**Job Descriptions**

**Accounting Clerk I**

This position is responsible for performing one or more routine accounting clerical operations such as: examining, verifying, and correcting various accounting documents to ensure completeness and accuracy of data by accounting procedures. Specific tasks/duties are assigned under adequate supervision.

Entry-level reconciliation and posting will be assigned under detailed guidance. In most instances, an employee in this position will rely on the supervisors’ instructions. Completed work will be reviewed for accuracy and compliance with procedures.

**Accounting Clerk II**

This position uses knowledge of double-entry bookkeeping in performing one or more of the following: posting actions to journals, identifying subsidiary accounts affected, making debit and credit entries, and assigning proper codes.

- The Accounting Clerk II may review computer printouts against manually maintained journals, detect and correct erroneous postings, and prepare documents to adjust accounting classifications and other data, or review lists of transactions rejected by an automated system. In this instance, the Accounting Clerk II will determine reasons for rejections and prepare necessary correcting material.
- On routine assignments, an employee will select and apply established procedures and techniques. Detailed instructions are provided for difficult or unusual assignments. Completed work and methods used, are reviewed for technical accuracy.

**Accounting Clerk III**

The Accounting Clerk III maintains journals or subsidiary ledgers of an accounting system and balances and reconciles accounts. Typical duties include one or both of the following:

- Reviewing invoices and statements verifying information, ensuring sufficient funds have been obligated, and if questionable, resolving with the submitting unit determining accounts involved. The review will include coding transactions, and processing material through data processing for application in the accounting system;
- Analysis and reconciliation of computer printouts with operating unit reports (contacting units, researching causes of discrepancies, and taking action to ensure that accounts balance). The supervisor provides suggestions for handling unusual or non-recurring transactions. Conformance with requirements and technical soundness of completed work is reviewed by the supervisor or are controlled by mechanisms built into the accounting processes.

**Administrative Assistant**

This is structured administrative support work of average difficulty and complexity. Work requires the operation of personal computers, Teletype Devices for the Deaf, communications systems, and other office equipment; may require communication with the public.
• Screens callers and visitors; provides information or makes referrals, assists visitors completing forms and applications; provides information on services and functions schedules and places conference calls
• Handles emergency or trouble reports for communication systems.
• Maintains calendars, schedules, and makes travel arrangements.
• Answers routine inquiries requiring minor interpretations of policies, procedures, rules, and regulations.
• Obtains information from incoming patients or other responsible individuals; informs patients of hospital regulations, policies, and procedures; explains rates, charges, services, discounts, and billing; notifies particular hospital division to expect patients and arranges for escort of the patients. Collects, sorts, opens, and distributes mail.
• Operates electronic mailing systems to process building and interoffice mail, and all classes of federal mail. Maintains a record, filing, or registration system(s).
• Processes invoices, vouchers, payrolls, personnel transactions, and other records; receives, records, tabulates, reconciles, and reports cash receipts; distributes receipts to proper funds following established routines; prepares checks and cash for a deposit.
• Maintains billing and posts charges and credits to accounts, prepares reports.
• Enters and manipulates data and information by creating simple word processing templates, form letters, database tables, and spreadsheets. May maintain web pages.
• Operates office equipment and personal computers.
• Enters data in a high production environment. Prepares and enters data or information from source documents, rough drafts, copy, or general instructions into routine and technical materials including forms, statistical reports, and correspondence.
• Proofreads for proper coding, classification, mathematical accuracy, and compliance with procedures. Takes minutes at meetings. Trains, guides, and assists in the use of equipment or completion of assignments.
• Maintains an adequate level of office supplies.

**Administrative Support Specialist**

This position provides a variety of administrative support services in most or all of the following areas:
• Space management, purchasing supplies and equipment, security, internal controls, mail, records, reproduction services, forms management, and communication services.
• Provide recommendations to management on policy, or procedural conflicts, provide interpretations based on routine and best practices.
• Assist with the planning and organization of space for the office and perform administrative duties to support the coordination of office moves, office construction, and other facility improvements.
• Prepare documents to obligate funds for repairs, maintenance, licensing and registration fees, and vehicle inspections, and conduct annual year-end closing activities, and performs reconciliation.
• Responsible for providing a variety of administrative management analysis and direct support services
• Conduct in-depth, coordinated studies and analysis of all office support functions and their interrelationships to evaluate their effectiveness
• Prepare a variety of studies, analysis, and reports
• Advise management within area of responsibility and making recommendations involving changes to administrative policies and procedures
• Making purchases and entering into contracts within delegated monetary authorization with governing regulations and guidelines, via formal acquisition procedures or government purchase card
• Draft final contract documents and representing the USAO concerning contract inquiries;
• Administering a wide variety of administrative support activities, e.g., office moves, reorganizations, communication system changes
Civil Rights Investigator

- Conduct a preliminary inquiry into allegations and draft memoranda recommending whether to open a full civil investigation.
- Assesses specific nature of allegations
- Reviews allegations and supporting materials; conducts preliminary research in computerized databases, and contacts complainants, advocates, and others with relevant information.
- Plan, coordinate, conduct and evaluate in-depth affirmative civil rights investigations at locations throughout the District.
- Draft documents and data requests designed to obtain all relevant information.
- In consultation with civil rights AUSA’s plans and conducts on-site investigations, to include interviews with victims, witnesses, managers, and officials.
- When appropriate, utilize Concordance, Case map, and/or Sanction software to plan and develop timelines or documentation that compile and present information gathered from the investigation in a manner for complete analysis.
- When appropriate, plans and manages databases cataloging voluminous evidence and investigative reports relating to allegations of federal civil rights violations. Extracts and categorizes material obtained from the investigation for inclusion in the database.
- Makes necessary support arrangements with information systems personnel and, in conjunction with civil rights AUSA’s, arranges for necessary litigation support.
- Analyses information contained in applicable databases. Identifies and focuses on supporting facts and evidence that may become apparent. Prepares reports for review by civil rights AUSA’s, USAO management, and the Civil Rights Division
- When necessary, obtains information, confers, and coordinates with the Civil Rights Division and other Department of Justice components.
- In the direction of civil rights AUSA’s, plans and conducts necessary background legal research.
- Prepares factual summary and evaluation based on investigations, in conjunction with civil rights AUSA’s, develops recommendations as to the action that may be justified against particular jurisdictions or agencies.
- Performs other related duties as assigned

Court Reporter

- Records examination, testimony, judicial opinions, judge's charge to the jury, judgment or sentence of the court, or other proceedings in the court of law by manual or machine shorthand.
- Reads portions of the transcript during trial on the judge's request and ask speakers to clarify inaudible statements. Transcribes recorded material, using a typewriter, or dictates material into a recording machine.

Customer Service Representative I

This position receives, comprehends, provides, and responds to routine informational inquiries and service requests through the use of various communication technologies including but not limited to telephones, e-mail, facsimile, postal mail, and the Internet.

Customer Service Representative II

This position is responsible for performing duties detailed in CSR I job description. Also, CSR II is responsible for responding to escalated and more complex inquiries on a broader scope of topics. Tasks may require simple adaptation and interpretation of provided reference materials.
Customer Service Representative III

This position is responsible for performing duties detailed in CSR I and CSR II job descriptions. Also, CSR III is responsible for supervising and advising CSR I and CSR II.

Data Entry Operator I

This position works under close supervision and follows specific procedures or detailed instructions.

The Data Entry Operator I work from various standardized source documents that have been coded and require little or no selecting coding, or interpreting of data. Problems such as erroneous items and codes, or missing information are resolved at the supervisory level. Work is routine and repetitive.

