Munters Moisture Control Services – MCS Division

The Munters MCS Division offers services for water and fire damage restoration. Leveraging joint concepts, work methods and technical aids are important success factors within MCS. The division offers a broad range of services for evaluation, inspection and restoration, primarily for limiting water damage, and elimination of odors to customers. Munters competitive advantages include high availability and modern technology that enable faster and more cost-effective restoration.

Water Damage Recovery

When you use Munters after water damage, you limit your loss, recover faster and prevent long-term problems, such as mold growth or structural deterioration. Munters founded the water damage drying business in North America over two decades ago as specialists in the emerging field of water damage drying. Since then, using desiccant drying technology, we have successfully dried more than 30,000 water damage environments. Munters has proven time and time again that drying, instead of replacing, water damaged interiors can cut recovery costs up to 70%, while reducing business interruption significantly. Today, Munters is the most experienced water damage recovery company in the world.

Fire and Smoke Damage Recovery

When you call Munters after fire damage, you get a coordinated effort to control your loss and minimize your recovery costs. The professionals at Munters quickly assess fire damage problems, integrate all necessary services and quickly bring the required staff and equipment to the job site. With Munters on the job, there is no time wasted, and no confusion resulting from multiple companies unwilling or unprepared to cooperate.

Document Recovery

Call Munters when books, documents, files, medical records, electronic media, audio/visual materials, x-rays and legal records are water, fire and smoke damaged. Each year, Munters saves more than 1 million documents and we have the expertise and equipment to evaluate and cost-effectively recover your information loss.

Service Contract Act

The Service Contract Act (SCA) is applicable to this contract. This contract includes SCA applicable labor categories. The prices for the indicated SCA applicable labor categories are ceiling rates based on the US Department of Labor Wage Determination identified below. Should Munters perform in an area with lower SCA rates, resulting in lower wages being paid, the prices offered will be discounted accordingly.

Wage Determination No.: 2005-2017
States: Alaska, Areas: Alaska statewide

Munters' Labor Category	SCA Category	Occupation Code
Health and Safety Officer	Surveying Technician	99832
Restoration Technician	Service Order Dispatcher	01320
Operations Technician	Heavy Equip Machanic	23430
Project Auditor	General Clerk III	01113
Administrator	General Clerk II	01112
Skilled Laborer	Gen Maintenance Worker	23370
General Laborer	Laborer	23470

LABOR CATEGORY DESCRIPTIONS

Project Coordinator

Education/Experience: Requires High School Diploma plus four or more years of related work experience.

Responsibilities: Responsible for coordinating the efforts of the client and the workforce, establishing mobile headquarters during a natural or man-made disaster, procurement of contracts and subcontracts. In addition, the Project Coordinator will serve as a point of contact for all Project Managers and as assign project tasks. The Project Coordinator is responsible for the overall success of the project.

Project Superintendent:

Education/Experience: Requires High School Diploma plus three or more years of related work experience.

Responsibilities: operates as assistant project manager and shift coordinator. May have several Project Supervisors reporting with each having responsibility of crews of as many as ten.

Project Auditor

Education/Experience: Requires High School Diploma

Responsibilities: Responsible for managing the clerical support in the administrative functions. Each Project Auditor is assigned a group of projects and is responsible for ensuring invoices are completed and submitted on schedule. Ensures that all contractor pricing is within the parameters of the contract and that each item billed has supporting documentation. Responsible for resolving outstanding billing issues, coordinates all invoicing processes and assists with collection efforts.

Project Supervisor

Education/Experience: Requires High School Diploma plus two or more years of related work experience.

Responsibilities: A hands-on worker that reports directly to the Project Manager and is responsible for assigning specific tasks to a group of general laborers and ensuring those tasks are completed. Responsible for completing required paperwork at the job site.

Restoration Technician

Education/Experience: Requires High School Diploma plus three or more years of related work experience.

Responsibilities: A hands-on worker that reports directly to the Project Manager and is responsible for assigning specific tasks to a group of restoration workers and ensuring those tasks are completed. Has supervisory experience and a thorough understanding of proper restoration procedures. Responsible for completing required paperwork at the job site and is capable of moisture mapping.

Project Manager

Education/Experience: Requires High School Diploma plus three or more years of related work experience.

Responsibilities: Responsible for the daily operations of a specific project. Serves as the client contact and deals primarily with the logistics and performance factors of the project. All supervisors and subcontractors report directly to the Project Manager. Responsible for ensuring all daily paperwork is properly completed and submitted to the billing department.

Operations Technician

Education/Experience: Requires two years technical school and two years or more years of related work experience.

Responsibilities: A hands-on worker that reports directly to the Project Manager and is responsible for installing, repairing and operating equipment in support of the Moisture Control Service Quality System. Experienced at operating and servicing large equipment including desiccants, air conditioners and generators. Responsible for the delivery, set-up, tear-down and removal of all equipment.

Health and Safety Officer

Education/Experience: Requires High School Diploma plus three or more years of related work experience.

Responsibilities: Responsible for the inspection of job sites and reporting of working conditions, safety hazards, injuries, etc. Provides safety meetings for employees and related documentation.

Administrator

Education/Experience: Requires High School Diploma

Responsibilities: Assists with the responsibilities of gathering documentation, auditing invoices, and generating invoices. Responsible for the submittal of invoices and documentation to the client. Capable of typing proposals and contracts.

Skilled Labor

Education/Experience: Requires High School Diploma

Responsibilities: Responsible for the completion of specialized tasks as assigned by the Restoration Technician or Project Manager. The Skilled Labor classification is utilized for interior restoration and demolition.

General Labor

Education/Experience: Requires High School Diploma

Responsibilities: Responsible for the completion of simple daily tasks as assigned by the Restoration Technician or Project Manager to include outside debris removal and interior hygienic wipe-down and cleaning.

Mobilization (MO)

Project support to include supply and logistical support and procurement, delivery or coordination of transportation to any of the MCS job segments.

Consulting (CON) A team or an individual of MCS personnel engaged to provide independent technical knowledge for an array of needs. The list may include but is not limited to; technical specifications, file and pricing review of insurance losses, scope development and review and other similar tasks.

Document Restoration Labor Descriptions**Document Supervisor (SD)**

Senior MCS personnel assigned specifically to document recovery efforts, books, X-rays, or other similar media. The SD is expected to manage and set up both large and small projects in the field or at the document centers. The individual will over see all Document Specialists crews on job sites, drying projects, restorative projects, recovery projects, ensure job site safety and coordinate the shipping and receiving efforts. Depending on the scale of the project and SD may be the lead MCS staffer or report to a more senior MCS project manager.

Document Specialist (DS)-

MSC personnel who specialize in the restorative techniques associated with the recovery efforts of documents, X-rays, books and other similar media. A DS may work at one of our two Document Centers or may work in the field as necessary to support the recovery effort and direct handling and organization of materials. The DS reports to a Document Supervisor.

Document Laborer (DL)

The production labor force utilized for hands-on tasks associated with restoring documents, X-rays, books and other similar media. Tasks may include but are not limited to; packing, boxing, loading, unloading of documents or other media. In most cases the DL reports to a Document Specialist.
