and solutions to combine with samples or other reagents, following standardized formulas and methods. Test processes, finished products, and raw materials to determine quantity and quality of characteristics or materials of a substance. Accurately conduct various complex and simple analytical tests on samples under the supervision of a chemist. Recognize erroneous outcomes to ensure all testing methodologies or processes are well controlled and documented.

Staff Technician

Associates degree or higher in science, engineering or related field. High School diploma and related experience may be considered in lieu of education requirement. Two or more years of related experience. Assists senior field staff at client sites. Performs routine sampling and monitoring tasks, under supervision, and prepares routine reports for review by supervisor. Operates and maintains all field equipment and performs internal Fit Testing. Recommends and obtains appropriate equipment needed by group, maintains an inventory of expendable supplies, and interacts with vendors to keep abreast of current developments in instrumentation.

Junior Staff Technician

Associates degree or higher in science, engineering or related field. High School diploma and related experience may be considered in lieu of the education requirements. Assists field staff at client sites. Performs routine sampling and monitoring tasks, under supervision, and prepares routine reports for review by supervisor. Operates and maintains all field equipment and performs internal Fit Testing. Recommends and obtains appropriate equipment needed by group, maintains an inventory of expendable supplies, and interacts with vendors to keep abreast of current developments in instrumentation.
