SENIOR ENVIRONMENTAL ENGINEER

Responsibilities: Provide technical analysis on California regulatory issues, particularly on Title 22, Title 23 and Aboveground Petroleum Storage Act (APSA) projects. Consulting services for Spill Prevention Control and Countermeasure (SPCC) Plans and Steel Tank Institute Inspections and Guidelines. Provide environmental related studies, assessments, and consultations. Studies and consultations include, but are not limited to, compliance studies, leak detection, secondary containment, overfill protection, coating and linings, corrosion, tank and pipeline inspections, repairs, hazardous waste analysis and material compatibility, material and equipment evaluations, wastewater studies, and system modifications. Provide technical analysis on pipeline and tank inspection, testing, and integrity. Coordinate work of other technical experts and resources such as corrosion, seismic, engineering, geological and construction disciplines. Provide on-site consultation for technical work. Prepare technical reports and environmental studies to document each project. Communicate daily with clients.

Minimum Experience: Ten years of experience and training in environmental consulting, hazardous waste management, and the proper installation of hazardous waste tank systems and components. Demonstrated knowledge of California Regulations for Air, Wastewater, and Hazardous and Mixed Waste. Ten years of experience with California Title 22 and 23 Regulations for above ground and underground storage tanks. Previous work with Department of Toxic Substances Control and County Regulators. Experience in the design and construction of steel, HDPE, fiberglass and plastic tanks, pipelines, and auxiliary equipment for the accumulation and treatment of hazardous waste, including on-site construction.
management. Demonstrated knowledge of overfill protection, instrumentation, permitting, leak detection and corrosion protection. Experience in the documentation and preparation of technical environmental reports, assessments, and evaluations. Excellent personal and communication skills and ability to work well with regulators and clients.

**Minimum Education and Registrations:** Requires a BS in engineering and a registration as a Professional Engineer in California. Hazardous Waste Management Certification. 40 Hour OSHA HAZWOPR Training. Steel Tank Institute Certified Inspector Required.
ENVIRONMENTAL PROJECT MANAGER
Responsibilities: Manage environmental projects and programs including construction and repair projects and modifications to bring facilities into compliance with environmental regulations. Prepare scope or statement of work and cost estimates, evaluate bids and contractors, specify materials, and provide on-site management for environmental projects. Environmental projects include, but are not limited to, Title 22 and Title 23 compliance for above and underground storage tanks and hazardous waste and wastewater facility compliance. Evaluate environmental issues as they occur and provide assessments and cost-effective solutions. Coordinate work with other technical disciplines and environmental regulators. Facilitate all work while facilities are operating 24/7 to provide service to customers. Manage schedules and costs for projects. Manage environmental programs. Interface with operators, client, other personnel, various contractors and regulators. Provide daily progress reports and documentation. Assist in preparation of environmental studies, assessments, and reports.

Minimum Experience: Ten years of experience in environmental project management including experience in budgeting, scheduling and technical on-site management of environmental projects. Demonstrated knowledge of California Regulations for Air, Wastewater, and Hazardous and Mixed Waste. Ten years of experience in working with regulators on environmental compliance projects particularly with hazardous waste and wastewater. Demonstrated knowledge of overfill protection, instrumentation, primary and secondary containment, permitting, leak detection and corrosion protection. Strong interpersonal skills, as well as previous responsibilities, that demonstrate ability to communicate well with on-site personnel, regulators, various contractors, and environmental regulators.
Minimum Education and Registration: Requires a BS in engineering. 40 Hour OSHA HAZWOPR Training Required.