Data Entry Operator II

This position requires the application of experience and judgment in selecting procedures to be followed and searching for interpreting, selecting, or coding items to be entered from a variety of document sources. The Data Entry Operator II may occasionally perform routine work as described for Data Entry Operator I.

Excluded are operators above Level II using the key entry controls to access, read, and evaluate the substance of specific records to take substantive actions, or to make entices requiring a similar level of knowledge.

Financial Analyst

- Plan and conduct complex financial analyses of individual, partnership, and corporate judgment debtors. Analyses may include financial and expense performance, the rate of return, depreciation, working capital, and investments.
- Perform detailed review of relevant financial information, including financial statements, credit reports, tax returns, insurance information, real property escrow, and lending materials, bank statements, and loan applications to third parties, to determine the collectability of assets. Prepare forecasts and analysis of trends in manufacturing, sales, finance, general business conditions, and other related areas.
- Create and analyze monthly, quarterly, and annual reports and ensure financial information has been recorded accurately.
- Perform financial forecasting and reconciliation of internal accounts.
- Prepare detailed reports of financial analysis, making clear conclusions regarding the collectability of debts. Reports should give particular emphasis to assets readily available to pay judgments, assets that could be recovered under the Federal Debt Collection Procedures Act, and recommendations regarding further investigatory work.
- Identify trends and developments in competitive environments and presents findings.
- Draft written discovery (interrogatories, requests for production of documents, and subpoenas) to obtain information to support financial analyses. Sources of discovery include the defendant, the defendant’s family members, defendant’s businesses, banks, brokerages, title insurers, and lenders.
- Obtain and meaningfully evaluate the results of computerized database searches, public record information, judgment and lien information, Secretary of State records, and publicly filed financial information available from entities such as the Securities and Exchange Commission.
- May conduct special financial and business-related studies and cooperates with other departments in the preparation of analyses.

General Clerk I

This position follows detailed specific procedures in completing several repetitive clerical steps performed in a prescribed or slightly varied sequence.

- Coding and filing documents in an extensive alphabetical file; could involve simple posting to individual accounts
• Opening mail, calculating and posting charges to departmental accounts
• Operating basic office equipment, e.g., photocopier, facsimile, multi-line phone/voicemail systems, mailing machines, and minimal computer programs.
• Little or no subject-matter knowledge is required, but the clerk uses his or her judgment in choosing the proper procedure for each task.

General Clerk II

This position requires familiarity with the terminology of the office unit. The General Clerk selects appropriate methods from a wide variety of procedures or makes simple adaptations and interpretations of a limited number of substantive guides and manuals. The clerical steps often vary in type or sequence, depending on the task. Recognized problems are referred to like others.

General Clerk III

This position uses some subject-matter knowledge and judgment to complete assignments consisting of numerous steps varying in nature and sequence. The General Clerk III selects from alternative methods and refers to problems not solvable by adapting or interpreting substantive guides, manuals, or procedures. Typical duties include:
• Assisting in a variety of administrative matters; maintaining a wide variety of financial or other records (stored both manually and electronically);
• Verifying statistical reports for accuracy and completeness; compiling information; and handling and adjusting complaints.

Order Clerk I

This position handles orders involving items that have readily identified uses and applications. The Order Clerk I may refer to a catalog, manufacturer's manual, or similar document to ensure that the proper item is supplied or to verify the price of the order.

Order Clerk II

This position handles orders that involve making judgments such as choosing which specific product or material from the establishment's product lines will satisfy the customer's needs or determining the price to be quoted when pricing involves more than merely referring to a price list or making some simple mathematical calculations.

PC Technician

• Perform a variety of tasks associated with the day-to-day operations and administration of IT systems within the Office of the United States Attorney. These duties include a wide range of information technology support to meet the USAO information needs using network hardware and software capabilities.
• Customer Support - Assists in the planning and delivery of customer support services at the point of computer user/specialist interface, including installation, configuration, troubleshooting, customer assistance, and/or training.
  o Provides IT customer service and support in troubleshooting, recovering, and resolving recurring software/hardware problems.
  o Provides user training and assistance on a variety of routine applications.
  o Provides a wide variety of technical support services to coordinate teleconferences and distance learning activities to effectively deliver legal training using electronic and/or telecommunications media.
  o Installs, configures, upgrades, and troubleshoots commonly used hardware and software systems within the organization.
• IT Systems/Network Administration: Performs duties related to the planning, analysis, design, development, testing, quality assurance, configuration, installation, implementation, integration, maintenance, and/or management of networked systems used for the transmission of information in voice, data, and/or video formats.
  o Assists in the configuration, installation, and maintenance of networked systems using knowledge of network standards and protocols, and knowledge of the capabilities and applications of network equipment including hubs, routers, switches, bridges, servers, and related hardware.
  o Properly maintains and controls assigned telecommunications systems using knowledge of transmission, broadcasting, switching, control, and operation of telecommunications systems.
  o Performs ongoing network monitoring and management. Performs diagnosis of recurring network problems and service interrupts.

Paralegal Specialist

• The Paralegal Specialist performs a variety of legal assistance duties in an office providing legal assistance to attorneys or litigation teams. The Paralegal Specialist analyzes the legal impact of legislative developments and administrative and judicial decisions, opinions, determinations, and rulings, researches the preparation of legal opinions on matters of interest; performs substantive legal analysis of requests for information under the provisions of various acts; or other similar legal support functions which require discretion and independent judgment in the application of specialized knowledge of laws, precedent decisions, regulations, agency policies, and judicial or administrative proceedings. Such knowledge is less than that represented by graduation from recognized law school and may have been gained from formalized, professionally instructed agency, educational institution training, or from professionally supervised on-the-job training. While the paramount knowledge requirements of this occupational class are legal, some positions may also require a practical knowledge of subject matter areas related to the agency's substantive programs.
  The paralegal will perform extensive legal research and writing to assist the Assistant United States Attorney (AUSA) s with the preparation of pleadings, briefs, and responses to be filed in the United States District Court and the United States Court of Appeals for the Sixth Circuit. The subject matter of work is primarily (but not exclusively) related to post-conviction and appellate matters filed under 18 §§ U.S.C. 2255 and 3582, involving criminal defendants who seek to modify or vacate their sentences based on recent developments in the law.
• Develop and maintain an understanding of applicable law and Departmental policy to prepare accurate draft pleadings, briefs, and responses for AUSAs.
• Review files, conduct research, and prepare draft pleadings, briefs, and responses for review by AUSAs.
• Assist the Appellate Chief in preparing guidance and giving advice to AUSAs concerning developments in the law and Department of justice policy.
• Assist the Appellate Chief and AUSA Supervisors in the review of pleadings prepared by AUSAs to ensure accuracy and uniformity.

Personnel Assistant I

This position performs a variety of tasks including, but not limited to, clerical and secretarial duties. The work is under the general supervision of higher-level personnel in preparation of various human resource tasks throughout compensation, benefits, staffing/employment, EEO procedures, and policy administration.
  • Exercise discretion at all times; limited judgment may be necessary at times. This assistant may be required to operate general office equipment such as a typewriter, personal computer, copier, adding machine, and facsimile.

Personnel Assistant II

This position serves as a clerical expert in independently processing the most complicated types of personnel actions, e.g., temporary employment, rehires, and dismissals.
• In this position, one may perform tasks beyond routine clerical such as pre-employment drug screening and new hire orientation, responding to routine questions on policy and procedures, and/or provide reports on employee turnover or time and attendance.

