***“In today’s federal agencies, personnel shortages and mission requirements dictate a need for service provider “augmentation” to meet client and customer specific needs.”***

***“Federal end users can now benefit from having Oshkosh on the GSA schedule by having the first U.S. manufacturer of tactical defense vehicles to become ISO 9001:2000 certified, available when they need it.”***

***“Oshkosh Corporation is known for its unprecedented logistics and service support, on-line parts ordering and integrated electronic data manuals.”***

Oshkosh Corporation not only provides Trucks, but the service, parts, and support to keep them top condition. Oshkosh trucks are the most reliable, best-performing trucks in the world. Not surprisingly, Oshkosh Corporation also provides the best, most trusted maintenance services for our trucks or others.

Oshkosh Corporation’s maintenance and services are based on critical customer needs and forecasted mission and personnel requirements and shortages. Oshkosh Corporation provides its customer as an “augmentation” force, for maintenance and service, rather than a “replacement” force.

OSK is offering Fleet maintenance and repair service under this proposal which will assist Federal agencies with their Supply and Value Chain Management Services tasks (SIN 874-501) and their Fleet Operation and Maintenance tasks (SIN 874-503).

## Oshkosh Shop Maintenance Services

Oshkosh Corporation (OSK) provides all the assets and equipment responsible for conduct of service when contracted. OSK provides highly qualified and OEM trained personnel who are equipped with requisite manuals, specialized training, and equipment to perform all facets of equipment service and repair. All special tooling and equipment required to perform work is provided by the OSK at no additional cost to the government and any tooling not available to perform a specific task will be purchased and the cost absorbed by OSK. Specific Test, Measure, and Diagnostic Equipment (TMDE) that is required in performance of service work and specific sub-system tests, such as the material handling crane load test weights or engine diagnostic tools such as the Kent-Moore Pro-Link, are provided by OSK. All hazardous materials handling, disposal, and bulk petroleum product storage requirements are removed from the customer and become the burden of OSK. OSK offers two levels of service:

1. **OSK site:** Repairs and routine maintenance are performed at OSK Service Centers throughout the country in accordance with the Original Equipment Manufacturer (OEM) applicable technical manuals. This hourly shop rate includes the use of the facility and OEM trained personnel. The personnel that perform the service work generally have a minimum level of training upon entry to the work force including diesel training courses. This training continues through many diverse in-house courses that continue to develop mechanical proficiency. This rate does not include repair parts, disposal fees, consumables, petroleum products or any other incidentals.
2. **Customer Site or Road Repair:** Repairs and routine maintenance are performed at Customer sites or Road Repair throughout the country in accordance with the Original Equipment Manufacturer (OEM) applicable technical manuals. The truck mechanics that perform the service work generally have a minimum level of training upon entry to the work force including diesel training courses. This training continues through many diverse in-house courses that continue to develop mechanical proficiency. This rate includes the use of the service truck and OEM trained personnel. This rate does not include repair parts, disposal fees, consumables, petroleum products or any other incidentals.

Services to be performed under SIN 874-501 and 874-503.

Service	Hourly Rate
