Service Description

Intertek Testing Services has the ASHRAE 16 and ASHRAE 37 test facilities to perform First Article or Statement of Work testing on various types of Environmental Control Unit (ECU) equipment. Testing includes capacity, high temperature, low temperature, heating, air flow, noise, operational tests, reliability and safety. The test facilities can support the testing of ECU air conditioning equipment, packaged tent air conditioners, chillers, roof top air conditioners, combination ECU/Generator equipment, Fan Coils and refrigeration equipment.

Testing facilities for ECU type equipment are charged for by the hour, day (8-hour shift), week or month. As testing variables are specific to each customer and their needs, the exact number of hours for a singular task will be negotiated with the customer. Upon agreement, each testing task will state the amount of time and equivalent fee required for the set up, test chamber conditioning and test. A Statement of Work (SOW) is submitted describing the testing with the required set up and length of time for each test.

A typical performance test on an ECU may include Cooling Capacity, Heating Capacity, Air Flow, Noise and a Report. Each test sample will require time for the initial uncrating, inspection, nameplate data, facility set up, test room conditioning, testing, and reporting.

A typical SOW test plan may include the following tests for a 3 Ton ECU. (Approximate Shift times presented as examples only):

1. Cooling Capacity Test. This would include the initial uncrate, set up in facility, conditioning time and test time. (3 Shifts per sample.)
2. Air Flow Test. (¾ Shift per sample.)
3. Heating Capacity. (1 Shift per sample.)
IV. High Temperature Operation. (2 Shifts per sample.)
V. Inclined Operation. (2 Shifts per sample.)

26. Notification regarding registration in The System for Award Management:
   Intertek Testing Services NA, Inc. is registered in SAM.
Service Contract Act
The Service Contract Labor Standards (SCLS) is applicable to this contract and as it applies to the entire Multiple Award Schedule and all services provided. While no specific labor categories have been identified as being subject to SCLS due to exemptions for professional employees (FAR 22.1101, 22.1102 and 29CRF 5413.300), this contract still maintains the provisions and protections for SCLS eligible labor categories. If and/or when the Contractor adds SCLS labor categories / employees to the contract through the modification process, the Contractor must inform the Contracting Officer and establish a SCLS matrix identifying the GSA labor category titles, the occupational code, SCLS labor category titles and applicable wage determination (WD) number. Failure to do so may result in cancellation of the contract.