• This assistant may be asked to evaluate and consolidate information from various sources under short deadlines, such as internal or external survey information, reporting on company employment statistics (retention, equal opportunity reporting, etc.).

• The Personnel Assistant II may guide to lower level Personnel Assistants. This level requires extensive knowledge of various office software packages. Guidance is provided as needed. Completed written work receives a close technical review from higher-level personnel office employees. Work may be checked occasionally.

**Personnel Assistant III**

This position performs work in support of human resource professionals that require a good working knowledge of personnel procedures, guides, and precedents.

- Job tasks may include interviewing applicants, obtaining references, and recommending placement in a well-defined occupation.
- At this level, assistants typically have a range of personal contacts within and outside the organization, in addition to handling employee-sensitive material. Therefore, the Assistant must be tactful, discrete, and articulate.
- This Assistant may be involved in identifying potential issues and grievance procedures, in addition to documenting necessary information to avoid company threats.
- The Personnel Assistant III may make recommendations to human resource professionals on job classification, wage rates, and employee salaries. The use of computers may be relied on heavily for organizational and reporting purposes. Advanced experience with office software packages may be needed.
- This Assistant may perform some clerical work in addition to the above duties. The supervisor will review the completed work against the stated objectives.

**Production Control Clerk**

- Compiles and records production data for industrial establishments to compare records and reports on volume of productions, consumption of material, quality control, and other aspects of production, performing any combination of the following duties: Compiles and records production data from such documents as customer orders, work, tickets, product specifications, and individual worker production sheets, following prescribed recording procedures and using the typewriter and other devices.
- Calculates such factors as types and quantities of items produced, materials used, amount of scrap, frequency of defects, and worker and department production rates, using adding machine or calculator.
- Writes production reports based on data compiled, tabulated, and computed, following prescribed formats.
- Maintains files of documents used and prepared.
- Compiles from customer orders and other specifications detailed production sheets or work schedules based on established guidelines and priorities.
- Compiles material inventory records and prepares requisitions for procurement of materials and supplies.
- Charts production, using the chart, graph, spreadsheet, or pegboard, based on statistics compiled for reference by production and management personnel. Sorts and distributes work tickets or material to workers. May compute wages from employee time cards and post wage data on records used for the preparation of payroll.

**Rental Clerk**

- Performs clerical duties concerned with rental and management of public housing projects.
• Answers telephone and respond to requests for maintenance, complaints, and rental information or, as appropriate, forwards calls to senior officials.
• Receives rental payments and other income, assesses late charges, applies cancellation stamp required by government housing agency, writes receipts, and prepares rental transmittal forms and collection logs for the government accounting system.
• Receives security deposits and prepares tenant receipts. Prepares bank deposits. Maintains tenant files. Follows up on income recertification.

Secretary I

This position carries out recurring office procedures independently and selects the guideline or reference that fits the specific case. The supervisor provides specific instructions on new assignments and checks completed work for accuracy. The Secretary I perform varied duties including or comparable to the following:
• Respond to routine telephone requests that have standard answers; refer calls and visitors to appropriate staff.
• Control mail and assure timely staff response, and send Forms and letters
• As instructed, maintain the supervisor's calendar, make appointments, and arrange for meeting rooms.
• Review materials prepared for supervisor's approval for typographical accuracy and proper format
• Maintain recurring internal reports, such as time and leave records, office equipment listings, correspondence controls, and training plans.
• Requisition supplies, printing, maintenance, or other services, type, take and transcribe dictation, create and maintain office files.

Secretary II

This person handles differing situations, problems, and deviations in the work of the office according to the supervisor's general instructions, priorities, duties, policies, and program goals. The supervisor may assist the secretary with special assignments. Duties include or are comparable to the following:
• Screen telephone calls, visitors, and incoming correspondence; personally, respond to requests for information concerning office procedures; determine which requests should be handled by the supervisor, appropriate staff member, or other offices, prepare and sign routine non-technical correspondence in own or supervisor's name.
• Schedule tentative appointments without prior clearance.
• Make arrangements for conferences and meetings and assemble established background materials as directed.
• May attend meetings and record and report on the proceedings.
• Review outgoing materials and correspondence for internal consistency and conformance with the supervisor's procedures.
• assure that proper clearances have been obtained, when needed.
• Collect information from the files or staff for routine inquiries on office program(s) or periodic reports and refer non-routine requests to supervisors or staff.
• Explain to subordinate staff supervisor's requirements concerning office procedures, coordinate personnel, and administrative forms for the office and forwards for processing.

Secretary III

This person uses greater judgment and initiative to determine the approach or action to take in non-routine situations, interprets and adapts guidelines, including unwritten policies, precedents, and practices, which are not always completely applicable to changing situations. Duties include or are comparable to the following:
• Based on the knowledge of the supervisor's views, compose correspondence on own initiative about administrative matters and general office policies for supervisor's approval.
Anticipate and prepare materials needed by the supervisor for conferences, correspondence, appointments, meetings, telephone calls, etc., and informs supervisor on matters to be considered.

Read publications, regulations, and directives and take action or refer those that are important to the supervisor and staff.

Prepare special or one-time reports, summaries, or replies to inquiries, selecting relevant information from a variety of sources such as reports, documents, correspondence, other offices, etc., under general directions.

Advise secretaries in subordinate offices on new procedures; request information needed from the subordinate office(s) for periodic or special conferences, reports, inquiries, etc., and shift clerical staff to accommodate workload needs.

Service Order Dispatcher

- Receives, records, and distributes work orders to service crews upon customers' requests for service on articles or utilities purchased from the wholesale or retail establishment or utility company.
- Records information, such as name, address, article to be repaired, or service to be rendered.
- Prepares work orders and distributes them to the service crew.
- Schedules service calls and dispatches service crew.
- Calls or writes customer to ensure satisfactory performance of service.
- Keeps records of service calls and work orders. May dispatch orders and relay messages and special instructions to mobile crews and other departments, using radiotelephone equipment.

Supply Technician

- This position performs limited aspects of technical supply management work (e.g., inventory management, storage management, cataloging, and property utilization) related to depot, local, or other supply activities. Work usually is segregated by 11 commodity area or function, and controlled in terms of difficulty, complexity, or responsibility.
- Assignments usually relate to stable or standardized segments of technical supply management operations; or to functions or subjects that are narrow in scope or limited in difficulty. The work generally involves individual case problems or supply actions.
- This work may require consideration of program requirements together with specific variations in or from standardized guidelines. Assignments require (a) good working knowledge of the governing supply systems, programs, policies, nomenclature, work methods, manuals, or other established guidelines; (b) an understanding of the needs of the organization serviced; and (c) analytical ability to define or recognize the dimension of the problems involved, to collect the necessary data to establish the facts, and take or recommend action based upon application or interpretation of established guidelines.

Switchboard Operator/Receptionist

This position greets visitors, determining the nature of visits, and directing visitors to appropriate persons.

- The Receptionist may also have other duties such as recording and transmitting messages; keeping records of calls placed; providing information to callers and visitors; making appointments; keeping a log of visitors; and issuing visitor passes.
- In this position, one may also work on a computer and perform other routine clerical work that may occupy a major portion of the worker's time.
Travel Clerk I

- Arranges travel on one and sometimes two modes of transportation under close supervision or following specific procedures and detailed instructions. Travel is almost always recurrent by the same modes, carriers, routes, and some major points of origin and destination, seldom involving special transportation privileges or requiring special allowances or planning for supplemental transportation facilities. When such services are required, they do not occur in such variety or with such frequency as to create problems of timing or coordination.

Travel Clerk II

- Involves the use of two or more modes of transportation. Information on carriers, modes, and facilities are readily available since most carriers servicing the area maintain local facilities or publish information regularly.
- Single carriers or connecting carriers have schedules that are easily coordinated through the use of readily obtainable timetables or guides. Travel is frequently recurrent. A substantial number of problems arise as a result of rerouting, and there are often side trips requiring changes in transportation. Travel is usually to areas accessible by direct line or established connecting points and normal modes of transportation.
- Travel is not always planned well in advance, so there may be major problems with scheduling or accommodations. Travel involves special transportation privileges or special allowances and requires authorization or planning for supplemental or special transportation facilities, and when such services are required, they usually do not occur in such variety or with such frequency as to create major problems of timing or coordination. Within general guidelines, employees select and apply appropriate travel guides, methods, techniques, and work sequences to effectively accomplish the work. The majority of assignments are performed without technical assistance, but unusually difficult travel situations or problem cases encountered during the work are referred to the supervisor before decision or commitment.
- Review of work is for compliance with regulatory guides and program policies and soundness of decisions and conclusions.

Travel Clerk III

- At this level, all major modes of transportation are used, and most individual trips involve combinations of more than one mode. Travel is varied, often not recurrent, and periodically requires planning for relatively inaccessible intermediate or destination points.
- Routings are diverse and there is a necessity for frequent rerouting, re-planning, or rearranging, with many side trips, requiring changes in modes of travel and creating substantial difficulty in routing and scheduling connections. A substantial amount of travel involves special allowances or requires authorization and planning for supplementary or special transportation facilities.
- It is frequently difficult to obtain the required information. The incumbent is characterized by independence of action, with very little instruction, guidance, and review, except for review of accomplishments of broad objectives and conformance to policy.
- The incumbent is viewed as the authority on travel matters, including the furnishing of advice and information to travelers, administrative officials, and others; and responsible as the principal point of liaison with other elements and with carriers and other facilities.

Word Processor I

This position produces a variety of standard documents, such as correspondence, form letters, reports, tables, and other printed materials. Work requires skill in typing; knowledge of grammar, punctuation, and spelling; and ability to use reference guides and equipment manuals.

The Word Processor I perform familiar, routine assignments following standard procedures, seeks further instructions for assignments requiring deviations from established procedures.
Word Processor II

This position uses knowledge of varied and advanced functions of one software type, knowledge of varied functions of different types of software, or knowledge of specialized or technical terminology to perform such typical duties as:

- Editing and reformatting written or electronic drafts. Examples include: correcting function codes; adjusting spacing formatting and standardizing headings, margins, and indentations.
- Transcribing scientific reports, lab analysis, legal proceedings, or similar material from voice tapes or handwritten drafts. Work requires knowledge of specialized, technical, or scientific terminology.

Work requires familiarity with office terminology and practices. Incumbent corrects copy, and questions originator of the document concerning missing information, improper formatting, or discrepancies in instructions.

The supervisor sets priorities and deadlines on continuing assignments, furnishes general instructions for recurring work, and provides specific instructions for new or unique projects, which may lead to lower-level word processors.

Word Processor III

Requires a comprehensive knowledge of word processing software applications. Office practices and a high degree of skill, in applying software functions to prepare complex and detailed documents.

For example, processes complex and lengthy technical reports which include tables, graphs, charts, or multiple columns. Uses either different word processing packages or many different style macros or special command functions; independently completes assignments and resolves problems.

Computer Operator I

The Computer Operator I work under the close personal supervision and is provided detailed written or oral guidance before and during assignments. As instructed, this worker resolves common operating problems and may serve as an assistant operator working under close supervision or performing a portion of a more senior operator's work.

Computer Operator II

The Computer Operator II processes scheduled routines that present few difficult operating problems (e.g., infrequent or easily resolved error conditions). In response to computer output instructions or error conditions, this worker applies standard operating or corrective procedure, refers to problems that do not respond to the preplanned procedure, and may serve as an assistant operator, working under general supervision.

Computer Operator III

The Computer Operator III processes a range of scheduled routines. In addition to operating the system and resolving common error conditions, this worker diagnoses and acts on machine stoppage and error conditions not fully covered by existing procedures and guidelines (e.g., resetting switches and other controls or making mechanical adjustments to maintain or restore equipment operations).

In response to computer output instructions or error conditions, the Computer Operator III may deviate from standard procedures if standard procedures do not provide a solution and refer problems that do not respond to corrective procedures to a person of supervisory or higher individual contributor level.
Computer Operator IV

The Computer Operator IV adapts to a variety of nonstandard problems that require extensive operator intervention (e.g. frequent introduction of new programs, applications, or procedures).

In response to computer output instructions or error conditions, this worker chooses or devises a course of action from among several alternatives and alters or deviates from standard procedures if standard procedures do not provide a solution (e.g. reassigning equipment to work around faulty equipment or transfer channels); then refers problems if necessary. Typically, completed work is submitted to users without a supervisory review.

Computer Operator V

The Computer Operator V resolves a variety of difficult operating problems (e.g. making unusual equipment connections and rarely used equipment and channel configurations to direct processing through or around problems in equipment, circuits, or channels or reviewing test run requirements and developing unusual system configurations that will allow test programs to process without interfering with ongoing job requirements).

In response to computer output instructions and error conditions or to avoid loss of information or to conserve computer time, the operator deviates from standard procedures. Such actions may materially alter the computer unit's production plans.

This operator may spend considerable time away from the control station providing technical assistance to lower level operators and assisting programmers, systems analysts, and subject matter specialists with the resolution of problems.

Computer Programmer I

Assists higher-level staff by performing elementary programming tasks which concern limited and simple data items and steps that closely follow patterns of previous work done in the organization, e.g. drawing flow charts, writing operator instructions, or coding and testing routines to accumulate counts, tallies, or summaries. This worker may perform routine programming assignments (as described in Level II) under close supervision.

In addition to assisting higher-level staff, the Computer Programmer I may perform elementary fact-finding concerning a specified work process, e.g., a file of clerical records which is treated as a unit (invoices, requisitions, or purchase orders, etc.) and then report findings to higher-level staff. May receive training in elementary fact-finding. Detailed step-by-step instructions are given for each task, and any deviation must be authorized by a supervisor. Work is closely monitored in progress and reviewed in detail upon completion.

Computer Programmer II

At this level, initial assignments are designed to develop competence in applying established programming procedures to routine problems. This Computer Programmer performs routine programming assignments that do not require skilled background experience but do require knowledge of established programming procedures and data processing requirements and works according to clear-cut and complete specifications. The data are refined, and the format of the final product is very similar to that of the input or is well defined when significantly different, i.e., there are few, if any, problems with interrelating varied records and outputs.

- The Computer Programmer II maintains and modifies routine programs, makes approved changes by amending program flow charts, developing detailed processing logic, and coding changes, tests and documents modifications.
and writes operator instructions, may write routine new programs using prescribed specifications, and may confer with EDP personnel to clarify procedures, processing logic, etc.

- Also, the Computer Programmer II may evaluate simple interrelationships in the immediate programming area and confers with user representatives to gain an understanding of the situation sufficient to formulate the needed change and implements the change upon approval of the supervisor or higher-level staff. The incumbent is provided with charts, narrative descriptions of the functions performed, an approved statement of the product desired (e.g., a change in a local establishment report), and the inputs, outputs, and record formats.

- This Worker reviews objectives and assignment details with higher-level staff to ensure thorough understanding; uses judgment in selecting among authorized procedures and seeks assistance when guidelines are inadequate, significant deviations are proposed, or when unanticipated problems arise. Work is usually monitored in progress, and all work is reviewed upon completion for accuracy and compliance with standards.

**Computer Programmer III**

As a fully qualified Computer Programmer, this Worker applies standard programming procedures and detailed knowledge of the pertinent subject matter in a programming area such as a record-keeping operation (supply, personnel, and payroll, inventory, purchasing, insurance payments, depositor accounts, etc.); a well-defined statistical or scientific problem; or other standardized operation or problem. The incumbent works according to approved statements of requirements and detailed specifications.

While the data are clear cut, related, and equally available, there may be substantial interrelationships of a variety of records, and several varied sequences of formats are usually produced. The programs developed or modified typically are linked to several other programs in that the output of one becomes the input for another. This Computer Programmer recognizes probable interactions of other related programs with the assigned program(s) and is familiar with related system software and computer equipment, and solves conventional programming problems. (In small organizations, may maintain programs that concern or combine several operations, i.e. users, or develop programs where there is one primary user and the others give input.)

- The Computer Programmer III performs such duties as developing, modifying, and maintaining assigned programs, designing and implementing modifications to the interrelation of files and records within programs in consultations with higher-level staff. This Worker monitors the operation of assigned programs and responds to problems by diagnosing and correcting errors in logic and coding; implements and/or maintains assigned portions of a scientific programming project, applying established scientific programming techniques to well-defined mathematical, statistical, engineering, or other scientific problems usually requiring the translation of mathematical notation into processing logic and code. (Scientific programming includes assignments such as: using predetermined physical laws expressed in mathematical terms to relate one set of data to another; the routine storage and retrieval of field test data, and using procedures for real-time command and control, scientific data reduction, signal processing, or similar areas.)

- This Programmer tests, documents work, writes and maintains operator instructions for assigned programs, and confers with other EDP personnel to obtain or provide factual data.

- In addition, this Programmer may carry out fact-finding and programming analysis of a single activity or routine problem, applying established procedures where the nature of the program, feasibility, computer equipment, and programming language have already been decided. Job tasks may require the incumbent to analyze the present performance of the program and take action to correct deficiencies based on discussion with the user and consultation with and approval of the supervisor or higher-level staff. This Programmer may assist in the review and analysis of detailed program specifications, and in program design to meet changes in work processes.

- The Computer Programmer III works independently under specified objectives; applies judgment in devising program logic and in selecting and adapting standard programming procedures, resolves problems and deviations according to established practices, and obtains advice where precedents are unclear or not available.
• This Worker may guide or instruct lower-level programmers; supervise technicians and others who assist in specific assignments, works on complex programs under the close direction of higher-level staff or supervisor, and may assist higher-level staff by independently performing moderately complex tasks assigned, and performing complex tasks under close supervision. Work at a level above this is deemed Supervisory or Individual Contributor. Completed work is reviewed for conformance to standards, timeliness, and efficiency.

**Computer Programmer IV**

The Computer Programmer IV applies expertise in programming procedures to complex programs; recommends the redesign of programs, investigates and analyzes feasibility and program requirements, and develops programming specifications. Assigned programs typically affect a broad multi-user computer system that meets the data processing needs of a broad area (e.g., manufacturing, logistics planning, finance management, human resources, or material management) or a computer system for a project in engineering, research, accounting, statistics, etc.

• This Programmer plans the full range of programming actions to produce several interrelated but different products from numerous and diverse data elements, which are usually from different sources; solves difficult programming problems, and uses knowledge of pertinent system software, computer equipment, work processes, regulations, and management practices.

• This Programmer performs such duties as developing, modifying, and maintains complex programs; designs and implements the interrelations of files and records within programs which will effectively fit into the overall design of the project; works with problems or concepts and develops programs for the solution to major scientific computational problems requiring the analysis and development of logical or mathematical descriptions of functions to be programmed; and develops occasional special programs, e.g., a critical path analysis program to assist in managing a special project. This Worker tests, documents, and writes operating instructions for all work and confers with other EDP personnel to secure information, investigate and resolve problems, and coordinates work efforts.

• Besides, this incumbent performs such programming analyses as investigating the feasibility of alternate program design approaches to determine the best-balanced solution, e.g., one that will best satisfy immediate user needs, facilitate the subsequent modification, and conserve resources. Duties include the following: assisting user personnel in defining problems or needs, determining work organization on typical maintenance projects and smaller scale, working on limited new projects, the necessary files and records, and their interrelation with the program or working on large or more complicated projects, and participating as a team member along with other EDP personnel and users, holding responsibility for a portion of the project.

• The Computer Programmer IV works independently under overall objectives and direction, apprising the supervisor about progress and unusual complications and modifying and adapting precedent solutions and proven approaches. Guidelines include constraints imposed by the related programs with which the incumbent's programs must mesh. Completed work is reviewed for timeliness, compatibility with other work, and effectiveness in meeting requirements. This Worker may function as a team leader or supervise a few lower-level programmers or technicians on assigned work.

**Computer Systems Analyst I**

At this level, initial assignments are designed to expand practical experience in applying systems analysis techniques and procedures.

• This Analyst provides several phases of the required systems analysis where the nature of the system is predetermined, uses established fact-finding approaches, knowledge of pertinent work processes and procedures, and familiarity with related computer programming practices, system software, and computer equipment.

• This Worker carries out fact-finding and analyses as assigned, (usually of a single activity or a routine problem); applies established procedures where the nature of the system, feasibility, computer equipment, and programming language have already been decided; may assist a higher level systems analyst by preparing the detailed specifications required by computer programmers from information developed by the higher-level analyst, and may
research routine user problems and solve them by modifying the existing system when the solutions follow clear precedents. When cost and deadline estimates are required, results receive a closer review.

- The supervisor defines the objectives, priorities, and deadlines. Incumbents work independently; adapt guides to specific situations; resolve problems and deviations according to established practices, and obtain advice where precedents are unclear or not available. Completed work is reviewed for conformance to requirements, timeliness, and efficiency.

This position may supervise technicians and others who assist in specific assignments. Work at a level above this is deemed Supervisory or Individual Contributor.

**Computer Systems Analyst II**

This Analyst applies systems analysis and design skills in an area such as a record-keeping or scientific operation. A system of several varied sequences of formats is usually developed, e.g. the analyst develops systems for maintaining depositor accounts in a bank, maintaining accounts receivable in a retail establishment, maintaining inventory accounts in a manufacturing or wholesale establishment, or processing a limited problem in a scientific project. This position requires competence in most phases of system analysis and knowledge of pertinent system software and computer equipment and the work processes, applicable regulations, workload, and practices of the assigned subject-matter area. Job duties require the incumbent to be able to recognize probable interactions of related computer systems and predict the impact of a change in the assigned system.

- The Computer Systems Analyst II reviews proposals which consist of objectives, scope, and user expectations; gathers facts, analyzes data, and prepares a project synopsis which compares alternatives in terms of cost, time, availability of equipment and personnel, and recommends a course of action; upon approval of synopsis, prepares specifications for the development of computer programs. Duties also include the ability to determine and resolve data processing problems and coordinate the work with programs, users, etc. This worker orients user personnel on new or changed procedures may conduct special projects such as data element and code standardization throughout a broad system, working under specific objectives and bringing to the attention of the supervisor any unusual problems or controversies.

- In this position, the incumbent works independently under overall project objectives and requirements and apprises the supervisor about progress and unusual complications. Guidelines usually include existing systems and the constraints imposed by related systems with which the incumbent's work must mesh. This worker adapts design approaches successfully used in precedent systems, works on a segment of a complex data processing scheme or broad system, as described for Computer Systems Analyst, level III works independently on routine assignments, and receives instructions and guidance on complex assignments. Work is reviewed for accuracy of judgment, compliance with instructions, and to ensure proper alignment with the overall system. Completed work is reviewed for timeliness, compatibility with other work, and effectiveness in meeting requirements. This analyst may provide functional direction to lower-level assistants on assigned work.

**Computer Systems Analyst III**

The Computer Systems Analyst III applies systems analysis and design techniques to complex computer systems in a broad area such as manufacturing, finance management, engineering, accounting, or statistics, logistics planning, material management, etc. Usually, there are multiple users of the system; however, there may be complex one-user systems, e.g., for engineering or research projects.

This position requires competence in all phases of systems analysis techniques, concepts, and methods and knowledge of available system software, computer equipment, and the regulations, structure, techniques, and management practices of one or more subject-matter areas. Since input data usually come from diverse sources, this worker is responsible for
recognizing probable conflicts and integrating diverse data elements and sources and produces innovative solutions for a variety of complex problems.

- The Computer Systems Analyst III maintains and modifies complex systems or develops new subsystems such as an integrated production scheduling, inventory control, cost analysis, or sales analysis record in which every item of each type is automatically processed through the full system of records. The incumbent guides users in formulating requirements, advise on alternatives and the implications of new or revised data processing systems, analyzes resulting user project proposals, identifies omissions and errors in requirements, and conducts feasibility studies.
- This analyst recommends an optimum approach and develops system design for approved projects, interprets information, and informally arbitrates between system users when conflicts exist. This worker may serve as lead analyst in a design subgroup, directing and integrating the work of one or two lower-level analysts, each responsible for several programs. Supervision and nature of review are similar to level II; existing systems provide precedents for the operation of new subsystems.

**Peripheral Equipment Operator**

The Peripheral Equipment Operator operates peripheral equipment that directly supports digital computer operations. Such equipment is uniquely and specifically designed for computer applications but need not be physically or electronically connected to a computer. Printers, plotters, tape readers, tape units or drives, disk units or drives, and data display units are examples of such equipment. The following duties characterize the work of a Peripheral Equipment Operator:

- Loads printers and plotters with correct paper; adjusting controls for forms, thickness, tension, printing density, and location; and unloading hard copy;
- Labels tape reels, or disks;
- Checks labels and mounting and dismounting designated tape reels or disks on specified units or drives;
- Sets controls which regulate the operation of the equipment;
- Observes panel lights for warnings and error indications and taking appropriate action;
- Examines tapes, cards, or other material for creases, tears, or other defects that could cause processing problems.

Excludes workers who monitor and operate a control console or a remote terminal, or whose duties are limited to operating decorators, busters, separators, or similar equipment.

**Personal Computer Support Technician**

The Personal Computer Support Technician provides support to distributed PC/networking environment including installation, testing, repair, and troubleshooting for stand-alone PCs, PCs linked to networks, printers, and other computer peripherals. Support responsibilities include software installation and configurations.

- This technician performs technical, operational, and training support to users of personal computers either by telephone or on-site for PC desktop hardware and software packages.
- Job duties require the technician to install and test personal computers, printers, and other peripherals, configure operating systems, load shrink-wrap programs, and other application software programs.
- In this position, the incumbent troubleshoots computer problems, performs hardware and software diagnostics, coordinates needed repairs, resolves computer system problems, including coordination between users and components of a local area network, and participates in the evaluation of system configuration and software.

**System Support Specialist**

- Resolves a variety of difficult operating problems (e.g., making unusual equipment connections and rarely used equipment and channel configurations to direct processing through or around problems in equipment, circuits, or channels or reviewing test run requirements and developing unusual system configurations that will allow test
programs to process without interfering with ongoing job requirements). In response to computer output instructions and error conditions or to avoid loss of information or to conserve computer time, the operator deviates from standard procedures. Such actions may materially alter the computer unit's production plans. May spend considerable time away from the control station providing technical assistance to lower level operators and assisting programmers, systems analysts, and subject matter specialists in resolving problems

**Procurement Assistant I**

- Functions under the supervision of Contract/Acquisition Specialist performs or assists in the performance of some contract administration duties at an entry-level or clerical level.
- Office experience and experience in commercial and/or government contracting required

**Procurement Assistant II**

- Possess knowledge and demonstrated experience in the Procurement Specialist I category.
- Additionally, possesses more years of experience and progressively more responsibility and experience in supporting commercial and/or government contracting, including, but not limited to administration, disputes, project control, change negotiation, and analysis.

**Contract Specialist I**

- Functions in an entry-level/assistant capacity. Under the guidance of a Contract Specialist/Administrator V, carries out pre-determined and recurring tasks which are designed to provide broad, but limited exposure to the contract’s profession.
- Assignments may include but are not limited to general cradle to grave contract administration.
- Limited support functions may include acquisition planning, proposal solicitation preparation, market research/analysis, selection and administration of terms and conditions, negotiation, and preparation of contract modifications.
- Knowledge and exposure to different contract types. Some exposure to FAR and/or DFAR. Additionally, possesses more years of experience in contracts administrative duties to include additional exposure to limited cost/price analysis, evaluation of performance, contract termination, and contract closeout FAR and/or DFAR.

**Contract Specialist II**

- Possess knowledge and demonstrated experience in the Contracts Specialist I category
- Functions in mid-level capacity. Under the guidance of a Contract Specialist/Administrator V, carries out pre-determined and recurring contract administration duties.
- Functions may include acquisition planning, proposal solicitation preparation, SOW development, market research/analysis, selection and administration of terms and conditions, cost/price analysis, negotiation, preparation of contract modifications, evaluation of performance, contract termination, and contract closeout.
- Knowledge and exposure to different contract types. Knowledge of FAR and/or DFAR.

**Contract Specialist III**

- Possess knowledge and demonstrated experience in the Contracts Specialist II category and:
- Additionally, possesses more years of experience in contracts administrative duties, performs with limited or no supervision.
Contract Specialist IV

- Possess knowledge and demonstrated experience in the Contracts Specialist / Administrator III category and:
- Functions in a senior level/supervisory capacity. Carries out a pre-determined and recurring cradle to grave contract administration duties. Functions may include acquisition planning, proposal solicitation preparation, market research/analysis, selection and administration of terms and conditions, cost/price analysis, negotiation, preparation of contract modifications, evaluation of performance, contract termination, and contract closeout. Knowledge and exposure to cost reimbursement/cost-sharing contracts and review of claims and equitable adjustments.
- Provide guidance and direction to lower-level administrators.
- Have the ability to work independently. Ability to simultaneously manage, coordinate, and pursue multiple, complex projects and activities.
- Interface with corporate management and government officials. Has limited commitment authority.
- Extensive knowledge of the FAR and/or DFAR.

Contract Specialist V

- Possess knowledge and demonstrated experience in the Contracts Specialist IV category and:
- Functions in supervisory level capacity. Carries out tasks that may include acquisition strategy, analysis, and development of an A-76 Procurement, termination for convenience/default, and review of bid protests
- Experience setting performance standards and guide lower-level administrators.
- Has the ability to independently complete difficult and complex assignments, simultaneously manage, coordinate and pursue multiple, complex projects and activities.
- Interface with senior corporate management and government officials.
- Mastery of procurement regulation and contracting principles. Mastery of negotiation techniques to serve as an advisor during pre-negotiation strategy development.

Subject Matter Expert Level I

- Services may include providing expert advice, assistance, guidance, or counseling in support of agencies' mission-oriented business functions. This may include studies, analyses, and reports documenting any proposed developmental, consultative, or implementation efforts. Examples of consultation include but are not limited to: strategic, business and action planning; high-performance work; process and productivity improvement; systems alignment; leadership systems; organizational assessments; cycle time; performance measures and indicators; program audits, evaluations, and customized training.
- Enforces and maintains performance standards. Has the ability to work independently on difficult and complex assignments. Ability to simultaneously manage, coordinate, and pursue multiple, complex projects and activities. Interface with corporate management and government officials.

Subject Matter Expert Level II

- Services may include providing expert advice, assistance, guidance, or counseling in support of agencies' mission-oriented business functions. This may include studies, analyses, and reports documenting any proposed developmental, consultative, or implementation efforts. Examples of consultation include but are not limited to: strategic, business and action planning; high-performance work; process and productivity improvement; systems alignment; leadership systems; organizational assessments; cycle time; performance measures and indicators; program audits, evaluations, and customized training.
- Enforces and maintains performance standards. Has the ability to work independently on difficult and complex assignments. Ability to simultaneously manage, coordinate, and pursue multiple, complex projects and activities. Interface with corporate management and government officials.
Subject Matter Expert Level III

- Services may include providing expert advice, assistance, guidance, or counseling in support of agencies' mission-oriented business functions. This may include studies, analyses, and reports documenting any proposed developmental, consultative, or implementation efforts. Examples of consultation include but are not limited to: strategic, business and action planning; high-performance work; process and productivity improvement; systems alignment; leadership systems; organizational assessments; cycle time; performance measures and indicators; program audits, evaluations, and customized training.
- Enforces and maintains performance standards. Has the ability to work independently on difficult and complex assignments. Ability to simultaneously manage, coordinate, and pursue multiple, complex projects and activities. Interface with corporate management and government officials.

Technical Writer I

The Technical Writer I revise or writes standardized material for reports, manuals, briefs, proposals, instruction books, catalogs, and related technical and administrative publications concerned with work methods and procedures, and installation, operation, and maintenance of machinery and other equipment.

- This worker receives technical direction from supervisor or senior writer, notes or manuals containing operating procedures and details manufacturer's catalogs, drawings, and other data relative to operation, maintenance, and service of equipment.
- This writer may have access to blueprints, sketches, drawings, parts lists, specifications, mockups, and product samples to integrate and delineate technology, operating procedure, and production sequence and detail.
- This worker organizes material and completes writing assignment according to set standards regarding order, clarity, conciseness, style, and terminology, may maintain records and files of work and revisions, select photographs, drawings, sketches, diagrams, and charts to illustrate the material, assist in laying out material for publication arrange for typing, duplication, and distribution of material; may assist in writing speeches, articles, and public or employee relations releases, and may specialize in writing material regarding work methods and procedures.

Technical Writer II

- Superior writing and editing skills with the ability to digest large amounts of information into a clear, concise format needed for technical and training documentation.
- Excellent working understanding of software technology.
- Excellent analytical, problem-solving, and project management skills with the ability to interpret technical information and independently develop technical/operational knowledge of Bowman Systems technologies.
- Strong creative skills, excellent verbal and interpersonal communication skills for effective interaction with both technical and non-technical individuals.
- Knowledge of instructional design process and adult learning principles, or equivalent relevant experience. Proficient with the Microsoft Office Suite of products. Organized, goal-oriented, motivated self-starter who can work well in a team environment.

Technical Writer III

- Gathers, analyzes, translates and composes technical information into clear, readable documents to be used by technical and non-technical personnel.
- Composes technical documents including, user manuals, training materials, installation guides, proposals, and reports.
- Edits functional descriptions, system specifications, user manuals, special reports, or any other customer deliverables and documents.
Conducts research and ensures the use of proper technical terminology.

**Paralegal (Occupational Base)**

The Paralegal performs a variety of legal assistance duties in an office providing legal assistance to attorneys or litigation teams.

- Analyzes the legal impact of legislative developments and administrative and judicial decisions, opinions, determinations, and rulings, researches the preparation of legal opinions on matters of interest;
- Performs substantive legal analysis of requests for information under the provisions of various acts; or other similar legal support functions that require discretion and independent judgment in the application of specialized knowledge of laws, precedent decisions, regulations, agency policies, and judicial or administrative proceedings. Such knowledge is less than that represented by graduation from a recognized law school and may have been gained from formalized, professionally instructed agency, educational institution training, or from professionally supervised on-the-job training. While the paramount knowledge requirements of this occupational class are legal, some positions may also require a practical knowledge of subject matter areas related to the agency's substantive programs.

**Paralegal/Legal Assistant I**

The Paralegal/Legal Assistant I; works under close supervision with required assistance readily available. Persons in this position typically perform the following:

- Consults prescribed sources of information for facts relating to matters of interest to the program
- Reviews documents to extract selected data and information relating to specific items
- Reviews and summarizes information in the prescribed format on case precedent and decisions
- Searches and extracts legal references in libraries and computer-data banks
- Attends hearings or court appearances to become informed on administrative and/or court procedures and the status of cases, and where necessary, assist in the presentation of charts and other visual information

**Paralegal/Legal Assistant II**

- Reviews case materials to become familiar with questions under consideration
- Searches for and summarizes relevant articles in trade magazines, law reviews published studies, financial reports, and similar materials for use of attorneys in the preparation of opinions, briefs, and other legal documents
- Prepares digests of selected decisions or opinions which incorporate legal references and analyses of precedents involved in areas of well-defined and settled points of law
- Interviews potential witnesses and prepares summary interview reports for the attorney's review
- Participates in pre-trial witness conferences, notes possible deficiencies in case materials (e.g., missing documents, conflicting statements) and additional issues or other questionable matters, and requests further investigation by other agency personnel to correct possible deficiencies or personally conducts limited investigations at the pre-trial stage
- Prepares and organizes trial exhibits, as required, such as statistical charts and photographic exhibits
- Verifies citations and legal references on prepared legal documents
- Prepares summaries of testimony and depositions
- Drafts and edits non-legal memoranda, research reports, and correspondence relating to
**Paralegal/Legal Assistant III**

- Participates in the substantiate development of cases by performing the following functions:
  - Analyzes and evaluates case files against litigation worthiness standards; Notes and corrects case file deficiencies (e.g., missing documents, inconsistent material, leads not investigated) before sending the case on to the concerned trial attorney
  - Reviews and analyzes available precedents relevant to cases under consideration for use in presenting case summaries to trial attorneys;
  - Participates in the substantiate development of cases by performing the following functions:

• When necessary, obtains information, confers, and coordinates with the Civil Rights Division and other Department of Justice components.
• In the direction of civil rights AUSA’s, plans and conducts necessary background legal research.
• Prepares factual summary and evaluation based on investigations, in conjunction with civil rights AUSA’s, develops recommendations as to the action that may be justified against particular jurisdictions or agencies.
• Performs other related duties as assigned.

**Paralegal Specialist**

• The Paralegal Specialist performs a variety of legal assistance duties in an office providing legal assistance to attorneys or litigation teams. The Paralegal Specialist analyzes the legal impact of legislative developments and administrative and judicial decisions, opinions, determinations, and rulings, researches the preparation of legal opinions on matters of interest; performs substantive legal analysis of requests for information under the provisions of various acts; or other similar legal support functions which require discretion and independent judgment in the application of specialized knowledge of laws, precedent decisions, regulations, agency policies, and judicial or administrative proceedings. Such knowledge is less than that represented by graduation from recognized law school and may have been gained from formalized, professionally instructed agency, educational institution training, or from professionally supervised on-the-job training. While the paramount knowledge requirements of this occupational class are legal, some positions may also require a practical knowledge of subject matter areas related to the agency's substantive programs.
• The paralegal will perform extensive legal research and writing to assist the Assistant United States Attorney (AUSA) s with the preparation of pleadings, briefs, and responses to be filed in the United States District Court and the United States Court of Appeals for the Sixth Circuit. The subject matter of work is primarily (but not exclusively) related to post-conviction and appellate matters filed under 18 §§ U.S.C. 2255 and 3582, involving criminal defendants who seek to modify or vacate their sentences based on recent developments in the law.
• Develop and maintain an understanding of applicable law and Departmental policy to prepare accurate draft pleadings, briefs, and responses for AUSAs.
• Review files, conduct research, and prepare draft pleadings, briefs, and responses for review by AUSAs.
• Assist the Appellate Chief in preparing guidance and giving advice to AUSAs concerning developments in the law and Department of justice policy.
• Assist the Appellate Chief and AUSA Supervisors in the review of pleadings prepared by AUSAs to ensure accuracy and uniformity.
Financial Analyst

- Plan and conduct complex financial analyses of individual, partnership, and corporate judgment debtors. Analyses may include financial and expense performance, the rate of return, depreciation, working capital, and investments.
- Perform detailed review of relevant financial information, including financial statements, credit reports, tax returns, insurance information, real property escrow, and lending materials, bank statements, and loan applications to third parties, to determine the collectability of assets. Prepare forecasts and analysis of trends in manufacturing, sales, finance, general business conditions, and other related areas.
- Create and analyze monthly, quarterly, and annual reports and ensure financial information has been recorded accurately.
- Perform financial forecasting and reconciliation of internal accounts.
- Prepare detailed reports of financial analysis, making clear conclusions regarding the collectability of debts. Reports should give particular emphasis to assets readily available to pay judgments, assets that could be recovered under the Federal Debt Collection Procedures Act, and recommendations regarding further investigatory work.
- Identify trends and developments in competitive environments and presents findings.
- Draft written discovery (interrogatories, requests for production of documents, and subpoenas) to obtain information to support financial analyses. Sources of discovery include the defendant, the defendant’s family members, defendant’s businesses, banks, brokerages, title insurers, and lenders.
- Obtain and meaningfully evaluate the results of computerized database searches, public record information, judgment and lien information, Secretary of State records, and publicly filed financial information available from entities such as the Securities and Exchange Commission.
- May conduct special financial and business-related studies and cooperates with other departments in the preparation of analyses.

PC Technician

- Perform a variety of tasks associated with the day-to-day operations and administration of IT systems within the Office of the United States Attorney. These duties include a wide range of information technology support to meet the USAO information needs using network hardware and software capabilities.
- Customer Support - Assists in the planning and delivery of customer support services at the point of computer user/specialist interface, including installation, configuration, troubleshooting, customer assistance, and/or training.
  - Provides IT customer service and support in troubleshooting, recovering, and resolving recurring software/hardware problems.
  - Provides user training and assistance on a variety of routine applications.
  - Provides a wide variety of technical support services to coordinate teleconferences and distance learning activities to effectively deliver legal training using electronic and/or telecommunications media.
  - Installs, configures, upgrades, and troubleshoots commonly used hardware and software systems within the organization.
- IT Systems/Network Administration: Performs duties related to the planning, analysis, design, development, testing, quality assurance, configuration, installation, implementation, integration, maintenance, and/or management of networked systems used for the transmission of information in voice, data, and/or video formats.
  - Assists in the configuration, installation, and maintenance of networked systems using knowledge of network standards and protocols, and knowledge of the capabilities and applications of network equipment including hubs, routers, switches, bridges, servers, and related hardware.
  - Properly maintains and controls assigned telecommunications systems using knowledge of transmission, broadcasting, switching, control, and operation of telecommunications systems.
  - Performs ongoing network monitoring and management. Performs diagnosis of recurring network problems and service interrupts.
  - Distributes and installs new or upgraded software to ensure customers receive current versions of supported software.
o Follows established procedures for data recovery and preservation of electronic evidence when unauthorized operations have occurred, to include reporting procedures.
  o Assists customers and clients in identifying and describing IT requirements for business and legal applications.
  o Installs routine updates and patches to existing programs. Maintains operating systems components based on knowledge of the organization’s operational environment.

- **Information Systems Security**: Performs assignments related to ensuring the confidentiality, integrity, and availability of systems, networks, and data through the planning, analysis, development, implementation, maintenance, and enhancement of systems, programs, policies, procedures, and tools.
  o Uses knowledge of information systems security principles and methods to participate in the testing and implementation of the district’s information security program.
  o Monitors compliance and maintains assigned information systems security procedures following internal, agency, and Federal information security regulations and policies.
  o Applies knowledge of the capabilities of commercial information systems security products, including firewalls and intrusion detection software in use by the organization in providing network support services.

- **Internet**: Performs routine assignments and segments of projects related to technical planning, design, development, testing, implementation, and management of the internet, intranet, and extranet activities, including systems/applications development and technical management of Web sites.
  o Converts user-developed content into workable Web pages using standard graphics mark-up languages, such as hypertext markup language (HTML) or extensible markup language (XML). Uses a variety of formats to deliver content using the internet, including graphics and multimedia.
  o Performs assigned segments of the district’s content management plan. Creates basic scripts or code using general knowledge of programming languages and tools. Evaluates code, responds to customer comments regarding broken links/files, and repairs errors. Carries out server maintenance functions using basic Internet server maintenance techniques.
  o Evaluates accessibility and recommends potential solutions to ensure compliance with ADA Section 508.

- Performs other related duties as assigned.

**SharePoint Developer**

- Ability to convert business requirements into technical solutions using the appropriate and applicable SharePoint web part(s) using a combination of workflows and web development technologies.
- Work as a SharePoint developer, web developer, and SharePoint strategist and maintain responsibility for supporting the need of various business groups and driving enduring results back to clients.
- Develop, enhance, test, support, maintain, and debugs software applications and interfaces that support business units. Support the development of technical solution documentation and training.
- Design, maintain, improve, integrate, and develop online SharePoint solutions using the latest version, including internal and/or external web sites. Plan, lead and execute SharePoint and other .Net web development tasks.
- Work with end-users to develop and modify SharePoint sites. Capture requirements, develop site content framework, and SharePoint web parts. Train end-users and update SharePoint tools and objects in response to evolving user needs.
- Work independently to identify and execute maintenance and upgrade activities for assigned SharePoint sites.
- Develop solutions to urgent business problems, leveraging existing tools and services wherever possible and otherwise building them as custom applications.
- Ability to leverage expertise in time management to complete assignments independently and effectively.
- Work on creating a new interface for and support the current Interface for SharePoint sites that provides information from various applications, (create or leverage APIs) wherever possible.
- Ability to estimate work and meet deadlines
- Strong written and oral communications skills
- Database design and data management
